SPORT NEWS

INTERMEDIATE HOCKEY

An intermediate hockey league has been formed comprising the towns of Bruce, Holden, Ryley and Tofield. At a meeting in Holden the schedule and rules were drawn up. The rules in part are:—

1. Players names to be in president's hands and passed by directors, seven days before playing, majority to rule.

2. All players not registered in present act must be passed by board and play four league games to be eligible to play in finals.

3. Each team to pay membership fee of $1.00 and more if needed.

4. All games scheduled for 8:30 p.m., unless otherwise arranged.

5. One referee for each game agreed upon by each team.

6. Second and third team play sudden death game, to decide right to play leader game to be played on second team's ice.

7. Final play-off to be best two out of three, first game on leaders ice.

8. In case of any tie a sudden death game be played to break the tie, place of playing to be agreed upon by both teams.

9. Each team to send in line-ups, with scores and assists, to secretary, after every game.

The Board of Directors of the league is as follows:—

Bruce—L. C. Hergott, president; L. Stambaugh.

Tofield—O. P. Thomas, vice-president; J. A. L. Smith.

Holden— F. Skakum, secretary; S. Black.

Ryley—J. Hulbert. L. H. Helley.

INTERMEDIATE LEAGUE SCHEDULE

Dec. 10—Tofield v.s. Ryley.
Dec. 12—Holden v.s. Bruce.
Dec. 14—Bruce v.s. Tofield.
Dec. 15—Ryley v.s. Holden.
Dec. 17—Holden v.s. Ryley.
Dec. 19—Ryley v.s. Tofield.
Dec. 20—Bruce v.s. Holden.
Dec. 22—Tofield v.s. Bruce.
Dec. 29—Ryley v.s. Bruce.
Dec. 29—Holden v.s. Tofield.
Jan. 1—Tofield v.s.Holden.
Jan. 4—Bruce v.s. Ryley.
Jan. 7—Holden v.s. Bruce.
Jan. 7—Ryley v.s. Tofield.
Jan. 10—Tofield v.s. Holden.
Jan. 11—Bruce v.s. Ryley.
Jan. 14—Ryley v.s. Bruce.
Jan. 15—Holden v.s. Tofield.
Jan. 15—Bruce v.s. Holden.
Jan. 18—Tofield v.s. Ryley.
Jan. 21—Bruce v.s. Tofield.
Jan. 21—Ryley v.s. Holden.
Jan. 24—Holden v.s. Ryley.
Jan. 25—Tofield v.s. Bruce.

Cut this out for future reference.

TOFIELD DEFEATS HOLDEN

Last Saturday the Tofield Intermediates journeyed to Holden to play their first league game against the Holden team. The teams were evenly matched and Tofield had to work hard to win by the score of 2—1. Tofield finally opened the scoring after about twelve minutes play. McCauley drove a fast one past Moore in the Holden goal on a perfect pass from McLaughlin. C. Foran evened it up for Holden on a pass from Thompson in the second period. The two teams fought hard to break the tie but the goalies put up a good game, both making several stops on plays which looked like sure scores. With only two minutes left to play Burnett put Tofield in the lead on a solo try.

The play was much slower than it otherwise would have been on account of the snow which fell throughout the game. The second and third periods had to be played with only a stop for changing ends. The game was also marred by a large number of penalties, both teams one time playing two men short.

Line-ups: Holden: Moore, Black, T. Foran, Skakum, J. Foran, Doris, A. Logan, C. Foran, B. Thompson, S. Edworthy.

Tofield: Dodds, Allan, Dunn, Pincott, Smith, Whyte, Burnett, Bowick, Taylor, Lee, McCauley, McLaughlin.

Referee: Menielly of Holden.

TOFIELD INTERMEDIATES WIN FOUR STRAIGHT

On New Year's Day Tofield won their fourth league game by defeating Holden 6—2. It was a fast game with the forwards of both sides back-checking hard. Tofield opened the scoring in the first period and a few minutes later Holden tied. Holden then scored another, the period ending 2—1 in their favour. Tofield began to put on pressure in the second period, which resulted in Tofield tying the score. In the last period Tofield made sure of the game by scoring three times. McCauley scored three of Tofield's goals, Burnett one, and McLaughlin one. Holden received all the penalties of the game, a total of twelve minutes.

Tofield now leads the league with a total of eight points. Bill McCauley is the leagues high scorer with a total of seven points.

Line-ups, Tofield—Dodds, Allen, Dunn, Pincott, Smith, Burnett, McCauley, McLaughlin, Lee, Bowick, Taylor, Beirnes, Whyte, Letourneau, G. Smith, Swinton.

Holden—Moore, Black, T. Foran, Skakum, J. Foran, Doris, Logan, Thompson, S. Edworthy, C. Foran, Centes.

Referee—R. Whyte.

HOLDEN DEFEATS TOFIELD 5—3

(Holden Herald)

Holden broke its bad luck streak on Wednesday night, Dec. 26th and trimmed Tofield for the third time this season, by a score of 5—3, on the local ice.

The small crowd which defied the weather to see the game got more than their share of excitement. The home team started strong and before the visitors realized just what had happened they were on the small end of a 4—0 count. They came back strongly however and in a great offensive drive brought the score up to 4—3. It looked as though things were going to be tied up but a clever play by Bob Maguire and A. Black notched another counter for Holden and the local boys were able to successfully stave off Tofield's last minute attack. It was a fast clean game and Holden deserved their win.

Those scoring for Holden were: Hopkins to Stewart, Maguire, Minisly, Black to Hurum, Maguire to Black.

For Toleld: N. Glover, L. Glover to Craig, Worton to Craig.

TOFIELD 5—VIKING 4

On Friday, December 21st, Tofield registered their second straight win over the Viking well drilled smart hockey squad. The game was fast and clean and the teams were well matched as the score of 5—4 would indicate.

IRMA 5—TOFIELD 1

In bitterly cold weather, the Tofield team carrying but seven players journeyed to Irma and met defeat to the tune of 5—1. Tofield held their own until the last period when the extreme cold and lack of subs told, and Irma forged ahead.

LADIES WEEK

We received a very kind invitation to attend some of the Ladies curling games and of course we hied ourselves over to the Ice Palace. The first thing that struck our eye was the wonderful ensembles worn by the ladies this season. It would be worth your while to get an eyeful of this "boys." And then we noticed that they use the same system as the men in collecting rinks. Loaded up. It also takes a lot of conversation to curl the required 10 end game. Their favorite cry is sweepisweep! and how they dust em. Here's a few kicks that does no harm "Does'nt your wife miss you when you stay out curling till two in the morning? Ans. Occasionally but usually her aim is perfect. We also found out that when a married woman curler loses her temper her husband usually finds it. And listen boys, here's one I overheard during a game at one lady curler to another—I could give you a few wrinkles' my dear, and back snapped the reply, I know you could darling, and not miss them either. The ladies also use tassels on the rocks, but being a little backward we did not find out the object for this but we did find that a Scottish accent is an end or more advantage in a game. The red coats were hitting on all six.

I know a certain columist,
Who has an awful fault,
His name of course is A. B. C.
And no matter what he has to say,
You need a grain of salt.

FLASH

Curler beats his wife all the way from the rink—by five minutes.

If you like this we have a few more good ones.

Oh give me the grace to curl the game,
In a manner that always fair,
In a manly way thats far from blame,
And is ever upon the square.
And when your last hard battle is fought,
And the game is fairly won,
Let me go to sleep with the restful thought,
Of a game that's been well run.

Lloyd and Bill chose up sides and this is how they picked them.

"Lloyd's Side	"Bill's Side"
Calvert	Mack
Smith	Chapman
Swift	Hammond
Jobb	Dr. Law
Beirnes	Hugh Law

It seems to me that all the law is on one side. But somebody is going to pay for oysters and personally some of our side never did like oysters.

Never take your trouble home from the rink. Mine's usually there waiting for me.

A lot of our curlers knock em about —others just knock.

Oh, Doc Law thinks he can curl,
And play the runners too,
But when he plays that Calvert rink
He'll miss his oyster stew.

LOCAL NEWS

The Holy Trinity W. A. annual meeting is to be held in the church on January 9.

Mr. and Mrs. O'Brien of Ryley, Mr. and Mrs. J. Aitken, Mr. and Mrs. C. Lee, Miss McAdam and Mr. H. McCay of Edmonton were visitors at the John Lee home for the holidays.

Mrs. Moon, Kathrine, Alice and Jim of Edmonton spent the holidays here.

Mr. and Mrs. G. Jobb of Daysland, Mr. and Mrs. McCulla of Neilburg Sask., and Miss Audrey Jobb of Provost spent Christmas at the Jobb home.

Mrs. Ellis, Jean and Raymond spent Christmas at the Malcolm home.

Mr. Dan Purcell spent Christmas at his home in Calgary.

Mr. and Mrs. E. Wuetherick spent Christmas visiting relatives in Chipman.

Mr. Bill Robinson of Bank of Montreal staff here spent the holidays at his home in Camrose.

Miss Margaret McCauley who is training in Lamont spent Christmas day with her parents here.

Miss Helen McCauley who is teaching at Bruce spent the holidays here.

Mr. and Mrs. W. McIntyre spent Christmas at Raven.

Miss Margaret Allan of Westlock, Miss E. Allan of Barrhead and Mr. and Mrs. Provost of Edmonton spent the holidays at the Allan home.

Mrs. Edith Thompson and children of Donalda is visiting relatives in Tofield.

Mr. and Mrs. Wuetherick spent New Years day in St. Paul.

Mrs. Brace and Jim spent a few days in the city last week.

Mr. and Mrs. H. Kendall and Mrs. Hay and family spent Christmas with Mr and Mrs. Albert Kendall of Edmonton.

Miss Charlotte Forster spent the holidays at her home in Calgary.

Miss Ruth Wingrove spent Christmas with relatives in Edmonton.

Miss Jean Hall spent the holidays visiting Mr. and Mrs. Wilmore of Edson.

Mr. and Mrs. D. K. Ball and family of Edmonton visited Mr. and Mrs. Geoglein for a few days.

Miss Anne Lindsay spent the Christmas holidays at her home in Innisfree.

Mr. and Mrs. Bill Swift of Athabaska spent Christmas at the Swift home here.

Mr. and Mrs. Swick have moved to Innisfail.

Mr. and Mrs. W. J. Richards of Edmonton and Mrs. A. A. Beatty and son Grant of Lloydminister spent the holidays at the Cup Lee home.

Miss M. Neuth of Edmonton is visiting Mrs. Coutts for a few days.

Miss Florence Kendall of Leduc spent New Years at her parents home here.

Mrs. H. Law spent Christmas visiting her son in North Battleford.

Miss Stuart spent Christmas at her home in Edmonton.

Mr. and Mrs. Geo. Edwards on behalf of Dennis, who is slowly recovering from illness wishes to thank the many freinds who brightened Dennis' Christmas by sending him presents.

Through this medium I would like to sincerely thank all those who so kindly remembered the Snell family at Christmas. Mrs. Snell.

Mr. and Mrs. J. O. Letourneau and D'Arcy spent Christmas visiting relatives at Calgary.

Harold Schultz and Joe Kallal who are attending the agricultural college in Vermillion were home for the holidays.

Mr. and Mrs. Roner and Brice spent Christmas in Stettler. Mr. and Mrs. Roner sr. of Viking spent a few days visiting their son here this week.

Max Rogers and Harland Thompson who are attending the University of Alberta spent the holidays visiting their parents here.

Mr. and Mrs. Abbott spent Christmas visiting their daughter and son-in-law, Mr. and Mrs. Brady of Edberg.

Mr. and Mrs. Bill Chapman spent New Years day in the city.

Glenn Wood and Murray McHeffey who have been hunting near Edson were home for Christmas.

Will the correspondent of the Social Hour Club kindly repeat her communication which was inadvertently mislaid in the Mercury office.

Neil Ross jr. and Pete Kerr of Jasper spent a day in town last week.

Miss Annie Swift spent a few days in the city visiting friends and relatives last week.

PRESENTATION TO MRS. BAYNES

The O. E. S. Chapter gave Mrs. Baynes a surprise party on Saturday Dec. 29. As Mrs. Baynes is leaving to make her home in the city the members met to tender her a farewell. The evening was spent in bridge, honors going to Mrs. Mc- McLaughlin and Mrs. John Lee. A delicious lunch was served and Mrs. Abbott W. M. presented Mrs. Baynes with a token of remembrance from her chapter. Mrs. Baynes responded in a few well chosen words. All joined hands and sang "Auld Lang Syne" and the members gave Mrs. Baynes three rousing cheers. Every one voted a grand evening.

On the same evening at the home of A. R. Clutterham, Mr. Baynes was entertained by an number of his friends. Mayor Brace made a presentation on behalf of the "boys" to Mr. Baynes to which he responded very suitably.

CORPORAL BAYNES TRANSFERRED TO EDMONTON

Corporal Baynes of the R. C. M. P. who has been in charge of the Tofield detachment for the past three years has been transferred to Edmonton, where he will be connected with the office staff of the force. His departure from Tofield will be regretted by his many friends here as he has proved himself to be an ideal guardian of the law. Pleasant yet thoroughly efficient, he has performed his duties with wisdom and tact so as to merit those with whom he came in contact, the respect and admiration of all.

Mr. and Mrs. Baynes and family wil leave on Friday and the best wishes of the people of this district for their welfare accompany them.

MRS. T. L. MUNRO PASSES TO HER REWARD

The death occured at the family home east of Tofield on Saturday, Dec. 22 of Mrs. T. L. Munro wife of Mr. J. Munro, at the age of 51 years. Mrs. Munro had been in indifferent health for some time but the end came very suddenly, following a severe stroke.

Mrs. Munro was born at Seattle, Washington and came to Strathcona when but nine years of age. A short time later she came to the Tofield district where she has resided since. When 18 years of age she was united in wedlock to Mr. H. Neale and after the death of Mr. Neale was again married to Mr. J. Munro who sur-

addresses will be given by
MR. HAROLD GREER, Mayor of Beverly, and Miss Crang, of Edmonton
VOCAL and INSTRUMENTAL MUSIC
A cordial invitation is given to all to attend. Young people specially invited.

Motor Vehicle Licenses

Announcing reduction in fees effective January 1, 1935. Reduced fees for lower priced passenger cars will be charged as follows:

Not exceeding 100 inch Wheelbase	$10.00
Exceeding 100 inch up to 105 inch Wheelbase	$12.50
Exceeding 105 inch up to 110 Wheelbase	$15.00
Exceeding 110 inch up to 115 inch Wheelbase	$20.00

The fee on all cars exceeding 115 inch Wheelbase will be the same as in former years.

A reduction of $1.00 will also be made in the fees for models made eight years previous to January 1 of the current license year, on those cars with Wheelbase of 120 inches or less.

All Fees Due and Payable January 1, 1935

THOSE OPERATING CARS AFTER JANUARY 15, 1935 WITHOUT LICENSES WILL BE LIABLE FOR PROSECUTION

GOVERNMENT OF ALBERTA

HON. R. G. REID, Provincial Secretary
E. TROWBRIDGE, Deputy Prov. Secretary

Alberta Savings Certificates

New Interest Rate on Certificates

Issued After Jan. 1, 1935

3% per annum will be paid on certificates redeemable on demand.

3½% per annum will be paid on certificates redeemable in one year.

4½% per annum will be paid able in two and three on certificates redeem- years.

These certificates constitute a direct charge upon all the resources of Alberta and afford a safe and convenient depository for savings at attractive interest rates.

Alberta Government Savings Branch
TREASURY DEPARTMENT, EDMONTON
HON. J. R. LOVE, Provincial Treasurer

New Body Lines and More Room in 1935 Ford V-8

THE largest and roomiest cars Ford has ever built, with new body lines of advanced streamline design, are illustrated above in this Ford V-8 de luxe Tudor sedan for 1935. Sedans seat six passengers in comfort. Luxurious appointments are new. The eleven body types are all finished in new baked enamel which is said to need only washing to restore its high lustre. Cars are approximately eight inches longer from bumper to bumper and seats are wider. Chassis improvements, including moving the engine forward more than eight inches and new spring suspension, add to riding comfort, especially of rear seat passengers. Directed flow crankcase ventilation is an improvement of the 90 horsepower V-8 engine.

A SWAPPING GAME

MONEY, OR NO MONEY, WE STILL DO BUSINESS. QUITE A NUMBER OF MERCURY SUBSCRIBERS HAVE TRADED IN A VARIETY OF PRODUCTS, PAYING UP THEIR ARREARS AND CURRENT SUBSCRIPTION. AT DIFFERENT TIMES WE HAVE TAKEN SUCH A VARIETY OF ARTICLES AS EGGS, BUTTER, LARD, CHICKENS, TURKEYS, PORK, LAMB, BEEF, HAY, GREENFEED—IN FACT ANYTHING WE CAN USE

WE DO NOT STRIKE A HARD BARGAIN EITHER, WE KNOW WELL ENOUGH, EVEN WITH THE SLIGHT IMPROVEMENT IN ECONOMIC CONDITIONS, THE AVERAGE PERSON IS NOT "FLUSH" AND WITHIN REASON WE LET THE CUSTOMER MAKE HIS OR HER OWN DEAL.

WE PREFER MONEY OF COURSE—BUT IF IT IS MORE CONVENIENT TO YOU TO SWAP—YOU WILL FIND US QUITE WILLING TO MAKE A DEAL.

HEALTH
by
A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

HEALTH

You are beginning a new year and you have likely thought out your plans for the coming year. Did you consider your health in making these plans? Did you stop to think that sickness would upset things, and that your health must be good to carry out your plans?

We pride ourselves on our intelligence, and yet when we realize that well over one-third of all the deaths which occur in Canada could be postponed, we may well wonder if we are not rather a stupid lot in matters of health.

You are a lucky person in many ways. You are living at a time when so much more is known about disease that we no longer have to sit down and accept disease as inevitable. No indeed; we can do a great deal to prevent the occurrence of disease and to raise the standard of personal health.

It is rather a terrible thought that so many die prematurely through their own ignorance or carelessness. Are you one of those who, through your own fault, will not enjoy the years of health which would be yours were you to make the necessary effort?

A great deal can be done for you, but no one can give you health because health depends upon your own habits of living more than anything else. You must eat the right kinds of food; no one can do this for you. You must sleep enough to get the rest your body needs. King or peasant, rich man or poor man, must live a healthy life if health is to be enjoyed.

Now, if your health is worth looking after—and who will doubt that it is—then it seems more than reasonable to give some attention to it. Does it not seem a better idea to secure the advice of your family doctor on how to keep well rather than to wait until you are ill to ask his aid.

The periodic health examination offers you a practical means for keeping fit. At regular periods, go to your family doctor and have him examine you. He will find, first of all if the various parts of your body are working properly, and if they are not he will prescribe whatever treatment is required to set matters right. Is this not a better plan than waiting for the condition to become so marked as to become apparent to you? Your doctor will consider your habits of living, and will guide you in any changes which may be necessary. You will enjoy more years of health if you make use of the periodic health examination.

AN OUTSPOKEN CHAMBER OF COMMERCE PRESIDENT

An extraordinary document has emanated from the Edmonton Chamber of Commerce. This is the report of Mr. R. V. MacCosham, retiring president. Afeature of this report is that it refers to Canadian agriculture and its problems in a candid and sincere manner.

Mr. MacCosham mentions Resolution No. 10, passed at the annual convention of the Canadian Chamber of Commerce, held last September in Winnipeg, an extract from which is as follows:—

"This convention believes that the agricultural industry of Canada being the foundation of its prosperity, every effort should be made to increase the rewards of agriculture to a basis that will at least equal the rewards of other industries, and that by so doing it will increase the prosperity of all. It recognizes the disabilities under which the primary producer is working during this period, and believes that those in control of public policy and of finance should give every consideration to alleviation of its position and increasing its prosperity."

Now listen to Mr. MacCosham's comment on this resolution:

"Agricultural Canada is languishing. How can it be otherwise when we consider the other great combination of entrenched trade industrialists protected by impregnable tariffs. Is it any wonder that we in the West are in a welter of hopelessness as to the future in a world gone mad with economic nationalism? Western Canada sells its agricultural products at world prices while Eastern Canada sells its manufactured goods at twenty-five to fifty per cent over world prices. As between the two, stagnation and life abide side by side."

The retiring president then goes on to cite incidents of discriminatory tariff enactments. He mentions a selling in the Dominion at $903 and the same make in United States at $560. The Canadian price is 61¼ per cent over the world price. With the price of wheat in Canada at around 70c and in the United States at 90c it takes 1290 bushels Canadian wheat to pay for the car at the Canadian factory whereas American farmers can get a similar car at the U. S. factory for 622 bushels.

Mr. MacCosham very aptly suggests that while Resolution No. 10 recognizes the disabilities under which agriculture is suffering and the extent to which the prosperity of the country as a whole is dependent on the prosperity of agriculture, it suggests no line of action designed to bring about amelioration of those disabilities or promotion of the so-desirable agricultural prosperity. If that resolution, epochal in its possibilities, is to amount to anything more than a friendly gesture, some means must be found to implement it, he says.

Internal business as between two interests should be more or less on a equality of dollar values, Mr. MacCosham suggests. In December, 1933 price-levels as between the two were as follows:— Farm products 53.3, manufactured goods 71.9—a difference of 35 per cent. A balance of trade internally on such a basis will never bring prosperity to agriculture. Therefore the nation cannot advance as a whole. Place agriculture on an equality of operation and the result would be the immediate expansion of internal business and a similar reviving of exports. Agriculture would live again and the artificial and ill-advised expedients of the ameliorations now existent would disappear. National budgets would balance giving a more even distribution of equity to all parts of Canada.

EPIC OF THE CANNED TOMATO

The change in public opinion with regard to fashions in food is well exemplified by the tomato. Not so many years ago the tomato was an object of suspicion to-day canned tomatoes and tomato products constitute the largest of Canada's cannery packs. Indeed, the story of the canned tomato is one of the epics of Canadian trade. Ten years ago it was one of the least important of the food commodities sent abroad by Canada. By 1927 the export of Canadian canned tomatoes rose to what is now considered a mere 300,000 pounds. In 1934 nearly 10,000,000 pounds were exported to 31 different countries, 16 of which are British. The British Isles alone took 9,000,000 pounds. Ontario, Quebec and British Columbia are the provinces in which the commercial production of tomatoes for canning purposes and fresh sale is of greatest importance. The total acreage is approximately 20,000 acres. A dependable cannery demand, even though this demand varies, is also of importance to those growers producing for the fresh vegetable market. The grower therefore, as pointed out in the Agriculture Situation bulletin, issued early this year, is vitally interested in both the domestic and export demand for canned tomatoes and tomato products.

THE FEED SITUATION—

THE SEVERE drought last year in some of the States of the Union has created a demand for fodder in western Canada. In August of last year, the Dominion government, anticipating this demand passed an order in council prohibiting the export of fodder except under license. From that time on there has been a steady development towards the end that drought stricken farmers could procure fodder and Western Canadian farmers realize in dollars on the fodder which in the case of straw would be eventually burned. While no doubt there will be some private exporting of fodder, the chief interest centres in the purchases of the Federal Relief Administration of the United States. This organization was formed to assist drought stricken farmers of the United States and is purchasing feed for cattle and horses being kept by the farmers under the direction of the administration. The administration allows the sum of three dollars per month per head for cattle and four dollars per month for horses and with these figures as a foundation, fodder must be purchased in Canada accordingly. The freight being a major item, effort was made as early as August last year to have the freight rates reduced, and until they were reduced, the whole business, with the exception of points near the American boundary, was at a standstill. The Canadian railways have now, to assist in the movement of fodder, reduced freight rates, and to further assist Alberta shippers, Coutts has been made a port of entry. But even with these concessions, the price allowed for fodder is cut so fine that only a few farmers are very much interested.

This paper's interest centres in the Tofield district, where undoubtedly there is both wheat and oat straw that could be exported. There is more wheat straw than oat straw, but we have heard it stated that last years wheat straw was above the average in fodder value.

Mr. Malcolm MacGregor of Brandon, Man., is the sole purchasing agent in Western Canada for the American Federal Relief Administration and when Mr. MacGregor's advertisement calling for fodder first appeared the Tofield District Board of Trade communicated with Mr. MacGregor with the object in view of assisting in the movement of surplus fodder from this district. Since that time it has been announced that the Edmonton Hay and Grain Co. are buying in the Edmonton district for Mr. MacGregor and have already made many contracts with farmers, one at least being in the Tofield district. The Board of Trade has a listing of about a dozen farmers with surplus fodder, but no doubt there are many more who are awaiting developments.

The whole question centres on the price paid. There is considerable labor connected with baling, hauling and loading fodder and when this is taken care of only a nominal sum is left for the straw. The price of $3.25 per ton for wheat straw loaded in cars is cut so fine that while farmers living quite close to a loading point might get by those living at a distance from a loading point would not be so fortunate.

The labor element is worthy of consideration of course. If the straw is baled, hauled and loaded, in the aggregate a considerable sum of money will find its way into the district, as payment for the labor involved.

From the point of view of the farmer who has straw but no facilities to bale it, it would appear the best plan would be to have the Federal Relief Administration take care of the baling, hauling and loading, the farmer receiving a price per ton for the straw as it is baled in the field or loaded in cars. To those with facilities for baling and desiring to go to work, the situation is different. If they have the straw, baling equipment and labor, they will get all there is in it, which may or may not be satisfactory depending upon the way they look at it.

In many ways it is to be regretted that final arrangements re rates and shipping could not have been brought about sooner. One would think the fodder should be in the States right now. While there is no fortelling what in the way of weather January and February will bring, we know a splendid spell of weather was enjoyed throughout November and December, the kind of weather that made outside work relatively easy.

PROPAGATION OF PEACE—

IF ETERNAL vigilance is the price of liberty, might it not be said with equal truth to be the price of peace? What, after all, is liberty but the right to live in peace? Thus it would seem that an abomination of the menace of war is a safeguard to peace.

The people of the world must come to recognize war not as a sort of predestined fate, but as a thoroughly outdated nuisance on a par with plagues of disease which intelligence has conquered. Militarism is a hoary old form of ineffective black magic, for the preservation of world peace, which deserves as much condemnation as the black arts of war. The spirit which promises peace is a spirit of justice for all peoples.—Buffalo Courier-Express.

A YEAR OF PROGRESS

By S. J. Hungerford,
President, Canadian National Rlys.

Montreal, Dec. 29——The improvement in the earnings of the Canadian National Railways which commenced in the latter part of 1933, continued throughout 1934, with the result that the gross revenues of the C. N. R. all-inclusive system for this year will be approximately $10,000,000 greater than in 1933. It is particularily significant that there was a substantial increase in the movement of manufactured products and merchandise, demonstrating increased business activity. The improvement in the automobile, lumber and newsprint industries is also indicated by increased movement of these products. The grain movement during the year was slightly less than in 1933.

The benifit of operating economies made during the depression is evidenced by the fact that the increased traffic has been handled in such a manner that the net operating revenue of the System will be approximately $4,500,000 more has been expended on maintaining the property and equipment. This result demonstrates in a very real manner the ability of the System to take full advantage of increasing revenues from traffic.

The figures for 1934 and 1933 are as follows:—

These results have been obtained by a strict adherence to the budgetary control of expenses. I wish to express my appreciation of the loyal co-operation of officers and employees, which has rendered such a gratifying performance possible.

One effect of the improvement in traffic has been that approximately 5,000 employees returned to full or part-time work for the National railways in 1934. The increased payroll distribution during the year was approximately $4,000,000.

Some indication of the improvement in the operating efficiency of the System may beobtained from a comparison of the results for 1934 with those of 1931. With a gross revenue in 1934, which was $35,000,000 les in 1931, the net operating revenue improved more than $11,000,000 over 1931.

Following upon negotiations between the Canadian Railways and the various groups of organized labour agreement was reached whereby the generally existing deduction from the standard rate basis of 15 per cent will become 12 per cent on January 1, 1935, and 10 per cent on May 1, 1935 this in recognition of the improvement which has taken place in railway earnings during 1934 and the prospect of increasing earnings in 1935. Other employees will also receive the benifit of this adjustment, except that it does not apply to supervisory officers and others whose salaries are $2,700 per year or more.

During the year a revised plan was designed and approved by the Board of Trustees, to be made effective January 1, 1935. The new plan authorizes a minimum basic or subsistence pension of $300 per year and the payment of supplemental annuities derived from equal contributions by the employee and the Company. The transition from the present pension plan will be carried out in such a manner that the pension equity, under the present rules, of employees in the service at the end of 1934 will not be disturbed. The revised plan will not effect the pensions now being paid. A reduction in the cost to the Company of future pensions will result from operation of the new plan.

Co-operative activities with the Canadian Pacific Railway continued during the year, the principal accomplishment being the extension of the passenger train pool to include all passenger train services between Montreal and Quebec, Montreal and Toronto, and Ottawa and Toronto. Further extensions of the pool have been under study during the year, and it is anticipated that additional economies in passenger train services will be obtained.

Other co-operative measures involving the abandonment of parallel and functionally duplicate lines, joint operation of terminals and many other phases of railway operations have been under study by Joint Committees of technical officers of both companies and considerable progress has been made towards putting into effect a number of projects which will result in economies to the mutual advantage of both companies. The results so far obtained through co-operation, therefore, are not by any means represented by the savings already made.

The railways continue to suffer from highway competition, and the Company has during the year continued its study of different methods of meeting competitive forms of transport. In the highway trucking field the railway is at present carrying on three different types of operation in an endeavour to determine which method is best suited to the railway's interest. In all three experiments charges for the collection and delivery of the freight are included in the tariff. So far each of the experiments being conducted to regain highway truck traffic has succeeded in some degree, and the experiments will be continued until the most satisfactory solution of the problem is found.

In the passenger field the excursion rates offered during the year have been very pleasing in their result in adding to the rilway passenger traffic.

Capital expenditures during the year were kept to a minimum, consisting only of those absolutely essential for the safety of operation.

The betterment in operating results in 1934 will mean that for the third successive year the new money requirements of the System will be reduced. We hope that continuing improvement in railway earnings is a definite indication that we may look forward to a gradual but sustained return to better times, in which the country as a whole, and therefore the railways, will benefit substantially.

SUMMER CRUISES TO NORWAY SCHEDULED FOR NEXT SUMMER

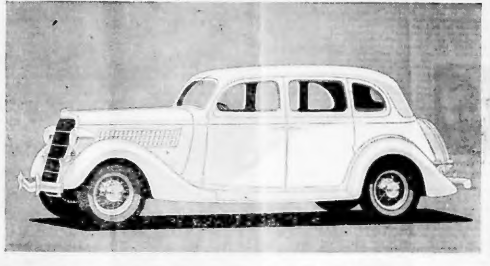
Montreal, Que., December 31—Two summer cruises for next year arranged to take vacationists into the most attractive areas of Scandinavian and Baltic scenery, are announced by the Norwegian American Line, for which the Canadian National Steamships are General Passenger Agents for Eastern Canada.

The SS. Stavangerjord will leave Oslo, Norway, July 19 on a pleasure cruise of 16 days duration, during which stops of liberal time allowance will be made at the various ports and scenic centres fringing the whole Norwegian coast line to the northern tip at North Cape. From there the cruise will continue northwards to Spitzbergen and as far as the pack ice in the Polar region.

A total of 26 calls are made during this round trip cruise, in which 4,000 miles are covered midst the finest scenery and places of human interest to be found in Northern Europe. On this tour there will be stops lasting up to 20 hours for the benefit of passengers, return to Islo being made on August 5. Sheltered from the Atlantic by a chain of islands which extend in an almost unbroken line along the coast of Norway to the North Cape, the cruise affords a smooth water sail all the way.

The steamers Stavangerfjord and Bergensfjord occupy a period of but seven and one half days from New York to Norway.

FORD V·8 FOR 1935



A New Ford V·8 That Brings New Beauty, New Safety, and a New Kind of Riding Comfort Within Reach of Millions of People

The New Ford V-8 for 1935 is the biggest and roomiest Ford car ever built. It is a strikingly handsome car, with modern lines and new, luxurious appointments.

But most important of all it is especially designed to give you smooth, easy riding over all kinds of roads—"a front-seat ride for back-seat riders."

This ease of riding is achieved by the use of three basic principles never before combined in a low-price car.

1. Correct distribution of car weight by moving engine and body forward eight and a half inches.

2. New location of seats by which the rear seat is moved forward, toward the centre of the car away from the rear axle and away from the bumps.

3. New spring suspension which permits the use of longer, more flexible springs and increases the springbase to 123 inches.

The result is Centre-Poise—which not only gives you a new riding comfort but adds to the stability of the car and its ease of handling. You can take curves from seven to eight miles faster with perfect safety.

There are many new features in the Ford V-8 for 1935 which make the car still easier to drive. New brakes give more power for stopping quickly with far less foot pressure on the pedal. A new type of easy-pressure clutch employs centrifugal force to increase efficiency at higher speeds. New steering mechanism makes the car still easier to handle.

The New Ford V-8 for 1935 retains the V-8 engine which has demonstrated its dependability and economy in the service of over a million owners. There are refinements, but no change in basic design. You buy premium performance when you buy this Ford V-8—full 90 horsepower and 85 miles an hour.

We invite you to see this New Ford V-8 at the showrooms of Ford dealers. You will want to ride in it—to drive it yourself. You will find it a new experience in motoring.

Ford V·8 Prices Are Low

11 BODY TYPES—Coupe (5 windows), $645; Tudor Sedan, $665; Fordor Sedan, $750. DE LUXE—Roadster (with rumble seat), $715; Coupe (3 windows), $720; Phaeton, $725; Tudor Sedan, $730; Cabriolet (with rumble seat), $815; Fordor Sedan, $810. TOURING SEDANS, with built-in trunk—Tudor Touring Sedan, $780; Fordor Touring Sedan, $830.

(F. O. B. East Windsor, Ontario. Bumpers, spare tire and taxes extra. Small down payment. Convenient terms.)

BE SURE TO SEE THE NEW FORD V-8 1½-TON AND 2-TON HEAVY-DUTY TRUCKS . . . AND THE NEW COMMERCIAL CARS

MRS. T. L. MUNRO PASSES TO HER REWARD

(Continued from front page)

vives her. As a Tofield old-timer Mrs. Munro was very well known and universally respected throughout the district. Of a cheerful disposition she made friends wherever she went.

She leaves to mourn her loss, her husband and nine children, Mrs. T. E. Seale, Mrs. A. E. Calvert, Mrs. Stan Yakabuski, all of Tofield; Mrs. Edith Thompson, Donalda; Jessie, Archie and Kenneth at home; Mr. R. Seale and Mr. Fred Munro of Vancouver. Also four sisters, Mrs. C. M. McKeown, Calgary; Mrs. D. Munro, Merrit, B.C.; Mrs. R. C. Haselhurst, Mamerecte Lake, B. C.; Mrs. J. Appleby, Tofield.

The funeral was held on Christmas day, service being held at the United Church, Tofield, Rev. D. K. Allan officiating. Favorite hymns were sung, "What a Friend We Have In Jesus" and "Jesus Lover of My Soul." Rev. Allan delivered a suitable address after which interment was made in the Tofield cemetery.

The pall bearers were: Jim Francis; Geo. Cookson; Jack Cookson; Johnston Ferguson; Lloyd Wood, R. C. Phillips.

Floral offerings were received from; The Family, Edith and Ralph, Fred, Mr. and Mrs. D. Munro, Mr. and Mrs. R. Haselhurst, Mr. and Mrs. J. Appleby, Mr. and Mrs. C. N. McKeown, Mr. and Mrs. Coatta, Leslie Glover, Muriel and Mrs. Malcolm, Mr. and Mrs. Geo. McLaughlin, Loret and Hilda, Mr. and Mrs. R. C. Phillips, Mr. and Mrs. W. A. Mitchell, Jason and Mrs. Henderson, Mr. and Mrs. Chas. Ingram, Alfred Schultz and family, U.F.W.A., Willie and Mildred, Mr. and Mrs. A. N. Booth, Lakeshore Ladies' Aid, Mr. and Mrs. J. W. Cookson, Mrs. Myrtle Seale, Mrs. Bethel and family, United Church Ladies' Aid, Arthur Francis, Mrs. J. Hansen, Mrs. J. Yakibuski, Jim Francis and family, Mrs. W. Kallal.

Geo. McLaughlin, funeral director.

LINDBROOK

* * *

A Bright, Happy and Prosperous New Year to all from all at Lindbrook.

The Xmas season passed very well here despite the 38 degree below zero weather. Most people heard the Empire Broadcast and were much interested in the news from other lands. Santa Claus remembered that there are kiddies in Lindbrook too.

Mr. and Mrs. W. Ashwright and Mr J. Whittle of Wainwright spent Xmas with their relatives Mr. and Mrs. Bracegirdle of Lindbrook.

Several parties visited the city for the New Year celebrations, and some went to the dance at Ryley on New Year's Eve.

The children's Xmas tree and concert at the school here was held on Friday evening Dec. 21, at 8 p.m. It was quite a large program, there being about 40 numbers, far too many to describe at length. The little sketches were well acted and drew much applause as did the individual dances. The whole programme deserves praise and much credit must be given to Mr. McCleay and his pupils for the show they put on. After the concert Santa Claus (Mr. J. Bracegirdle) did his usual bestowing of presents to the excited youngsters, every child getting something in addition to the usual bags of good cheer that kids like. Then a lunch was served and afterwards the children departed with their elders to rest up for the next spasm which will be at their homes on Dec. 25. One youngster avers that he has seen Santa's tracks on the snow leading to his home.

It seems as if Lindbrook is becoming or has become the "last great West," to judge from the influx of settlers this last year. Last week Mr. and Mrs. Gould and family moved on to the Harrington (Cookson) quarter one-half mile north of Lindbrook. They came from 30 miles south of Stettler in the dry belt. Welcome! Mr and Mrs. Gould and family and the best of luck in your new home.

Mrs. F. Evans of Athabaska, was a visitor here last week, at the home of her brother Mr. J. Bracegirdle and family.

We hear that Mr. J. H. Brown has bought one of the Wilde quarters adjoining his place.

It was announced over the radio that Master Leslie Bailey, son of J. Bailey of this district won the 1st prize for oats in the boys' fair.

Mr. McCleay, our teacher, has again arranged to have a box of books from the Dept. of Extension U. of A. to be lent out to the people of the district. Many thanks Larry! we sure appreciate it.

SCHOOL NOTES

by

I.M.E.R.

The Tofield High School Student's Union celebrated the closing of school by staging a Christmas party on Friday afternoon Dec. 21st. This was a most welcome change after two strenuous weeks of Christmas examinations. A short concert with the following High School items was seemingly enjoyed:

O Canada; Piano Solo, "Purple Night" Isabel Robinson; Vocal solo, "My Task" Betty McCarthy; Piano Solo, "Barcole" Mr. G. P. Thomas; Piano Solo, "Nola" Cleo Wilson. Elaine Thomas and Doris Coatta from Miss Wingrove's room gave recitations. The remainder of the afternoon was spent in taking part in several games and contests. A few days before we drew names for Christmas presents and these were distributed from the Christmas tree. The usual fare of nuts, candy and apples contributed by the girls in High School completed a most successful afternoon's entertainment. All then left for their respective homes bidding each other good-bye and exchanging the usual holiday greetings.

The regular meeting of the Tofield Junior W. A. of Holy Trinity Anglican Church on Dec. 22nd. took form of a Christmas party at the home of Mrs. J. W. Robinson. Many new and novel Christmas games were played during the afternoon. Then an impromptu concert of recitations, solos, both vocal and instrumental put on by the Juniors was much enjoyed. At a former meeting the Juniors drew names and the small gifts were distributed from the Xmas tree. Around five o'clock the Juniors found their place-cards at the table. Christmas crackers, caps, riddles etc. added to the fun. After lunch Rev. Wallis, a guest, entertained with a few songs.

The annual meeting of the United Church congregation is to be held on Tuesday January 15.

The reports for the year will be given, followed by a social hour.

Keep this date open and come to this friendly and interesting gathering.

At the next meeting of the Tofield Young Peoples on January 9, the following resolution is to be debated. "Resolved that trade reciprocity between United States and Canada would be beneficial to both countries." The debate will follow parliamentary rules and each member is expected to take part in the discussion.

RUSH PRESS NEWS

The 5 pin bowling finished with A. B. Clutterham and R. Coatta in the finals. A. B. Clutterham nosed out for a win by taking two games.

High average in league—Ray Coatta.

High two games—W. Worton.

High game—Ray Coatta.

High lady—Mrs. Swick.

Mr. Joe Hisey extends grateful thanks to his friends for their acts of kindness and sympathy on the occasion of his sad bereavement in the loss of his wife.

C. GALLANGER BUYS GOOD SHORTHORN BULL IN EAST

Claude Gallinger has purchased from Beath Farms, Oshawa, Ont., an outstanding bull, Lord Rothes, for the large Shorthorn herd maintained on his farm at Tofield.

Lord Rothes was bred by Beath farms, his sire being im. Walshford Paymaster and his dam imp. Collynie Fairy Queen, bred by J. Duthie Webster of Tarves, Scotland.

He was grand champion at the Canadian National and reserve grand champion at the Royal this fall. The price was a fairly long one, but young bulls of this kind are not found every year, and Mr. Gallanger's fellow breeders will congratulate him upon securing a young bull of such outstanding merit.—Market Examiner.

SERIOUS ACCIDENT CHRISTMAS EVE

While enroute to Ryley on Christmas Eve, Mr. and Mrs. Hetsler met with a serious accident when their automobile collided with a telephone pole just at the Tofield intersection to the highway.

The car was badly damaged and Mr. Hetsler sufered a broken jaw bone as well as minor injuries. Mrs. Hetsler was knocked unconscious, but revived and suffered shock and bruises. Dr. Law and Corporal Baynes were soon on the scene and the injured were conveyed to an Edmonton hospital. Mr. Hetsler is now progressing favorably and Mrs. Hetsler is staying at Ryley.

EASTERN STAR GAVE HAMPERS AT CHRISTMAS

Christmas day passed quietly at Tofield, family gatherings being the mode of celebrating the festive time. The Eastern Star Chapter, as in former years, prepared hampers of suitable articles which they distributed to those in need of same.

The severe cold made outdoor activities unpleasant, the citizens prefering their own fireside.

Cold Weather Requirements Attractively Priced

FLANNELETTE SHEETS—	
White or grey, ¾ bed size	$2.25
White, full bed size	$2.39

Plain beige with fleece lining	95c.
Novelty lines for sportswear	75c. to $1.00

H. E. ROGERS

Canada Makes Progress Says Beatty

C.P.R. President Reviews Past Year and Finds Evidence of Permanent Economic Improvement in Advances so far made—Predicts Canadian Wheat as Best in the World will find Steady Market.

THE course of our recovery from the economic catastrophe which swept over the world in 1929 and 1930 has been markedly different from that of any of the previous cases of business expansion in this country. This time we seem to be experiencing a process of slow rebuilding, and, as far as I can see, one of permanent re-adjustment of our economic activities to conditions which have radically and permanently changed. What we are today experiencing is a process of steady, and I hope permanent growth.

E. W. BEATTY, K.C.
Chairman and President Canadian Pacific Ry

This to my mind would be an entirely normal result of the causes which led to the great collapse of Canadian business. The boom conditions which followed a temporary depression after the Armistice were, as far as Canada is concerned, chiefly the result of forces and conditions in other countries. Actually our productive boom resulted from tangible demand for Canadian products, and from conditions in other countries which directed a flow of capital into Canadian development. Equally the economic collapse in Canada resulted chiefly from forces operating in other countries.

Nothing is more important in our economic life than our great exporting industries. In the case of wheat I have never accepted the alarmist views which have been freely expressed. The world surplus stocks, produced partly by active encouragement of production in many importing countries, and partly by a series of unusually favourable seasons in Europe, seem to be needed to meet the marked shrinkage in production in 1934. While complete recovery of world commerce in wheat must depend on some limitation of excessive economic nationalism, on greater stability of monetary exchange, and on increase in the total volume of other forms of world commerce, I see no reason to believe that Canadian wheat, the best in the world, sold at fair prices, will not find a steady market.

Other primary products, such as minerals, lumber, and bacon are being exported in increased volume and at better prices, largely owing to the Imperial trade agreements of 1932, and the newsprint industry shows clear sign of recovery.

It is to be regretted that the past few years have seen further increase in the debt of the Dominion, the Provinces and many municipalities. Much of our public debt has been incurred for purposes obviously legitimate as part of the ordinary government of the country, but much has resulted from experiments in the direction of governmental participation in business. Regrettable as is the loss occasioned by errors on the part of private enterprise, this type of loss is corrected by a reduction in the income and capital holdings of those who finance the enterprises. An unwise investment by a public body means a permanent charge on the tax-payers. I recommend this thought to those who believe that further expansion of governmental activities is the best method of protecting the ordinary citizen from exploitation by capitalists. In actual fact the safest policy for great capitalists is at present to buy securities issued by public bodies and to leave the chance of loss to be carried by the mass taxpayers.

Throughout the past year the matter of the country's railway problem has received an increasing amount of public attention, and I am convinced that proposals for its solution along the lines of unified management for the two great companies have made decided progress. In all directions are observable a greater willingness on the part of the public to enter upon an unprejudiced consideration of the case, and even among those classes whose interests might at first glance seem to be threatened by any such proposals, I discover a growing desire to examine their possibilities and to find out if they really are as dangerous as those who early rushed into print to attack them would seem to believe. This is all to the good. If unified management will not stand up under the most searching criticism, obviously, it should not go forward. But the criticism should be fair and honest and it should be based upon a fairly sound understanding of railway economics and not upon personal interest or prejudice. I say nothing less than the truth when I affirm that most of the criticism that has come out so far will not stand up before any one or even two or three of the above tests. I shall not further deal with the matter here, except to say that I can see no other way than unified railway management in which the country can put a stop to the continual cumulative wastage of vast sums of money and can safeguard the future of both railways while adequately preserving the proprietary rights of the Canadian people in the Canadian National, and those of the shareholders of the Canadian Pacific. In a word this is my proposal for unified management.

It is a partnership between public ownership and private ownership with the added advantage of private operation free from political control.

Both Canadian Railway systems as well as the railways of almost every modern nation, have suffered to some extent from the growth of highway transportation. The general use of privately owned motor cars, and an increasing amount of pleasure travel in prosperous times have led to the construction of a great network of modern highways, which in turn have been used as the right of way for a great number of freight vehicles. To a great extent the operations of these vehicles and their policy in setting their charges, have not been subjected to the same close supervision which public authorities have long given to railway operations and tariffs. In this case also public opinion is pressing for better handling of the situation. The railways do not question the advisability of building good roads, or of permitting them to be used for commercial transportation, but the perfection of the present attempts to proper control of this operation will, in my opinion, return to the railways at least some of the business taken from them by highway transport and place both highway and rail transportation on a sounder basis.

It is also interesting to note a growing public sentiment in the direction of demanding some contribution to the upkeep of our great and costly inland waterway system from those who use them especially in the case of ships of foreign registry.

With every correction of these special cases of unfair competition, the Company must depend chiefly for a restoration of its normal business on a recovery of Canadian prosperity in general. The outlook in that respect is comforting. The very careful studies prepared by the Dominion Bureau of Statistics indicate a condition far from as alarming as some authorities would make it.

In this great and scantily populated country we should not, however, be talking only of recovery. Canada should look forward to expansion in every direction. To my mind the policies needed to insure this are very simple. I would list them as: scrupulous care to prevent the debts of public bodies and resulting destructive taxation from any further increase; concentration of our efforts both in public policy and private business on the increase both in volume and prosperity of our primary industries — especially agriculture; public and private business policies looking to increase the population of Canada — especially in the agricultural areas, and, as I have remarked, an immediate correction of the burdensome and costly duplication of transportation facilities.

It appears to me that we can look back on 1934 with some complacency as a year during which we found that the world was not ending, and that by industry and thrift, courage and individual [illegible] could still conquer. What interests me more is that I believe we can look forward to 1935 and succeeding years with confidence that under Providence we shall see in them a period when Canada will revive that faith in her future which too many of us seemed to lose, and that we shall again come to realize that all that is wanted to set this country on a forward path of progress are such simple virtues as thrift, honesty and ordinary common sense.

SPORT NEWS

TOFIELD DEFEATS IRMA BY 4—1 SCORE

Playing "heads-up" hockey the locals trimmed Irma by a 4—1 count on Friday last in a game that was packed with thrills and spills from start to finish.

Both teams opened the throttle wide open from the start and fast two and three man rushes were features of the game as first one team and then the other took the attack.

Irma however found it plenty difficult to get through the Glover—Stutzman defence who were handing out plenty of stiff body checks. Stutzman who was playing his first game of the season strengthened the defence considerably and turned a real smart performance. Glover as usual was as steady as the Rock of Gibraltar as well as figuring prominently in the scoring. Both forward lines travelled at a fast clip throughout and gave their opponents little time to get away.

Irma opened the scoring for their lone goal when they scored on a shot that Bowick thought he had stopped, when at the last moment it took a crazy bounce to land in the net. L. Glover evened it up a few minutes later with a shot from just inside the blue line. This ended the scoring for the first period.

In the second period with Bowick playing grand goal the locals went into the lead with Worton scoring on a pass from L. Glover. Then with Irma serving a penalty, they went down on a smart three man rush and scored again with N. Glover taking Kynoeness pass to make the score 3—1. That was all the scoring in the second period.

In the third only one goal was scored with L. Glover getting his second of the evening making it 4—1 for the locals and this lead was held to the end.

Bud Hannan handled the bell to the satisfaction of all.

VIKING WIN FROM LOCALS BY 4—3

"Outlucked" more than "outplayed" the locals were nosed out by a 4—3 count by the fast playing Viking crew on Tuesday night here. The locals fought an uphill battle all the way. Viking held the lead on three separate occasions and every time the locals tied it up. But after Viking took the lead in the third period, 4—3, it just wasn't in the cards for Tofield to even it up.

For a greater part of the game the locals literally bombarded the Viking goal but to no avail, the Viking goalie stopping pucks from all angles.

It was a good game for the crowd of spectators and kept them in a frenzy of excitement throughout.

An unfortunate accident marred what otherwise was a fast clean game, when goalie Bowick was struck in the face by a flying puck, the wound requiring three stitches. He pluckily returned to the ice and finished the game, after receiving medical attention by Dr. Law.

Those scoring for Tofield were: L. Glover 2; N. Glover 1.

Bud Hannan refereed the game.

TOFIELD RETAINS NORTHWESTERN UTILITIES CURLING CUP

Viking curlers represented by two rinks skipped by J. Slavik and W. Collier invaded Tofield curling circles Monday evening in an attempt to win the Northwestern Utilities Cup. Slavik won from Beirnes, but Collier was defeated by McLaughlin and as the two Tofield rinks made 25 points against the visitors' 22 the cup will remain at Tofield for awhile longer.

Final scores were: McLaughlin 16, Collier 7; Slavik 15, Beirnes 9.

The personnel of the rinks: J. Slavik skip, A. E. F. Carey, V. Slavik, B. Slavik. W. Collier skip, H. Collier, H. Hilliker, K. Hilliker. George McLaughlin skip, A. E. Calvert, W. J. Duckfield, A. B. Clutterham. A. A. Beirnes skip, Dr. F. P. Law, J. O. A. Letourneau, L. W. Smith.

VEGREVILE BONSPIEL JANUARY 14th to 18th

The Vegreville Curling Association is holding its annual bonspiel January 14th to 18th. There are six competitions with handsome prizes accompanying.

Vegreville curlers hope to welcome rinks from the Fort, Chipman, Islay, Kitscoty, Lloydminster, Tofield, Wainwright, Ryley and Camrose. A highlight feature of the spiel will be the big banquet on Tuesday, January 15, at 6:30 p.m. when well known curlers from many centres are expected to be present.

Behind the Hog

By A.B.C.

Oh give me a rink where the curling stones roll
And the old boys and new ones are there,
Where never is heard a cross or cuss word
And all curlers are happy and fair.

—o—

Two Viking rinks came, they saw, but failed to conquer, in an attempt to lift the "Gas" trophy. Biernes lost to Slavik and McLaughlin won from Collier. Totals Tofield 25, Viking 22.

Personnel of rinks—Slavik, skip; Carey; F. Slavik; P. Slavik. Collier, skip; H. Collier; H. Hilliker; B. Hilliker.

A. Biernes, skip; Dr. Law; Letourneau; L. W. Smith. McLaughlin, skip; Calvert; Duckfield; Clutterham.

The ladies' club served lunch after the games, and what a break the ladies gave us, they donated the proceeds to our club and do we need it? and how.

—o—

Our old friend A. E. F. Cary the pie eating champion from Viking sure curled a dandy game for his team.

—o—

In this Chapman, Calvert game, the supposed to be smooth Calvert rink made the mistake of not letting Mr. Worton curl 8 rocks each end.

—o—

For the third and last time we pause to remark—the rink that gets the most stones near the "button" wins.

—o—

Our two butcher curlers are always "beefing" about something.

—o—

Behind the glass is what we call curling in comfort.

—o—

As Bert said, "Lets board Mac at at the rink, and Ducky replied, "Im no barber."

—o—

How's the cold folks? Doc says alcohol will not ease a cold—but still here's looking. A-choo!

—o—

Some one at the rink said that we now hold the option on the smegth stuff, how about it Mr. president.

—o—

Scandal is like mud, you can't spread even a little, without getting some on yourself.

—o—

Bill Forman talks some of the boys out of the shots—then at other times they have no one to blame.

—o—

Next week during the Ladies' "spiel" at Edmonton, keep your ear glued to the phone as it would be too bad if you did not happen to be in when the call comes.

—o—

During the cup games this week, one curler nearly parted with his trousers, one match and a shingle nail saved the day.

—o—

When ladies curl on ice 1, with a cold wind from the south, they should always use two pairs at least.

—o—

Do you like oysters? No we don't like oysters, and I'm glad we don't like them because if we did we would have to eat'em and we hate the blamed things.

—o—

This is a fact, and not a foolish witicism,
All curlers like a lot of praise, and not a word of criticism.

—o—

According to rule 6 posted up at the rink some curlers flit gracefully across the ice but most of them are just in the way.

—o—

We noticed Lloyd Smith pinch hitting for Imler during the cup games. Fred gave us his moral support and says that he will not curl with or without a hat this year.

—o—

The most beautiful thing to be found at the rink after losing a game is a face radiant with joy.

—o—

Be like the banana boys stay with the bunch and don't get skinned.

—o—

Our brand new up to date set of alibis have arrived and are available to both members of Ladies' and Men's club. We have put a lot of thought into this matter and have also drawn on the reserve in the club.

Try one and be pleased.

LOCAL NEWS

Miss Fritzie Zerbey of Stony Plain visited Miss Muriel Malcolm last week.

Those from town attending the hockey game in Edmonton on Sunday were: Muriel Malcolm, Fritzie Zerber, Helen Schultz, Lois Thompson, Hes Taylor and Cliff Stutzman.

Miss Mary Burnett has been confined to bed for a few days with tonsilitis.

Miss Helen Schultz spent the week-end visiting Lois Thompson.

The teachers and pupils of the Tofield school returned to their work on Monday after having a two weeks holiday.

Mr. and Mrs. Abbott visited Mr. and Mrs. Brady of Edberg this week.

Ella Taylor and Eileen Allen spent a few days visiting Mrs. Geoglin last week.

Mr. Bill Robinson spent the week-end at his home in Camrose.

Mrs. Utas of Vegreville is visiting at the Joe Wiltzen home.

Mrs. Wilson, Lola, Faye, and Cleo and Ina Taylor visited the city on Saturday.

Mrs. Lindsay of Innisfree is spending a few weeks with her daughter Annie.

Mr. and Mrs. Baynes and family left on Friday for their new home in Edmonton.

In our last issue we reported that Mr. and Mrs. Swick had moved to Innisfail. This is incorrect, Mr. and Mrs Swick spent the Christmas holidays at Innisfail, but have since returned and Mr. Swick is back at his job as mechanic at McLaughlin's garage.

Remember the Annual Meeting of the United Church congregation on Tuesday, January 15th at 8:00 p.m. Reports from Ketchamoot and Lakeshore will be submitted as well as the record of the Tofield activities. This is an interesting gathering and all interested in the work of the United Church are cordially invited. A social hour will be held at the close.

PUBLIC MEEETING SUNDAR AFTERNOON

A new departure in the way of public meetings will be held on Sunday afternoon of this week when prominent Edmonton speakers will combine with local vocal and orchestral talent to make a really worthwhile gathering. The meeting is sponsored by Mr. Geo. Edwards. Among the speakers are Mr. Harold Greer, Mayor of Beverly, Miss Crang of Edmonton and Mr. Clifford Lee of Edmonton. The addresses will be progressive, entertaining and instructive.

Mr. Edwards has arranged for some very fine local talent to appear, both vocal and instrumental and weather conditions being favorable, a good crowd is expected. A cordial invitation is extended all to attend.

UNITED CHURCH NEWS

The annual congregatonal meeting of Lakeshore United Church was held at the home of Mr. and Mrs. T. R. Murray on Tuesday afternoon, January 8th. There was a fine attendance and the interest taken in the reports of the year's work was most encouraging. The main purpose of the Church is to serve and keep alive in the hearts of the people, moral and spiritual values. From all the reports one gathered this has been kept in mind and a measure of success has attended the efforts of Rev. Mr. Allen and his workers.

The finances are in splendid condition in all departments and obligations were all met. A social hour brought a fine meeting to a close.

The Rev. D. K. Allan acted as chairman and Mrs. Anderson as secretary.

The annual meeting of the Ketchamoot congregation of the United Church was held at the home of Mr. and Mrs. John MacGinitie on Wednesday afternoon, January 9. There was a large gathering of members and adherents. The reports revealed marked improvement in attendance and support of the Church.

There is a deep desire in the mind and heart of the people to make the Church a moral and spiritual force in our midst. The co-operation of all is heartily desired to achieve this worthy end.

There is fine harmony of effort and purpose among the people and "Forward" is the motto. The finances are in the best condition, all obligations were met and a surplus in all departments. A delightful social half hour was spent at the close of the business. Rev. D. K. Allan was chairman and Mr. Wm. Lee, secretary.

The Y.P. met for the first time this year on Wednesday, January 9th. The president, Mr. Wm. McIntyre was in the chair. There was a good attendance of the young people. Miss Margaret White gave an illuminating talk on "George Washington Carver and Donald McLaughlin gave a most interesting talk on "Indian Homes, past and present. The parliamentary debate on the resolution submitted by the leader of the house, Blake Clutterham, viz: "That Reciprocity would be beneficial both to Canada and United States was keenly debated. The leader of the opposition, Arthur Beirnes made a strong attack on the resolution by revealing some of the implications involved in reciprocity. Both leaders had generous support for their ideas. When the vote was called the opposition emerged with a slight majority. A delightful meeting was closed by two thrilling games.

HOME DESTROYED BY FIRE

On Wednesday, January 29th, the home and contents of Mr. and Mrs. W. Hay of Tofield were completely destroyed by fire.

Tuesday night and Wednesday morning were quite cold and Mrs. Hay had stayed up late keeping the house warm and watching the furnace. After the children had gone to school on Wednesday she layed down and was awakened by the house being full of smoke. Running over to the Barden home a short distance away, she gave the alarm which was promptly telephoned into central who in turn notified J. W. Chapman at the town hall. He immediately rang the bell and the chemical extinguisher was taken to the scene of the fire, only a short distance away, but arrived too late to be of use. When the chemical arrived the kitchen wall was burning, fed by fire beneath. The exact cause of the fire is unknown but it is believed to have originated in the basement. By the time help arrived the house was completely filled with smoke and it was not possible to enter and save anything. The building and contents were partly insured.

LOCAL SCOUTS REPAIR TOYS

The zeal and ingenuity of the Tofield boy scouts was fully demonstrated during the holiday season. Prior to Christmas the boys collected and repaired many toys and articles that were distributed and brought joy to needy children. To scoutmaster Wallis, young men and boys, much credit is due.

The thanks of the scouts and recipients are also extended to those who generously donated the toys.

TOWN COUNCIL

A regular meeting of the town council was held on Monday evening January 7th. Those present were: Mayor Bruce, Councillors Chapman, Bellamy, Swift, Hammond, and Taylor. The minutes of the previous meeting, an adourned meeting and a special meeting were read and approved. A number of accounts were approved for payment.

A by-law was passed appointing Mr. E. B. Nowers to the office of assessor for the Town for the year 1935. In this connection the secretary advised that it was expected that the assessment would be made and notices mailed within the next two weeks.

J. W. Chapman was appointed returning officer for the year 1935.

A statement of receipts and expenditures for the month of December 1934 was read and ordered to be incorporated in the minutes of this meeting.

The annual meeting of the Women's Missionary Society will be held at the home of Mrs. D. K. Allan on Thursday, January 17th, at 3 p.m.

A Happy 1935

Editor's Note.—During Christmas week we were pleased to publish "Christmas Messages from the Churches" We were unable to get into touch with Father Malone at that time, but he kindly consented to write a short message of encouragement for the New Year.

"Hope springs eternal in the human breast." The depression has become a habit. But it will be beaten yet. We confidently expect that there is a golden age in the offing, an age when there will be an equitable apportioning of our abundant heritage of temporal blessings.

None the less the Christian New Year is always happy since essentially all is well. The road may be rough but we are on our way. "God is in His Heaven and all will be well." We glimpse through the gloom our glorious destiny.

At the same time we pray God to crown our earthly strivings. Great anguish of soul in the face of present difficulties prevails. But, thank God, the world is awakening to its opportunities. The laissez faire system is in the discard. Happy issues await our grappling.

I wish the Mercury and its readers a Happy New Year. I wish them everything good.

B. W. MALONE.

* * *

LAKESHORE

* * *

Miss Ethel Graham and her friend, Miss Mary Hovdebo returned to their school duties in Edmonton Saturday, after spending the holidays at the Graham home.

Miss Ethel Baines of Gadsby visited friends in this district for several days between Xmas and New Year's.

Mrs. Joe Majahey entertained a number of friends at bridge on Saturday evening of last week. Five tables played and honors went to Miss Ethel Baines and Hubert Bethel, while Miss Myrtle Bethel and Mrs. T. D. Ferguson (the latter playing as gentleman) won the consolations. A delicious lunch was served after the game.

Miss Elsie Allen of Marvola left for her home on Monday after spending two weeks at the J. H. Johnston home.

An enjoyable dance was held at the T. A. Jones home last Friday evening. Inspite of the cold weather and heavy roads a goodly number was present and a splendid time is reported.

T. R. Murray returned home on Monday morning from Regina where he was called on business in connection with the Livestock Marketing Board of which he is a member.

Miss Grace McKinnon returned last Wednesday after spending the holidays at her home at Mannville.

Miss Mrtle Bethel returned to her teaching duties at Sedgewick last Saturday.

CORRECTION

The following names were inadvertently omitted from the list of floral offerings relative to the passing of Mrs. T. L. Munro. L. J. Carlisle and family; E. L. Carlisle and family; F. Shupe and family; Mrs. E. McMullen; Sam Stirrett and family; Robert Bearrcloth and family.

* * *

LINDBROOK

* * *

This last week seems to be kind of disastrous for anyone of the name of Anderson in this district. Two of this name literally got into "hot water." Maybe some of our budding astrologers may explain this in regard to the position of the stars etc.

First of all Mr. Chas. Anderson scalded his foot whilst helping to scald a pig. Dr. Law was sent for and dressed the scald (not the pig) and the patient is now getting on O.K.

Then on Saturday afternoon Mrs. E. Anderson, wife of Elmer Anderson C.N.R. here, whilst lifting a boiler of hot water to put into a bath, slipped and the water scalded her badly on the chest and legs. Mr. Heichen the elevator man who is next door, rushed her over to the store assisted by Messrs. J. Yakabuski and Geo. Carter of the C.N.R. At the store Mrs. Jas. Bracegirdle rendered first aid, and Mr. Heichen took her to Tofield. On the way his car went 'flooey' and a member of the funeral cortege of Dr. Farrell of Holden whilst preceeding to the city turned out and took Mrs. Anderson on into Tofield where Dr. Law again was called into action. We are glad to hear that the patient is getting along O.K.

Messrs. A. B. Clutterham, Jas. Bracegirdle and P Holland attended the 49th Battalion annual banquet at the MacDonald in the city and renewed many former pals of the days that we hope "are gone forever," still some of the days wer'nt too bad at that

PROPOSED ALBERTA LIVE STOCK MARKETING SCHEME

A Scheme for regulating the marketing of life stock produced in the Province of Alberta, which was prepared by live stock producers, has been reviewed by the Dominion Marketing board.

The proposed scheme has been printed and those interested may obtain copies by writing to the Secretary of the Dominion Marketing Board, Confederation Building, Ottawa.

HUDSON'S BAY TRAFFIC MANAGER SAYS ESKIMOS ARE INTERESTING PEOPLE

Halifax, N. S., December 31—"The 'Vagabond Cruise' to the West Indies and British Guiana I consider one of the most delightful of holiday trips," stated Colonel H. Reid, of Winnipeg, traffic manager of the Hudson Bay Transport Company, on his departure on the Ocean Limited for that city recently. Colonel Reid was one of the several passengers who took the Vagabond Cruise on the passenger-carrying freighter "Chomedy," Canadian National Steamships, which arrived at this port a few days ago. "Dominica and St. Vincent in the British West Indies particularly appealed to me," Col. Reid continued, "and I should think it would be a most delightful place to retire to."

On being questioned with regard to transportation routes operated by the Hudson's Bay Company, the oldest incorporated company in the world, he stated a line of boats is operated from Edmonton north to Aklavic on the Arctic ocean, utilizing the numerous water routes which avail in northern Canada. A trip from Edmonton to Aklavic takes 12 to 16 days and, in the opposite direction, 19 to 21 days. The Mackenzie river routes of travel and commerce and its tributary waters are the main through the Mackenzie district. The world's largest known deposit of bituminous or tar sands is centered about For McMurray, Alta., served by the company's water routes. The season is from May 17 to September 27. Winter travel is by dog sleigh and airplane.

A peculiar feature of the service is that artificial light is not required on the steamers on the first through trip of the season, there being little or no darkness during the entire twenty-four hours.

The Eskimos in the territory are very interesting, unlike the Indians, being a maritime people depending for most of their food on the sea mammals. In summer they live in tents like Indians, but in winter most of them build huts of snow. In the Mackenzie delta, where drift wood is plentiful, they build substantial houses of wood. Col. Reid remarked that the Eskimo has a different disposition from the Indian, being cheerful and not morose, nd has more staying power and is not so easily discouraged.

New Deal in the Kitchen

Lady: "Have you been accustomed to having a housekeeper over you?" New Maid: "Madam, we never speak of having people 'over us.' But I have had colleagues."

HON. J. H. THOMAS ON DOLLAR WHEAT

Writers in Australian farm papers did not take very kindly to the statement made in London, England, by Hon. J. H. Thomas that dollar wheat would never be back again. A writer in The Land says: "Mr. Thomas could have told his audience a few home truths instead blathering like he did. He could have told them that fundamentally the whole process of feeding mankind was in urgent need of re-organization; that the distribution of food was the most vital movement in the world and the one given least consideration.... Three times during the last century men howled that dollar wheat had gone forever and the world laid down with its "blues." Three times during the last century they were wrong. It wasn't until wheat reached the dollar limit that the world recovered from its "blues."

TREMENDOUS CHANGE IN ECONOMIC POLICIES

In 38 countries of the world the governments have instituted price supporting policies of one kind or another. Of these countries 27 have established marketing control of one or more commodities through organization of producers; in 23 government monopolies of greater or lesser extent have been created; in 25 minimum prices for home-consumed agricultural products have been fixed; in 15 measures for control of production have been adopted; in 18 imports of agricultural produce have been regulated by quotas; and in 12 the milling industry has come under regulations with regard to the quantities of imported wheat in the making of flour. This is a tremendous change in economic policies from those prevailing before the war and even up until 1929. — Extract from Radio Address by C. H. Burnell, vice-president, Manitoba Pool Elevators.

PROLIFICACY OF DIFFERENT BREEDS OF SWINE

The prolificacy of a breed of pigs is a very important point, directly affecting the profits of the breeding and feeding operations. At the Dominion Experimental Station, Lacombe, Alberta, a summary of nine years of breeding work comparing the prolificacy of the Yorkshire, Tamworth and Berkshire breeds of swine shows that in number of pigs farrowed and in average of pigs weaned per sow, the Yorkshire ranks first, the Berkshire second and the Tamworth third.

As Tamworths have been raised at the Station only since 1925, only a nine-year average is possible, but this includes a large number of litters. During the nine-year period two hundred and sixty-three Yorkshire were farrowed, these giving a total of 3,103 pigs, or an average per litter of 11.8 pigs at birth, and 7.6 at weaning.

During the same perion a total of seventy-seven Berkshire litters farrowed, averaging 9.4 pigs per litter at birth, and 6.0 at weaning.

A total of one hudred and twenty-eight Tamworth litters farrowed, averaging 8.6 pigs per litter at birth, and 6.0 at weaning.

Improvement in prolificacy is a requirement of the Tamworth breed at the present time. Young Tamworth sows, especially, are inclined to give rather small litters.

It is worthy of note that in 1924 a Yorkshire sow at Lacombe farrowed a litter of twenty-five pigs, and this same sow farrowed six litters during a period of three years, averaging seventeen pigs per litter, and raised a total of fifty-six pigs from the six litters. These unusually large litters, such as twenty-five pigs, are not desirable as the mortality must necessarily be high, and possibly those that survive may suffer from lack of vitality.

BALING STRAW AT CAMROSE FOR U.S.

Camrose—A number of farmers of the Dorenbury district, nine miles south, have contracted to sell large quantities of baled wheat straw for shipment to the drouth areas in the United States. An agent of the Canadian purchasing firm visited this district some time ago, and samples were sent to Brandon for inspection. These were reported to be excellent.

Several baling presses are now at work, each turning out about 10 tons daily. These are operated by four men and the power used is the old fashioned "sweep" pulled by a team of two horses.

So far about 1000 tons have been contracted for. The farmers are being paid at the rate of $3 per ton, delivered on the cars, and shipments from this district are being loaded at Mile 4 Siding on C. N. R., making a haul from four to five miles. Two dollars of the proceeds ar paid to the baler, the farmer receiving one dollar net for the straw.

The crops in this particular district were unusually heavy the past season, one farmer selling all the straw produced on a half-section, which is estimated to exceed 250 tons. This wheat ran from 35 to 53 bushels to the acre and graded two, three and four.

It is reported that several hundred cars of straw will be shipped from the Camrose district, if the necessary baling machines can be secured.

VAST HISTORICAL CHANGE?

THOSE WHO have been listening to Premier Bennett's radio addresses have been more than surprised at the information imparted. In the Canadian West at least; the Dominion premier has for years been classed as the typical die hard tory, defender of sound money, and conservative in principle as well as in name. Somebody once said, "none of us are as good or as bad as the people in general think we are" and perhaps this would partly explain why, from a Conservative of high standing comes news of impending social changes such as announced by the premier in his radio addresses. When premier Bennett speaks of "changing the system," it is time to sit up and take notice.

However, it is very essential that the rank and file of Canadian citizens should not be stampeded into premature exuberant hopes or into believing that the reforms spoken of by the premier are original with him or his party. Most of them, such as unemployment insurance, health, accident and sickness insurance, an improved old age pension plan, a change in taxation on earned and unearned increment, all these things have been long and vigorously demanded for years by reformers of another school. And it is important to remember that for many years much of the reform legislation proposed by the premier has been in effect in some other countries for some time. Another thing, and one which the political opponents of the premiers party will pounce upon quickly enough, is that the reform proposals are made in the light of an impending election which, it is generally expected will take place this year. As a clever statesman seeking the return of his party to power, it is not to be expected the premier would undervalue the vote getting value contained in the reform proposals, but in our opinion this is not by any means a complete explanation.

In our opinion the reform proposals are the inevitable outcome of the economic system which on the whole tends to make the rich, richer and comparitively speaking, the poor, poorer. To a very large extent the reform proposals have been forced upon the government due to the widespread distress. It really is better and perhaps cheaper, to have these things placed on the statue books in an orderly way and efficiently controlled than to go on spending millions of dollars in direct relief. Prior to the finan- crash of 1929, there was little need for direct relief in Canada. Most men able to work could find work, but since that time relief expenditures have become enormous, so enormous as to make some other plan preferable. The premier is deserving of credit for the stand he has taken, which is almost right-about-face from all previous conceptions of conservatism. It is to be hoped as time passes that he will realize the logic of the western agriculturalists when they cry, selling in an open market and buying in a protected market is an unsurmountable barrier to agricultural contentment and prosperity.

NEW BROOMS—BRITISH EXPERIMENT

(Christian Science Monitor)

Great Britain is making a new experiment in the practice of government which her social reformers are watching with the greatest interest. The experiment consists in giving a roving commision to one man to discover for himself the best way of getting a big job done, and giving him very wide powers to make his own plans and get them carried out. The job is that of rehabilitating the distressed areas—the areas, where trade was ebbing even before the slump, which show no signs of recovering when others are becoming more prosperous; whose population suffers from prolonged unemployment and is becoming desperate.

Instead of announcing a program of action, the Government has appointed two individuals—one for England and Wales, one for Scotland—who are invited to discovver their own programs. These two commisioners will be able to draw upon considerable sums of money, £2,000,000 to start with, and more as it may be required. They will be able to consult with public officials, local authorities and voluntary social workers in each locality; initiate new schemes for the purchase and use of land, for making roads, for removing the hideous excrescences of derelict industrial areas.

It is of the essence of the proposal that these two men should be unhampered, and have a free hand to act as needs may demand; keeping in touch of course, with the Government, and making use of its administrative machinery so far as is desirable, but not tied to any rigid program. Being men of wide experience, but with no official ties, who have placed themselves, unpaid, at the disposal of the country for the performance of a great national task, the commisioners are likely to feel that they have a unique and splendid opportunity of public service.

It is a leaf out of the book of dictatorship, but one in which there is no departure from the essentials of democracy, for the ultimate control remains in the hands of parliament.

UNEMPLOYMENT, SICKNESS INSURANCE; TAX CHANGES TO EQUALIZE WEALTH; FARM AID PLANNED BY BENNETT

OTTAWA, Jan. 5.—Contributary unemployment insurance, a remodeled old-age pension scheme, health, sickness and accident insurance, amended income tax laws to correct inequality in wealth distribution, minimum wage laws and maximum hours of work, and further legislation in the interests of the farmers were promised by Prime Minister Bennett Friday night as part of his new reform policy.

Delivering the second of a series of pre-election addresses which he started Wednesday night, Mr. Bennett reiterated his belief that the economic system had broken down and required radical alterations if it was to be saved and made serviceable to the people.

He proposed to make these changes, and expressed the confidence that once the people knew the true conditions in Canada they would give him the support to enable him to carry out his policies.

Mr. Bennett castigated the system which, he said, permitted large numbers of willing workers to be unemployed, which kept producers from their just share of the world's wealth and allowed non-producers to secure what he believed to be an unequal share.

He decried the belief that a workman should be held to his task "throughout the daylight hours" and advocated a minimum wage and maximum working week. His references were directed to "white-collar" workers as well as laborers and he declared that income adjustments by taxation should not trespass further than they had already upon the non-producer's income which was only sufficient to maintain its possessor in the ordinary necessities and comforts of life.

The new legislative proposals were discussed only in a general way and were not presented as the complete outline of the government's reform program.

"Clearly it would be unwise," he said, "to circumscribe our activities by any attempted forecast of all that should be done. We can but move forward carefully."

With respect to intervention in business in the way of regulation and control, which Mr. Bennett declared Wednesday to be essential to any policy of reform, he gave no new details tonight. "All I can tell you," he said, "is that we will go just as far as is necessary to reform the system and to make it effectively work again."

Long in Big Business

Reminding his hearers that he was 64 years old, Mr. Bennett observed that since his earliest manhood he had been studying the ways of capitalism. For 30 years he had been closely associated with big business and finance. He could claim more knowledge of the system and had praised it—with knowledge.

It was also with knowledge that he was now pointing out its defects which he proposed to remedy so far as possible.

One of the best tests of the efficiency of the system was that of employment. The fact that unemployment was rampant proved the system faulty and demanded corrective measures. He went further and declared that those who were laboring were not securing the happiness and leisure—the standard of living—that was their due.

"There must be an end," he said, "to the reckless exploitation of human resources and the trafficking in the health and happiness of Canadian citizens. There must be an end to the idea that the workman should be held to his labors throughout the daylight hours of every day. There should be uniform minimum wage and a uniform maximum working week."

There was an inequality in the distribution of income, the prime minister declared, "and I think, as between non-producer and the producer, there must be devised, by some plan of taxation to be considered at once, a better balance, not only in fairness to the producer but also in the interests of the non-producer."

When depressions threw large numbers of men out of work it was through no fault of the workman, if indeed the blame could be attached to anyone.

"If a man is able and wiling to work but can get no work," the prime minister said, "provision for his security must be made in a decent way. I do not mean the dole. The dole is a rotten thing.

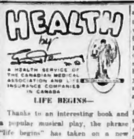
"Now that we have achieved some measure of control over economic conditions and can operate without fear of imminent disaster, we are going to do away as quickly as possible with emergency relief measures and put in a permanent system to sound and scientific insurance against unemployment."

Old Age Independence

Paying tribute to those who devoted their years of vigorous manhood toward support of the industrial machine, Mr. Bennett declared it was the duty of the state to see that they were provided for when their working days were over. This system of insurance should be on the same social and economic principle as unemployment insurance, he said, involving recognition of thrift on the part of those who would provide for their old age.

"The present old age pensions act is unscientific and obsolete," Mr. Bennett declared, "and must give way to something which will serve you better. Likewise health, accident and sickness insurance must be developed in the same way."

Regulations to protect farmers from certain types of middlemen and distributors, "some of whose activities would properly include them within th classification of economic parasites," were being considered and would be discussed later, Mr. Bennett said. He described at some length the farmers creditors arrangement act, now in operation, designed to compose farm debts in such a manner as to keep the agriculturists solvent and on the land.



A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

LIFE BEGINS—

Thanks to an interesting book and a popular musical play, the phrase "life begins" has taken on a new meaning. A previous generation used to refer to those who were dead but did not know they were.

Despite the change in meaning of phrases and expressions, the human body in its development continues to follow along well-established lines. No matter at what age you may consider life begins, the development of your teeth began at least six months before the day of your birth.

After all, the important question is "What happens?" rather than "When did something begin?". It is of no particular value for us to know that although most babies are born without any visible signs of teeth, yet the teeth are well under way even if they are hidden. This information, however is of no particular value unless we make use of it.

Actually, from the point of view of dental health, this is the most important idea for us to get hold of. The soundness of our teeth depends upon the food we eat during that period when the structure of the teeth is being laid down. The diet of the expectant mother determines the kind of teeth baby will have for his first set. What baby has to eat and what he continues to eat during the early years of life is the deciding factor as to the kind of teeth he will have and how long they will last.

Nothing is of more interest to the family than baby's first tooth. Few things should be of as much interest as the loss of the first permanent tooth. It is unfortunate that lack of reasonable care in eating the right kinds of food, neglect of cleaning and delay in securing dental care lead to so much dental disease, but this is so.

It is not suggested that anyone should have to eat with his mind fixed on his teeth alone. The teeth are a part of the body and so they are affected for good or ill, by those things which make or mar the health of the body. Food that is good for the whole body is good for the teeth. Milk, fruits, green leafy vegetables, egg-yolk and cod-liver oil are the foods which the growing child needs in abundance.

The teeth should be kept clean. The most important time to brush them is before going to bed and it is desirable also to brush them after each meal. Once decay has started, there is only one way to arrest it and that is through proper dental treatment. Better still, do not wait until you know there is decay; have your teeth examined regularly.

PATHFINDING

Established in 1817, the Bank of Montreal was the first permanent bank in British North America.

Inaugurating branch banking in Canada, it was the first bank in the capital of Lower Canada, first in the capital of Upper Canada, and first of the present banks in Bytown, afterwards Ottawa, the capital of the Dominion. It was the first permanent bank to be established west of the Great Lakes and the first to achieve a transcontinental system of branches. It was also

The first institution to provide Canada with a domestic currency, both bills and coinage.

The first bank to assist in financing the foreign trade of Canada.

The first banker for the Government of Canada.

The first bank to help finance the improvements of the St. Lawrence Waterway, through the assistance it gave to the building of the first Lachine Canal.

From its inception the Bank of Montreal has held the confidence of the Canadian people. Today that confidence is expressed in the fact that the Bank holds more than one million deposit accounts, equal to a deposit account for one in every ten persons in the entire Dominion.

Canadians naturally expect, as the sequel to such a record that this Bank will retain the spirit of the pioneer in co-operating with the future business life of the nation.

EMPLOYES MUST NOT PARTICIPATE in PROVINCIAL POLITICAL AFFAIRS OR SEEK SEATS IN FEDERAL HOUSE

A ban on professors or other staff members taking part in provincial politics was ordered by the board of governors of the University of Alberta Friday.

While staff members may take part in federal politics, they are not to stand as candidates or accept seats in the dominion house, under the ruling. To become candidates, they must resign from the university.

The board's order, made on the recommendation of Dr. R. C. Wallace, president of the university, has the effect of barring Dr. W. H. Alexander, head of the department of classics and prominent C.C.F. advocate, from accepting nomination as that party's candidate for West Edmonton federal riding, if he desires to remain on the university staff.

For some time Dr. Alexander has been mentioned as the probable C.C.F. candidate for that constituency, supporters being confident that he would make a strong nominee.

Labor C.C.F Protest

Bitter protests against the Board's action in clamping down the lid on political activities are being voiced in Labor and C.C.F. circles.

Elmer E. Roper, head of the Canadian Labor party here, and a member of the board of governors, registered strong objection to the order at the meeting when the whole question was discussed.

Protests will be made on the floor of the house when the legislature assembles on February 7 for its last session before a general election, it was stated, and the board's action is due for condemnation at the forthcoming Federation of Labor convention at Lethbridge, according to Labor men.

With the exception of two, Dr. J. D. Harrison of this city, and L. M. Johnstone, K.C., of Lethbridge, all members of the board of governors attended the meeting: Chief Justice Hon. A. C. Rutherford, chancellor; Dr. Wallace; Mrs. R.B. Gunn of Lloydminister; Mrs. Violet McCully Barss; F. E. Osborne of Calgary; J. E. Macleod, K.C., of Calgary; J. W. Winn and Mr. Roper of Edmonton; Earl Cook of Pincher Creek; and A. West, bursar and secretary of the board.

Discussion Peaceful

The discussion was not of an acrimonious nature, it is stated. While there was a division of opinion, the vote on the matter has not been revealed.

Dr. Wallace's recommendation urging the ban, pointed out that there was no question, but that staff members should not take part in provincial politics. As the main support of the university came from the legislature, any partisan activities of staff members would prejudice the university's position when a vote was being considered, he said.

As to the federal field, Dr. Wallace said that as a member of the staff could not at the same time serve as a member of the house of commons, he should not offer himself as a candidate without first resigning his university position.

While this condition should not apply to part-time members of the university staff, Dr. Wallace said, they should be scrupulously careful to appear in public activities in their true position as professional men connected with the university only incidentally.

CHOOSING THE BREEDERS

(Experimental Farms Note)

It is by selecting for desired characteristics that real results in poultry breeding are obtained. There are numerous characteristics that poultry breeders desire, but the most important are health, egg production, egg size, and breed type.

Health is the main essential, because without it there can be only failure in all other respects. After culling out the less vigorous birds, the next step is the selection of birds that have the other required characteristics. Breeding from the highest producer each spring will not necessarily result in all the daughters being high producers, but the average will remain high if selection has been well done. It would seem that flock production averages have, in many cases, almost reached the peak. Attention must now be turned to the problem of breeding birds with sufficient productive persistency to continue their heavy laying into the second and third year. When this goal has been reached, it will be unnecessary to raise so many pullets each year, because it will be profitable to keep the yearlings for another year or so. With this in view, those yearlings that have shown steady egg production over a biological, or laying year, close to, or if possible exceeding 365 days, should be retained for use as breeders. The pullet that persists in laying along into October or November at the end of the first laying year is the good producer. Of course, broodiness (an undesirable characteristic,) sickness, or the use of the pullet as a hatching medium will have to be discounted.

Research work is uncovering many truths to help the poultryman in the choice of his breeders. For instance, it has been found that small body weight at first egg and heavy body weight at the close of the 365-day period, or laying year, are associated with high laying persistency. The observant poultryman can use this knowledge to advantage.

Egg side must not be neglected. If a small egg is set in the incubator, you are likely to get a pullet that will lay a small egg. There is usualy a few cents difference between egg grades, so that the poultry-keeper who breeds his birds to lay eggs that will grade "large" will be ahead of the one who pays no attention to this characteristic.

With the male——the member that constitutes half the flock—great care must be taken to see that he is from high-producing ancestry and that he shows the finest breed characteristics and egg type, such as, depth of body, length and width of back, smooth well-shaped head, and prominent bright eye.

PROVINCIAL HOUSE OPENING DATE ANNOUNCED as FEB. 7: JUNE ELECTION IS EXPECTED

Last sitting of the Alberta legislature before the next general elections are held, probably in June, will open Thursday, February 7th, when the fifth session of the seventh legislature convenes, it was announced by by Premier Reid Thursday.

Hon. W. L. Walsh, lieutenant, governor of Alberta, was notified Thursday by Mr. Reid that the opening date had been set and R. A. Andison, clerk of the legislative assembly, will prepare notifications of the opening of the forthcoming session.

Indications are that the session will be a lengthy one and presentation of various commission reports and budget legislation will be important features of the sitting.

Reports from the commission investigating rural education and from the taxation inquiry board will be received. Included in the budget figures is the proposed gasoline tax increase for the province.

COW ADOPTS PUP AS SON; MOTHER-LOVE BEATS LAW

Dogs have been heriditary enemies of cattle since the time they first inhabited the world.

They have learned to tolerate each other since both have become domesticated, but their old hatred still remains and flares up frequently.

But there's something a hundred times more powerful than this instinctive animosity, something that will sweep aside the rigid rules of nature as if they were only imagined fancies. Humans call it mother love.

Thus mother love is responsible for the adoption of a jet black Labrador pup by Daisy, a little Jersey cow, who live together in a barn in the back yard belonging to Dr. W. S. Hall, 14625 Stony Plain rd.

Last summer Daisy was the proud mother of a dainty little fawn calf, but when the fall came her baby was spirited away.

About the same time, Prince, a loose-limbed Labrador, came to take up his residence in the stable and. Daisy quietly adopted the eight-months-old pup.

She grew as devoted to Prince as if he were a calf and Prince, strange and lonely reciprocated.

Now Daisy flatly refuses to be led into the barn unless Prince goes in first so she is sure he is safely put to bed each night. Prince has to go into the stall with her—and just try to milk Daisy if Prince isn't right alongside to see what happens!

If Prince wanders off—he is 11 months old now and quite a sizable fellow—she bawls like any bovine mother for her calf.

But her true devotion stands out if a strange dog dares to come near her "baby." With the savageness of a moose she will charge and drive the intruder away. She's not letting her old enemy the dog come near her "baby." No, sir.

The usual Saturday night bath is quite an affair at the Hall stable too. Daisy solemnly licks Prince's shaggy coat with her rough tongue and Prince "takes it."

CANADA'S HORSE INDUSTRY

Reports indicate an upward trend in horse production in Canada for the year 1934, says the 1935 "Agricultural Situation and Outlook," shortly to be published by the Dominion Department of Agriculture, in co-operation with the Department of Trade and Commerce. While statistics show 2,933,400 horses in June 1934 as compared with 2,984,100 in June 1933, there has been distinct increase in breeding activities during the year. Horse breeders' clubs in the Prairie Provinces numbered 166, an increase of 32.8 per cent over the number in operation in 1933, and a number of districts reported inability to secure satisfactory stallions. Importations of pure bred males and females for breeding purposes show a marked increase over 1933. Fifty pure bred stallions and mares of the draft breeds were imported in 1933, and this number will be more than doubled in 1934.

The export trade in draft horses was much more active in 1934 than for a number of years. An increased number of high class draft geldings were sold to buyers from the United States where there is a marked scarcity. Two shipments were made to Great Britain, one of grade Clydesdale geldings, and one of geldings of Percheron type. Frequent inquiries have been made for more horses of draft type for street work in the cities of Great Britain where there is brisk demand. A car load of horses bred from pure bred sires of the hunter type was sent to Barbados for constabulary work, following a satisfactory trial shipment taken to the West Indies last year. Negotiations are at present under way for supplying five hundred unbroken western range horses to the Chinese National Government. A demand is developing in Australia for pure bred Clydesdales and Percherons from Canada for breeding purposes. A small shipment of pure bred Percheron mares in-foal was sent there early in the year, and inquiries for further shipments have been received.

Domestic demand for work horses improved sharply during spring and summer, with a corresponding appreciation in prices. The increase in the price of ordinary work horses was 15 to 25 per cent over 1933, and for big, sound drafters, from 20 to 35 per cent. All things considered, prospects point to improvement in both production and market demand.

FOR SALE.—Purebred Shorthorn bull calves from two weeks to 18 months old. Can be registered if desired. Price $10.00 and up, if taken soon. Phone 209.—Joseph Voegtlin.

COW'S SWISH PREVENTOR IS NEW GADGET

LOS ANGELES, Jan.7.—The "cow tail holder" is one of the numerous little gadgets inventors have thought up to make this world a better place in which to live.

It and some 500 other dodads are on exhibition at a hotel where the National Inventors' Congress opened a five-day meeting Sunday.

The cow tail holder was invented by Albert Giese of Benton Harbor, Mich., who estimated that between 15,000 and 20,000 milk maids or milk men receive serious eye injuries each year when bossies switch at flies or just swish to be swishing.

PROGRESS RAZES ANCIENT COURTS

LONDON, Jan.4.—In this wonderful old London are houses in which oil lamps are still the only lights—houses of ancient memories. Some are less than 100 yards from the roar of Fleet Street. Off a very narrow court these stand—houses built in the reign of Charles II.

In the largest—in Nevill's court—lived Keir Hardie, the Labor M.P. There is a chapel belonging to the Moravian Mission. Visitors in search of picturesque old London look at these buildings with a sense of their history and romance.

But there are plans afoot for a new street. Nevill's Court may go the way of other old London corners.

ENDORSATION FOR SETTLEMENT PLAN

PRINCE ALBERT, Jan. 4.—The Prince Albert Board of Trade unanimously endorsed the Hornby settlement plan as presented by Brigadier General M. L. Hornby this afternoon at an unusually well-attended meeting of the members. The chairman of the agricultural committee W. W. Whelan, who presided reported the approval of his committee, and the meeting endorsing a motion for further discussion, proposed by P. W. Mahon and Allan McKenzie, went into the matter with General Hornby, discussing it from many angles.

A survey of the possibilities of a settlement near Prince Albert prepared by Mr. Whelan, showed that 100 families could be settled between the north and south branch of the Saskatchewan River.

According to General Hornby, if the idea of a foundation farm settlement in the neighborhood of Prince Albert meets with the approval of the citizens, there is no reason why it should not be carried out.

General Hornby left for Melfort this afternoon.

C.C.F. Hold Meeting Here

SPEAKERS FROM EDMONTON SPEAK ON ADVANCED SOCIALIZATION

On Sunday afternoon, despite the frigid temperature quite a number of people attended the study group meeting organized and sponsored by Mr. Geo. Edwards. However it is safe to say that the attendance would have been much larger had the weather been milder.

There were three speakers from Edmonton all of whom spoke in support of the C.C.F. party and advanced socialization.

A. J. Harrison occupied the chair and in opening the meeting called on Mr. Edwards for a few remarks.

Mr. Edwards said the meeting was in the nature of a study group, forming a branch of the E.E.A. He hoped it would be possible to get people to think, because if they did, they might, like the Hon. R. B. Bennett, adopt the views of the C.C.F. He did not need to remind his hearers that all the proposed reforms of the premier were planks from the C.C.F. platform. The conservatives had literally stole the laces from the C.C.F. shoes, and there was no telling but that in due time the conservative party would take the shoes.

Mr. McGreer said in part the topic assigned to the speakers from Edmonton was "problems of the day and youth." He proposed dealing generally with the problems of the day and Miss Crang would deal with the problems of youth. The way to approach any problem, he said, was the scientific way. In the early days of mankind, men were afraid of the elements, thunder and lightening awed them and they offered sacrifices to the gods as propitiation. Later they learned to understand the working of the elements and were no longer afraid. The world to-day, is living in fear of it knows not what and before attempting to remedy the problems, they must find out what these problems are and the underlying causes.

Different people had different problems. The problem of the housewife was to make ends meet. The farmer would say his problem was to obtain sufficient price for his product—the fisherman the same. The unemployed man would say his problem was to get a job. Is it possible to combine all these problems under one complete whole? Every problem has a back ground, some combination of circumstances have created the present condition, which it must be remembered is world wide. From 1880 to 1914 were expanding industrially and as all nations expanded markets necessarily contracted. This competition for world markets finally brought about the Great War. Since the war the policy has been reversed and instead of industrial expansion, industrial contraction has occured. Since 1929 world trade has declined 65 per cent. During the past year there has been increased activity in some lines—particularly minerals. The total dividends paid to the company shareholders have also increased and the dividends to holders of gilt edged securities have increased. But there is another side. The Steven's investigation has brought to light deplorable conditions where shareholders and executives have been receiving, even in so called hard times handsome dividends and salaries while the workers have been receiving a mere pittance. As an example only 1.3 per cent of Canadians pay income tax. This is the situation that created the problems. The question is how to deal with the problems.

The wealth of the country is controlled by private monopoly. The speaker then described the workings of a shoe factory where shoes were manufactured for profit. Under the present system the individual worker receives only a small part of the profit compared to the owner of the factory, and the C.C.F. say profit is not the divine right of the owner of the factory. To adjust the whole thing a survey would have to be made of the production and consumption capacity of the whole world, so that prduction and consumption could be kept relatively balanced.

The speaker touched upon the reform proposals of Hon. R. B. Bennett, saying that while unemployment insurance was a move in the right direction, it was not a solution to the problem.

In closing he requested support for the C.C.F., saying that putting C.C.F. policies into effect would not be easy as anyone who has financial interests in anything will not give them up simply because the C.C.F. ask them to.—applause.

A duet "What are you doing for Jesus" was then pleasingly rendered by the Misses Lois and Faye Wilson, Miss Cleo Wilson playing the accompaniment.

Mr. McAfee of Edmonton spoke briefly and in a humerous vein, interjecting his remarks with humerous practical satire on the present economic system.

A violin solo was then rendered by Donald Edwards.

Miss Crang said in part, she was pleased to see so many people on such a cold day. She would speak very briefly and would speak particularly to the young people. How many, she wondered, knew that, in camps controlled by the Department of Defence, there were 48,000 young men and boys, to whom the ordinary channels of industry were closed? These young men and boys came chiefly from Canadian homes and it was a standing disgrace to Canada that they should be in camps doing useful work such as gravelling roads and beautifying parks at the paltry remuneration of 20c a day and board. She understood that they were housed in bunk houses which were flimsily built and in which during winter the extremes of heat and cold had to be endured. These young men and boys were being exploited, African natives being much better off. She protested against the system of blacklisting, by which when a man "kicked over the traces," was denied the accommodation of other camps. The speaker dealt with the ruling of the University Board of Directors, relative to the non-participation in politics of members of the University teaching staff. This, she said was directed against Professor Alexander, who had pronounced C.C.F. views. She reminded her listeners that Premier Bennett had issued $40,000,000 of new paper money, he could just as easily have issued $100,000,000 as the C.C.F. urged him to do, on the credit of the country. But what of the $40,000,000. $1,200,000 of this was allocated to build a police barracks at Calgary. The Calgary people thought a hospital would be more appropiate and wrote the government and asked if they could build a hospital with the money. The reply that they received was that if Calgary did not want a police barracks there were plenty of other cities that did. She did not like the change from the Alberta Provincial Police to the R.C.M.P. When vested interests became threatened it always reverts to force, and there is always a highly paid police force which stands behind a dictator. Ordinary militia soldiers will not shoot down their fellow country men. In a recent Tuxis boy's parliament they stated that the present economic system has no place for youth. In closing the speaker said neither Conservatives or Liberals stood for changing the economic system, but the C.C.F. and Communists stood for production for the use of Canadian people.—Applause.

Mr. Broughton then rendered a solo, Mr. McCauley accompanying on the piano.

Mr. Clifford Lee spoke briefly saying in part, he was pleased to see the formation of a study group here. It was some years since he had become a socialist, his belief in socialism being chiefly brought about by the war question. Wars are fought for trade and the men who fight the battles are not the men who reap the benefits. He believed in the socialization of public services, particularly health services. There are many times when a doctor prescribed medicine for a patient, not only the efficiency of the medicine, but the cost had to be considered. He believed the only consideration should be the efficiency of the medicine.—Applause.

A question and answer period was held after which the meeting closed.

A M MATHESON M L A ADDRESSES TOFIELD U F A

On Thursday last A. M. Matheson, M.L.A. for the Vegreville constituency visited Tofield and addressed a meeting of the Tofield U. F. A. held at the town hall. Mr. Matheson dealt chiefly with finances, public and private and said the present economic system was a debt creating system. Speaking of the Douglas plan, he said the powers of the provincial government were limited by the British North America Act.

The meeting elected Mr. Johnstone Ferguson as delegate to the annual convention which is being held in Calgary.

The same afternoon a meeting of the U.F.W.A. was held, Mrs. Murray being elected as delegate to the U.F.W.A. convention being held at Calgary.

Hornby Plan Described

BRIGADIER-GENERAL HORNBY SPEAKS ON IMMIGRATION

On Wednesday evening of this week, Brigadier General Hornby made a flying visit to Tofield arriving on the 8:33 train from the west and leaving again at 5:30 Thursday morning. He attended a special meeting of the Tofield District Board of Trade and after a brief introduction by the president L. W. Smith, spoke at some length on his immigration plan.

Brigadier General Hornby said that the whole development of Canada was for a larger population. We had railways, roads, public works, parliament buildings, all these things capable of serving a much larger population then we at present had. The needs of Canada were less taxation, elimination of railway deficit and little or no unemployment. The way to get these things was to return to the idea we had four years ago—and bring immigrants. We have spent much money in building up Canada and the only justification was a larger population.

He stated that the British House of Parliament some years ago voted three million pounds annually for Empire settlement purposes and with the exception of a small sum this money had never been used. His particular plan was to have the British Parliament loan money to immigration committees in various parts of the British Isles who would buy one hundred farms in a certain district in Canada and place upon them selected immigrants from their district in Great Britain. Thus there would be a definite link between district in Great Britain and a district in Canada. These immigrants would stay on the farms for five years when they would be considered experienced and encouraged to locate on a farm of their own. There would be an experienced supervisor for each district. Each settlement of farms would cost approximately one million dollars, this amount being spent in acquiring farms, equipment, houses, furniture etc. There would be considerable labor created and the money would circulate around.

Considerable discussion arose after his address, and the following motion, moved by Dr. Law and seconded by Mr. Joseph Rogers was passed.

"That the Tofield Board of Trade endorse the Hornby plan as outlined by Brigadier General Hornby and that we heartily get behind it. And that a copy of this resolution be forwarded to the federal member for this constituency and to the Minister of Immigration, Ottawa."

INTERMEDIATES DEFEAT HOLDEN

Last Thursday night in their third game with Holden this season, Tofield won by the score 7—3.

Holden opened the scoring when Black picked a corner in the Tofield net. Just before the period ended Allan, taking the puck at his own blue line, rushed the length of the ice to tie the score. In the second period Thompson scored on a pass from Edworthy but Allan again tied it up for Tofield. Holden went ahead for the third time a few minutes later when Edworthy scored. Burnett tied the score and in the next minute put Tofield in the lead on a pass from McLaughlin. Allan scored again on a pass from Burnett and the period ended 5—2 for Tofield. In the third period Allan scored on an assist from Bowick and Burnett on a pass from Taylor.

Bob Whyte refereed the game.

NOTICE OF ANNUAL MEETING

Public notice is hereby given that a meeting of the electors of the Town of Tofield will be held in the Town Hall, Tofield, on Friday the 25th day of January 1935 at 8 o'clock p.m., for the purpose of receiving the report of the Mayor, Secretary-Treasurer, Auditor and chairman of the various committees of council for the year ending December 31st 1934.

Dated at Tofield, this 16th day of January A.D. 1935.

J. W. Chapman,
Secretary-Treasurer.

AMISK CREEK

* * * * * * * * * * *

A Happy and Prosperous New Year to each and every one of the Mercury readers, Editor and staff, is the wish we have for all of you, not only for those that read this but for the whole world. We hope this year will bring happiness and joy to the people far and near.

Christmas came and went very quietly on account of the cold weather.

The Christmas tree and program was held in the church on Friday Dec. 27. Much credit is due to the children and young people for the excellent program they presented.

Pearl Patterson, Lily and Olive Haugen, Agnes Annebo, Lily Berg and Glen Olson who attend the Camrose college spent the holidays at their parents home here.

Olive Olson who is studying music in Edmonton spent the holidays with her parents in Shonts.

Mr. and Mrs. I. C. Olson and family, Mrs. R. O. Berg, Mr. and Mrs. E. A. Moen and Mrs. P. O. Flaaten motored to Edmonton to attend the funeral of late Marian Karen Blackburn of Lavoy. Interment took place in Edmonton.

Mrs. I. H. Olson and son Ralph spent Christmas with her daughter Mrs. J. Watt in Edmonton.

Doris Watt of Edmonton spent New Years visiting relatives and friends here.

Mr. and Mrs A. Patterson entertained the young people to a social evening on Saturday December 9. Quite a number were present and everyone reported a very enjoyable evening.

Arthur Annebo who is attending the Agricultural school in Vermillion was home for the holidays.

Professor Solheim from Camrose conducted a service in our church on New Years day. Due to the cold weather the attendance was small.

The Ladies' Aid held their annual meeting at the home of Mrs. J. Annebo on January 8. It was decided that the old officers would serve another year. Mrs E. A. Moen, pres.; Mrs. A. Patterson, vice president; Mrs. P. O. Flaaten sec. treasurer. Mrs. C. Erickson was elected to help the program committee, taking the place of Mrs. L. Rolfstad.

John Kjeering from Grande Prairie has been visiting friends and relatives in this district. He also has been visiting his brother in Ryley.

Mrs. A. Steen and son Alton of Bardo were Christmas visitors in this district for a few days.

Raymond Patterson was obliged to spend Christmas in the Royal Alexandra Hospital in Edmonton. He was operated for appendicitis on the Wed. before Christmas and returned home New Years evening, starting the New Year right.

Mr. and Mrs. J. Berrill and Olsy Jennie visited at the R. O. Berg home on Sunday evening.

Mr. Annebo and P. O. Flaaten are among those that installed new radios for Christmas.

CORRECTION

In the recent list of floral offerings relative to the death of Mrs. T. L. Munro, the name of Mr. and Mrs. J. Ingram was inadvertently omitted.

NOTICE OF ANNUAL MEETING

Public notice is hereby given that the annual ratepayers meeting of the Tofield School District No. 1030 will be held in the Town Hall, Tofield, on Friday January 25th 1935 at eight o'clock p.m.

Dated at Tofield, this 16th day of January A.D. 1935.

J. W. Chapman,
Secretary-Treasurer.

FARM WANTED.—Person wishes to rent farm. Willing to pay all current taxes and half crop basis. Half section preferred.—Apply to Mercury Office. 50p

Local & Personal

Two ladies' curling rinks are playing in the bonspiel in Edmonton this week. The personnel of the rinks are: Mrs. Brace, Mrs. Calvert, Mrs. Jobb and Mrs. Rogers. Mrs. Hammond, Miss Malcolm, Mrs. Biernes, and Mrs. Law.

Miss Loret Ross visited the city on Thursday.

Constable and Mrs. Davies and family arrived in town last week.

The Jolly Eight bridge club met at the home of Miss A. Lindsay on Wednesday evening.

Quite a number of Tofielders attended the Old Timers Banquet in Edmonton.

Quite a number of Tofielders are receiving medical attention in the hospital. These are: Thelma Noland, Mrs. J. B. Warner, Mr. J. Robinson and Pat Moan.

Mrs. A. Moan returned to the city after spending some time here.

Mr. and Mrs. Geary, Miss Crang, Miss Hooper, Mr. McAfee and Mr. Lee were entertained to dinner after the meeting on Sunday at the John Lee home.

Mrs. T. R. Murray is attending the U.F.W.A. convention at Calgary as delegate from the Tofield local. Mr. T. R. Murray is representing the rural credit society.

* * * * * * * * * * *

LINDBROOK

* * * * * * * * * *

Miss Chrissie Robinson, daughter of Mr. and Mrs. Robinson was taken to the hospital last week for an x ray photo to be taken. It seems whilst playing at home she hurt her neck, seemingly very badly, but we are glad to say the xray showed nothing very serious and the patient is coming along fine now.

Mr. Leslie Bailey, son of Mr and Mrs J. Bailey of Lindbrook was taken to the hospital last week and operated on for appendicitis. We hear that he expects to be home on the 17th so that sounds as if he is progressing favorably.

Our other "scald" patients are nearly O.K. now.

Miss Edna Gray has been at the home of Mr. and Mrs. E. Andersen here whilst Mrs. Anderson is recuperating from her injuries.

So much for our medical sheets the less we see of that kind of stuff the better it is.

Now to the Department of Education. The annual ratepayers meeting of the Lindbrook S D was held at the school 2:30 p.m. Jan. 11. Mr. Wellington Glenn, retiring trustee, retired and then took it on again for another three years, he'll soon be eligible for the long service medal. The usual business was done and the annual question of moving the school of course had to come up. It seems that before anything can be done about it, that the Department in Edmonton insist on a permanent site and in the event of that being decided will do what they can, that is if by a vote of the ratepayers it is decided to do so. A resolution was passed calling for a general meeting to be called to discuss and settle on the site business, so watch out for notices if interested.

Mrs. W. Glenn left last week to visit her mother Mrs. Swain and Mr. and Mrs. J. Leahy and family at the coast.

Miss Doris Anderson entertained a party of young friends to tea one afternoon this week. The occasion being her 10th birthday. Many happy returns, Doris.

RICHARD SECORD DIES SATURDAY

One of Edmonton's pioneer citizens and vice-president of the firm McDougal & Secord, Ltd., Richard Secord, 75, 9845 105 st., died at 12:00 o'clock mid-day Saturday after a short illness.

A descendant of Laura Secord, who was his great great aunt, and whose name is honored in Canadian history, Richard Secord was born in Brant county, Ont. on July 19, 1860. After receiving his elementary education in the public schools of his native place, he afterwards took a course at Brantford Collegiate institute. With scholastic honors freshly won, he set out for the Canadian Northwest.

Mr. Secord is survived by his widow, formerly Miss Annie York of Edmonton, whom he married in 1891; three daughters, Mrs. A. C. McFayden, Mrs. Geo. Keltie and Miss Isabel Secord of this city, and a son, Richard, farmer, of Spruce Grove.

Mr. Secord also leaves several brothers and sisters, including Mrs. Mary Pratt, Mrs. Alice Hoyle, James Secord of Tofield; John of Athabaska, Thomas and David.

Behind the Hog

By A.B.C.

If no curlers smiled, and no curlers cheered, and no curlers helped us along.
If each curler looked after himself, and the good rocks all went to the strong.
If no curler cared just a little for you, and no curler thought about me.
And we stood all alone in the battle of stone, what a dreary old world this would be!

—o—

Some of our boys curl their best the first six days of the week, our rink is closed on Sundays.

—o—

Knocking is constructive at the rink only when done with hammer and nails.

—o—

Most curlers owe everything to their wives, especially on pay day.

—o—

Do you know a six letter word meaning kick in the pants. Hooch boys, hooch!

—o—

Little dabs of powder
That you scarce can see,
Makes the curlers of fifty
Act like twenty-three.

—o—

Theme song of the two ladies' rinks at the Edmonton spiel:
Oh you city curlers,
Oh you blooming curlers,
You throw your rocks along the ice, and do it, oh so wise!
We wish you all the luck there is,
But don't take every prize.

—o—

Aftermath of the oysters. We welcome you to our banquet, and hope you'll enjoy it and try to come back again for the next one—if your tummies don't hurt bye and bye.

—o—

And can you keep a secret, I asked a dame who curled.
She answered, yes, you bet I can,
I'll TELL THE COCK-EYED WORLD.

—o—

Truth may be stranger than fiction, but it isn't half as popular.

—o—

When trouble is brewing at the rink, keep still; imprudent speech has done more harm than gunpowder.

—o—

A curler may not be too old to learn, but too old to realize it.

—o—

My mind may be untrammelled, free,
Without a jail or jailor,
And yet of no more use to me
Than cloth without a tailor.

If freedom merely means to me
The right to think, but not to say,
Then thought indeed must surely be,
A harmless and diverting play.

What value are the thoughts we think,
Unless expressed in printers' ink.
The plans and visions of the head,
Unless perchance explained and said.

If each must screen from mortal sight,
Through fear of law or iron might
His intellectual dynamite.
The blinded eyes of helpless men
Will never see and never can.

—o—

THE MERCURY

PRIZES FOR BEST WRITTEN PLAYS

The Carnegie Trust Fund Play Writing Competition, conducted by the Department of Extension of the University of Alberta, closes on February 2nd, 1935. The prizes offered are $125.00 for the best three act play; $75.00 for the best one act play; $50.00 for the third best play chosen from either group. The judges may withhold awards in any class, if they feel that the plays submitted are of insufficient merit to justify an award.

This is the third play-writing competition conducted by the Department since the Carnegie endowment was made. A. F. Key of Drumheller won the highest award the first year, D'Arcy Marsh of Calgary second place, and E. Church and G. Sterndale-Bennett of Lethbridge won third prize for their play written in collaboration. In the 1934 Contest, Elsie Park Gowan of Edmonton won first prize for her one act play "The Giant Killer," E. J. Thorlakson won second prize with Derelict, and A. F. Key third prize with X.O.X., a political satire. A special prize was awarded to Georges Bugnet for his French "efaite."

A number of the plays submitted to the Carnegie Competition have been produced in various places in Alberta. It is hoped that the entries this year will have real merit and that it will be possible to make an award in every class.

Full particulars regarding the Competition may be obtained from E. A. Corbett, Director, Department of Extension, University of Alberta.

SLEEPING SICKNESS CASE IN EDMONTON

Mysterious and dread disease, encephalitis lethargica, commonly known as sleeping sickness, has made its appearance in Edmonton, the victim being a middle-aged woman who is now confined to a city hospital. It is the first case in Edmonton for some years.

According to Dr. R. B. Jenkins, city medical health officer, the mortality of the disease is high and the incidence low but growing. The problems of origin and cure have not yet been conquered by medical science.

Several years ago, Winnipeg had an epidemic of the disease but there is no reason to believe, as yet, that Edmonton will have a similar experience.

Symptoms of the disease are a progressive lethargy or stupor, accompanied by double vision due to the effect on the optic nerves. While mortality is high, the victim sometimes recovers but there are, in such recoveries, often recurrences a year or two later with fatal results.

Dr. M. R. Bow, deputy minister of health, stated that this was the first case of sleeping sickness to be reported in the entire province since 1933. In 1932 and 1933 there were three scattered cases.

BARLEY VS WHEAT FOR GROWING PIGS

(Experimental Farms Note.)

Wheat has been compared with barley for hog feeding at the Dominion Experimental Station at Scott, Sask., with a view to ascertaining the relative value according to weight. The wheat used graded "feed" and the barley 3 and 4 C.W. All grain was chopped and comparisons were made pound for pound. In two tests each grain was fed alone and checked against a mixture of oats and barley chop and in two further tests each grain was combined with oats. In all cases where oats were mixed in the ration the proportion was one part of barley or wheat to three of oats at the beginning of the feeding period and the oats were gradually replaced with the other feed until at the end of the feeding period only one quarter oats was used to three quarters of other feed.

In the first instance, where the grains were fed alone, the average of the two tests showed gains to be 3.6 per cent higher in the lot getting wheat and 5.5 per cent lower in the lot getting barley as compared with the grains resulting from the use of the oat and barley chop mixture mentioned. The chop required per hundred pounds gain was 4.9 per cent less in the case of wheat and only half of one per cent less in case of barley as compared with the mixture.

When the two grains in question were combined with oats, 1.5 per cent greater gains were produced by use of wheat as compared with the oat and barley mixture, and the chop required per hundred pounds gain was 1.8 per cent less where the wheat was used in the mixture with oats in the place of barley.

The gains produced in these trials indicate feed wheat to be more valuable than medium quality barley for feeding hogs.

QUINTUPLETS RANK HIGH IN BEST 1934 STORIES

TORONTO, Jan. 5.—Birth, death and love were the triple core of world news in 1934. But only birth was big enough to rate as the year's greatest Canadian story and take its place in the top rank of the world's best as well.

Late in the year telegraph editors of Canadian daily newspapers were asked by the Canadian Press to express an opinion on the six best stories of the year from a world standpoint and the six best from the point of view of Canadian significance.

Editors were nearly unanimous in putting on top of world news the Marseilles assassinations. They were nearly unanimous too in giving the Dionne quintuplets top place in domestic news. And the five little girls won world ranking as well.

Selections in order of preference were as follows:

World news:

(1) Marseilles assassinations; (2) Morro Castle disaster; (3) British royal wedding; (4) Hitler blood purge; (5) Dollfuss assassination; (6) Dionne quintuplets.

Canadian news:

(1) Dionne quintuplets; (2) Premier Brownlee case; (3) Labatt kidnapping; (4) Ontario elections; (5) H. H. Stevens' resignation; (6) mass buying probe.

Birth on a May morning near the settlement of Callender, Ont., of five tiny daughters to Mrs. Oliva Dionne was named more often than any other story. The little multiplets were virtually a unanimous choice in the Canadian list and a majority of editors ranked their advent and survival as world news of high order.

As one points out: "The Ontario backwoods story was bright spot for front pages laden with crimes and wars and rumors of wars. Probably few editors saw more than a 'box feature' in it the day it broke, but it grew. And it will be a good sound human interest yarn as long as the quintuplets live."

Editors listed a wide variety of stories, from Pacific coast sea serpents to prairie drouth and Atlantic rum-running, but there was little doubt as to the top yarns in the Canadian list.

In the world record the running was closer. Arrest of Hauptmann on charge of killing Baby Charles Lindbergh, the sensational air races from London to Melbourne, death of King Albert of the Belgians, the Stavisky riots, the America's cup races and Dillinger's killing pressed for inclusion over stories finally chosen.

HEALTH INSURANCE DRIVE IS PLANNED

On his return to Alberta around the end of January Dr. A. C. McGugan of the department of health will take charge of the campaign throughout the province in connection with the health insurance scheme which was drafted by the committee of the house and tabled at the last session of the legislature, it was announced Saturday by Hon. George Hoadley, minister of health.

It is expected that public meetings will be held at between 25 and 30 pivotal points in the province.

All organizations of various kinds as well as general public will be invited to attend these meetings and take part in the discussions. The minister and the deputy minister and possibly others interested in this subject will on occasion and to the degree possible be present at these meetings.

RECEIVE WORD 3 DEATHS

WINNIPEG, Jan. 2.—News of three deaths, all by accident, came to two families living in one house here Wednesday almost simultaneously. While Mrs. J. H. Young was consoling Mrs. Mike Kalinski on the death of her husband, word came to the house Mrs. Young's two brothers, Cyril and Kenneth Chaston, had been killed in a snowslide at Revelstoke, B.C. Kalinski was believed to have been struck by a freight train or switching engine on the outskirts of the city here.

MENTAL HEALTH

No one can be truly healthy unless he enjoys health of both mind and body. We have minds and we have bodies, but these are not separated the one from the other; rather do they work together, either helping or hampering the individual in doing his best.

Health is the condition when all parts of the body are working together in harmony. If the harmony is lost, ill-health follows, and where there is actual discord, we have disease. Our own personal happiness and our usefulness depend, in a large measure, upon our health which, to repeat, means health of mind and body.

The past century has witnessed advances in medical science which have given such an understanding of disease as to enable us to go far in both the treatment and prevention of disease and in raising the standards of personal health. In no branch of curative medicine has there been greater advance than in the care of the insane.

It is not so many years since mental disease was considered as a disgrace. There are still those who feel that their family is disgraced if one of its members requires treatment in a mental hospital. A similar attitude used to exist with regard to tuberculosis.

Mental disease is not any different from physical disease except that in the one case, it is the mind rather the heart or kidneys which is not functioning properly. Just as long as mental disorders were looked upon as evidence of possession by a devil, those suffering from such disorders were treated with cruelty. With an understanding of the true nature of the sufferings of these patients, there was developed a more humane care until we now have the mental hospital rather than the asylum.

The foundation of mental health is laid in childhood. It begins with the earliest training of the child in regular habits of feeding; later comes the establishment of other habits, out of which the child learns to share with others; to do without things now so as to have pleasure later on; to work for the joy of getting things done; to accept disappointments.

The world in which we live is a very real place. We have to meet many difficulties. If we secure mental health through proper training in childhood, we shall face these difficulties and not run away from them or keep to ourselves. Running away means trouble through ill-health. Facing up to reality means happiness and mental health through a satisfactory adjustment to the world in which we must live.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

[illegible]

[illegible] miles will be covered by the [illegible] cruise. This is [illegible] twelfth annual [illegible] cruise.

Four years old and still breaking records, the [illegible]-ton Empress of Japan, newest and biggest of the Canadian Pacific Steamship Pacific fleet, made the run, Honolulu to Vancouver in six days, 16 hours, [illegible] minutes, putting the ship in possession of speed supremacy for all legs of the Pacific crossing.

R. Cornthwaite, fireman, Canadian Pacific Railway, Engineer James Y. Ross and Yardman J. Brophy, Port Arthur, aboard yard engine "[illegible]" pulling the empty cars from Port Arthur to Fort William, saw a woman lay her head on the rails just ahead of the engine. Cornthwaite leapt through the cab window and from the front floor board jumped just in time to drag the woman clear of the track.

Miss Georgia Englehart, slim girl Alpinist of New York, this summer climbed Mount Assiniboine, highest peak in the Canadian Rockies, and in doing so completed her 100th ascent in the Banff-Lake Louise area. Two years ago she set a new woman's endurance championship by scaling 38 peaks in a single summer in that section.

Low winter fares good from December 15 to February 28 are being offered by the railways covering round trips to Canada's Evergreen Playground, that favored region in British Columbia called Vancouver Island, with the beautiful capital of the province, Victoria, and all the sports attractions of summer available during the winter months brought within the purse limits of the average Canadian.

The big event of 1935 will be the pageantry and picturesque functions of the 25th anniversary of King George's accession to the throne, set for May 6 next, which will continue until well into July. Summer sailings of Canadian Pacific liners have been planned to connect with these events.

The Laurentians, Eastern Canada's winter playground, face the biggest season in their history with an ambitious programme of ski events calling for 19 meets of various kinds, not counting the Dominion and international intercollegiate championships extending from January 1 to April 21, it is announced by the Laurentian Zone committee of the Canadian Amateur Ski Association.

Recommendation of immediate implementation of the Beatty Commission's report for professional ranks of the Civil Service of Canada was unanimously concurred in at a business session of the Professional Institute of the Civil Service held recently at Ottawa.

THE TOFIELD MERCURY
A Weekly Newspaper Published At
Tofield, Alberta
W. Worton, Publisher

THE C.C.F.

WHILE READERS of newspapers and periodicals have read much of the activities of the Canadian Commonwealth Federation, little activity of this particular branch of political thought has appeared at Tofield. Some two years ago a meeting was held here at which Professor Alexander outlined the platform of the C.C.F. We have not a complete manifesto before us, but perhaps a programme of advanced socialization would describe their policies as well as any other phrase.

While at first it would appear as if there would be a fusion of C.C.F. and U.F.A. forces and thought, this does not now appear to be so, though the two schools of thought have much n common. At a recent meetng of those in high council of the U.F.A. it was decided that the U.F.A. for the present at least would maintain its individuality and not officially merge with the C.C.F.

The meeting on Sunday at the Variety Theatre was a straight C.C.F. undertaking and is evidence, even if there are few C.C.F. members in the different parliaments of Canada, those sponsoring this particular political thought are active and alert.

It is a matter of history that many of the privileges we enjoy to-day were at one time considered radical proposals. Free and compulsory education for example, something the present generation takes for granted, when first suggested was looked upon as a most radical proposal. Compulsory free education is not so very old either, yet so accustomed are we to including it among our social advantages that were a suggestion to be made that it be taken away, a great cry would arise. So it is wise when we listen to and read of C.C.F. orators not to be too dogmatic in our thought and conversation, lest we err like those people of little more than half a century ago, when they said education would be the ruination of a large number of children of poor parents.

On the whole there was little to complain of in the addresses on Sunday. Anyone who is conversant with present conditions, and who is not? know that reforms are needed—desperately needed. Therefore it is easy to work up sympathy for the unemployed, both in and out of relief camps; to wish farmers and fisherman better prices for their products and to hope that the opportunity will come quickly for the housewife to make both ends meet and perhaps lap over a little.

There was, however, one note struck at the meeting on Sunday which does not make for harmony, viz: Miss Crang's reference to the R.C.M.P. Whether or not it was wise to change from a provincial body in the policing of this province is of course a matter of opinion, and any one is free to express his or her opinion regarding the change. It should be realized however, that the R.C.M.P. are not only the servants of law abiding people but friends also. In the first place they are chosen very carefully and are then compelled to go through a rigid course of training, which among other things teaches them to handle difficult situations with wisdom and restraint. Not infallible in every single instance perhaps, but it is safe to say that for every head the police have in emergency situations been compelled to "crack," they have in the regular course of their duty, saved more serious injury to thousands of other people. There is no advantage to be gained by those desiring advanced socialization by casting reflections on the police force, for unless people in general become more idealic than they are at present, we would be in a sorry mess without them.

WET PAINT

The "Wet Paint" sign is not merely a piece of cardboard with a crude scrawl cautioning against contact; it was indeed, neatly printed, with ornaments in several colors. An attractive warning, one might say, paradoxically.

In fact, the "Wet Paint" sign proved to be an attraction. Many seemed to look upon it as an urgent invitation to test its veracity. Even as you and I.

"Wet Paint," we read, and immediately we touch the paint with the tip of the finger to see if it is really wet.

I have often wondered why.

Surely not because we suspect the sign of telling a lie. Only a fool of the deepest dye would try to fool the public that way. No; when we touch the paint we want to find out not so much whether the paint is wet as to whether it is still wet. No doubt it was wet, but we are hoping it is no longer wet.

We are hoping conditions are better than the sign says they are.

And that is what faithful hearts are ever believing; always trusting that the times are better than the signs of the times. Gloomy and dark the signs often are, but we cannot give way to pessimism when we believe that man's destiny is of divine origin. Things must be better than they look, for we have an Almighty Father.—Exchange.

"MUMMY WHEAT"

Our Research Department has been able to obtain a small quantity of genuine ancient dynastic Egyptian "Mummy" wheat from Sir Ernest Wallis Budge, late keeper of antiquities, British Museum. This wheat is 3,100 years old at least. The Dominion Seed Branch Laboratories, Winnipeg, submitted part of the sample to a very careful germination test. After six days the kernels disintegrated into dust and mould proving once again that genuine ancient Egyptian wheat taken from tombs will not grow. A photograph of spikelets and kernels of this "Mummy" wheat will be forwarded to any interested farmer. Write to the Research Department.

UNITED CHURCH ANNUAL MEETING

On Tuesday evening 15th of Jan. the annual congregational meeting of the United Church was held.

Although the evening was cold there was a splendid attendance of members and adherents. The reports of the year's activities in all the branches of our church-life were well received and highly commended.

1934 has been a good year in the congregation. The services have been well attended and the messages of the Rev. D. K. Allan appreciated.

The choir has rendered valuable service by their devotion and musical assistance.

The Sunday School was never better equipped. The superintendent, Mr. W. C. Swift and his workers are rendering a very important service to the boys and girls.

The Ladies' Aid played a great part in the year's financial success and the W.M.S. keeps burning brightly the missionary spirit.

The Young People's organization has a great place in the hearts of its members.

The meeting was bright and brimful of enjoyable facts.

All financial obligations have been met and a considerable increase in giving reported.

The following gave reports:
Session—Rev. D. K. Allan.
Board of Stewards—Mr. John Lee.
Ladies' Aid—Mrs. Webb sec'y. Mrs. L. Smith read the treasurers report for Mrs. John Lee jr.
The Sunday School—Mr W. C. Swift, Mr. Harry Baker, treasurer.
C.G.I.T.—Cleo Wilson.
Mission Band—Mrs. D. K. Allan.
W.M.S.—Mrs. W. C. Swift. Mrs. L. Smith, treasurer. Mrs. J. Ferguson spoke on the report.
Y.P.S.—Miss M. Stuart.
Choir—M. L. Smith.

A most enjoyable social half hour was spent at the close.

The following are the stewards for 1935:—Messrs Bert Lovell, John Lee, L. W. Smith, J. Ferguson, W. C. Swift, M. Jacobs, F. M. McHeffey, C. Burchard, W. Billman, H. Baker, W. Hill.

BEAVER LAKE COUNCIL MEETING

The regular monthly council meeting Municipal District Beaver Lake, 486 was held at Ryley Jan. 12, 1935.

All councillors present.

After the adoption of the minutes the usual general business was carried out as folows:

Fare for Tehis family from Calgary authorized at $30.00.

The secretary was instructed to accept payments on consolidations up to January 31, 1935.

Old age pension was recommended at $10.00 per month for Oletsa Hewko and Mrs. Sadie Lupina.

Increased Mother allowance authorized for Mrs. Romanissen at $15.00 per month.

Relief was refused Mrs. Skorochid.

Hay lease for Poe refused Mrs. Gordoch.

Secretary and Reeve empowered to borrow $3000.00 for Municipal account and $3000.00 for School account.

The council re-established their rate of payment for meetings and road supervision in accordance with the act.

J. S. Kubin was authorized to receive $25.00 for weed inspection in 1934.

Geo. Yullum refused to accept $13.84 for weed inspection 1934 as authorized.

A motion to give the secretary a bonus of $100.00 was defeated.

The date for the next meeting was set for February 9 1935 at 2 p.m.

The usual bills were passed for payment.

The secretary was instructed to write all those having received seed grain, asking for immediate payment.

Adjournment at 6:15 p.m.

LUCKLESS SR HOCKEY TEAM LOSE AGAIN

The luckless sr. hockey club again went down to defeat before Holden on Monday night by the score of 4—3. Considering the weather a fair crowd was in attendance and for the first period at least were given a good display of the winter pastime. The remaining two periods being rather ragged hockey.

Holden opened the scoring when Black scored on a long shot. Tofield soon got the equalizer and then went into the lead by Kjenseens and McLaughlin. Holden then tied it up on a goal by McGuire who stickhandled through the defence and gave Bowick no chance to save. Just before the period ended the locals again went into the lead when Glover and Worton combined to score with Glover scoring on Worton's pass.

The second period saw the Tofield team go to pieces and Holden with well planned attacks scored two more goals and the teams took the second breather with Holden holding a one goal lead. In the third period the locals tried desperately to even the count but could not beat McClintock the visiting goalie who was right on. Holden added one more to their total in this period when Hurum batted in a loose puck.

Bud Hannan handled the bell to the satisfaction of all.

TOFIELD INTERMEDIATES STILL UNDEFEATED

On Tuesday January 15 the Tofield Intermediates, minus two of their star forwards, held Holden to a scoreless draw. Luck seemed to be down on the Tofield team that night. The game was slowed down considerably by the snow which fell throughout the game, it was difficult to control the puck which sometimes disappeared in the snow. Don Allan had a very unfortunate accident about half way through the final period. Rushing in to get a rebound he fell over Dodds in the Tofield goal and broke his arm.

Line-ups—Tofield Dodds, Dunn, Piscott, Smith, McCauley, Allan, Whyte, Lee, Bowick, Taylor, Biernes, Letourneau, Swift.

Holden—Moore, T. Foran, McIsaac, Skakum, Coates, Emond, Allan, C. Foran, Thompson, Edworthy, J. Foran, Black, Dorin.

Referee—Ed. Stuart.

He: "The cutlet is cold again, darling. What would you do if I scolded you just a little?"

She: "Make it hot for you, dearest."

SPORT NEWS

Behind the Hog

By A.B.C.

Speaking of fees boys, money is only a symbol, But it don't seem such a symbol thing to get hold of these days.

Hats off to Peggy Hammond and her bonspeil rink, the best rink of visitors at the Edmonton speil, Page the Scotch. And now boys you can put your hats on again while we tell you the bad news about the Ash Cup, Edmonton 27 Tofield 17, again I say Page the "Scotch."

We would willingly have all curlers perfect, and yet we amend not our own faults.

Always be late for your games, this may be your only chance for publicity.

We are still using our grains of salt, but we find them much improved by dropping them in a stein of beer.

You may be KING of your own rink,
And ACE high with the pack.
But if you want a Gorgeous QUEEN,
You've got to have the JACK.

And look all you curlers, you don't have to go on a diet to lead a fast life.

Cold Weather Curling.
I have to work, I used to like to play, but now I'm getting old.

We are kind of getting our eggs all in the one basket, we are about to run out of jokes, and no reserve to draw on. If you know any good ones come up and see me sometimes.

My experience leads me to conclude that we have no curling problem in Tofield that cannot be settled by reasonable discussion.

Women curlers are as a rule more sensible than the men, because they have more time to sit around and think.

Strong well built men curlers make amiable husbands. So do strong well built women.

This week we are starting on the artificial ice question. This a curse to the community and a menace to the province. Yet I know there is a little cube of it in the glass by your side. Artificial ice has frozen together the curling and golfing season at both ends, curling is now continuous. The January thaw gives us no respite. There may be balmy days in February and March, tempting the tender shoots from the earth, the bear may come forth and see his shadow in the sun. But the bear's pregnant gesture means nothing to our skip, whose stern commanding voice is heard over the 'phone, warning us for duty at the rink at 7:45 p.m. To-day we must take our foot from the hack and insert on No. 1 green. We must lay aside the besom for the brassie, with only sufficient time to change our rubbers for the spikes. On the eve of all Fools day we sweep the skip's last stone through the house, in the afternoon we drive off the first tee into casual water. Not a day for repose, for meditation, for prayer. Why not put an end to it all. Take up chess, go in for bridge, collect Stamps. No one is compelled to golf or curl either, it is a free country, see you. I tried to escape. I consulted Doc with his bedside manner of a company sergeant major. Too much oats, too much smoking, too much gin, set he, take more exercise. Why, man, I should say hoot mon, you can curl every day till the golfing season begins. My spiritual adviser is a saintly silver haired man, and not a drop of Scottish blood in his veins. And yet, when I began to tell him my troubles he took pad and pencil and began drawing circles, one within another to illustrate his marvelous double wick shot made at the eighth end on Tuesday night. We will continue with this subject next week, or we may have another brain wave by then. It all depends upon the weather.

SERVICE WITH A SMILE.
WE AIM TO PLEASE.

TOFIELD PLAY R.C.M.P. HOCKEY TEAM

Flashing a passing game unequalled in any of their performances here this winter, and being supported by stellar goal keeping by Bowick and a sound defense by Glover and Stutzman, the Tofield senior hockey team won from the R.C.M.P. team of Edmonton by the score of 8—1.

In all fairness to the visitors it should be said the side of the rink bothered them considerably, they being used to playing on a much larger sheet of ice. On a larger sheet of ice the score would probably have not been so one sided.

Even though outscored the visitors were in the game all of the time and used their bodies to good effect on the incoming forwards. The game was played at a fast clip throughout.

The first period opened fast and the game was not many minutes old before Craig had tallied for the locals. The visiting goalie was having a busy time and about mid-way through the period Spratt put the locals two up. McLaughlin, right-winger, then scored two in succession, one on a solo effort and the other on a pass from Worton. The period ended 4—0 for Tofield.

The visitors put on the pressure in the second period and before the period was very old, Elick, who played a stellar game at centre for the visitors beat Bowick on a fast drive. Scores for the locals then came in fairly rapid succession. Worton scored on an assist from Craig and Craig scored on an assist from Worton. Burnett caught a rebound and scored and repeated on a pass from N. Glover.

It looked as if the visitors were going to be swamped by an avalanche of goals, but in the last period, having somewhat got used to the rink, they staved off attack after attack and were able to prevent further goals being scored against them.

Line-up—R.C.M.P.—goal, Simoneau; defence, Keen, MacDonald; forwards, McAdam, Elick, Marson, Davis, Treadhill, Lawford, Shandruk, Wilson.

Tofield—goal, Bowick; defence, L. Glover, Stutzman; forwards, Craig, Worton, N. Glover, Burnett, Spratt, McLaughlin.

Referee—A. Clutterham.

A return game is expected in the near future.

INTERMEDIATES DEFEAT RYLEY

Although the thermometer registered forty-five degrees below zero, Ryley and Tofield played a scheduled game on Friday last, Tofield winning by a score of 5—3. Tofield got away to a fine start with three goals to their credit before Ryley scored once. Ryley, however, scored two straight and the second period ended three to two for Tofield. Tofield scored twice in the final period and Ryley once. This was the first game this season in which the locals have taken the lead and kept it.

For Tofield the scores were made by Bowick 1, Swift 1, Mc Laughlin 3. Assists were credited to McCauley to McLaughlin.

For Ryley, Anderson, Norton, Findley. Assists were credited to Halbert to Findlay.

INTERMEDIATE LEAGUE STANDING

	P	W	L	D	Pts
Tofield	7	6	0	1	13
Holden	9	3	5	1	7
Bruce	5	3	2	0	6
Ryley	5	0	5	0	0

RINK FROM LOCAL CLUB WINS VISITOR'S TROPHY AT EDMONTON SPIEL

Two rinks skipped by Mrs. Brace and Mrs. Hammond from the Tofield Ladies' Curling Club played at Edmonton last week in the Annual Ladies' Bonspeil of that city. Meeting in the semi-finals of the Visitors' event, Mrs. Hammond's rink emerged winner over Mrs. Brace's rink by the close score of 10—9. Playing another visiting rink in the finals, Mrs. Hammond's rink won out, capturing the Visitors' trophy. Handsome prizes accompanied the trophy.

A FEW YOUNG TOMS FOR SALE —From A grade imported toms and Alberta hens from prize winning flocks. Reasonable prices. —Apply to Mrs. John Bowick, half mile north of Tofield school.

LOCAL NEWS

Leslie Bailey returned from the hospital where he underwent a operation for appendicitis.

Miss Swanson of Bruce visited with Helen McCauley for the week end.

Miss Thelma Jobb entertained at tea on Sunday afternoon.

Miss Jessie Munro is visiting at the Calvert home for a week.

The snow plough from Edmonton came as far as Tofield this week.

Quite a number of Tofielders attended the old-timers' dance in Edmonton last week.

Miss C. Benesure of Vegreville is visiting at the Davies home.

Mrs. Chapman visited the city for the week end.

We are glad to hear that Mrs. McCauley is up and around again.

We understand that the Tofielders who are undergoing treatment in the hospital are all improving.

Mrs. Thomas entertained the Intermediate hockey team after the game on Friday.

Mr. Alan Dunn spent Monday and Tuesday with his brother Frank here.

Mrs. Eddie Hicks entertained a few of her friends at bridge on Tuesday evening.

Born to Mr. and Mrs. Regehr, on Monday Jan. 21, a son.

Mr. and Mrs. Davies entertained the R.C.M.P. hockey team after the game on Wednesday night.

The Jolly Eight bridge club met at the home of Thelma Jobb on Thursday evening. The prizes for the month were won by, 1st. Annie Lindsay, 2nd. Thelma Jobb and consolation Mrs. Coatta.

BARDO

Born to Mr. and Mrs. Loyal Kaufman on Jan. 15 a daughter. Congratulations.

Mr. and Mrs. Lars Sorgaard and children of Grande Prairie are visiting here.

The L.D.R. met at the home of Mr. and Mrs. Haukedal on Wednesday last. Despite the cold weather most of the members attended and an enjoyable afternoon was spent.

Misses Mable Foshaug and Nora Rude and Messrs. Arnold Johnson, Arthur Moen and Olaf Anderson attended the Young People's convention in Camrose over the week end.

Messrs. P.B. Anderson, Olaf Anderson and Edward Steen spent a few days of last week in Edmonton.

The annual school meeting of the Anderson S. D. was held last Saturday. Mr. Ezra Stauffer retiring trustee was succeeded by Mr. I. B. Moen.

Mr. M. B. Ness attended the U.F.A. convention in Calgary last week.

Mr. and Mrs. A. Steen and Buddy were supper guests at the I. B. Moen home Tuesday.

Dinner guests at the B. M. Anderson home on Sunday were, Mrs. O. Hagen, Mr. O. M. Hagen, Mr. and Mrs. T. Sorgaard and children, Rev. Bjelde, Harold Hjelter and Eldon Moen.

Mr. and Mrs. C. J. Rude and Miss Nora Rude were dinner guests at Mr. M. Eide's on Thursday.

Mrs. Clara Jevning spent a couple of weeks visiting with her father, Mr. M. Eide.

A painful injury befell Mr. T. Rorem one day last week, when a big lump of coal crushed his thumb against the side of the box, almost splitting it. It is healing nicely now.

There are two cases of Chicken Pox in this district. The Hendrickson and Finseth children are the unhappy victims.

CARD OF THANKS

I wish to take this opportunity to express my sincere appreciation to all the friends, who kindly helped to brighten my stay in the hospital in December, for flowers, fruit, cards and letters. Thanking one and all.

I remain yours sincerely,
Mrs. Sears.

FIRE DESTROYS SECOND HOME IN TOFIELD WITHIN MONTH

The ravages of the fire demon once again was made manifest at at Tofield in the early hours of Saturday morning last, when the house and most of the contents of William Marichiew, Tofield shoemaker were destroyed.

Mr. and Mrs. Marichiew were at the home of Mrs. Marichiew's parents and the only occupants of the destroyed home were two young men.

They were awakened by smoke and found difficulty in making their way downstairs so jumped out of the window into the snow.

They ran to the home of Mayor Brace, close by, and gave the alarm. Mayor Brace telephoning the alarm into central. The fire bell was rung and the chemical engine taken to the scene of the fire but arrived too late to be of assistance.

The night was bitterly cold the thermometer registering around the 40 degree below zero mark.

EASTERN STAR OFFICERS INSTALLED

The officers of Ionic Chapter of the Eastern Star held its annual installation ceremony on Monday evening Jan. 21st. Mrs. McLaughlin was the installing officer and was assisted by Mrs. Biernes. The officers are; W.M. Mrs. J. Lee; W.P. Mr. J. Lee; Assoc.M, Mrs. J. G. Jobb; Assoc.P. John Chapman; Secy. Mrs J.O.A. Letourneau; Treasurer, Mrs. M.C. Hammond; Conductress, Miss T.L. Noland; Assoc. Conductress, Mrs. W.A. Webb; Chaplain, W.A. Webb; Marshall, Mrs. E.M. Hardy; Organist, Mr. O.P. Thomas; Adah, Mrs. O.P. Thomas; Ruth, Mrs. A.C. Dodds; Esther, Mrs. A. B. Clutterham; Martha, Mrs. F.F. Law; Electa, Mrs. H.L. Law; Warder, Mrs. T.W. Taylor; Sentinel, Mrs. D.W. Jacobs. A social time was had after the ceremony.

LIBRARY NOTES

Books added this week to the local library are:—

Air Service Boys Over the Enemy's Line, by Chas. A. Beach; The Leader of the Lower School, by Angela Brazil; The Golden Road, by L. M. Montgomery; Dead Men Tell no Tales, by E. W. Hornung; Air Service Boys Over the Rhine, by C. A. Beach; Tom Slade with the Colors, by P. K. Fitzhugh.

DANCE BILLED FOR FRIDAY OF THIS WEEK

The New Moon-Glow Minstrells Five Piece Band announce a dance at the Variety Theatre to-night Friday. Peppy modern music will tingle your toes while some old-time numbers will be added for good measure. See advertisement in another column.

BLOOD TESTING POULTRY FLOCKS FOR DISEASE

We all had nice complimentary remarks to make regarding the spell of cold weather recently experienced but sitting on a box in a hen house making blood tests of chickens with the themometer reading 30 to 40 below, would at least give one inspiration and probably add to wealth of detail. So says F. Newcombe of Vegreville, district agriculturalist, who is in the district this week blood testing poultry flocks for pullorum disease. In th districtt he has 24 flocks to test.

The reason for this work is to maintain a high grade of baby chicks from the hatcheries as any poultryman selling eggs to a hatchery must have his flock tested.

ADVISES TO KEEP CHIMNEYS OPEN

An advertisement in another column is advising householders to pay attention to their chimneys. During long spells of cold weather, the heat arising from the chimney meeting the cold air, condenses into moisture which has been known to freeze and completely or partially block the chimney at the top, thus preventing fumes and unburned gases from escaping into the air. While users of gas need to pay particular attention to this, those who burn coal would be wise to examine their chimneys.

Mrs. Murray returned on Wednesday from Calgary where she attended the U.F.W.A. convention.

TWO BADLY HURT, 45 JUST SLIGHTLY; SPLIT RAIL CAUSE

MORRIN, Alta., Jan. 18.—Forty seven persons were hurt, two of them seriously, when three cars of an Edmonton-bound Canadian National excursion train toppled over a 20-foot embankment near Morrin at 11:20 a.m. Friday. Detrailment of the cars was attributed to a split rail, caused by the intense cold prevailing.

Those hurt was riding in the first day coach and smoker of the train. The third day coach also derailed was empty. Baggage and mail cars remained on the track.

Morrin is 161 miles south of Edmonton, and 104 miles from Calgary on a main C.N.R. line between the two cities. As soon as word of the crash had been received an emergency train carried a wrecking crew, doctors and nurses from Drumheller, 17 miles distance to the scene of the accident.

The injured persons were cared for at homes in Morrin temporarily.

A temperature of 40 degrees below zero was prevailing and added to the sufferings of those hurt.

The engine of the wrecked train proceeded into Drumheller, a distance of 17 miles to get help and Dr. F. R. McGregor and Dr. L. F. Brogden, of Drumheller, together with two nurses of the Drumheller hospital, left immediately to give aid to the injured.

ROBERT GARDINER M.P. RE-ELECTED U.F.A. PRESIDENT

CALGARY, Jan. 16—Robert Gardiner, M.P. for Acadia, Wednesday was re-elected president of the United Farmers of Alberta for his fifth consecutive term.

Several nominations were made during the annual convention here Wednesday, including J. E. Brownlee, former premier of Alberta. All nominees withdrew in favor of Mr. Gardiner.

Thunderous ovation was given as the announcement was made.

"I appreciate very much the confidence you have shown in me in honoring me again in this way," Mr. Gardiner said in acknowledging his return to the chair. "These are troublesome times and I assure you I will do everything in my power to forward the interests of the U.F.A. and those things we hold dear."

Others nominated, but who asked that their names be withdrawn were: Ex-Premier J. E. Brownlee; H. B. Macleod, High River; William Irvine, M.P., Wetaskiwin; Donald Cameron, M.L.A., Innisfail; Norman F. Priestly, Calgary; R. M. McCool, M.L.A., Cochrane; George Bevington, Winterburn; C. W. Robinson, Calgary.

Norman F. Priestley was re-elected as vice-president of the U.F.A. at the Wednesday afternoon session.

SEARLE FINDS MUMMY WHEAT FAILS TO GROW

Every few months since the Ancient tombs of Egypt were discovered stories have been heard in various parts of the west of farmers obtaining samples of "Mummy" wheat at very high prices for a few ounces of this ancient cereal. These reports led Major H.G.L. Strange seed expert of the Searle Grain Company, to obtain, direct from the British Museum of London, England, a sample of genuine "Mummy" wheat. The seed was 3,100 years old. It has been sealed away in the tombs of the Kings of Egypt one thousand years of England. Major Strange arranged for germination tests of this wheat with the Dominion Seed Branch Laboratories under ideal conditions. In six days it disintegrated into dust and mould. Farmers of the west now have definite evidence that anyone professing to sell them "Mummy" wheat at high prices, which will grow, are taking money out of their pockets for nothing. Any person interested in obtaining a photograph of spikelets and kernels of this 3,100 year old "Mummy" wheat should write to Research Department, Searle Grain Company, Winnipeg.

TOWN COUNCIL MEETING

A regular meeting of the Town Council was held on Monday evening January 21st. Present were Mayor Brace, Councillors Swift, Bellamy, Taylor and Hammond.

The minutes of the previous meetings were read and approved, and a quantity of routine business transacted.

The Hornby land settlement scheme was discussed in the light of the visit in person by General M. I. Hornby last week, and a resolution was passed endorsing the scheme and approving of the idea of establishing a settlement in the Tofield district.

The auditor's report and Financial Statement of the Town for the year 1934 was placed before the council for its consideration; and in addition the Secretary made a detailed report covering the various phases of the town's activities during the past calendar year.

BANFF BEAUTY WINTER QUEEN

Ski-joring behind a fast running horse; mushing with a team of huskies; skating; or ski-ing on the mountain trails all come under the heading of real sport, according to Miss Dorothy Standish, who reigns this year during the winter sport season in the Canadian Rockies. Visitors from many United States cities as well as from Canadian centers are enjoying all the thrills which only this area can provide, and which reach a peak during the annual Banff Carnival held this year February 11-17 inclusive.

"A Painted Ship On A Painted Ocean"

◆

T. A. Grehan, advertisement manager of the Dublin (Ireland) Independent Newspapers, Ltd., says:

"My bunch of newspapers—all nationwide circulatior—have just gone through a period of complete 'silence' lasting almost nine weeks. That is to say we were unable to issue one copy over all that time. Labour trouble was the reason, but let that pass. The point is that as a result of that elimination of our newspapers, the business of our regular advertisers went completely wallop. There was undiluted desolation. Stores here that knew crammed floors regularly as a matter of course, resulting from their budgets of advertising offers, were as idle as a painted ship upon a painted ocean.

"As an old campaigner, it stunned me to see just what the value of newspaper advertising is. Our merchants tried all sorts of other devices to get over the handicap of this no-newspaper period. They tried the street cars, the billboards, the movies, the handbills, even the air. No worth-while results accrued altho I have reason to know that the cost was as heavy in the aggregate,, in some cases decidedly heavier, than if the money involved had been expended in newspapers. And rememberber this big point, the results in business were definitely unsatisfactory.

"I have been in this live business of newspaper advertising for so many years that I thought I knew how the thing worked. I didn't know. This just-concluded newspaper silence has taught me a volume of things and if there is one thing above all that sticks out it is that a country without its newspapers is a country blindfolded completely. Our people here were positively bewildered. We all went around wondering what in the name of blazes was going on, but the poor bewildered advertiser felt that the wind had completely dropped, his business craft was becalmed, business movement was, as I said at the outset, as idle as a painted ship on a painted ocean.

"If ever I felt lukewarm on the question of the value of newspaper advertising, and I doubt if I ever did, I am now a 'roaring, tearing, hot-gospeller." Boys, it has been an amazing eye-opener. So, let us say, out of evil cometh good."

◆

THE MERCURY

"TOURNAMENT OF ROSES"

Colorful Description of Brilliant Floral Pageant

On Monday of last week we received from Mr. and Mrs. Secord, who are visiting in the States, a copy of the Los Angeles Herald Express containing photographs and descriptive writing of the Pasadena Tournament of Roses held on January 1st. A million people watched the parade of large floral floats, gorgeously beautiful. The first prize went to Santa Barbara for a float depicting the fable of "Jay and the Peacock."

While the photographs naturally lack the brilliant coloring of the flowers, they are indicative of the magnificent size and wonderful beauty of the floats.

A portion of the write-up describing the festival follows:

"Through the ages the golden legends have been told in swinging poetry and prose.

Wandering minstrels chanted them in ancient cities long ago.

And by the smouldering fires in homes throughout the world mothers have spun these tales to wide-eyed children.

Today the golden legends were written again.

The were written on the bright streets of Pasadena by the light of the sun that was like a marigold in the blue garden of the sky.

WRITTEN IN FLOWERS

And they were written in flowers more beautiful than words, more poetic than rhythms, under a sky as blue as cornflower.

Countless millions through the years have heard these legends told. A million people standing in the sunlight at the foot of the lavender mountains read them again today and saw them live in flaming beauty as Pasadena presented her forty-sixth Tournament of Roses "Golden Legends in Flowers."

Out of the books of fables and fairy tales and sagas of the land and sea came the vikings, the kings and princesses, Cinderella, the mythical Roc, the fire bird, Pele, Pandora—all the myriad legends.

And the magic of the sun and sky and gentle wind and flowers, made the legends seem new tales told for the first time to a wondering world.

At times the crowd was silent because of so much beauty, and the thunder of applause could be heard throughout the sunlit city of Pasadena.

CROWD CAME EARLY

The crowd came early. It was stil dark when the first people began moving into the city. The hills were drab and a few stars hung low in the sky and the air was cold. Then a story book day broke. The sun swam up from behind the great hills and moved like a marigold in the sky, and in the west the pale slice of moon seemed a petal of some silver flower.

There was just a little wind, and it ran through the trees lightly, and there was soft music for the dance of the sun beams on the housetops on the streets and on the hills.

In no time at all the city was packed with men, women and children, and hundreds of policemen tried desperately to clear the traffic-choked roads."

SANTA BARBARA'S BEAUTIFUL WINNING FLOAT DESCRIBED

The old adage that "fine feathers do not make a fine bird" was brilliantly illustrated by the Santa Barbara float which won the grand sweepstakes prize today in the Tournament of Roses parade and which represented Aesop's fable of "the jay and the peacock."

Against a brilliant gold background of marigolds in the form of a Grecian arch, the beautiful peacock of cornflowers and larkspur and a hundred other variety of flowers solemnly admonished two pure white jays on the impossibility of making a fine bird out of the jay by fixing to him the feathers of the peacock.

The float was further adorned with two urns filled with lovely pink roses. The birds moved back and forth, spreading their tails and moving their heads.

Seven men were required to operate the magnificent portrayal of the fable and a telephone system was necessary to enable it to be moved along the street and to coordinate the movements of the scene portrayed. It was 65 feet in length and some 20 feet wide.

Affixed to the back of the float was the seal of the city Santa Barbara, a white flood of chrysanthemums dashing over a precipice of larkspur. The seal revolved also.

GOVERNOR - GENERAL WRITES OF SCOUT MOVEMENT

I am now starting my fifth and last year in Canada as Govenor-General.

During every one of the past four years, I have travelled many thousands of miles throughout this wonderful Dominion. As the representative of the King in this country, I have endeavoured to testify to Canadians of all ages, in your great cities and in your remoter country districts, the close personal interest that His Majesty feels in all his Canadian subjects.

In my travels, I have met a great number of men, women and children of this glorious country. I have seen many sides of Canadian life. I have seen, I hope, something of the hearts and minds of Canadians as well as much of their outward activities. It has been, as you can imagine, a very agreeable, but also a very moving, and a very illuminating, experience. From that experience, one impression stands out more vividly, perhaps, than all the others I have gathered—and that is Canada, as a country, is vitally instinct with the spirit of Youth.

By that, I do not mean that Canada is, historically, a young nation, as nations go. I do not mean, either, that Canada at the present moment offers greater professional opportunities to Youth than do other countries. What I do mean is that Canada today seems to me pre-eminently conscious of the needs of Youth, anxious to give Youth a fair chance, proud of its own boys and girls, and determined to make the most of the fine raw material of citizenship which those splendid boys and girls provide; and this explains what I have also noticed everywhere—that in Canada the elders seem to stay younger, to keep Youth in their hearts longer than they do in most countries. There is in fact, throughout this great country, a deep seated sympathy with Youth, a realisation of the obligations of Age to Youth, which is one of Canada's greatest assets.

There are in the world today many so-called "Youth Movements," but of all those of which I have any knowledge the one for boys that appeals to me most is the Boy Scout Movement. In my opinion, this organisation which lays stress on honour, on loyalty, on neighbourliness, and on "playing the game," is the one that is the finest and is best suited to Canada. Naturally its emphasis on loyalty appeals to me, for is not life made up of loyalties; loyalty to one's friends; loyalty to those things that are beautiful and good; loyalty to one's country; loyalty to our King; and above all, and most important of all, loyalty to God.

Doubtless you have heard that the Chief Scout of the World, Lord Baden-Powell is coming to Canada next spring and that I have challenged the Scout Organisation to celebrate what may be his last visit by laying plans for a considerable expansion and improvement of the Movement. Canada has 60,000 excellent Scouts, but I know that is not enough. There should be at least one hundred thousand in this country, and Scouting should be made available to the hundreds of smaller communities which at present have no organised activities of any kind for their boys.

Mr. Beatty, the President of the Scout Organisation in Canada, is just as much in earnest about this matter as I am. With his co-operation, an all-Canada Conference of Scout Provincial Presidents, and Provincial Commissioners, met in Ottawa last September, and decided to accept my challenge.

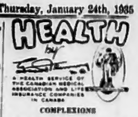
Organisation for the Campaign, with this object in view, will begin tomorrow, and I am calling upon every adult member of the Association in every Province, and upon everyone who loves Canada, to lend a hand with this big task.

May I ask the people of the Dominion to do this for me? I would feel a great deal happier on the sad day when I return to England, on giving up my office, if I could report that the Scout Movement, which lays such stress on loyalty to the Throne, had been firmly placed upon its feet for the next five years, and that plans had been completed for greatly extending and increasing its usefulness to Canada.

To be a good Canadian and a good Scout will always, I feel sure, be synonymous terms.

WEALTHY GAME HUNTERS LIKE ALBERTA ROCKIES

Declaring that his hunting trip to Alberta last fall exceeded all his expectations, and stating that he believed Alberta guides to be altogether too modest about the marvellous sporting opportunities of the Alberta Rockies hunting areas, Harold C. Keith, president of the Walk-Over Shoe Co., of Brockton, Mass., has published a private brochure on his trip entitled "Hunting in Alberta, 1934," a copy of which he has just forwarded to the provincial publicity office. Mr. Keith's party of four was one of the most prominent of American hunting parties to visit the province in 1934. One of the members was General R. E. Wood, president of Sears-Roebuck, Chicago, and who was quarter-master-general of the U.S. army during the war. Other members included Colonel E. R. Humphrey and Jean Keith, son of Mr. Keith. The party was in charge of Jack Brewster of Jasper.



A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

COMPLEXIONS

The human body is covered by eighteen square feet of skin, but more attention is given to the square foot which covers the face than to all the rest. Several millions of sweat glands form part of the skin. It is these sweat glands which secrete perspiration to the skin. The evaporation of perspiration from the skin regulates the temperature of the body.

Good complexions come from healthy body under a healthy skin. It might be said that there cannot be a healthy skin unless the body is healthy because the skin is a mirror which reflects the general health of the whole body.

The skin of the face is more exposed to the elements than is the skin which covers other parts of the body, with the possible exception of the hands. The hands are usually washed many times each day, but most people give their faces a dash of water in the morning, and let it go at that.

A good complexion means a healthy skin. The skin must be kept clean if it is to be healthy. Despite the claims of many beauty specialists, there is no better way of ridding the face of dirt than through the regular and frequent use of soap and water. A bland soap should be used so as not to remove too much of the natural oils of the skin. After the face is cleaned, it is than a matter of taste as to whether or not creams are to be used.

The lives of many young people are made miserable for them because of pimples or blackheads (acne) which begin to appear at an age when boys and girls are first giving some attention to their personal appearance, and it is not much satisfaction for them to be told that acne seldom persists after the early twenties.

The skin which has large pores and which tends to be oily seems more liable to be troubled with acne. There is only one sound approach to this condition, and that is through improving the personal health of the sufferer.

Use plain food, making sure that milk, fresh fruits and green vegetables appear regularly in the diet; drink plenty of water between meals; avoid fried and greasy foods; give up pies and cakes for a time. Secure regular elimination through regularity of habit, diet and exercise. Keep the skin clean by frequent baths and do not touch the face with the hands. Release blackheads by squeezing them out very gently after having bathed the part in hot water. Pimples contain pus, and proper care must be taken when they are opened or the infection will spread.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

GROWING POPULARITY OF FROZEN FRUITS

Trial packs of frozen fruits and vegetables have been received by the public with increasing favour and their movement is increasing. The frozen pack of strawberries and raspberries amounted to from 40,000 to 50,000 pounds in 1934 as compared with 6,000 pounds in 1933. In 1935, the output is expected to exceed 100,000 pounds. In addition to small fruits, such vegetables as spinach, asparagus, and peas, have been successfully treated. This process will extend the season of Canadian fruits and vegetables, and it is probable that the frozen product may compete with and displace a part of the imports of fresh products. There is an increasing interest being taken in frozen fruits by large institutions, such as hospitals which can freeze their own supplies and hold them for use.

THE HORNBY PLAN—

THE VISIT to Tofield on Wednesday last of Brigadier-General Hornby has further increased the interest taken by Tofield and district residents in the Hornby immigration plan. It will be remembered by Mercury readers that several months ago we described this plan in this column. Since that time, while considerable preliminary work has been done towards the plan and much publicity spread throughout the country about it, there is nothing definite or anything of an official nature concerning it. This does not mean that the plan is purely visionary or impractical, a decision concerning its feasibility and liklihood of success must be withheld until the spadework in this country is at least partly completed.

The plan, very briefly, is to have the British government loan British local immigration associations money to finance the immigration of their own carefully selected immigrants. An immigration association in Great Britain would buy, furnish and equip 100 farms in a district in Canada. One hundred settler families would be placed on these farms under the direction of a supervisor who would visit around and instruct the settlers in his block of 100 farms. After a period of five years the settlers would be expected to move off and with their savings augmented by a loan, be in a position to purchase farms of their own. Other settlers would be brought in to take their places on the British immigration society owned farms, a more or less continual change taking place. The original cost of buying, furnishing and equipping one hundred farms in a district is estimated at approximately one million dollars. It is the aim of Brigadier General Hornby to bring about the establishment of 250 such settlements throughout the entire dominion.

The Tofield and district Board of Trade at a special meeting went on record as heartily approving the plan. The interest of course largely centreing in the supposition should the plan be put into effect, that the Tofield district would be chosen as a location for a one hundred farm settlement. Already there are on hand a sufficient number of farms for sale within the desired area and it is commmon knowledge that as to natural advantages this district can more than hold its own.

The development of the plan will be watched with keen interest here.

Brigadier-General Hornby made a pleasant impression upon his visit here. A gentleman of mature years, affable and genial, yet master of his subject, he will receive a cordial welcome if he ever returns to Tofield.

THE U.F.A's. 12 PRINCIPLES—

THE TWELVE principles enunciated and approved by the U.F.A. convention at Calgary last week seem to us to be one of the very best things to come out of a U.F.A. convention—for that matter any convention. While each principle is general in its nature and has contained within it a wealth of detail to be attended to, on the whole they are moderate in tone, reasonable, and more important still, possible of attainment.

While many people to-day believe the world, or at least the more advanced portions of it, is heading for great social changes, so many of the changes proposed are of such a radical nature as to invite opposition from the outset. It may be that these radical changes are bound to occur and are really good, but apparently the levelling mantle of time must fall upon them until they cease to be regarded as radical and are brought into being by common consent.

THE WEATHER—

MARK TWAIN was quite right when he said, "everybody talks about the weather, but nobody does anything about it," or words to that effect. During the past few weeks the citizens in this part of the country certainly have had something to talk about even if they are totally impotent as regards doing anything about it. Of course cold weather is no novelty to Central Alberta, but nearly five weeks of sub zero weather could be perhaps described as having too much of a godd thing. We have had cold spells before, however, and it is remarkable how soon they are forgotten once they are past history.

Consolation can be obtained from the news that Central Albertans are not alone in having winter weather problems to solve. British Columbia, that land of "green hills far away" to many residents here, have been having anything but a pleasant time during the past few weeks. Snow, rain, slush, frost, all have combined to make the lot of the coast dweller miserable. Only a day or so ago in Vancouver it snowed, rained and then froze. Then it snowed again and thawed. The water and slush unable to get away because of the ice beneath it, caused a general cessation of traffic, conditions being so bad as to cause some of the large stores to abruptly close until conditions were better.

As a contrast there is the report of the "Tournament of Roses," held on January 1st, from the Los Angeles Herald-Express. This is very alluring but it should also be remembered California has its weather problems also. Even moderately cold weather creates discomfort there, while during the summer the siturtion is reversed, it is too hot. To further balance the advantages and disadvantages of geographical location, nature stages an earthquake every so often in California.

SOIL DRIFTING COMMITTEE

For the purpose of studying the problem of soil drifting and making what recommendations they feel necessary to the provincial government for meeting the problem, a special committee has been named by Hon. F. S. Grisdale, minister of agriculture, who announced the personnel on Tuesday.

The committee will include O. S. Longman, provincial field crops commissioner; E. L. Gray, deputy minister of municipal affairs and former field crops commissioner; Dr. F. A. Wyatt, soils expert of the university; M. L. Freng, district agriculturist at Lethbridge; J. E. Palmer of the federal experimental farm at Lethbridge; L. Kool of Monarch; J. J. Strang of Claresholm and A. C. B. Grenville of Morrin.

A meeting of the committee will be held shortly to organize and prepare a plan of operation.

U.F.A. TAKES 12 PRINCIPLES 'AS INDUSTRY'

CALGARY, Jan. 19—Final approval to a new U.F.A. provincial 12-point program was given by delegates to the annual convention of the organization, Friday, not as the platform of a political party but as the "declaration of principles of an industrial group seeking representation in the provincial legislature."

Exceeded only by the debate on social credit in length of discussion, the provincial program was before the convention for most of the Thursday and Friday sessions. Only minor amendments were made to the program as submitted by the U.F.A. board.

Complete revision of rules of court and simplification of court procedure to reduce costs of litigation; endorsation of the principle of public ownership of all utilities used in common and natural resources which are in the nature of monopolies; and teaching of political science in schools to stimulate the will of youth toward the solution of present ills, were three of the most important program sections passed Friday. Under the following headings the points approved were:

Industrial Development

1. Full co-operation by the department of industry with all branches of trade and industry to eliminate evils of excessive competition and insure fullest development of provincial trade.

2. Reorganization of the coal industry looking to better development.

3. Extension of markets for industrial products of Alberta.

Education

1. That the basis of our educational system be changed so as to teach our children to place human and spiritual values above property values, and that the subjects of citizenship and political science particularly, should be so presented as to stimulate the will of our youth toward the solution of our present ills, rather than the fatalistic acceptance of them.

2. That the government take steps to make available the facilities of our higher educational institutions of learning by scholarship or bursury or otherwise, to such young persons of the province as show themselves capable of exceptional achievement.

3. That as rapidly as possible, further steps to be taken to equalize educational opportunity for all children in the province.

4. That the government takes steps necessary to institute as soon as possible, an adult educational system similar to folk schools in Scandinavian countries.

Public Health

Expansion of the existing public health services, looking toward the ultimate objective of complete state medicine.

Highways

1. Continuance at a rate as rapid as possible, of the policy of progressive highway construction, with particular regard to the orderly development of local and market roads.

Administration of Justice

1. Complete revision of rules of court and simplification of court procedure to reduce costs of litigation.

2. Formation of arbitration tribunals to which disputes may be referred without the usual court formality.

3. Establishment of the office of

Judging from the large demand for poultry marked by official grades, it is apparent that Canadians are becoming familiar with those grades. More tagged poultry was displayed and sold on grade during the recent holiday season than in any year since grade tagging was introduced.

public trustee.

4. Setting of a system of domestic relations' courts.

5. Extension of the "Needy Litigants' act."

6. Continued study and application of constructive methods in the treatment and reformation of prisoners.

7. Provision for better supervision for juvenile offenders and delinquents.

8. Bonding of all persons handling trust funds in Alberta.

Public Ownership

1. We endorse the principle of public ownership of all utilities used in common and natural resources which are in the nature of monopolies. These should be brought under public ownership and control.

2. We also endorse the principle of private ownership of property in individual use.

Recognizing the limited powers of the province with respect to public ownership, we pledge ourselves to co-operation with the dominion government with a view to the most rapid progress toward these ends.

Land

We stand for the retention for the people of Alberta of all unalienated lands and land which may revert to the crown, such land to be settled on the basis of long term leases for actual use only.

Most Urgent Task

"The most urgent task confronting us is the rehabilitation of agriculture," the preamble to provincial program states, "and achievement in social reforms and other fields is dependent upon the prosperity."

The 12 heading in the program are, planning, financial, interest and debt reduction, agriculture, unemployment, old age pensions, industrial development, education, public health, highways, administration of justice, and public ownership.

THE FLIP OF A COIN

A Canadian romance is unfolded in The Implement and Machinery Review (Great Britain). Quoting the phrase of the poet Schiller "There is no such thing as chance," the journal says "yet 110 years ago, as a sailing vessel was nearing the port of New York, one of the passengers tossed a shilling in the air, and as it fell with the face of George III uppermost, it decided a course of action which led to a banquet being held recently at Brantford, Ontario, with Colonel the Hon. Harry Cockshutt at the head of the table. The man who flipped the coin in such seeming disregard of destiny was James Cockshutt, grandfather of Colonel Cockshutt, and as it was 'heads' that showed up he decided to take steps which eventually led him to settling in Brantford, Ontario, instead of in Pittsburg, U.S.A. The family has been intimately associated with Brantford for over a century, and now honour has been done to one of its members. Colonel Cockshutt, on the completion of fifty years' unbroken service with the Cockshutt Plow Company."

Behind the Hog

By A.B.C.

More about artificial ice. It is not easy to get away from the great twin Scottish brethren unless one flees and seeks sanctuary in the desert. Golf and curling—golf and curling talk (which is worse) are about him and before his ways from one Burns dinner to another. In my old age, I went to my lawyer about making my will. He picked up a Writ of Mandamus from his desk, rolled it into a cylinder like a walking stick and proceeded to show me the correct way of swatting a golf ball—he also drew plans in circles as to wicks, rolls and draws. And yet golf and curling are different. In golf a player addresses the ball, while every soul remains motionless and mute; one sniff or cough and your name is posted. How different in curling. The player steps to the tee to the roar of stones and skips, and the humorous comments of the gallery. The players awaiting their turns shift and slide stones about the ice with loud raucous cries hoping to catch the player in the legs or elsewhere. The motionless deadly silence of golf and the pandemonium of curling are equally nerve-shattering. A much needed reform would consist of allowing refined conversation on fairway and green and insisting upon some approach to decorum at back, hog and house.

The absolute and tyrannical authority of the skip should be reduced and on the other hand the status of the golf pro should be raised. The pro is required to say SIR to the golfers, though he is a better golfer than any of them. In curling no one of lesser rank than third is allowed to speak to the skip at all, however the rest might like to call him SIR. But he is a better curler than any of them Ha, Ha! To any curler who is not a skip, a skip is practically a mental case, besides not knowing his right hand from his left. The two games are alike in that they have a common origin, Scotland, land of the frozen loch and blasted heath. They are alike in that they have brought the sorrows of widowhood, without its blessings, to countless sad-eyed women.

—o—

It is said that a woman never argues with a fool, this should make some of our curlers happy.

—o—

One curler was looking for a "Really Efficient Leader of Men. Gosh—Ain't there any women in this club.

—o—

Oliver says: "Prosperity is an event that is always coming off. So are the buttons on his pants. Hope you are the same.

—o—

Don't get sick this week as we have only the undertaker left. The doctor and druggist are away spieling.

—o—

When water becomes ice, what great change takes place—the price "boys."

—o—

We are not sure if you got the one about fees last week. What we really meant was "Please pay your fees."

—o—

To the Skips

I don't know how he is on shots,
I never heard him say;
But he's got a smile that fits his face,
And he wears it every day.
If rocks go wrong he won't complain,
Just try to see the joke;
He's always finding little ways
Of kidding other folk.

—o—

Mack had his name on the radio as being an entry at Wetaskiwin, but we never missed his smiling face at the home rink.

—o—

We noticed Fred Imler and Harold Hicks doing a little "gassing" at the rink.

—o—

Artie is taking Lem, Doc and Chris to Wainwright—we think to spite the Wainwright Oil Peddler.

—o—

We heard that Fred Imler is putting his foot down at home.

—o—

It is a false notion that curlers can only understand Hokem and Bunk.

—o—

SERVICE WITH A SMILE.
WE AIM TO PLEASE.

LADIES TO STAGE TOFIELD BONSPEIL

On Monday and Tuesday, February 4th and 5th, the Tofield Ladies' Curling Club are holding a bonspeil. There will be three separate competitions and two visiting rinks are expected from Holden and two from Ryley; there will also be seven local rinks.

Games will be played at 9:00 a.m., 12:00 noon and 3:00 p.m.

Tofield Drops Two Games to Viking

VIKING 5—TOFIELD 4

On Tuesday at Tofield the Viking senior hockey team defeated Tofield by a 5—4 score. Before the final bell rang the spectators were treated to thrills galore and it was not until the second overtime period was played that Viking was able to claim a victory. Tofield's chances for a play-off position largely depended upon this game and play opened up fast in the first period. Early in the period Craig and Worton combined for a smart goal Worton being the marksman. Setting a torrid pace, Viking worked hard for the equalizer and were rewarded about the middle of the period when McAthey scored on a pass from McLaren. Tofield then advanced another notch when Les Glover scored on a solo rush. Viking, however, came right back and evened the score again when McEachern scored on a combination play in which Runion and Hardy figured. The period ended 2—2.

The second period opened with Viking pressing hard for the lead and in a scramble near the Tofield goal Ash scored. Their lead was short lived as shortly after Les Glover on an end to end solo play made his second goal of the night, thus again tieing the score. Ending a splendid combination play Kjosness scored for Tofield and at the end of the second period Tofield were holding a one goal lead.

Both teams still playing fast hockey the third period was featured by end to end rushes and smart goal keeping on the part of both goalies. About half way through the period Viking again evened the score on a combination play which gave Ross a chance to close in on goal and draw out Bowick.

The first overtime period found both teams trying desperately to get the lead, but this period proved scoreless. In the second overtime period McClaren and Runion combined for what proved to be the winning tally.

Viking—Rasmussen, McAthey and Scott, Hardy, McLaren and Runion; subs Ross, Ash, McEachern.

Tofield— Bowick, Stutzman, L. Glover, Craig, Worton, McLaughlin, Burnett, Kjosness, N. Glover.

Referee—J. J. Hannan.

VIKING 7—TOFIELD 2

In the return game the following night, played at Viking, Tofield were defeated 7—2. The game was not as one sided as the score would indicate, the score at the end of the second period being 3—1. With everything to gain and nothing to lose, in the third period Tofield sent up all men and were caught often enough to have four more goals scored against them.

These two defeats eliminate Tofield fr catmnyeahern field from any chance of a play-off position in the Gas Line League.

TOFIELD AND BRUCE PLAY DRAW GAME

The intermediate hockey team held Bruce to a four—four draw in Bruce Monday last. Lee scored for Tofield on a pass from Bowick early in the first period but Bruce evened it up right away and went into the lead a few minutes later. Bowick scored on a pass from McLaughlin and the period ended with the score two all. In the second period Tofield scored twice, McLaughlin putting the team in the lead and McCauley scoring on a pass from Whyte. In the third period Bruce scored twice forcing the game into overtime. Good work by the goal-tenders kept the score at four all.

INTERMEDIATE LEAGUE STANDING

LUMBER SHED ROOF CAVES IN

Professor Mueller of Edmonton missed his calculation as to the Edmonton High Level bridge falling, but sure enough something did fall that afternoon—the roof of the Crown Lumber Company's main shed at Tofield.

Due to the weight of snow, quietly and without fuss or feathers the big roof caved in bit by bit until it could fall no further. Beyond the inconvenience there was no great amount of damage done.

Local & Personal

The regular meeting of the W.A. will be held at the home of Mrs. Clutterham on Wednesday, Feb. 6th, at 2:30.

Mr. Geo. Edwards is on the sick list with an attack of pleurisy.

A rink skipped by A. A. Beirnes is attending the bonspeil in Wainwright. The personnel of the rink is: M. C. Hammond, Dr. Law, Lem Abbott and A. A. Beirnes (skip.) At time of writing the rink was doing very well having lost only one game out of a number played.

Mrs. W. McIntyre entertained the Jolly Eight Bridge club on Wednesday evening.

Helen Schultz spent a few days with Lois Thompson last week.

Visitors to the city on Sunday were, Mr. and Mrs. Geo. Coutts and Doris, Thelma Jebb, Loret Ross, Arthur Biernes, Bob Whyte and Bill Worton.

Miss Matiare of Edmonton is relieving in the Bank of Montreal here.

Miss P. Burnett spent a few days in the city last week.

Mr. and Mrs. Provost of Edmonton spent Sunday at the Allan home.

Mr. and Mrs. Clark of Edmonton spent a day in town last week.

Visitors to the city last week were, Mrs. Weutherick, Mrs. Schmaltz, Mr. and Mrs. McLaughlin.

Born—To Mr. and Mrs. Bob Spangler on January 25, a son.

Born—To Mr. and Mrs. Campbell, a daughter.

On Friday evening Mrs. Bailey and Barrett Berild celebrated their birthdays by entertaining a few friends at Mrs. Bailey's home. Games and contests were played during the evening after which a delicious lunch was served by the hostesses.

Due to the stormy weather the crowd at the dance on Friday evening was small. The music, however, was excellent and should they play again at Tofield we feel sure there will be a good turn out.

We regret to report that Mr. D. Purcell received word of his father's death at Maple Creek on Saturday. Mr. Purcell left immediately for Maple Creek and returned on Wednesday. The sympathy of the district is extended to Dan.

Miss Dorothy Green who has been visiting her parents at Dutchess returned to the Innes home last week.

Mrs. Schmaltz is visiting her folks at Delbourne for a few days.

* * * * * * * * *

LAKESHORE

* * * * * * * * *

Mrs. Phillips entertained Mrs. Graham, Mrs. Matejeka and Mrs. John Wood on Wednesday afternoon of last week.

Friends of Mrs. J. B. Warner will be pleased to hear that she is progressing favorably after her recent operation.

Mrs. Geo. Francis is spending a few days with her sister Mrs. Jas. Francis east of town.

Miss McKinnon was a dinner guest at the Phillip home on Sunday.

A most enjoyable dance was held at the J. H. Johnston home on Jan. 18th. In spite of the cold weather a large crowd was in attendance and danced until the wee sma' hours.

Mrs. Matejeka entertained Mesdames John Wood, T. D. Ferguson and Wm. Seale on Wednesday.

W. R. HOWSON, M.L.A.
Liberal Leader in Alberta

E. Weutherick, Mrs. Swick, W. Bailey, Mrs. Bailey.

E. Edwards, Miss Moss, L. Burnett, Mrs. Barden.

NOTICE OF TIME AND PLACE OF NOMINATION

Town of Tofield—Municipal Elections 1935

Public notice is hereby given that I will attend at the Town Hall, Tofield, on Monday the 4th day of February 1935, from eleven o'clock in the forenoon until twelve o'clock noon, for the purpose of receiving the nominations of candidates for the office of councillor and Mayor for the next ensuing two years.

Given under my hand at Tofield, this 28th day of January, 1935.

J. W. CHAPMAN,
Returning Officer.

NOTICE OF TIME AND PLACE OF NOMINATION

Tofield School District No. 1939—School Elections 1935.

Public Notice is hereby given that I will attend at the Town Hall, Tofield, on Monday the 4th day of February 1935, from eleven o'clock in the forenoon until twelve o'clock noon, for the purpose of receiving the nominations of candidates for the office of trustee for the next ensuing two years.

Given under my hand at Tofield, this 28th day of January, 1935.

J. W. CHAPMAN,
Returning Officer.

NOTICE OF PREPARATION OF ASSESSMENT ROLL

Town of Tofield

Notice is hereby given that the assessment roll of the Town of Tofield for the year 1935 has been prepared and is now open for inspection at the office of the Secretary-Treasurer from ten o'clock in the forenoon until four o'clock in the afternoon on every day which is not a public holiday, except Saturday, and on that day from ten o'clock in the forenoon until two o'clock in the afternoon, and that any person who desires to object to the entry of his name or that of any other person upon the said roll or to the assessment of any property or to the assessed value placed upon any property, must within thirty days after the date of this notice lodge a complaint in writing with the secretary-treasurer.

Dated this 30th day of January 1935.

J. W. CHAPMAN,
Secretary-Treasurer.

* * * * * * * * *

LINDBROOK

* * * * * * * * *

Now that the past five weeks of record making weather has passed and the temperature is somewhat livable again, we are glad to report no serious effects from Lindbrook, bar a few frozen heels, cheeks and noses and none of these badly. The snow is very heavy and drifted making it difficult to get around, still we're surviving it all and still kicking, "always kicking" would'nt be human if we wer'nt.

Two young children of Mrs. Henri Goubault of Lindbrook Nord were taken to the hospital in Edmonton last week suffering from pneumonia. The condition of both is serious, but the youngest, a girl of two years of age is extremely critical. The other is a boy of four years old. To date no further news has arrived, but we hope for the best.

Last week a special meeting was held at Lindbrook School to decide whether the present site is a permanent one. It was put to a vote, the result being 32 in favor of it not being permanent and 24 in favor of retaining as permanent. Mr. Jas. Bracegirdle was chairman assisted by Mr. Jas. Mackenzie as secretary. Messrs. R. Herchen, W. Lancaster, and E. W. Hooper were elected as scrutineers for the poll.

Quite a big turn out of the ratepayers was in evidence, there being between 50 and 60 present.

Business Changes

The past two weeks have seen two business changes in Tofield, two well established places of business changing hands.

The Tofield Service Station commenced and operated by W. Stutzman for some years past has been purchased by Mr. Conrad Patterson, who we understand will take over control early in February.

C. M. Coombes, who has operated a grain crushing service for a number of years sold his business this week to Mr. Mike Stewchuk who has already taken over control.

SCHOOL NOTES

by

I. M. E. R.

The Tofield High School Student's Union held a most successful and enjoyable dance in the Curling Rink on Saturday, January 26, at 8:30 p.m. The boys and girls shared the expenses equally. The boys paid for the rent of the rink while the girls supplied the refreshments. Some of the members of the Student's Union took turns in supplying the music.

WEDDING BELLS

A quiet wedding of local interest took place at the McDougal Manse, Edmonton on December 4, when Miss H. E. Sterger of Federal, Alberta, was united in marriage to Mr. William Duckfield of Tofield, Rev. Villette officiating.

Both the contracting parties are popular members of Tofield's younger set and congratulations and good wishes for future happiness go out to them. They will shortly take up housekeeping at Tofield where "Bill" Duckfield is managing proprietor of the Central Meat Market.

PICTURE SHOW TUESDAY FEB 5th

On Tuesday, February 5th, the Purdy Road Shows will present at the Variety Theatre, Tofield, the all talking feature "Now and Forever," featuring Gary Cooper, Carole Lombard and Shirley Temple. This is the story of a broken heart made whole by the winsome charm of a little child. Three reel comedy in addition. Usual prices.

LOCAL BOYS WIN TRIP TO PROVINCIAL SEED FAIR

In a summary of grain club activities for 1934 recently received, we note that Joseph J. Kallal and Clifford Appleby are winners of a free trip to the provincial seed fair. In the Tofield wheat club with an active membership of 11 members Joe. J. Kallal came first with 81.7 points with Clifford Appleby coming a close second. In Tofield the oat club with 21 active members Joe again came first with 81.4 points.

In the Ryley wheat club with 14 actibe members H. K. Moen came first with 87.2 points. He repeated in the Ryley oat club with 11 active members coming first with 85.1 points. Arnold Berg came second in the Ryley oat club and with H. K. Moen is winner of a free trip to the provincial seed fair.

ATTENTION BOY SCOUTS

All boy scouts are requested to attend the scout meeting on Tuesday evening February 5th. In view of the forthcoming visit to Edmonton in April of Baden-Powell, there is important work to be done.

Mr. Jas. Hooper left last week to pay a visit to a friend in Timber country west of Edmonton.

TALKIES
At The
VARIETY THEATRE
TUESDAY, FEB. 5th
The Purdy Road Shows
present
"NOW AND FOREVER"
starring
Gary Cooper, Carole Lombard, Shirley Temple

Two hearts rent in twain—healed by the winsome love of a little girl.

Also Three Reel Comedy

Admission: 15c., 20c., 30c.

"A Painted Ship On A Painted Ocean"

❖

T. A. Grehan, advertisement manager of the Dublin (Ireland) Independent Newspapers, Ltd., says:

"My bunch of newspapers—all nationwide circulation—have just gone through a period of complete 'silence' lasting almost nine weeks. That is to say we were unable to issue one copy over all that time. Labour trouble was the reason, but let that pass. The point is that as a result of that elimination of our newspapers, the business of our regular advertisers went completely wallop. There was undiluted desolation. Stores here that knew crammed floors regularly as a matter of course, resulting from their budgets of advertising offers, were as idle as a painted ship upon a painted ocean.

"As an old campaigner, it stunned me to see just what the value of newspaper advertising is. Our merchants tried all sorts of other devices to get over the handicap of this no-newspaper period. They tried the street cars, the billboards, the movies, the handbills, even the air. No worth-while results accrued altho I have reason to know that the cost was as heavy in the aggregate,, in some cases decidedly heavier, than if the money involved had been expended in newspapers. And remember ber this big point, the results in business were definitely unsatisfactory.

"I have been in this live business of newspaper advertising for so many years that I thought I knew how the thing worked. I didn't know. This just-concluded newspaper silence has taught me a volume of things and if there is one thing above all that sticks out it is that a country without its newspapers is a country blindfolded completely. Our people here were positively bewildered. We all went around wondering what in the name of blazes was going on, but the poor bewildered advertiser felt that the wind had completely dropped, his business craft was becalmed, business movement was, as I said at the outset, as idle as a painted ship on a painted ocean.

"If ever I felt lukewarm on the question of the value of newspaper advertising, and I doubt if I ever did, I am now a 'roaring, tearing, hot-gospeller." Boys, it has been an amazing eye-opener. So, let us say, out of evil cometh good."

❖

THE MERCURY

Secret But Silent War Rages Behind Scenes As Oil Barons Seek Power

BATTLE FOR BLACK GOLD SEEN AS MENACE TO WORLD PEACE

Kingdoms are made and broken for it; premiers and presidents, dictators and dynasties are serfs to it; men are but puppets in the secret war for black gold.

The struggle for world supremacy in oil parallels the insidious machinations of munition makers. The arms trusts have their Zaharoffs, Schneiders, De Wendels and Vickers; the oil industry has its Deterdings, its Rockefellers, its Mellon, Sinclair and Doheny.

The astounding story of oil is revealed in a new book, "The Secret of War" by F. C. Hanighen, co-author of "Merchants of Death" in which the dealings of arms-makers was exposed.

The whole amazing struggle for oil, from how England secured rights to vast Persian fields through its secret service agents, to the recognition of Russia by the United States, partially through the influence of the Standard Oil Company is told by Mr. Hanighen. Canadian references are but lightly touched upon.

"The secret war for oil is no ordinary trade war," quotes the author. "It is the most perfect manifestation of the clash of economic imperialism. Inherent in it are the self-destroying qualities of capitalism—raised to the 'nth degree. Deterding and Rockefeller, powerful titans of perhaps the most important industry in the world, are neverless powerless puppets drawn by strings of the acquisitive system. Will this system be modified in time to prevent world catastrophe?

Two Big Chiefs

Chief figure in the oil industry is Sir Henri Deterding, son of a Dutch sea-captain, who started life as a bank clerk. Today he is managing director of Royal Dutch Shell, a British company which has, according to Mr. Hanighen, the largest oil holdings in the world. Next in importance comes John D. Rockefeller, life-long enemy of Deterding, founder of the Standard Oil companies of the United States.

Others vitally concerned are the British and Soviet governments.

It was the British government and an Australian engineer, who actually started the battle, says Mr. Hanighen. Wm. Knox D'Arcy was an Australian engineer, a religious fanatic who was nevertheless firm in his conviction that there was oil to be found in Persia.

He devoted his life to finding it but it was not until late in life that he succeeded. By this time he had formed a strong friendship with the Persian ruler and when the oil was discovered obtained from the Shah a 60 year concession to about five-sixths of the country.

Britain uninterested before, and Rockefeller, attempted to buy from D'Arcy the valuable document. He refused to sell for any figure. He was old and had no use for money.

D'Arcy took a trip to the United States. On board ship he remained aloof from the passengers. So did a priest. The two became friendly and D'Arcy, the religious fanatic, unfolded his story to the sympathetic listener. Mr. Hanighen then relates how the priest prevailed upon D'Arcy to donate this document to the church so that missionaries would be enabled to go into Persia, a thing they had hitherto been unable to do. D'Arcy complied and the priest went home with the document.

But the priest's home was the British Intelligence office in London. His real name was Sydney Reilly.

Thus did Britain obtain control of Persian oil for nothing.

Meanwhile, Sir Henry Deterding was entering the scene. Becoming interested in the Dutch Oil company. Deterding's rise to control was swift. Their holdings, however, were in the Far East, and Deterding aspired to greater markets. In England a Whitechapel Jew by name of Marcus Samuel was in the shipping business, sending sea-shells to the Far East.

A merger was effected. Dutch oil was shipped to Europe in Samuels ships. The company became known as Royal Dutch Shell, and Rockfeller, hitherto scornful, was forced to recognize a mighty enemy. Deterding seemed to outwit the American tycoon at every step; his consolidation of a shipping service gave him a tremendous advantage over his American rival.

Moves to Mexico

Then came the oil boom in Mexico. It was another American Edward L. Doheny, who started it, but it took the combined efforts of the United States, British and Mexican governments to finish it.

Presidents and bandit leaders were financed by the oil companies. When one company succeeded in setting up its own government, the other would finance a revolution; all for the purpose of obtaining concessions to Mexican oil fields. The battle became so bitter, that the United States nearly went to war with Mexico—in fact, declares Mr. Hanighen, they even went so far as to attack and take Vera Cruz.

Apparently the American companies were getting the worst of it. But finally the famous Kellogg note from the U.S.A. to Mexico, a note which made Britain gasp, resulted eventually in the withdrawal of Deterding and thunder over Mexico was stilled. The oil war was transferred to South America.

Here the picture is similar to the Mexican scene. First secret agents would appear; government officials would be bribed and concessions gained. Then the opposition would start its counter attack and a revolution or a change of government would result and concessions would be cancelled.

But the secret war in South America had far more dangerous possibilities. Britain, writes Mr. Hanighen, wanted to build her own canal to the Pacific ocean through Colombia. She nearly succeeded through her secret agents. But the United States was able to block the plan at the last minute. Britain has since turned to purchasing concessions along the Panama Canal zone for the avowed purpose of prospecting for gold though geologists claim there is little gold in the district. Britain has also, secured through Royal Dutch, Curacao,,where Deterding's oil is supplied to ships passing through the Panama canal, thus cutting off a valuable source of revenue for American companies and holding a strategic point in case of war. It is a Dutch possession but owned by British oil interests.

On another front, Deterding carried the war right to Rockfellers doorstep. Geologists declared that oil in the United States would one day dry up. It is not a substance that can be called upon indefinitely. So Deterding, rather than use up his own supplies, used up those in the United States.

Whereas Standard Oil had bucked against Theodore Roosevelt and the anti-trust law had been disorganised by it, Deterding did everything in a perfectly legal manner. He even arranged it so that American money would be invested in his companies. Rockfeller did everything in his power according to Hanighen, to block Deterding without success. Especially when Deterding sold U.S. oil to the Japanese navy.

Now a new threat entered the picture—Russia. Before the revolution, Russian oil was scarcely touched. But the big interests realized that there were vast quantities there and it was after the revolution that Deterding and Standard, believing that the Soviet regime could not last, bought up every available concession. They were, to be plain, left holding the bag. The Soviet did not fall; even British, American and French armies, sent, Hanighen charges, at the behest of such interests as oil, could not lodge them.

The Soviet, unsuccessful in their dealings with these interests, entered into open competition with them, particularly against Deterding who hated them most and who lost heavily in the fight. Standard who had once been responsible for blocking U.S. recognition of Russia, now became more interested when Russia formed an alliance with her against Deterding. As a result new propaganda found its way in the American press, and Russia was recognized by the United States the thing Stalin was striving for.

Mr. Hanighen points out that oil was even an immediate cause of the World War; that Col. Lawrence, by his own admission, gave up archeology to protect Britain's oil interests in the Near East; that Primo de Rivera was dislodged, and Spain sent into tottering chaos as a direct result of her being exploited by the oil interests; that Calles, Mexican radical president, was converted to conservatism by oil money; that Russia and Japan are haggling over oil wells in the Far East; that Persian oil fields are owned by the British Intelligence office, a self supporting organization.

In short, the author sees in oil a substance that may be at the root of the next war, just as coal and iron were at the root of the last. He sees in Sir Henry Deterding a man of more influence than Zaharoff. Even the manufacture of synthetic oil by Germany, and now by Britain, is controlled by the oil tycoons.

The number of hogs graded in Canada during the first week of 1935 was 40,863 an increase of 2,443 over the corresponding week of 1934.

CANADA BECOMING SPORTSMAN'S PARADISE

Montreal, Que., January 21—There is a "fisherman's License" which extends beyond the mere legal permission to catch fish and includes the right to talk about fish, caught and uncaught, afterwards without being compelled to adhere too strictly to exact measurements and weights, stated Alan N. Longstaff of the Publicity Department, Canadian National Railways, in addressing the members of the Electrical Club of Montreal recently. Without this "fisherman's license," half the fun of fishing would be gone, the speaker continued. Some of the least successful fishing trips, in the matter of the number and size of fish caught, prove to be the most enjoyable since the angler can exult or mourn over what might have been, thereby building up his hopes for future outings and whetting his appetite for the moment when he can again leave office cares behind him and get out into the great outdoors, where men are men and fish are bigger when you fail to land them.

In addition to inviting tourists from Canada and other countries to enjoy their vacations in the Dominion, Canada is "rolling back the sportman's map" and providing new areas for the delight of the hunter, fisherman and nature lover, Mr. Longstaff stated. The setting aside of such areas as Jasper National Park in the Canadian Rockies as game sanctuaries and breeding grounds has resulted in better hunting in the areas adjacent to the park boundaries where, experienced guides claim, Rocky Mountain sheep and goats, moose, caribou, bears and other big game trophies are more numerous then for decades.

Similarly in regard to fishing, new game fish waters are being discovered and made accessible to the tourist. In Jasper National Park, speckled trout and rainbow trout fishing par excellence had been provided in lakes which but a few years ago were barren of fish life. In the Nipigon area, famous for its huge speckled trout and where the largest trout on record was taken some years ago, lakes had been discovered which were full of small-mouth black bass.

Canada is engaged in a serious campaign to increase her tourist traffic which is a tremendous revenue-prodecer for the Dominion, said Mr. Longstaff, but she is not stopping at issuing the invitation. Through the Canadian and Provincial travel bureaux, the Tourist Bureau of the Canadian National Railways and other organizations, every attempt is being made to provide the visitor with just the sort of outing he desires, even though that involves discovery and development of new areas which will keep the Dominion in her place as "The Sportsman's Paradise."

DIRECT EGG SELLING REQUIRES PERMIT UNDER POULTRY MARKETING PLAN

Producers of Grade A 1 eggs who comply with the requirements of the Federal Department of Agriculture egg grading regulations and who sell their eggs direct to consumers will not be affected in any way by the adoption of the proposed Alberta Poultry marketing Plan, under the Natural Products Marketing Act.

Producers of Grade A eggs as specified in the Federal regulations, will also be at liberty to sell direct to consumers under the proposed poultry plan, the only requirements in the case of these producers being that they shall secure permits from the Alberta Poultry marketing Board.

This policy towards these important sections of the poultry producing industry was laid down by the board members during a three day session in Edmonton last week.

Additional protection for the poultry producers has been created in the proposed poultry plan in connection with this phase of production, and it is now definitely specified in the plan that permits by the board cannot be unreasonably withheld.

In order to eliminate criticism of the manner of registering poultry producers and the conducting of a ballot among these on the proposed marketing measure, the Federal Marketing Board at Ottawa is taking the responsibility of conducting both registration and the ballot, thus relieving the Alberta Poultry Marketing Board of any suspicion of prejudice in the conduct of these two important steps.

It is anticipated the ballot will be taken in the course of the next few weeks and in the interval adequate steps to acquaint all poultry producers with the terms of the proposed marketing plan will be taken by the Alberta Poultry Marketing Board.

The export market for frozen poultry has opened up earlier than in 1934. Already 2,000 boxes of chickens have arrived on the British market, with more shipments to follow. One shipment from the Western Provinces is routed via the Panama Canal.

EPOCHAL CHANGE—

COMMENCING PERHAPS as far back as 1912—13, the foundation for a new social world order has steadily been going forward. Out of the welter of opinions, world movements, new plans, new systems; all suggested and advanced by those recognising the short-comings of the present system, there now appear to be definite and real signs that public men in high position have been won to the belief that a new order must emerge from the old. We are all more or less familiar with the recent speeches of premier Bennett promising legislation, which a few years ago would have been thought impossible as coming from a conservative leader. In the United States President Roosevelt is still working hard to bring economic order out of economic chaos, and in many ways disregarding what in the past has been classed as orthodox methods. In Alberta the U.F.A. convention, which is a sort of a reservoir from which the U.F.A. government obtains political inspiration, adopted twelve principles, which contain the escence of advanced legislation. In fact there are few men or bodies of importance who in some manner or other are not showing signs of changing their view point as regards men's relations one with another.

It may be perhaps, a source of disappointment to many that changes are not made, so to speak, overnight. The immediate improvement in their affairs which they had hoped for may not quickly materialize, but surely, if slowly, the world is pulling itself out of the morass of economic chaos, into which through the war and other causes, it had wandered. And in doing so it appears as if it is headed for clearer ground with a better chance for the common man.

The following taken from the Christian Science Monitor is of much interest.

"AT NO time during the last three years has any prominent British Minister spoken with so much appearance of confidence in the prospects of the near future as did Mr. MacDonald in the speech which he broadcast early in the new year.

And yet he spoke with more than his usual deliberation. He did not suggest that the conserving policy which his government has pursued had achieved its whole end, nor belittle the difficulties ahead. But he indicated clearly his conviction that the country had reached a stage where a more sanguine policy would be timely and would be adopted.

It was natural that he should express gratification with what had already been achieved. 'Every stranger who comes into our midst to look at us and study us,' he said, 'pays tribute to our conditions and takes home with him new hopes for the future.' Those were legitimate words of self-approval from the Prime Minister of a country which has reduced its unemployment by one third, again become the first exporting country in the world, whose consuming power in the home market is mounting, which has preserved its democratic form of government.

But if he had stopped there his speech would not have conveyed the encouragement which in fact it did. He set himself to take stock of those modern industrial and social conditions arising from the growing power of applied physical science and the revolution taking place here and now in our midst.

Only a day or two before, Lord Lothian, who is by party allegiance in opposition to the Government, had been speaking in similar vein of the crisis in the world's history, and the passage of mankind through one of those periods of chaos which have been almost invariably associated with a great step forward in civilization.

Mr. MacDonald, as head of the Government, was viewing the position in the same light, but now, as not always before, from the vantage ground of one who felt that he had the power in his hands to direct the struggle, and take constructive steps to compass the desired end.

Nor was he merely recognizing that continous work and shorter hours with improved machinery will be the means by which scientific progress will be made compatible with human welfare. He suggested that the British Government was now preparing to embark on a more enterprising policy than it has hitherto contemplated.

'Preconceived ideas will not prevent us from carrying out new experiments,' he said. 'Money is cheap. Let it be used for national development.' And at once he proceeded to state that the time is at hand when mining royalties would be nationalized and the basic coal industry compelled to submit to rationalization, when a big scheme of settlement on the land would be undertaken and when the experiments which the commisioners in the depressed areas have been instructed to make will form the basis for new constructional effort in dealing with unemployment and industry generally.

Never before has any prominent member of the National Government been thus lavish in his promises of new schemes to be undertaken by the administration and of action in the state planning of industry. It is evident that the pressure which the younger supporters of the National Government have been bringing to bear on it is having results, and that the Prime Minister of Great Britain is realizing that the time for a policy against disappointment is over, and that the time for a policy of hope has begun; that the moment has arrived to turn the accumulated assets of civilization to account and build for prosperity."

HEALTH by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

ARTHRITIS

Inflamation of a joint or joints is called arthritis. The inflamation may be acute or chronic. Acute arthritis may be a sympton of rheumatic fever; it may be due to an injury, or it may be a complication arising out of the presence of infection in some other part of the body.

The vast majority of cases follow some other infection in the system. Infected teeth, tonsils or nasal sinuses may be the underlying cause. Infection which has settled down in the gall-bladder, appendix, or generative organs may spread and set up an inflamation in the joints.

The disease may begin with fever. Pain in the affected joint when moved is an early sympton. All the usual symptoms of inflamation are present, such as redness, swelling and tenderness. The fingers and toes are the parts which are usually attacked. Later the joints become stiff and fixed in an unnatural position; they appear large because the muscles surrounding them waste through lack of use.

The extent and severity of the condition vary. In some cases, there is little or no deformity, while in others the deformity is quite severe. Obviously, the condition is related in its severity to the underlying cause.

The first step in treatment is rest and quiet. Attention should be directed to the general health which is often disturbed. A simple diet, including fresh fruits, green vegetables, and milk, together with the free use of fluids, is indicated.

The real and most hopeful treatment is directed towards finding and eradicating any focus of infection which may be present in any one of the sites previously mentioned. If the infection is already firmly established in the joint, too much cannot be hoped for from the removal of the focus from which the infection originated.

Medicines are of value in giving relief from the symptoms, but no medicine has been proved to be of value as a curative agent. Rather must reliance be placed upon raising the standard of personal health through the recognized means, and by avoiding any excesses, living the simple life, with plenty of rest. The use of massage, heat and other forms of treatment for the joints should be applied only under medical direction.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

THE NECESSITY FOR FARM ACCOUNTING

This year far more farmers than ever before are making an early detailed list of the items of their farm businesses to see what they own and what they owe; in short to find out how they stand as they wind up one farming year and begin another. Some record of receipts and expenses, together with an inventory (a list with values of live stock, feed, implements, and any other asset on hand) is really necessary. The record not only shows the farmer what he is actually worth and whether or not he is getting ahead, but also gives him a basis for a statement for obtaining bank credit. Further record includes a list of property for collecting fire insurance and settling estates, as well as a guide for the coming year's financial plans.

A record of each department of the farm business should be kept because it is the only way of finding out which part of the farming pays and which does not. To assist the farmer in this very important matter, the Dominion Department of Agriculture has issued a very simple and useful little account book. No special knowledge of accounting is necessary, and a record of transactions can often be made in less then one hour per week. The little book, though simple, is a great step in advance of keeping no accounts whatever.

Up to the end of December 1934, the number of pure-bred cattle registered during the year with the Canadian National Records, approved by the Dominion Minister of Agriculture, was 2,880 horses; 33,269 cattle; 11,862 sheep; 7,731 swine; 8,698 foxes; 7,566 dogs; 1,975 poultry and 99 goats. Each class of animal showed an increase on 1933:—horses, 110 increase; cattle, 3,269; sheep, 1,094; swine, 1,118; foxes, 488; dogs, 53; poultry, 33; and goats 14.

Western Canada shipped 118,081 cattle; 7,715 calves; 199,331 hogs; and 73,842 sheep to Eastern Canada during the 52 weeks of 1934.

POULTRY VALUE

Value of poultry and poultry products for Alberta during 1934 is tentatively estimated at $6,000,000 by the provincial poultry branch. This is an increase of 1,000,000 over the estimate for 1933. Poultry population of Alberta is given as 7,811,000 head of all classes.

AUTO LICENSES 1934

Total motor vehicle licenses issued in 1934 were 88,497, of which 73,114 were passenger cars and 15,383 were trucks. This is compared with 85,250 in 1933, of which 71,076 were passenger cars and 14,174 were trucks. Gasoline revenue for 1934 was $2,636,000 compared with $2,222,992 for 1933.

SCHOOLS OF AGRICULTURE

One of the best records of attendance in the history of the two schools of agriculture at Olds and Vermillion is being experienced this term. At Vermillion 170 students are in attendance, while at Olds 180 are attending, a total of 350 in the two schools.

THE FIRST REAL CANADIAN MONEY

History relates that Canada, in 1817, "was too poor to afford the luxury of a metallic circulating medium, and the development of trade and agriculture was hampered by the lack of facilities for exchange."

American money, also British and French and some Spanish and Portuguese, was used—all subject to fluctuating rates of exchange and causing monetary confusion. There was no Canadian money, either coin or paper.

But in 1817, when the Bank of Montreal was started, its directors—merchants who knew what Canadian business urgently needed—immediately provided a paper currency (the Bank's own bills in small denominations) and later copper coins. These Bank of Montreal issues were the first real Canadian money.

Through 117 years since then, the Bank of Montreal's notes have performed a useful function, as Canadian business has grown from small beginnings to its present extensive proportions. These notes have provided a sound, dependable and elastic currency, their volume automatically expanding and contracting with the changing demands of trade.

Notes of the Bank now in circulation amount to [illegible], or about one-fourth of the entire commercial bank note currency of Canada.

The Bank's resources ([illegible]) are likewise about one-fourth of the total resources of the Canadian commercial banks. These figures indicate the extent to which the Bank of Montreal participates in Canadian business activity.

ARRANGEMENTS FOR REGISTRATION AND POLLING in connection with PRAIRIE POULTRY MARKETING SCHEMES

The poll of poultry producers to determine their wishes with respect to the poultry marketing schemes for the Provinces of Manitoba, Saskatchewan and Alberta will be taken through the facilities of the Post Office Department and with the co-operation of the Postmasters of the Prairie Provinces.

In each of the three Prairie Provinces the Dominion Minister of Agriculture will appoint a Committee of five regular employees of the Dominion Department of Agriculture who are now stationed in Western Canada to take charge of the registration and voting. The chairman of each committee will be the Returning Officer for the Province.

Envelopes will be prepared and sent from Ottawa to all Post Offices in the three Prairie Provinces and these envelopes will be handed out on request by Postmasters to all producers having a total flock of poultry of all kinds in excess of twenty-five birds, (including — hens, turkeys, geese and ducks). In each envelope there will be enclosed

1. Registration Form and Ballot.
2. Instructions for registration and voting.
3. Return envelope addressed to the Returning Officer for the province concerned.
4. Copy of the scheme.

It is expected that all the envelopes will have left Ottawa for the Post Offices in the Prairie Provinces by February 2nd.

A public notice will be placed in every Post Office, calling the attention of poultry producers to the fact that Registration Forms and Ballots are available at every Post Office.

Postmasters will receive directions to hand to poultry producers applying for same the envelope containing the documents mentioned above, but before this envelope will be delivered to the applicant, he must sign his name to a Voters' Register which will be in the possession of the Postmaster, certifying to the fact that he owns or controls a flock of poultry in excess of 25 birds. The Voters' Register in each Post Office will be open for inspection on request, to all poultry producers during Post Office hours.

The voting week begins on February 16th and ends on February 23rd. No return envelope containing Registration Form and Ballot should be mailed before February 16th and any ballots mailed after February 23rd will not be counted. This return envelope which the producers will mail, will be addressed to the Returning Officer for the Province concerned and no postage will be required.

At the close of Post Office hours on February 25th, which is one full Post Office day after the close of the poll the Voters' Register, containing the signatures of producers who obtained envelopes, will be mailed by the postmaster to the Returning Officers at Winnipeg, Regina and Edmonton.

During the time the Voters' Register is open for inspection, any name signed to the Voters' Register may be challenged provided such protest, with reasons, is signed by at least two producers and mailed to the Returning Officer not later than the 25th day of February, 1935.

Upon completion of the poll, each provincial Returning Officer will make a return to the Dominion Minister of Agriculture, Ottawa.

ONE ITEM CONSCIENCE MONEY $800.00

Montreal, Que., January 22.—In these strange times some people have lost many things but apparently not their consciences. This is vouched for by the fact that the Treasurer of the Canadian National Railways has received a total of $1,114.85 in conscience money turned into the railway during 1934 by persons wishing to make restitution for certain wrongs committed. Frequently the remitter omits to state the exact nature of the act which caused a troubled conscience and in such cases the railway considers the amount as "belated" passenger revenue and it is therefore credited to that department.

Of the total amount of this conscience money received from all parts of Canada during the past year, the largest single amount was $800.00 in October last and the smallest that of 25 cents also in October, these two items representing the maximum and minimum individual amounts ever received in any year.

Subsidiary lines of the Canadian National Railways operating in the United States also have their "lean" and "fat" years as regards conscience money. For instance, the Central Vermont Railway's "conscience fund" usually quite sizeable in years past, was saved just recently from being a complete blank when $5.00 was received from one whose signature was "An Employee."

CANADIAN DRAFT HORSES

In view of the increasing demand in Canada and elsewhere for good commercial draft horses, and of the pressing need for more high-class stallions of the draft breeds in the Dominion, Hon. Robert Weir, Dominion Minister of Agriculture, has inaugurated a breeding policy for the improvement of the Canadian horse industry. To this end the Department has purchased a number of high-class outstanding stallions of the draft breeds which will be located at the following Dominion Experimental Farms in Alberta- Lethbridge and Lacombe.

Only pure-bred mares are eligible and must be nominated by the owners not later than March 15th. Further particulars may be had upon application to the Live Stock Commissioner, Department of Agriculture, Ottawa; to the Dominion Animal Husbandman, Central Experimental Farm, Ottawa; or to the Superintendent at the Experimental Farm at which the stallion is located, as mentioned above.

FOR SALE:—Five young pigs, weight about [illegible] pounds.—apply to Sam Dunham, Tofield.

FARM WANTED.—Person wishes to rent farm. Willing to pay all current taxes and half crop basis. Half section preferred.—Apply to Mercury Office. 50p

A FEW YOUNG TOMS FOR SALE —From A grade imported toms and Alberta hens from prize winning flocks. Reasonable prices. —Apply to Mrs. John Bowsch, half mile north of Tofield school.

LOST.—Friday, Dec. 28, a sleigh runner and bunk one mile west of Tofield. Finder please phone 416. Strayed on east half of section 18, Wednesday Dec. 26, one sorrel mare. Apply to John Brown, Tofield.

FOR SALE.—One sorrel gelding colt, good size, coming two in the spring. $40 cash.
Apply Mrs. Gray, Tofield. Phone [illegible].

FOR SALE.—Purebred Shorthorn bull calves from two weeks to 10 months old. Can be registered if desired. Price $10.00 and up, if taken soon. Phone 208.—Joseph Voegtlin.

Behind the Hog

By A.B.C.

You can no curl in the summer time, Mo Mom, the weather is so mild that the curlers cannot even get cold feet.

—o—

Laughs at the rink are good things, especially if they are on the other fellow.

—o—

Many curlers with poor shapes show good form.

—o—

A wise curler asks questions to learn something, the rest just to start an argument.

—o—

As Shakespear says, "to be or not to be, that is the burning question." That is what is troubling the Ladies' Curling Club about that spell. What we are concerned about is who we are going to get to cover this Highlight for Behind the Hog, as we will have to work the FIRST day anyhow.

—o—

We understand that Artie's rink when coming home were so busy getting the rocks on the train that they forgot to get on themselves. Art was looking at the buffalo in the glass cage on the station platform and he said, "this is what they should give for a prize," and Lew said, "what's the difference, we could not even get the hides."

—o—

We have curlers short and curlers tall
And curlers fat and curlers small
We have curlers lean and in between
We have curlers who can't hit a beam.
We have curlers who can hog them all
And curlers who can't hog at all;
We have curlers who just shout and shout;
And others not a peep let out
We don't care what its all about
As long as they don't bawl us out.

—o—

All above curlers should be getting their rinks ready for the big mixed bonspell which takes place next week sometime.

—o—

Ye've tolt me a lot aboot Vitamin D.
And hoo it is got from the squash and the pea,
But gi'e me ma curling alang till I dee
An' poke a' the vitamins intil yer e'e.

—o—

You have got to make calls if you want to get results.

—o—

Curling manners consist in pretending that we think as well of others as of ourselves.

As one curler says, "Do not rest on your laurels as they sometimes wilt.

—o—

The depression is over folks, two rinks of ladies to the Edmonton Spell, one men's rink to Wainwright, one men's rink to Edmonton and two rinks of ladies to Camrose. Some are lucky and others have to stay home. If you wish to pay your fees I will be on the job every day.

—o—

One curler fell down and Doc said, "are you hurt?" and he said, "right here Doc. Doc said, "then what are you holding your leg for?"

—o—

The mixed spell opens Thursday Feb. 14.

—o—

The finals in the Smith competition will be played Friday night between Calvert and Chapman. Our genial president L. W. Smith is the Santa Claus of this competition and there are prizes and ev'rything.

HOCKEY

The hockey story this week is a brief one. On Thursday of last week the Tofield seniors journeyed to Edmonton and played a return game with the R.C.M.P. team there. It was a good clean game and resulted in a win for Tofield by the score of 5—2. After the game the team was entertained to lunch by the R.C.M.P. team, a courtesy which was much appreciated.

The following night the team played Viking at Viking in a league fixture losing out by a score of 2—1. This we are informed was one of the best games of the season and the closeness of the score indicates the play being very even.

On Thursday of this week the team met Irma on local ice and suffered a defeat of 5—6. This game was peculiar inasmuch as the first period was all Tofields, the second all Irma's and the third fairly evenly contested. At the end of the first period the score was 5—1 for Tofield, at the end of the second 5—5, and at the end of the third 6—5 for Irma.

SOCIAL HOUR CLUB MEET

The ladies of the Social Hour Club held their regular monthly meeting at the home of Mrs. Jack Lee on the afternoon of Thursday January 10.

In spite of the heavy conditions of the roads there was a fairly good attendance.

Most of the afternoon was spent in a social way; since the quilt has been made and disposed of no active work has been done at the meetings.

It was decided at this meeting to send away for remnants, which are to be made into childrens garments for Sunshine.

The meeting was brought to a close with a charming tea served by Mrs. Jack Lee and her helpers.

Miss Margaret Mitchell was a guest of the club for the afternoon.

Local & Personal

Mr. McLaughlin is skipping a rink in the Edmonton spell this week. The personnel of the rink is; Mr. McLaughlin, Mr. Calvert, Mr. Hannan and an Edmonton curler.

The ladies' spell had to be postponed on account of the weather conditions. It will be held on Monday and Tuesday of next week.

We regret to report that Mrs. Wood is on the sick list.

Miss Thelma Noland and Mrs. J. B. Warner returned to their homes on Wednesday. They spent a few days with Mrs. Dr. Morrison after leaving the hospital.

The Young People went on a very enjoyable sleigh ride on Wednesday evening. After the ride lunch was served in the church basement.

A few Tofielders attended the R. C. M. P. hockey game in Edmonton last Thursday evening.

Miss Muriel Malcolm entertained Miss Mann and Miss Ottowell at dinner on Tuesday evening.

Two rinks skipped by Mrs. Brace and Mrs. Calvert are attending the Camrose bonspeil this week.

AN INSECT WEATHER PROPHET

Not all stories about insects as weather forecasters can be dismissed as myths. Alberta has an insect that is a real weather prophet. It is the manure beetle, of the genus Aphodius, which emerges suddenly in the spring and autumn in countless thousands. A thorough study of the weather records fails to give any reason why the beetles should fly when they do, says H. L. Seamans of the Dominion Entomological Laboratory at Lethbridge, but there is a distinct and valuable connection between the beetle flights and the weather that follows. The first flight in the spring is usually the forerunner of a cold spell with snow, but this cold period is the last before spring growing conditions arrive. The autumn flight immediately precedes the first snow or severe frost and is the forecast of the end of growing conditions and general insect activity. While mild weather may occur after the autumn flight, a second flight follows and this is the prelude to very severe weather. Gardeners and growers of root crops in the Lethbridge district are not stampeded into uncovering their delicate plants, or setting out bulbs in spring just because there has been a week or two ideal spring weather early in the season. They wait for the tip from the beetles.

REGISTER YOUR REVOLVERS

Mercury readers are reminded that all persons possessing revolvers are required to register them with the R.C.M.P. It is also necessary for residents who are not British subjects to register any firearms whatsoever in their possession.

TOFIELD RINK DOING WELL AT EDMONTON

The Tofield rink consisting of Bud Hannan, Bert Calvert, an Edmonton man and Geo. McLaughlin (skip) is doing exceptionally well at the Edmonton bonspell. At the time of writing they had played eight games with only one loss.

SNOWMOBILE

A new type of vehicle designed by Cootts Bros. and named snowmobile is creating much interest. The vehicle is propelled by power supplied by a car engine and connected with a large air propeller. Instead of the usual wheels sleigh runners are substituted.

SKIING BEHIND CARS

The thrill of a lifetime is being enjoyed by a few of theyoung bloods when they, riding on a pair of skis are drawn behind a fast travelling automobile. Last Sunday the snow was not quite suitable for this sport, but a week previous it was ideal.

"Without the slightest hesitation one can state that the birds sent from Canada this season are the best that have ever come from the Dominion. The turkeys themselves are well-finished, the grading leaves nothing to be desired, and packing and markings have received careful attention. One wholesaler remarked that 'Canadian birds are a pattern to anybody,' while another importer who had not been particularly pleased with some of the birds last year declared that 'Canadians would carve a special niche for themselves if they kept to that kind of quality for export'."

Re-elected by Acclamation

All councillors and school trustees were returned by acclamation on Monday. Members of council re-elected are Mayor Brace, who commences his second two year term as mayor. Councillor Swift, who has served continuously on the council since January 1917, including three terms as mayor, Councillor Bellamy who [illegible] starts [illegible] two year term. Councillor Lovell has now served four years.

A. C. Dodds replaces Mr. John Lee who declined to accept a nomination. Mr. Lee has a record of about sixteen years service including several years as chairman of the school board.

The full personnel of the council and school board are as follows.— Council: Mayor Brace, Councillors Swift, Lovell, Bellamy, Hammond, Chapman and Taylor.

School Board: J. W. Robinson, A. J. H. McCauley, A. C. Dodds, A. J. Harrison and J. W. Chapman.

WEDDING BELLS

A very pretty wedding was held on Sunday, Feb. 3rd when Miss Alice Sirdar, daughter of Mr. and Mrs. Paul Sirdar of Tofield became the bride of Mr. Geo. Wm. Carter of St. Albert. The ceremony was performed in St. Francis' Roman Catholic Church in the presence of a large number of friends and relatives. Rev. Father Malone officiating. The bride entered the church with her father to the strains of Lohengrin's wedding march played by Mrs. Wm. Kuilal, and was attended by two bridesmaids, Miss A[illegible] Audienko was the bride's sister, Miss Emily Sirdar. The bridegroom was supported by Mr. Peter Keouch and Mr. Frank Sirdar as best men.

After the ceremony a reception was held at the bride's parents home to which many friends had been invited. The Ozipko Bros. orchestra rendered suitable selections throughout the day.

The happy couple left for a stay at St. Albert after which they will take up housekeeping at Tofield where Mr. Carter is employed with the C.N.R. section crew.

Egg and Poultry Producers

A series of broadcasts dealing fully with the poultry marketing scheme proposed for this province under the Natural Products Marketing Act will be given over Station
CFCN Calgary
CJCA Edmonton
commencing at [illegible] p.m. each day on

Saturday, February 9	Saturday, February 16
Tuesday, February 12	Monday, February 18
Thursday, February 14	Thursday, February 21

Ballot of producers on the proposed Alberta marketing plan will be distributed February 16 to 21. Ask your postmaster for particulars.

ALBERTA POULTRY MARKETING BOARD
206 Northern Investment Building, Edmonton

EGG and POULTRY PRODUCERS

LISTEN TO THESE RADIO TALKS
It will be in your interests to listen to the series of [illegible] broadcasts over Radio Station CFCN Calgary [illegible] from 7:30 to 8:00 p.m., excepting [illegible] Saturdays between now and February 22. [illegible] broadcast over an Edmonton [illegible] the air. [illegible] why you should register your dis[illegible] Egg and Poultry Marketing Scheme by voting against it at the forthcoming [illegible].

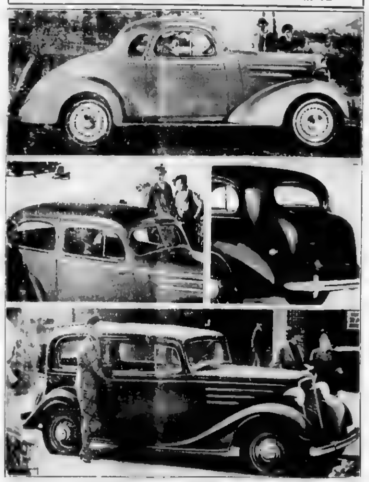
PROTECT YOUR LIBERTY AND LIVELIHOOD. DO NOT FAIL TO REGISTER
[illegible] that in order to vote you must register [illegible]. Full particulars as to how and when [illegible] may be obtained at your local Post Office.

ATTEND THE POOL MEETINGS
[illegible] attend the Pool Meetings. Listen to the arguments in favor but be prepared to ask questions and voice your disapproval if you are not in agreement.

The radio talks will provide you with plenty of arguments in this connection.

EGG AND POULTRY PRODUCERS PROTECTIVE ASSOCIATION OF ALBERTA

1935 Chevrolets Master and Standard Announced



BEAUTY, STYLE AND PERFORMANCE EMPHASIZED

New 1935 Master and Standard models have just been announced by Chevrolet. The Master models depart distinctly from previous Chevrolets in body design and the solid-steel Turret-Top body by Fisher is one of the striking improvements. Above is shown, the Chevrolet Master 3-passenger coupe. Centre panels show, on the right, the beautifully streamlined rear quarter of the new bodies; and on the left, a view of the solid-steel Turret-Top roof. Below is shown, Chevrolet Standard Coach, which achieves virtually the same performance as the Master. There are six models in the Standard line and ten in the Master line.

"A Painted Ship On A Painted Ocean"

T. A. Grehan, advertisement manager of the Dublin (Ireland) Independent Newspapers, Ltd., says:

"My bunch of newspapers—all nationwide circulation—have just gone through a period of complete 'silence' lasting almost nine weeks. That is to say we were unable to issue one copy over all that time. Labour trouble was the reason, but let that pass. The point is that as a result of that elimination of our newspapers, the business of our regular advertisers went completely wallop. There was undiluted desolation. Stores here that knew crammed floors regularly as a matter of course, resulting from their budgets of advertising offers, were as idle as a painted ship upon a painted ocean.

"As an old campaigner, it stunned me to see just what the value of newspaper advertising is. Our merchants tried all sorts of other devices to get over the handicap of this no-newspaper period. They tried the street cars, the billboards, the movies, the handbills, even the air. No worth-while results accrued altho I have reason to know that the cost was as heavy in the aggregate., in some cases decidedly heavier, than if the money involved had been expended in newspapers. And remember ber this big point, the results in business were definitely unsatisfactory.

"I have been in this live business of newspaper advertising for so many years that I thought I knew how the thing worked. I didn't know. This just-concluded newspaper silence has taught me a volume of things and if there is one thing above all that sticks out it is that a country without its newspapers is a country blindfolded completely. Our people here were positively bewildered. We all went around wondering what in the name of blazes was going on, but the poor bewildered advertiser felt that the wind had completely dropped, his business craft was becalmed, business movement was, as I said at the outset, as idle as a painted ship on a painted ocean.

"If ever I felt lukewarm on the question of the value of newspaper advertising, and I doubt if I ever did, I am now a 'roaring, tearing, hot-gospeller.' Boys, it has been an amazing eye-opener. So, let us say, out of evil cometh good."

THE MERCURY

Alberta News Bulletin

CATTLE SHIPMENTS

Shipments of cattle out of the province during the year 1934 showed an increase of nearly 40,000 over those of 1933, according to figures compiled in the provincial department of agriculture. The total shipments for 1934 were 161,578 head, compared with 123,428 for 1933. Shipments for 1932 season were even less, being in the neighborhood of 100,000 head. Total shipments of beef cattle from Alberta to the British market for the year were slightly less than in 1933. Export of horses from the province in 1934 totalled 20,337, compared with 16,182 head in 1933.

BACON HOG CAMPAIGN

During 1934 a total of 52 meetings were held in various parts of the province in the campaign conducted by the provincial department of agriculture and co-operating interests to promote the increase of production of "select" hogs. Further series of meetings are being held during the present winter.

1,200 PUPILS IN CORRESPONDENCE COURSES

During the past year, the educational correspondence courses conducted by the provincial department of education for the benefit of children in the outlying districts, served a total of nearly 1,200 pupils. The courses were established in 1924.

ROAD GRAVELLING PROGRAMME

During 1934 the provincial highways department completed a road gravelling programme totalling 258.64 miles, of which 147.57 miles was new gravelling. This provided for the extension of the main gravelled highways as follows: Bow Island to Medicine Hat; Castor to Coronation; portion of the Jasper highway; Sedgewick to Hardisty; Holden to Irma. There is now a total of 2,200 miles of gravelled highways in the province.

TOTAL OIL PRODUCTION

Final figures for the oil production of the province now available place the total for 1934 at 1,265,940 barrels, compared with 1,012,040 barrels in 1933.

REGISTERED UNEMPLOYED

Total registered unemployed with the provincial employment bureaus was 9,450 at January 19.

ALBERTA SEED FAIR

Dates for the annual provincial seed fair are February 13 to 15, to be held this year in Edmonton.

MUNICIPALITIES DO WELL

Progress was recorded by several central Alberta towns in annual reports presented at ratepayers' meetings. Camrose with record tax collections has $4,000 cash surplus. Ponoka transferred a deficit into a surplus and Provost cleared off debenture debt. Castor after making a heavy tax rate cut collected more revenue than in the previous year. Vermilion showed a surplus for the year, largely from increased revenue from its central heating plant. Fort Saskatchewan will probe the possibilities of a municipally owned power and heating plant. Other municipalities in various parts of the province are expected to reveal similarly satisfactory conditions.

SCOUT NEWS

Fijian Scouts at the Australian Jamboree presented Baden-Powell with a whale's tooth.

A 21 Year Old Good Turn

An Austrian Scout leader is endeavouring, through London Scout headquarters to locate two English Boy Scouts who came to his assistance in 1911 when, as a small boy who could speak no English, he was wheeling through the heavy traffic of the Strand and broke his bicycle chain.

Japanese and Canadian Scout Friends

Exampling the international contacts of the Boy Scouts comes the copy of a chatty letter, in most creditable English, from a 16 year old Scout at Osaka, Japan, to a Vancouver Scout. The Japanese lad concludes, "I hope we can live with good will in our Scout life."

Boys Gather From Many Lands

The 11,000 Boy Scouts participating in the recent Australian Jamboree comprised boys from 23 different countries or parts of the British Empire. Europe was represented by contingents from Belgium, France and Hungary. The East sent Scouts from India, Ceylon, Malaya, Dutch East Indies and Japan, the West from the United States.

A Juvenile Court Judge on Scouting

In meeting the problem of the under privileged boy which is particularly pressing under present-day conditions, the Boy Scout Movement is of great assistance, in the opinion of Judge J. F. McKinley, of the Ottawa Juvenile Court, and one of the Dominion's recognized authorities on juvenile and domestic court problems.

"I have no hesitation in saying that Scouting is a wonderful force for good, especially among underprivileged boys," declared Judge McKinley. "Many boys go wrong simply because they have no proper channels to give outlet to their physical and mental energies. As a result they make associations and form habits which ultimately lead to serious wrongdoing."

"In Scouting such boys are afforded a splendid outlet for their energies. They are thrown into intimate contact with qualified leaders, and altogether their associations are of the finest."

Scout units in various parts of the Dominion have made it a practice to provide for a number of boys of needy families at their summer camps. The Alexander Mackenzie Rover Scout Crew of Galt and Preston, Ont., holds an annual summer camp for such boys. Last summer over 100 boys were given the ten days' outing. The Scouts of a British Columbia troop gave up one week of their paid-for camp for the benefit of boys of needy families.

Alberta Indian Scouts to Meet B.P.

One of the Boy Scout troops hoping to meet Baden-Powell during his visit to Canada is the troop of the Sarcee Indian Reserve, near Calgary. On his last visit B.-P. was made a chief of the tribe, and christened "Chief Spotted Eagle." The young Indian Scouts hope for an opportunity to display their ability at Indian sports and horsemanship, as well as scouting.

LILLIPUTIAN RAILWAY

The smallest commercial railroad in the world, with the locomotives which are no higher than the average man's chest and which operate over a track of 15-inch gauge, is the Romney, Hythe and Dymchurch Railway on the south coast of England, states J. Cecil Nelson in an article published in the February issue of Canadian National Railways Magazine now being distributed. The R. H. and D. Railway operates at a profit, with lilliputian engines and rolling stock. The small locomotive can haul a full train of 300 passengers up a 1 in 100 gradient at 25 miles per hour.

PASSENGERS PRAISE OFFICIALS AND CREW OF MAROONED TRAINS

Vancouver, B.C., February 4.—B. T. Chappell, General Superintendent, Canadian National Railways and Steamships, Vancouver, last week received a memorial signed by 150 passengers who were held up at Kamloops during the recent storm and rerouted to Vancouver via Prince Rupert. They arrived in Vancouver on C.N.S. "Prince George." Signatures disclosed passengers came from points as far east as Prince Edward Island and as far west as the Philippine Islands.

The memorial reads: "We the undersigned wish to express our sincere thanks for the many kindnesses and the satisfactory manner in which the Canadian National Railway Company and the Canadian National Steamship Company handled so efficiently and with so little inconvenience, a difficult situation.

"Many of us were marooned for several days attributable to unprecedented weather conditions which created snow and other slides demoralizing schedules, with the resultant blockade of transportation on your railroad in southwestern British Columbia.

Suitable accommodation and meals were furnished us at the expense of your railroad. Our welfare was solicitously looked after and the uniform courtesy and helpfulness of your officials and crew of both train and boat were most commendable in every way and deeply appreciated."

C. N. RAILWAY ASSIST IN BACK TO LAND MOVEMENT

Winnipeg, Man., February 4.—Since the beginning of 1932 the Canadian National Railways have helped to return to the land in Western Canada more than 3,000 settlers who were formerly unemployed or located in cities or elsewhere where they found conditions unsuitable, says P. B. Kirkwood, writing in the current issue of Canadian National Railways Magazine. Mr. Kirkwood describes the homestead of a former unemployed trainman who was laid off due to short service and decided to strike out with his family to make a farm home. The family of six persons have made excellent headway and had been established on the farm at an expenditure approximating $700.00. Previously they had been on relief rolls of a western city.

ORANGES AND GRAPE FRUIT FROM JAMAICA

Bananas, cocoanuts, cocoa, coffee pimento and ginger are usually associated with Jamaica, but it may not be generally known that grapefruit, oranges and Jamaica are likewise synonomous terms, particularly at this time of the year when Jamaica's export of citrus fruits are at their peak, with thousands of boxes of luscious grapefruit and oranges being forwarded in the vessels of the Canadian National Steamships every year for distribution to many parts of Canada. Jamaica oranges and grapefruit are of quality which ranks high in the citrus field.

Here and There

Employed on railway construction 50 years ago, Thomas D. McGillivray, 85, of Edmonton claims the distinction of having placed the last carload of dirt on the C.P.R. when that trans-continental line was completed to the Pacific coast in 1885. Despite his advanced age he still has a clear recollection of incidents on construction.

Miss Mary McNeill, superannuated in December after over thirty years on the Upper Lakes as stewardess of the C.P.R. Great Lakes Steamships, spent almost her entire service as chief stewardess of S.S. Keewatin, sailing with her every season from her maiden voyage in 1908 until the close of the 1934 season.

Fortunes are being spent on research in the science of armaments but not one penny for research in the field of disarmaments, said Prof. Julian Huxley, famous grandson of the even more famous Thomas H. Huxley, in outlining the meaning and functions of science, its shortcomings and possibilities, at the Lord Nelson Hotel, Halifax, recently.

"Our province will soon take an important place, if not the leading place, among the gold-producing countries of the world", stated Hon. J. E. Perrault, Minister of Roads and Mines of the Province of Quebec, in a recent address on "The Mining Industry of Quebec" at the Chateau Frontenac, Quebec City.

Interviewed at Victoria recently, N. R. DesBrisay, assistant passenger traffic manager Canadian Pacific Railway, stationed at Winnipeg, said that indications pointed to a better all-around tourist season for 1935 over 1934 much improved though that year had been over previous tourist seasons.

Ski-joring behind a fast running horse; mushing with a team of huskies, skating or ski-ing on the mountain trails all come under the heading of real sport, in the view of Miss Dorothy Standish who reigns as Banff Winter Sports Beauty Queen during this year's season in the Canadian Rockies.

Harry Lauder, tourist, travelling along a highway near Banff by car recently, saw a golden eagle fly by the window of his car, and reaching out caught it by the neck and pulled it into the automobile. He turned the bird over to the Banff Zoo.

A forty-mile ski race, a forty-mile snowshoe race, motorcycle ski-joring, figure skating, ladies and men's hockey, championship speed skating, pony ski-joring, trap-shooting, ski-jumping and many swimming events in the warm pool, will be featured of the elaborate winter carnival at Banff on the week's programme beginning February 14.

Setting recently on her fourth annual cruise around the world, which will take 130 days, with calls at thirty-three ports in twenty-four countries, Canadian Pacific Atlantic flagship, Empress of Britain, left New York with close on 400 passengers. She will return to New York late in May.

Honoring Captain A. J. Hailey, R. N. R., who retired from command of the Canadian Pacific liner Empress of Canada after thirty-four years with the C.P.R., shipmates and shoreside friends presented him with an engraved wrist watch at a luncheon recently aboard the ship. Captain Hailey left the sea with forty-four years of service behind him on the seven seas.

EXAMPLE of LARGER SCHOOL UNIT DEMONSTRATED

Berry Creek Reduces School Costs Over Large Area

Editor's Note:—The following article taken from a recent issue of the Hanna Herald, and forwarded to us by Mr. C. D. Denny, formerly of Tofield and now of Coronal, Alberta, is of special interest, coming as it does, at the time of publishing the annual municipal school tax statement. Without either favoring or viewing with disfavor the scheme outlined below, we take pleasure in publishing same.

Indicating real possibilities in the administration of schools throughout the province of Alberta, by means of the larger unit, Berry Creek School District's annual statement has just been prepared, showing a saving to the ratepayers of the Berry Creek Area of $11,731.11 by a decrease in the cost of operation of their schools in the fiscal year of 1934.

Berry Creek might be described as the experiment in the formation and administration of larger school units and the experiment is a most successful one. The figures and facts which have been compiled following little more than a year's operation indicate that there will be a demand and a very wide demand, for the formation of similar large units in other sections of Alberta. When it is shown that the cost of operation can be reduced from $37,000.00 to $23,395.00 in one year's time, and maintain a better school service for the area affected, the scheme cannot be described as being anything other than a gigantic success.

For some years Hon. Perrin Baker's proposal to divide the province into larger school units has been a favorable topic in educational circles, but it remained for the organization of the Berry Creek unit to prove that the minister's scheme was sound and practical.

After operation for slightly more than a year a meeting was held at Sunnynook last week, when the financial statement of the district was presented. A resolution of the ratepayers expressed complete satisfaction in administration of the district's school affairs during the past year and confidence in the administration. A brief outline in connection with the organization of the Berry Creek unit might be of interest at this time.

The area known as the Berry Creek Area in Alberta was organized into four municipalities and comprised sixty-seven rural school districts; the total area was in the neighborhood of two thousand square miles. It is nearly fifty miles long, north to south, and forty miles wide. These school districts had suffered from drouth over a period of years and the people had been slowly moving to other locations. In 1932—33 there was an increase of this movement and the population left was thinly scattered, except along the railroad which runs through the approximate centre of the district.

Some of the districts had been without school population for a number of years, but had maintained a small mill rate. They had thus been able to accumulate quite a bank account. Other districts were left with a school population of anything up to twenty-five pupils to take care of. By the spring of 1933 these latter districts had come to the point where it was impossible for them to finance any further.

It was felt that this area was an entity that would lend itself very well to an experiment in the larger unit of administration. Upon examination it was found that the mill rates varied all the way from three to twenty-five. Operating districts were heavily in debt and non-operating districts had substantial sums in the bank. There was grave danger that there would not be any school facilities for any of the pupils for the fall 1933.

Meetings were called throughout the Area, the problem presented and a remedy suggested to the people. At each of these meetings a vote was taken and practically 100 percent voted in favor of reorganization.

Accordingly the whole area was reorganized as one school district under official trustee. He took over all of the assets and liabilities of the old districts. The operating districts owed teachers' salaries to the extent of $9,000, debentures $5,500, other bills of $4,500.

The first step in the new set up was to levy a flat rate of ten mills over the entire area for school purposes. This produced a tax varying from $3.20 to $6.00 per quarter section of land—an average of about $5. The official trustee then located on a large map every family with children. From this map he placed the school houses so that they would take care of the greatest number of children possible under three and a half miles. By moving several schools, it was possible to take care of the great majority of the pupils. This left a few scattered pupils with too great a distance to go to school with any degree of comfort during the very severe weather of the winter months. To take care of these, some of the old schools were moved to the grounds of the operating schools and turned into dormitories. Here the pupils are taken care of from Monday morning to Friday night by older children of the family, by the parents, or by a woman in charge. This feature is supplied by the district in lieu of conveyance required by the school Act for pupils over three and a half miles from school, and is proving much cheaper and more satisfactory. If it should happen to be very severe weather on Friday afternoon the pupils may stay over the week-end.

The fall term opened with twenty-two junior teachers, and four teachers doing the work of high school, or senior elementary school and high school combined. There were five hundred pupils attending.

The cost of educating the pupils in the old districts for the spring term 1933, six months, was $30,000. The cost for the ten months, fall 1933-spring 1934, under the new set-up was $24,400. This included the moving of schools and the preparing of dormitories.

The cost for the fiscal year 1934 was $23,395; the estimate for the year 1935 is $21,000. This compares very favorably with a cost of $37,000 for the fiscal year 1933, during which time the district was under present program for only four months.

Inspector L. A. Thurber, who has been responsible for the administration of this successful Berry Creek unit, outlines some of the reasons why larger units are considered to be in the interests of the

(Continued on back page)

ratepayers and the school population. In his address Mr. Thurber said

I would ask you to examine carefully some of the advantages and disadvantages of the system of administration [illegible]

DRESSED POULTRY REGULATIONS

The recent amendments to the regulations respecting the grading and marking of dressed poultry [illegible] sized pack.

(b) In the left lower corner, "Tagged" if and only if, all the birds in the box are tagged. In this corner may also be shown the gross weight of the package.

(c) In the right lower corner, the [illegible]

(d) In the centre, the kind and [illegible] quality on the first line; the [illegible] grade on the second line.

(e) In cases where the kind and [illegible] is designated by the [illegible] name shall be [illegible]

(f) In the marking of turkeys, [illegible] shall be [illegible] may be indicated [illegible] letters of [illegible]

[illegible] must be [illegible]

(2) No [illegible] shall place in any such box [illegible] design other than those [illegible] this regulation, except [illegible] be authorized in any case by the Dominion Minister of Agriculture.

The [illegible] new regulation, which refers to [illegible] grading and [illegible] poultry for export has been added as section 16 as follows:

(1) No person shall either by himself or through the agency of another [illegible] poultry for export [illegible] unless the same has been [illegible] certified by an inspector at point of shipment and [illegible] packed and the contents [illegible] in accordance with [illegible] individual [illegible] bearing the class and grade as specified in these regulations.

(2) The Minister may from time to time prescribe the form, colour, and lettering of tags used to mark birds [illegible] and the place and method of [illegible]

(3) [illegible] the end of the box stencilled [illegible] with section 7, no mark or other designation shall appear except those required or allowed by this section.

Sunburst Motor Coach

DAILY SERVICE

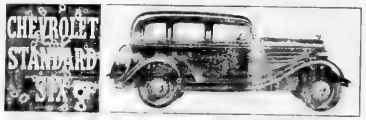
Leaves Tofield	10.40 a.m.
Arrives Edmonton	12.15 noon
Leaves Edmonton	5.00 p.m.
Arrives Tofield	6:35 p.m.

Fare to Edmonton:
$1.30 single; $2.35 return
Special week-end rate $1.65, good Friday to Monday Each Week

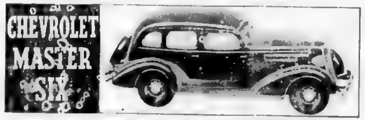
ADDED NEW SERVICE
Connecting Tofield and Saskatoon and all way points with daily service. Also fast through service to Winnipeg and all eastern points.
Leave Tofield for Viking, Saskatoon and all Eastern points 8:20 a.m.
Leave Tofield for Edmonton 9:10 p.m.

TWO NEW LINES OF CHEVROLETS

Featuring two distinct types of Fisher beauty ...Both powered with the same Improved Master Chevrolet engine ... Setting new standards of quality in the two lowest price ranges



Now on display ... Offers you the traditional, popular Chevrolet styling ... Roomier Fisher Bodies ... New, improved Blue Flame engine ... 23% more horsepower ... Bigger brakes ... Lowest operating costs of *any* car ... An all-feature *quality* car!



Soon to go on display at our showrooms ... Streamlined entirely new ... With the new Solid Steel "Turret Top" Body by Fisher ... Longer wheelbase ... Greater roominess ... Improved, fully-enclosed Knee-Action ... Outstanding gas and oil economy.

YEARS of sales leadership are back of these new Chevrolets. When you see them, you will agree they are bound to be *outstanding leaders* in 1935. They are the most beautiful and luxurious cars Chevrolet has ever built ... and the best-performing, most economical cars in all Chevrolet history. Get complete information now at our showrooms and you'll be convinced that *it's wise to choose a Chevrolet for quality at low cost.*

Behind the Hog

By A.B.C.

We have two full pages of news collected during the Ladies' Spiel, but after sorting it over we find we have to work and make our living in Tofield.

Every rink in the Ladies' Spiel played in the finals, but some of them made their third game the final one.

Mrs. Hammond wins Grand Challenge.

Mrs. Bruce wins the Young Trophy.

Mrs. McLaughlin wins the Consolation.

The Mixed Spiel starts Thurs. and what a mixture! It will take us a full 10 days to get it unravelled, 20 rinks entered, and some will win and others have hopes. Most of them are the Mr. and the Misses. Between watching the curling and listening in on the varied conversations one's head gets dizzy, and by the time the mixed is over, we expect to be going around in circles.

The Ladies served lunch during the Spiel, and we understand a lot of cash changed hands. We hope to get the same wonderful service during the mixed.

One lady curler said she gained 10 pounds this year, but we know of a man curler who lost 20 pounds, after inquiry we find he lost on a horse race. We have two men who will make the draws for the mixed, and about 78 other curlers who think they can draw them.

LADIES' BONSPEIL SUCCESSFULLY ENDS

After two starts and as many stops due to mild weather, the Tofield ladies' curling club eventually staged a very successful bonspeil.

The rink skipped by Mrs. Hammond won the grand challenge event the prizes accompanying the event being four lovely tablecloths. The rink skipped by Mrs. Hay of Ryley came second and the Ryley ladies fancy china collection is enriched by a handsome cup and saucer.

On the Young competition the rink skipped by Mrs. Bruce won out in the finals over the rink skipped by Hanlon of Holden. The first prizes in this event were four pictures and the second prizes four marmalade jars.

In the consolation event the rink skipped by Mrs. McLaughlin took first honors and the rink skipped by Mrs. E. Rogers second. Mrs. McLaughlin's rink will remember the spiel by handsome mirrors and Mrs. Roger's rink will have as a reminder fancy chinaware cups and saucers.

CHAPMAN RINK WINS PRESIDENT'S PRIZES

The final game in the Smith competition was played on Friday night last between rinks skipped by J.W. Chapman and A.B. Clutterham. The Chapman rink piled up a commanding lead early in the game and while their opponents counted late in the game it was not sufficient to go out in front.

The prizes were four briar pipes generously donated by the president and presented to the winning skip at the close of the game.

LINDBROOK

We are sorry to have to announce the death of the two year old little Cecilie Goubault, daughter of M. Heurt and Mme Goubault of this district, who died in an Edmonton hospital last week. Interment took place in Edmonton. The deceased's brother, a boy of four years of age is still in the hospital and is very ill with pneumonia, but we hope for his recovery. The sympathies of the district are extended to Mr. and Madame Goubault and family in their sad loss.

Mr. Norman Ellis returned home from Vancouver where he recently underwent an operation. He looks remarkably well after his trip.

The dance put on by "the lads of the village" last week went off well, quite a large crowd was present and now the lads are asking if it isn't the lassies' turn, the noo.

Mr. Robertson the school inspector was down here last Saturday on business connected with the Westlake S.D.

Mrs. E. W. Hooper spent the week end in the city.

HOCKEY

SENIORS LOSE LAST LEAGUE GAME TO HOLDEN

In what proved to be one of the best games played on local ice this winter, Tofield lost out to Holden on Tuesday night by the score of 7—6, Holden scoring the winning goal 20 seconds before time was called.

The first period showed the effects of sticky ice and the players had difficulty in keeping the puck from rolling. Holden scored four times in this period, A. Black, McGuire, Minsely and Hurum being the marksmen. Tofield scored twice, Allan scoring on a lone effort and Kjosness scoring on an assist from Spratt. The period ended 4—2 for Holden.

The second period opened up faster with end to end rushes and featured by good goal tending. About half way through the period Worton scored on a backhand shot and the period ended with the score reading 4—3.

The third period was aggressive hockey and anybody's game. Early in the period McGuire put Holden two up but Kjosness for Tofield cut the lead down again. McGuire for Holden repeated and Craig for Tofield cut Holden's lead to one. Then with the period three quarters gone Burnett for Tofield scored and tied the game. Both teams played wide open hockey in an attempt to break the tie in their favor and just when it looked as if overtime was inevitable Hurum scored for Holden.

The game was fast, clean and well handled by referee Bob Whyte.

The Lineups

HOLDEN — McClintock, Logan, Minsely, A. Black, McGuire, Hurum, Suhr, Edworthy, Ferns, H. Black.

TOFIELD — Bowick, Stutzman, Allan, N. Glover, W. Worton, Craig, Burnett, Kjosness, Spratt.

Referee: Bob Whyte

INTERMEDIATES WIN AGAIN

Last Saturday night the undefeated local intermediates won from Bruce by the score of three to two. It was a fast clean game, with very few penalties handed out by referee L. McLeay. Bruce got away to a fine start with Stambaugh and Bodinsky each scoring one goal. These two goals, coming in the first four minutes of play made things look a little black for Tofield but before the period ended the score was tied up, McLaughlin and Allan getting the counters for Tofield. The play during the second and third periods was fast and well balanced. The winning goal, scored by Burnett a few minutes from the end of the game, was well earned.

BARDO

Born.—To Mr. and Mrs. I. B. Moen on January 25, a daughter.

Ladies' Aid was held at the home of Mr. and Mrs. C. J. Rude on Thursday January 31. There was a good attendance and an enjoyable afternoon was spent.

Mrs. Reubin Eide and daughter, Roberta, spent a few days last week visiting at the A. Kindley home.

Miss Edna Steen of Camrose College spent the week-end at her home here.

Mr. and Mrs. A. Kindley and family were dinner guests at the A. Steen home on Sunday.

Sunday dinner guests at the A. Moen home were Mr. and Mrs. R. Eide and daughter.

Dinner guests at the A. Haukedal home Sunday were Mr. and Mrs. J. Jacobson and family, Mr. and Mrs. E. J. Rude and family, Mrs. Clara Jerning and family, Messrs. Nels Falkud, Anton Larson and Gunvald Nerland.

Dinner guests at the H. Jensen home Sunday were, Mr. and Mrs. John Ness, Mrs. I. Eggen, Mrs. O. Brecken and Mr. Ingolf Brecken.

Mr. and Mrs. C. M. Rude and daughter and Mr. Arnold Johnson spent Sunday at the L. G. Foshaug home.

Miss Betsey Ness of Edmonton had the misfortune to sprain an ankle, so she spent a week at her home convalescing. She was able to return to her duties on Sunday.

Mr. Pete Bjornson spent a few days of last week in Camrose.

Mrs. S. M. Johnson who has been staying with her sister, Mrs. I. B. Moen, returned to her home in Round hill on Tuesday.

Mr. and Mrs. C. M. Finseth and family were dinner guests at the C. J. Rude home on Sunday.

Everyone here is enjoying the fine weather, especially after what we've been through, and hoping that it keeps up indefinitely.

Local & Personal

Mrs. Ellis, Joan and Raymond were visitors at the Malcolm home on Sunday.

Mr. McLaughlin and Mr. Calvert and Mr. Wolfe and Mr. McIntyre of Edmonton are playing in the Briar competition this week.

The Jolly Eight Bridge Club met at the home of Miss Hilda Nomeland on Monday evening.

Eric Edwards is spending a few days in the city this week.

Mr. Eldred, manager of the Tofield Creamery attended the Dairymen's convention held in Calgary this week.

Mr. Duer spent the week end in the city.

Miss Annie Lindsay visited the city on Friday.

Mrs. Robinson and Edith visited Mr. Robinson who is a patient in the Royal Alexandra hospital on Sunday. Mr. Robinson is doing nicely.

Mr. and Mrs. Hayes were visitors to the city this week.

Mr. and Mrs. Norman Scott are in the city. Mr. Scott being called to serve on the jury.

Mr. and Mrs. Coutts visited the city for the week end.

Mrs. Swift and Annie were visitors to Edmonton on Saturday.

Mr. and Mrs. Imler and Mr. and Mrs. Hicks attended the Utilities' Ball held in Edmonton last week.

KETCHAMOOT

The Carlisle families entertained the young folk of the district to a dance at the Louis Carlisle home on Friday evening of last week. Messrs. William Craig and Eric Edwards furnished the music. A large crowd was present and all reported a most enjoyable evening.

Miss Hazel and Stanley Sears visited their cousin, Mrs. T. D. Ferguson and Mr. Ferguson of Lakeshore Sunday of last week.

Mrs. Elsie Carlisle and daughter, Doreen of Hay Lakes are visiting at the Carlisle home.

A most enjoyable afternoon was spent at the Appleby home on Wednesday afternoon of last week, when Mrs. Appleby entertained the Ladies' Aid. A large crowd of visitors and members was present.

Mr. and Mrs. Chester Coombes visited at the Archie Brown of Bawlf home on Sunday. Mr. Brown is very low with diabetes.

Mr. Geo. Lawson returned home one day last week after several months holiday spent near Edson.

Mr. and Mrs. Maurice MacGintie and family, Mrs. John Brown and family were guests of Mr. and Mrs. Herman Lawson on Sunday.

Mr. and Mrs. Henry McGinitie and Bennie Finseth were guests of Mr. and Mrs. Whillans on Friday evening.

The School Board held a meeting at the John Brown home on Saturday evening. Those on the board for this year are: chairman, Mr. John Brown; trustees, Roy Lee and James Sutton; secretary-treasurer, Miss Hazel Sears.

Mr. Jimmie Grabowki, who is spending the winter with his cousin, Mrs. H. McGinitie is visiting in Viking.

Mr. Alvin Schultz spent a few days in the city last week, having dental work done.

Mrs. W. A. Mitchell returned home on Wednesday after a few days visit with friends and relatives in the Lakeshore district.

Mrs. Chas. Whillans returned home on Wednesday after a week's visit with her mother and other friends and relatives in Edmonton.

Miss Viola Lee returned home Thursday of last week from an Edmonton hospital after undergoing an appendix and tonsil operation. We are glad to hear she is improving nicely.

A pleasant evening was spent at

(Continued on back page)

Communication

Tofield, Feb. 9th, 1935

(To the Editor)

I am writing to ask your kind permission for space in your paper to state my views on the proposed Natural Products Marketing Act. I think it is one of the finest proposed [illegible] introduced in the Dominion of Canada. Now it is up to every [illegible] of whatever product you are engaged in to work and in the [illegible] of local boards [illegible]. I think it is high time we are [illegible] away with the profit system [illegible] a fair and honest living for every one and millions for none. That is one thing I do not believe in [illegible] Social Credit is a man or woman with a big family of children under the age of 21 do not get any more than a man and woman without child[illegible]. I think it is up to every man [illegible] member of Parliament to put his shoulder to the [illegible] give the best that is in [illegible] good of Canada and the [illegible] as a whole and not for private profits.

[illegible] with its natural resources should be a para[illegible] instead of poverty and [illegible]. Take our oils for instance [illegible] the Imperial Oil be the [illegible]. Why [illegible] by the people for [illegible] and not for private interests.

[illegible] to listen to fellows talking on the air telling the farmers not to go into the Marketing Act for it is going to be costly, as they are going to take half a cent off every dozen eggs and half a cent off every pound of poultry and half a cent off our hogs and cattle and so on. I am sure that if we didn't have more than half a cent a pound taken off [illegible] under the present system of marketing, I am sure our hogs and cattle would be worth from 2 to 3 cents per pound more, and the consumer would not have to pay as much as they do now. There is no reason for hogs being worth 7 cents today and 6 1-2 cents tomorrow. I do hope that at our next elections the people of Canada will vote for Co-operation and not for the old capitalistic system.

Yours truly,
E. A. MOEN

Route 2, Tofield.

Admission: 15c., 20c., 30c.

LAKESHORE

On Wednesday evening of last week Mrs. Mateyka entertained a number of friends and neighbors at bridge. Five tables played and honors were won by Mrs. Francis and Mr. Lester Noland while Mr. and Mrs. Graham were suitably consoled for the hard luck which seemed to prevail in the Graham family that evening. A delicious lunch was served by the hostess after the game.

Mrs. T. D. Ferguson visited friends and relatives in the Ketchamoot district for a day or two last week.

Lorene and Kathleen, daughters of Mr. and Mrs. John Wood have been ill for the past few days with severe attacks of the flu or grippe which seems to be prevalent in the neighborhood just now. Nurse Baptist is caring for them.

A hotly contested hockey match between McKenzie and Lakeshore held on Friday resulted in a 3—1 win for McKenzie.

Miss Ardis Wood of Viking visited relatives on Wednesday.

SCHOOL BOARD MEETING

A meeting of the Board of Trustees of the Tofield School District was held on Wednesday evening. This was the first meeting following the annual elections, and A. C. Dodds and J. W. Chapman subscribed to and filed their oaths of office.

A. J. Harrison was appointed chairman for the ensuing year. Regular meetings will be held on the first Tuesday of each and every month.

AMISK CREEK

Born.—To Mr. and Mrs. B. Moen, on February 5th, a daughter.

Arthur Haugen was taken to the Royal Alexandra Hospital on Monday, February 4th and operated upon for appendicitis. Last reports are that he is getting along fine.

The Misses Mabel and Ida Aasmo entertained the Amisk Creek Ladies Aid on Tuesday of last week. There was a very good attendance.

The Y.P.L. held there annual meeting in the church on Sunday evening, February 3rd. After the pro-

(Continued on back page)

LOCAL CURLERS DO WELL AT EDMONTON

Curling almost steadily for more than a week the rink skipped by Geo. McLaughlin reached the finals in both the Grand Challenge and Essery competitions. In both events they came second. The personnel of the rink were: Bud Hannan, Bert Calvert, —— and Geo. McLaughlin (skip).

Geo. McLaughlin is also skipping a rink in the McDonald Brier which is progressing as we go to press.

PROTECT the EGG and POULTRY Industry

Your liberty as an independent producer, and your livelihood are at stake. Listen to our radio talks each night excepting Saturdays and Sundays over C.F.C.N., at 7:50 to 8 p.m.; also over C.J.C.A. Edmonton, at 1.15 p.m., February 14th, 15th, 16th, 19th, 21st, and 22nd, and from 8.15 to 8.30 p.m. on February 13th, 18th, and 20th. Hear the arguments pro and con.

By all means attend the Pool Meetings! Be prepared to ask questions and voice your disapproval. The radio talks will provide you with plenty of arguments.

Be sure to register at your Post Office. Secure your ballot and Vote Against the Compulsory Egg and Poultry Marketing Scheme.

"A Painted Ship On A Painted Ocean"

T. A. Grehan, advertisement manager of the Dublin (Ireland) Independent Newspapers, Ltd., says:

"My bunch of newspapers—all nationwide circulation—have just gone through a period of complete 'silence' lasting almost nine weeks. That is to say we were unable to issue one copy over all that time. Labour trouble was the reason, but let that pass. The point is that as a result of that elimination of our newspapers, the business of our regular advertisers went completely wallop. There was undiluted desolation. Stores here that knew crammed floors regularly as a matter of course, resulting from their budgets of advertising offers, were as idle as a painted ship upon a painted ocean.

"As an old campaigner, it stunned me to see just what the value of newspaper advertising is. Our merchants tried all sorts of other devices to get over the handicap of this no-newspaper period. They tried the street cars, the billboards, the movies, the handbills, even the air. No worth-while results accrued altho I have reason to know that the cost was as heavy in the aggregate,, in some cases decidedly heavier, than if the money involved had been expended in newspapers. And remember ber this big point, the results in business were definitely unsatisfactory.

"I have been in this live business of newspaper advertising for so many years that I thought I knew how the thing worked. I didn't know. This just-concluded newspaper silence has taught me a volume of things and if there is one thing above all that sticks out it is that a country without its newspapers is a country blindfolded completely. Our people here were positively bewildered. We all went around wondering what in the name of blazes was going on, but the poor bewildered advertiser felt that the wind had completely dropped, his business craft was becalmed, business movement was, as I said at the outset, as idle as a painted ship on a painted ocean.

"If ever I felt lukewarm on the question of the value of newspaper advertising, and I doubt if I ever did, I am now a 'roaring, tearing, hot-gospeller.' Boys, it has been an amazing eye-opener. So, let us say, out of evil cometh good."

THE MERCURY

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

ANAEMIA

The Greeks had a word for many things and from the Greek we take the word "anaemia". To us, this word means either a reduction in the number of red blood cells, or a decrease in the haemoglobin, which is the colouring matter of the blood.

Oxygen is taken in to the lungs when we breathe; there it is picked up and carried to the tissues in the blood stream, where it is released for use by the tissues, and carbon dioxide, the waste product of the tissues, is carried away.

Anaemia results from one of three causes: (1) the rapid loss of a quantity of blood, a haemorrhage; (2) the destruction of red blood cells within the body more quickly than they can be replaced; (3) failure, or inadequate formation of blood to meet the needs of the body.

One month is the average life of a red blood cell. A sudden loss of red cells is met from a supply held in reserve in the spleen and bone marrow to meet emergencies. If, however, the abnormal demand continues, it cannot be met, with the result that production is faulty and many imperfectly formed blood cells will appear in the blood.

Haemorrhage means loss of blood, and this, in turn, means loss of body fluids. When the tissues are drained of their fluids, the need for fluid is made known through the thirst that is created. To make up for the red cells lost in the haemorrhage, the heart beats more quickly and breathing is accelerated, so as to keep the remaining red cells working at full speed carrying oxygen to the tissues. The arteries in the skin contract to send what blood is left to the essential organs, and the skin becomes cold and pale.

In other forms of anaemia, pallor, weakness and shortness of breath are the symptoms. These forms are recognized early by a study of the blood. A condition which is comparitively rare now but which was quite common in the past is the anaemia of young girls—chlorosis, or, as it was known, "the green sickness." A somewhat similar anaemia, due to a lack of haemoglobin, is seen in the mothers of large families, and is due to a deficiency of iron, the basic element of haemoglobin. This anaemia can be readily cured.

Pernicious anaemia is a condition wherein the red blood cells are tremendously reduced in number. Preceded for several years by a decrease or absence of acid in the gastric juice, and the earlier symptoms of fatigue and dizziness with a numbness or tingling of the extremities, the condition progresses until the peculiar lemon-yellow tinge of the skin is noticeable.

Pernicious anaemia was invariably fatal until a few short years ago, when, beginning with observations on dogs, it was discovered that the regular use of liver will correct the condition and restore the sufferers to a normal condition. This is not a cure; the use of liver must be continued or relapse will occur.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

LIVE and CARCAS HOG GRADING

The grading of hogs alive during the past 12 years has undoubtedly been of great educational value. While a general selection according to desired type and general quality can be made when grading alive, it has always been recognized that the final determination of the quality can be arrived at only by examination of the carcass. Continuous experimental work has been carried on with a view to solving some of the problems peculiar to Canadian conditions that would permit of the carcass grading. It is interesting to note that every other country shipping bacon to Great Britain has established a system of carcass grading for the purpose of standardizing and improving their bacon. On March 8, 1934, the Hog Grading Regulations were amended to permit of voluntary grading of hog carcasses. It is hoped, says the annual report of the Minister of the Dominion Department of Agriculture, that the introduction of rail grading in this limited way will provide a practical method for its general application.

A Misunderstanding

When the preacher called for women to stand up and promise to go home and mother their husbands only one little woman arose, and when he told her to go home at once and mother her husband, she said, "mother him? I thought you said smother him!"

Canadian National Weekly News Items

Winnipeg, Man., February 11—One of the most interesting travel bargains offered in many years will be offered the travelling public during the first two weeks in March, according to an announcement made by Jos. B. Parker, Secretary of the Canadian Passenger Association, Western Lines.

The bargain fares are divided into three groups and will apply from Western Canada to all stations in Eastern Canada from Sault Ste. Marie, Sudbury, Capreol, Cochrane, Windsor, Sarnia and East. The tickets will be on sale from March 2 to 16 and will be good for 30 days in addition to date of sale.

Inorder to fully accommodate the public, the tickets will be offered as follows: One cent per mile, good in day coaches only; one cent and a quarter per mile, good in tourist sleepers on payment of tourist berth rate; one cent and a half per mile good in standard sleepers and parlor cars on payment for accommodation furnished.

As no tourist sleepers are operated east of Montreal, the standard sleeping berth rate will apply for those wishing sleeping car accommodation.

Winnipeg, Man., February 11—Has anybody seen our cat? This strange hue and cry was set up a few days ago from the Port Arthur freight shed of the Canadian National Railways. One of the members of the official rat catching staff was missing! Sugar was being loaded that day for Winnipeg and all the cats had turned up but one. Peter was absent.

Peter's absence meant a great blow to the rat catching staff and no doubt brought joy to the ranks of the rodents. Finally one of the clerks decided there was a chance that Peter was in the car of sugar. Word was sent to Winnipeg and on the arrival of the car, it was opened, and out popped Peter!

Over four hundred miles in a freight car and no rats to catch. Peter was both cold and hungry on arrival. He was taken in charge and has been returned to Port Arthur, where he will no doubt be quite content to resume his rat catching and confine his travelling to the floor of the freight sheds.

Despite the inroads of Deisel-propelled locomotives into the realms of speed, the London North Eastern Railroad engine, Flying Scotsman, demonstrated that coal-burning locomotives are far from the discard, states F. J. Gemmell Smith of London in the Overseas section of Canadian National Railways Magazine for February.

Using a locomotive which had been in operation for 653,000 miles, with 44,000 miles travelled since its last overhaul, Driver Sparshott and Fireman Webster of the L.N.E.R. hauled a train of three cars and a dynamometer car between Kings Cross (London) and Leeds, 186 miles in 152 minutes, an average speed being made of 73.8 miles an hour. A speed of 100 miles an hour was reached during the run and maintained for 600 yards.

Modern research into the uses of metal has had the effect of greatly extending the mineral wealth of Canada. Nearly every great ore body in Canada is composed of two or more minerals, with the result the main operations to extract base metal have extended operations to include the extraction of other minerals.

This has had the effect of enabling Canadian mines to maintain more regular operating levels; when the price of one metal falls another may show marked gains and operations can be adjusted accordingly.

As an instance, the present demand for gold and nickel has resulted in a greater production of copper, over Natural Resources Department of the price yield for gold and nickel enabling the operations to be maintained at worthwhile economic levels. In explanation of the copper production, it is pointed out that, in extracting nickel, approximately two pounds of copper are recovered for every pound of nickel.

British Columbia, Ontario, Quebec, Manitoba are the important copper producing provinces, according to the 200,000,000 pounds a year, the high Canadian National Railways. The Yukon, New Brunswick and Nova Scotia also have deposits of copper.

A minister on a west-bound train was reading his Bible when a man leaned over the back of his seat and said: "I don't believe a word in that book." The minister ignored the remark. Presently it was repeated in a louder voice: "I don't believe a word in that book." Losing his patience, the minister turned and looked at his interrupter. "My good man," he said, "would you mind going to hell quietly?"—Canadian National Railways Magazine.

Alberta News Bulletin

Issued by the Publicity Commissioner Government Buildings, Edmonton, February 9th, 1935

Alberta Second in Hog Marketing

Alberta still holds its place as second among provinces with respect to total marketing of hogs, according to final figures just released from the Dominion Live Stock Branch on live stock marketings for 1934. Last year Alberta again marketed one-third of the total hog marketings for the Dominion, the figures being for Canada 3,006,111 head and for Alberta 1,012,827 head. Ontario is still the leading province in this respect. The figures show a slight reduction from 1933.

Alberta's total marketings of cattle and calves were 241,169 head or 16 1-2 per cent of Canada's total marketings, which were 1,467,132 head. Of sheep Alberta marketed a total of 205,144 head, or 24 per cent of Canada's total which was 822,502 head.

Homestead Entries

Total homestead entries in Alberta during 1934 were 3,039, compared with 3,509 in 1933, according to figures released by the provincial lands department. There were 2,614 first homesteads compared with 2,907 in 1934. In 1934 there were 936 taken up by women compared with 989 in 1933.

New Records in School Attendance

Despite economic distress, new records have been made in school attendance during the past year, throughout the province, according to records of the department of Education at Edmonton. A larger percentage of schools than ever before operated for at least one hundred and sixty days. There was a greater regularity of attendance and the number of pupils in the high school grades bore a higher ratio to the total enrolment than in any previous year in the history of the Province. The average period of operation, which was one hundred and ninety-two and a half days, was slightly longer than in the preceding year and has only twice been exceeded.

Alberta's Big Game

Known as one of the greatest big game hunting areas on the continent, Alberta's mountain area attracted a considerable number of hunters during last fall, although the effects of the general depression have not yet worn off sufficiently to bring the province back to its peak year of 1929 in this respect, when non-resident sportsmen spent some $300,000 in the province. Last fall the province sold 39 general game licences and 25 special licenses to 35 residents of the United States, and four residents of England. These hunters captured game trophies to the extent of 22 bighorn sheep, 26 mountain goat, 15 caribou, 22 deer, 25 moose, 3 bear and 7 elk, but they spent in the province an estimated sum of $30,000.

Egg and Poultry Exports

Alberta exported last year a total of 26,735 cases of eggs, according to figures from the provincial poultry branch. Imports of eggs to the province totalled only 676 cases, all from B.C. Exports of poultry were 57 cars of turkeys and 20 cars of other poultry, a total of 1,800,000 lbs.

HOG PRODUCTION IN CANADA

The geographical trend of hog production in Canada is interesting. In 1923, 63.8 per cent of the total hog production was marketed in Ontario, and only 30.8 per cent in the three prairie provinces. In 1933, 42.8 per cent of the hogs was produced in Ontario and 55.6 per cent originated in Western Canada. The plentiful supply of suitable hog feed in the form of coarse grains would suggest, says the annual report of the Dominion Minister of Agriculture, that Western Canada will continue to be the dominating factor in hog production.

FINANCE—

AT A TIME when governments, cities and towns are laboring under a burden of debt, it is refreshing to find our own municipality, Cornhill Municipal District No. 487, calm and unworried in this respect. Mayor Clarke of Edmonton and Mayor McGeer of Vancouver are working desperately to bring about a cut in interest rate on money borrowed, but Reeve Glenn can sleep peacefully in his rural retreat, knowing all is well financially with his municipality.

A perusal of the Municipal District of Cornhill annual financial statement which has just been widely distributed throughout the municipality shows the district to be in good shape financially, and this despite the abnormal years through which we have been passing. The municipal tax collections for 1934 amounted to $19845.19, being $2695.44 over the previous year. The tax collections for rural school districts for 1934 amounted to $10184.02 being about $300.00 less than the previous year.

Turning to the assets and liabilities we find total municipal assets over liabilities of $52443.92. Of this amount $39607.90 is accounted for by uncollected taxes, $8875.00 by fixed assets, such as buildings, machinery, etc. and among other things $5408.64 cash in the bank and $50.00 cash on hand. There are no outstanding debentures or large obligations of any kind. The reeve and council, not to forget the secretary, upon whose shoulders the problem of financing chiefly falls, are to be congratulated on the excellent showing made.

The Town of Tofield is a different story. Here we find the large debenture debt, if not exactly choking the wheels of progress, certainly slowing them up. It might be a good idea if Mayor Brace joined forces with Mayor Clarke of Edmonton and Mayor McGeer of Vancouver and become a member of a really famous trio. Anyway, the debenture debt as regards Tofield is an old story and even if full payment appears a herculean task, it can truthfully be said the town council are holding up their end by making the payments as they fall due. During 1934 $6569.34 was paid on this account of which $1079.10 was principal and $5490.24 interest. The balance now outstanding is $90426.06. In spite of the debt however, the council has things arranged better than Chicago as the teachers so far have been paid when due in the coin of the realm and other current expenses kept paid up-to-date. Looking at it this way the town is in good shape, and upon second thought it might be better if Mayor Brace didn't line up with the other two famous mayors, but stay at home and, assisted by Secretary-Treasurer Chapman, continue to guide this craft into calm waters of financial security.

A WALLET IN WALL STREET—

FORTY-SEVEN years ago Frank Greges left Lithuania for America. He had heard that money was more plentiful there and his father's small farm didn't offer many possibilities. Today his figure is a familiar one in Wall Street.

More correctly stated would be on Wall Street. Plodding along the curb, or in the gutter of Broad Street where it runs into Wall, he bears aloft a sign advertising a passport photograph concern. He earns $1.00 a day. Because Tuesday was wintry and the ice coated streets slippery he often bent forward to shield his face from the wind. At one of these moments, in front of the stock exchange, he kicked something half hidden in the snow. He stooped and found—a wallet that had been dropped, and unmissed, by a messenger employed by a firm of brokers. It contained securities valued at $45,000.

Here was a dilemma. Frank wanted to keep it until he quit work and could find the owners. Maybe they would give him a little reward. Anyway, it wasn't his, and perhaps the person who dropped it would lose his job. Frank could appreciate what that meant. He decided to give it to a policeman he knew on his beat.

The police gave him a receipt. It seemed at first as though that was all he would get.

The story, however, leaked out to the newspapers. From them and the radio broadcasters the public gathered a very frank recital of the episode. Thereupon private individuals sent cheques. The National Surety Co., which bonded the messenger, realizing the need of encouraging honesty, rewarded the sandwich man. Later the brokerage firm owning the securities decided to join the others in recognizing suitably Frank Grege's services.

Honesty is its own reward. That is not just a copy book maxim. As Frank said, in his still imperfect English, "I think that is to steal, to keep what belongs to somebody else." Still, a little encouragement never hurts.

If Wall Street was somewhat tardy the tale has a happy ending.—Christian Science Monitor

"I can't marry him, mother, he's an atheist and doesn't believe there is a hell."

"Marry him, my dear, and between us we'll convince him that he is wrong."

HOME-MADE CALF MEAL MIXTURE

(Experimental Farms Note)

Whole milk provides a complete food for the young calf until it begins to eat coarser feeds in the form of grain and hay. The use of whole milk as a calf food for an extended period is rarely practicable due to the relatively high value of butterfat. For this reason skim-milk is used almost exclusively for calves from the time they are a few weeks old until they are weaned. Skim-milk, due to its lack of fat, is unable to keep young calves in good flesh. The addition of suitable meals to skim-milk helps to replace the food value of the butterfat that has been removed.

For a number of years a home-made calf meal mixture has been in use at the Dominion Experimental Farm, Brandon. The mixture is made up of two parts of finely ground hulless oats, or finely ground common oats that have been sifted to remove most of the hulls, two parts of ground sifted barley, and one part of ground flax. Such a mixture is fat forming and acts as a substitute for butterfat and is therefore suitable as an addition to skim-milk for young calves. In preparing the meal for feeding, it is stirred into a pail containing scalding water, until the consistency of a gruel or porridge is obtained. The mixture is allowed to cool before being fed. Upon cooling, the gruel forms a jelly, and in this form it is added to the milk. Enough gruel for all of the calves for a day can be made up at one time. The gruel that is held over from one feeding to another should be warmed before being mixed with the milk. It is always a good plan to have the milk for the young calves as near blood temperature as possible. Two tablespoonfuls of the gruel are added to the milk for each calf at the beginning and the amount is gradually increased until a good sized teacup is being consumed at each meal.

Calves find this mixture very palatable and consume the last particles in the pail. It is a practical and economical means of replacing a part of the food value of the butterfat, and its effect is soon noticeable on the young calf. In addition to this small meal allowance, a mixture of two parts of whole oats and one part of bran, and good quality hay should be provided for calves after they are ten days to two weeks old.

THE MOST SPECULATIVE AND INSECURE OCCUPATION

The mention of agriculture used to summon up visions of peace and quiet of persistent toil compensated by a frugal but wholesome life and by the absence of worry, writes Prince Potenziani, president of the International Institute of Agriculture at Rome, and Mrs. Saqui, daughter of David Lubin, founder of the institute. Then they go on to point out that such conditions do not exist today. Agriculture is now one of the most speculative and insecure of occupations. It is subject to reactions set up by currency depreciation, by tariff wars and by political programs aiming for economic self sufficiency.

Instead of being the most conservative centre of the economic field agriculture has become one of the most experimental. The experiments, moreover, are not those of individuals but of governments. Farming is no longer the most individualistic but the most controlled and legislated of economic activities. This is true of American agriculture and holds true in Europe where agricultural problem is [illegible] the fore.

The authors go on to point out that politically and economically the world has been converted to the doctrine of self-sufficiency or autarchy. This was due to the disorganization which followed the world war when governments had to impose temporary restrictions to enable their national producers to recover. When classes of population became dependent upon this artificial support that a return to the former degree of freedom in international trade relations would have entailed the sacrifice of vital interests. Thus conditions arose in which governments had no alternative but to keep their frontiers more or less effectively closed to international competition while trying to build up some workable system of planned economic development.

The situation thus created has become paradoxical at a time when everyone recognizes that under prevailing conditions returns of production will decline and with them the living standards of the population. But a return to the system of free competition with its automatic adjustment of supply and demand has been practically out of the question.

The authors then go on to [illegible] the efforts at international co-operation made to offset the development [illegible] ditions and suggest that if planning is to replace individualism in guiding the production and distribution of staples having a world market and world price, it must be extended from the purely national to the international sphere.—Wheat Pool Budget

INDIANS LOSE MEDICINE SKILL; SCURVY RESULTS

Fort Chipewyan, Feb. 9.—Plague of scurvy among a tribe of Indians north of here was caused by the Indians having lost the skill of mixing native medicine with their food to counteract the disease, Dr. H. W. Lewis, federal medical officer, stated Friday on his return from a flight to their stricken camp. Two children have died from the plague and six more are seriously ill, he said. Pilot Matthew Kennedy, Mackenzie Air Service, flew the doctor out.

BANKRUPTCY INEVITABLE RESULT IF RATES REMAIN SAYS McGEER

To Propose 50 Per Cent Suspension of Bond Interest to Holders

Vancouver, Feb. 9.—Bankruptcy and receivership for Vancouver are inevitable unless some arrangement is made whereby the city's bond interest rates are reduced [illegible] at least, Mayor McGeer declared Friday in an address to associated property owners of Vancouver.

He had succeeded in having a meeting of city bondholders called for next Monday, the Mayor said, when he will propose a 50 per cent suspension of interest rates until an adjustment can be made. If he does not receive the support of the city council in his proposal Mayor McGeer said he would recommend a receiver be placed in charge of Vancouver.

"We have paid war and post-war interest rates during the Depression," the mayor said. "I cannot believe that this is right. There is no sanctity of a contract that overrides the equity of that contract.

[illegible] those who are fortunate enough to hold bonds should be maintained at the expense of the rest of the people. [illegible] Current and future interest rates must be reduced.

I hope to have the backing of the council but there are [illegible] signs of [illegible]. Unless I am [illegible] there [illegible] alternative. That is for the citizens to demand a receivership and I shall not hesitate to ask that a receiver be appointed, if necessary, and place my reasons before the public.

"Bankruptcy for Vancouver is inescapable if a deferred interest arrangement with bondholders cannot be arranged or the provincial government cannot be induced to assist the city by legislation for reduced interest rates."

[illegible] he had gone again, the British Medical Journal described the surgical [illegible] Packering's four minute departure from "life." Packering is convinced he died on the operating table because "I saw my villagers from Arley. I knew them before they died. They were all happy and I was happy too." He painted a picture of shining faces in a bank of hazy shining clouds."

He underwent a serious abdominal operation. The medical journal declared all those present in the operating theatre believed the patient was dead. Dr. G. Percival Mills said:

"I slipped my hand under his diaphragm and found his heart had stopped. I could feel what appeared to be an empty, flabby heart without a flicker of pulsation. The head had, of course, been lowered and artificial respiration started."

The heart was massaged and adrenalin injected directly into the ventricle causing a "faint flicker in the flabby organ I was compressing."

The surgeon hurriedly completed the operation as the heart beat vigorously.

FIND GIRL'S BODY, BELIEVED SUICIDE

Viking, Feb. 9.—Body of Agnes [illegible], 17, was found in a clump of bushes [illegible] at 8:00 p.m. Wednesday, a bullet hole in the forehead.

She had been missing since forenoon but her absence had occasioned no real anxiety.

At the home where she was employed she left a note stating that she was going to do away with herself, "to be with mother who died three years ago."

She had been in a despondent mood for some weeks it is said.

A .22 rifle was found beside the body with one discharged shell.

PACK OF WOLVES TRAIL RESCUE TRIO

Harry Williams, Survivor of Lonely Trip in Foothills

[illegible], Feb. 9—How a pack of 40 snarling wolves trailed the rescue party on the Berland river in January, and how caribou grease and sugar found in the deserted cabin of a trapper near the Porcupine had provided his Christmas dinner, was related from a hospital bed by Harry Williams, who met with an accident to his foot and suffered frost bites and great hardship on a long lonely trail through the foothills, a further 135 miles in severe weather to Entrance.

Mr. Williams managed to cure one foot by [illegible] of bear grease, and doctors are hopeful of progress for the other foot.

Native of New Zealand, he has farmed for five years within 20 miles of Dawson Creek and two years ago made the same trip south over the trail to Entrance. He had intended striking through the lonely mountain passes into B.C. but a fall down a cutbank prevented it.

After crawling to the safety of an empty trapper cabin and painfully making his way to a second, the finding of wandering Indian ponies led him to the Indian camp where he contacted Eaton brothers, two white trappers on the Smoky river.

While fighting against terrific odds, Williams had kept away the menace of gangrene in frozen foot and leg by the heroic method of cutting decaying flesh away with a knife and applying bear grease.

Hauling the injured man on a toboggan south from the Smoky, the Eatons met Fred Hendrickson, a ranger, on the Berland. The wolves trailed the party from a distance of 200 feet while a great brindle dog, a member of the pack, with greater intelligence came within 20 feet. The ranger shot one and wounded another before the band left. Mr. Hendrickson supplied the party with horses and supplies so travelling became easier until they met the rescue sleigh 43 miles out of Entrance.

HENRY FORD WITH WONDERFUL BEAN

Henry Ford has turned his mind to the Soya bean.

He sees a day when the beanstalk may climb to the tops of skyscrapers.

The soya bean is the wealth of Manchuria and feeds millions of poor people. In Pennsylvania it covers 5,000,000 acres. It is a substitute for rice. It makes paints and soaps and printing ink. It can be turned into oil and butter and cheese, but Mr. Ford has found a new use for it.

On his 30,000 acre farm in Michigan he is planting it for fibre, which will be treated with chemicals so as to produce a working material as light as wood and nearly as hard as steel. He will use it for his car while obtaining from it as a by-product lacquer for varnishing the body work.

But this is only a small part of its destiny. He foresees a time when it will supersede bricks and cement and joinery for houses, and on its strong foundations will rise the superstructure (to which it will contribute) of the skyscrapers for which the new world is famous.

Some day there may be a monument higher than the Woolworth building to the fame of Mr. Ford and his soya bean.

B.C. RELIEF CAMP SACKED—BEDDING BURNED IN RIOT

[illegible], Feb. 11.—[illegible] men were arrested [illegible] British Columbia [illegible] ringleaders [illegible] Bay [illegible] bedding was burned, dishes broken and buildings damaged, according to reports reaching here from [illegible].

Deep Bay is [illegible] between here and the [illegible].

According to reports [illegible] of the camp [illegible] hauled bedding [illegible] of the camp buildings and stacked [illegible] piles which were set on fire.

Dishes were hurled from the buildings and broken and [illegible] windows were smashed. A [illegible] foreman was reported [illegible] but the extent of his injuries was not learned.

DAYSLAND "GHOST" PUTS PINS IN FOOD, HURLS KNIVES, BOOKS

A ghost walks in a farm home near Daysland!

[illegible] walks. It throws [illegible] pins into two frightened little girls, pins in one's food, [illegible] in the bedclothes!

[illegible] cups, spoons, [illegible] and books!

With Mephistophelean cunning its [illegible] hand snatches the pen from an eleven-year-old girl dutifully doing her homework, tosses it like a dart at the wall before her bulging eyes. Leaves it quivering there as if to shake a ghostly finger in derision.

Before [illegible] the poker [illegible] the fireplace [illegible] lands upright in the soft earth of a fern pot on the other side of the room.

The little girl is sent down the cellar [illegible] to get a half loaf of bread for lunch.

"There isn't a half loaf down here," [illegible] the cellar.

[illegible] insists that there is, but [illegible] the child if she can't find it [illegible] up the bread box.

As the daughter reaches the top of the stairs the half loaf of bread, [illegible], falls from the air, caroms off the [illegible] to the floor before the family's astounded eyes!

Magic? It would take a gifted magician indeed and a devilish one, to perform the reported feats that have terrified the home for some seven weeks.

Practical joker? The eleven year old girl finds pins and needles in her food. Even the most fanatical practical joker would draw the line at that.

It was about two weeks before Christmas according to reports, when the eerie events began.

The dimpled baby broke the stillness of [illegible] night by screaming wildly. The parents rushed to see what was the trouble. A very [illegible] little lady lisped that she had been stuck with a pin.

They told the child she must have been dreaming, kissed the pouty little lips, tucked her in and went back to bed.

But if the baby was dreaming her dreams were all alike for she woke the household on successive nights with cries of pain.

The elder girl was blamed for teasing her sister but denied it vehemently and was so outraged by the accusation she burst into tears.

Exasperated, the parents stripped the children's bed and to their relief found a single pin pointed upwards. Their problem was solved! So they thought.

The pin had been removed. No sooner had the children been soothed and the lights turned out than the baby screamed again. This time the thoroughly tired mother punished the elder daughter as the probable perpetrator of the nuisance.

The series of weird events had only commenced. A series that has aroused the district, shattered the nerves of the household, caused the neighbors to speak in hushed and fearful tones of the evil genius directing the

That same night screams awakened play the parents once more. This time the screams were from the 11-year-old daughter. She had jumped out of bed and there before the puzzled [illegible] of the parents and children were several pins sticking through the sheet where the child had lain!

The thoroughly aroused household, including the hired man, commenced an investigation in earnest—to no avail.

The girl moved out to a cot in the front room and there, too, pins appeared mysteriously, pricking the little girl's flesh so terrified she attempted to close her dilated eyes.

YOUNG PEOPLE TO HOLD OPEN NIGHT

On Wednesday, February 20th the Young People are holding an open night in the United Church. The programme will consist of moving pictures. The Rev. Dr. Stanley Scott, Viking, has a wide variety of subjects and will put on the screen pictures that will interest everyone. This is a real treat. Lots of funnies for the younger folk. Everybody welcome. To meet expenses a charge of 20c and 10c will be made. The show begins at 8:00 p.m.

NAVY IRE ROUSED AS CRUISER FINDS SETH PARKER BOAT O.K. — RESPONDS TO SECOND CALL

Admiralty Resents Publicity Stunt in Calling Warship to Aid

San Francisco, Feb. 11.—An SOS call from the "adventure ship" Seth Parker, sent the grey British cruiser, H.M.A.S. Australia, through a gathering south sea storm early Monday to the rescue of the battered old schooner.

It was the second time in 24 hours that the cruiser, with the Duke of Gloucester aboard, had steered toward the Parker on a similar errand of mercy. The U.S. navy also went into action.

A U.S. navy tug was ordered to leave the base at Samoa for the stricken craft.

The SOS call climaxed a day of mystery and skepticism concerning the schooner's condition.

At dawn Sunday the cruiser came alongside in response to trouble messages that had been coming for three days, only to find the smaller craft in apparently good shape. The cruiser was told its assistance was "no longer needed."

The Australia continued on her way after sending out a skeptical report on the Parker's trouble. The SOS came about 14 hours later.

Estimated on the basis of the SOS flashing 14 hours after the two vessels parted company, the cruiser should not take longer than 10 to 12 hours to retrace its course.

Chief claim to fame of the adventuring schooner is the fact its master, Phillips H. Lord, is a widely-known entertainer. He uses the name "Seth Parker" in his presentation.

Only a few hours after the Australia pulled away, Lord began sending his new trouble messages.

Then came the SOS at 11:00 p.m. Sunday (Edmonton time.)

"Seth Parker in distress and requests assistance," it read. "Rigging gone and leaking badly."

Seconds later the Australia answered it was on the way.

"Okay, thanks," replied the schooner.

A short while before the actual SOS came, the Parker warned: "If we lose contact it is a sign we have gone over."

Previous distress calls and the report of the Australia gave rise to wide belief the trouble was being "staged" by Lord as a publicity stunt. London expressed annoyance that the Australia had to go 400 miles out of her way.

The Australia expressed "considerable astonishment" when she found on her first visit to the supposedly sinking Seth Parker that nothing was wrong.

Reporting the incident, the Australia skeptically said the boats of the smaller craft hung trim in their davits and there was no sign of damage.

The radio performer embarked on the cruise with a crew of "down easters" to satisfy a craving for adventure. The schooner, built in 1918 in Portland, Ore., was renamed after the character when Lord and his crew sailed from Portland, Me., in December 1933, for a round-the-world cruise.

For Health . . . BEER IS BEST

The Good Drink Brewed From
Barley-Malt

The finest grades of barley are known as "malting quality" and the choicest of all "malting quality" is reserved for BEER. That is why you get the full benefit of that sovereign digestive -- MALT -- when you drink BEER.

There are no better beers than those made in Alberta. Obtainable at our warehouses, Vendor's Stores and your LOCAL HOTEL.

THE TOFIELD MERCURY

Vol. XVI, No. 4 Thursday, February 21st, 1935 $2.00 Per Year. To U.S.A. $2.50

Local & Personal

Dr. Law is skipping a rink at the Viking spiel this week. The personnel of the rink: A. Dodds, A. B. Clutterham, L. W. Smith and Dr. Law (skip).

Mr. Patterson and Mr. Stutzman made a business trip to Edmonton on Tuesday.

Mr. and Mrs. T. Cory are visiting friends in town.

Mrs. Provost of Edmonton is visiting at the Allan home for a few days.

Mr. and Mrs. Norman Scott returned from the city this week.

Mr. Jack Robinson returned home last Thursday after being a patient in the Royal Alexandra hospital for the past month.

Mrs. Carter of Edmonton spent a few days with her daughter Mrs. Thomas this week.

Quite a good crowd attended the Valentine dance sponsored by the Tofield Rangers. The music was good and an enjoyable time was had.

On Monday afternoon Mrs. Thomas entertained a few friends in honor of her mother who is visiting her for a few days. The afternoon was pleasantly spent in renewing old acquaintances and talking over old times. A delicious lunch was served by the hostess.

Mrs. L. C. Hay of Edson is spending a few days visiting at the Frank Scott home.

Rollicking Comedy to be Shown

Those residents of this district who enjoy a good stage production have a treat in store for them, when on Friday and Saturday, March 1st and 2nd, the Anglican Vestry present "The Absent Minded Bridegroom." The play, built around Irish-American life deals with the adventures of a bridal pair, Timothy Shea and Daphnay Rooney. These parts are being taken by Mr. Bert Calvert and Mrs. Paul Thomas and they could hardly be in better hands. They are ably supported by a caste of ten other players, who all add to the general laughability of the presentation.

It would be unwise to describe the play too much in detail, it is better that you receive the full benefit of the spontaneous humor as it appears from the stage. It is really good and, worth your money. Remember the date Friday and Saturday, March 1st and 2nd, at 8:30 in the Variety Theatre.

MIXED SPEIL

The mixed speil goes merrily on, but at the time of writing some of the divisions are not completely played out. The semi-finals and finals will most likely be played early next week when we will be able to announce winners and near-winners. We will also publish next week a special article "Our mixed speil."

MR. AND MRS. T. COOKSON WILL MOVE TO COAST PROVINCE

A farm auction sale will be held at the farm home of Mr. T. Cookson on Wednesday March 6th, F. O. Ball being the auctioneer. We understand Mr. Cookson has disposed of his farm to the Glover boys and will move to British Columbia. Mr. Cookson was among the earliest settlers in this district, having homesteaded here over 40 years ago. He spent two years in France with the expeditionary force and since 1919 has been farming under the soldier settlement scheme.

JUVENILES LOSE TO HOLDEN ON SATURDAY

In a "big" game of hockey the Tofield juveniles lost out to Holden on Saturday last by the score of 4-2. The mild weather made the ice soft so the youthful budding stars were unable to combine speed with stick-handling. Anyway they enjoyed it and had a good time.

Lakeshore — Intermediates

A team from Lakeshore played a pickup team of intermediates to a 2—2 tie. The soft ice hardly gave the forwards a chance to show their best stuff. The Lakeshore goalie showed good form and stopped many difficult shots.

LAKESHORE

We are pleased to say that the little daughters of Mr. and Mrs. John Wood are much improved since their recent illness.

The Jas. Francis and Bert Lovell families were Sunday visitors at the Geo. Francis home.

Friends of Mrs. J. H. Johnst[illegible] will be sorry to hear she has been quite ill for the past few days.

Mrs. John Wood entertained Mesdames Seale, Ferguson and Matejaka on Wednesday afternoon.

Lynn Phillips and Miss Grace McKinnon were visitors at the T. F. Seale home Friday evening of last week.

HOLY TRINITY CHURCH

Rev. D. K. Allan

Mrs. C. Baptist returned home on Tuesday after a month spent at Lethbridge and Calgary visiting friends and relatives.

Visitors to the city last week were Edna Lindsay, Muriel Malcolm, Mr. Wilson, Faye Wilson, Esther Jacobs and Mr. Jacobs.

Cornhill Annual Meeting

Due perhaps to the excellent financial statement recently distributed, there were comparatively few in attendance at the Cornhill Municipal [illegible] annual meeting.

There will be no municipal election for the first time in many years, as [illegible] for two divisions were elected by acclamation and one division, division 2 had no one present to make nomination to take the place of Councillor Bruen, retired. In division three Councillor G. McSporran was re-elected by acclamation. In division six Councillor Lloyd Wood declined the nomination and Mr. G. Walker was elected by acclamation.

KETCHAMOOT

M[illegible] and [illegible] a Valentine party at the school Friday [illegible]. Several of the mothers [illegible] friends were present [illegible] served after the program [illegible].

[illegible] Mr. and Mrs. [illegible] were guests of Mr. and Mrs. [illegible] Friday evening.

Miss Janet Brown visited her friend Miss Mildred Ingram on Sunday.

Mr. and Mrs. James Carlisle entertained the older set to a dance on Wednesday evening. Messrs. Craig and Edwards furnished the music on the accordian and guitar. A large crowd was in attendance and enjoyed themselves as much as the young folks did.

Mr. Henry McGinitie took a truck load of young people to a dance at Ministic on Wednesday evening.

Miss Mable Younie of Edmonton has been the guest of her uncle W. A. Mitchell and family the past week.

Sunday afternoon several members of the hockey team and a crowd of hockey fans motored to Hastings Lake for a game with the Hastings Lake team, but lost out 2—8. Owing to rain and soft ice not many of their team was present, but those that were had a good practice, not to mention coffee, cake and sandwiches served by the Hastings Lake team.

Mr. and Mrs. Appleby and sons, Mrs. Breck and children, Mrs. B. Cookson and Mr. People were guests to Mrs. Henderson and James on Sunday of last week.

Mr. and Mrs. W. A. Mitchell and family were guests of Mr. and Mrs. Shupe Sunday of last week.

Born: To Mr. and Mrs. Jim Johnson on Friday Feb. 15 a daughter. Congratulations.

Mr. and Mrs. Stacey George of Ministic were guests of Mr. and Mrs. Carlisle for a few days last week.

Miss Mable Younie visited her friend Helen Schultz on Monday.

Mr. and Mrs. John McGinitie and Mr. W. Hay visited at the Oscar Barnes home Saturday evening.

BUSINESS BETTER FOR FIRST MONTH

TORONTO, Feb. 18.—Canadian business showed a fractional improvement in January over the month previous according to the McConnell and Ferguson Monthly Index. The combined weighted index stood at 79.2 for January compared with 79.0 for December and 71.5 for January 1934.

For the past several months the index has shown little change in either direction indicating a steadying influence. The same condition obtained just prior to the rise which started in January of last year.

The chairman of a small town gas company was giving an address.

"Think of the good the gas company has done," he shouted, "and if I was permitted a pun, I would say, in the words of the poet, 'Honor the Light brigade'."

Voice from the audience: "Oh what a charge they made."

FOR SALE— Used Bull Dog fanning mill,—good condition. A bargain. Also Viking fanning mills. Apply M. C. Hammond.

FOR SALE— New and second hand Singer Sewing Machines. Expert repair work done on any make of machine. Leave your orders with the Tofield Mercury or write H. Martin, 9103—106 St., Edmonton.

Town Council Meeting

The regular meeting of the town council was held Monday evening February 18th at 8:00 p.m. Mayor [illegible] H. Bruce, and Councillors Lovell, Bellamy and Swift elected for the next ensuing two years by acclamation, subscribed to and filed their respective oaths of office.

Present were Mayor Bruce, Councillors Chapman, Lovell, Taylor, Hammond, Swift, Bellamy.

Councillor T. W. Taylor was appointed Deputy-Mayor for the next ensuing three months. The following committees were appointed, the first named being chairman of his respective committee:

Finance, Councillors Swift and Hammond; Fire, Water and Light, Councillors Hammond and Swift; Public Works, Councillors Chapman and Taylor; By-Laws, Councillors Taylor and Chapman; Health and Relief, Councillors Lovell and Bellamy; Property, Rink and Cemetery, Councillors Bellamy and Lovell.

A By-Law approving and authorizing the levying of a business tax in the year 1935 was given three readings and finally passed.

A statement of receipts and expenditures for the month of January was read and ordered to be incorporated in the minutes of the meeting.

Proposed receipts and expenditures for the year were considered and the budget compiled.

Routine business in the passing of sundry accounts for payment and the reading of communications was disposed of.

Chow Joe, better known as Ben, part proprietor of the Club Cafe left for Vancouver on Wednesday morning en route for China. He has been in Canada for more than fifty years during which time he has made three previous trips home.

INCOME TAX RETURNS
GOVERNMENT OF ALBERTA

You Can Help Very Much

❦

Publishing a weekly newspaper is rather a monotonous task. As the weeks roll round there is the same mechanical work to be done, the same searching for news to fill the columns and the same expended effort to procure sufficient advertising to make the venture a paying proposition.

But it is our work and as such, we must of course, keep going. Subscribers often help very much not only by paying up their subscription, but by giving us a few words of praise and encouragement and naturally, sometimes friendly criticism. We are always pleased to receive all three and there is no limit to the interest subscribers may take in this publication.

The Tofield Mercury is a country weekly published in the interests of this district. We neither aspire to or expect a huge circulation, but hope we have and are able to maintain the interest of the majority of residents of this district. Allied to no party or creed, the occasional expressions of opinion are given for what they may be worth at the time they are given and are always intended to be constructive—not destructive.

Readers may and can help greatly by taking an interest in their Home Paper.

HEALTH
by
A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

CANCER

Of all the questions which might be asked about cancer, the one which logically should be answered first is WHAT IS CANCER? There are many diseases which are unknown to the public at large; unfortunately, cancer is only too well known and feared.

It is natural for us to fear cancer. It will not help, however, if our fear leads us to shut our ear to warnings on the subject. Fear can be made useful if it brings us to learn what is known about this disease, so that we may act wisely for our own protection.

The specific or direct cause of cancer is not known. All over the world men and women are devoting their lives to the endeavour to wrest this secret from nature. In the course of time, they will succeed in doing so. The specific cause of cancer must be found, because when the cause is known, it is likely that prevention and cure will be possible.

In the meantime, we have some knowledge which is of practical value. It is known that long-continued irritation [illegible] leads to changes [illegible] which may develop into cancer. As an example of this, there is cancer of the mouth which develops at the point where the cheek was irritated for a long time by a broken tooth.

The irritation is not always due to a mechanical irritant such as a broken tooth. Such forms of irritation may follow upon the presence of [illegible] or germs which, for example, set up a chronic inflammation in the lower part of the uterus which has been torn at childbirth. It does not seem to make any difference what the nature of the irritant—if it continues, it may lead to cancer.

Cancer begins at one spot. Just as long as it remains in that spot, it can be removed. It is for this reason that any sores which do not heal and stay healed, or any lump or swelling in any part of the body should be investigated without delay. Of course many of these conditions are quite harmless, but by giving prompt attention to all of them, the dangerous ones are found, treatment is given and the patient is cured.

Any unusual discharge from any body opening demands attention. It is easy to say, for example, that blood in the stool is due to haemorrhoids, but is it? An examination will furnish the answer. It is difficult for most people to believe that, to begin with, cancer does not usually cause pain. They find it hard to credit that a sore, lump, or discharge may be serious and yet not cause any real pain.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

TIME TO START SELLING WHEAT

The time has come for releasing John I. McFarland and the central Selling Agency of the Canadian Wheat Pools from their public responsibilities in connection with the wheat trade of Canada.

Mr. McFarland's acknowledged integrity, his hard work during the past four years, his unselfish desire to promote the public's interest and the regard in which he is held as an individual should no longer blind the country to the essential facts that the line of policy which has been pursued under his direction has resulted disastrously to the wheat trade of Canada. A different line must be adopted with all speed, and it is evident that it must be pursued under different direction.

When Mr. McFarland accepted the position of the Wheat Pool selling agency at the end of 1930, he stipulated that he was to serve without salary. Neither Mr. McFarand nor anyone else foresaw at that time either his long retention of office or the fact that it would grow into the public position of being wheat dictator of Canada.

Canadian National Weekly News Items

* * * * * * * * *

Montreal, Que., February 18.—In the Island of Malta, an important naval base of Britain in the Mediterranean, milk is delivered on the hoof, being purveyed direct to the consumer from the herds of goats which are driven from house to house. The Maltese people prefer goat's milk to that supplied by cows, although there are two small dairies supplying sterilized or pasteurized cow's milk. This gives rise to a large importation of condensed milk for use by the European population and in this trade Canada has a share, states the Industrial Department of Canadian National Railways. Other Canadian products which find their way to Malta are bacon, sold to the Navy, Army and Air Force canteens; flour, wheat, fish, canned, dried, salted and fresh; and apples. There appears to be a good opening for Canadian chedder cheese.

—o—

Most famous of all the European stream-lined trains, the Flying Hamburger of the German Railways accelerates swiftly to the maximum speed of 100 miles an hour so smoothly that passengers aboard hardly feel the effect of speed, according to E. L. Diamond, British engineer, who describes a ride on this famous train in an article published in the February issue of the Canadian National Railways magazine. Despite the "slow orders" here and there along the route during the journey, the Flying Hamburger completed her run of 179.1 miles from Hamburg to the Lehrte Bahnhof (Berlin) in only 130 minutes 20 seconds on the occasion described.

—o—

Winnipeg, Man., February 18.—The next country to beimporting Canadian hockey players will probably be China. They are about to build their first artificial rink in Shanghai. Plan for an ice surface of 200 x 85 feet with accommodation for 700 skaters and 4,000 spectators, according to the Industrial Department of the Canadian National Railways. We figure fan rooting will far surpass anything heard at Canadian and American hockey games, judging by our knowledge of the Chinese language. They have natural ice in China and there is skating to some extent but this is confined to Tientsin, Peking and other centres of North China and Manchuria. There is no natural ice in Shanghai sufficient to provide skating. There are expectations of an order being placed for 500 skates with boots attached and there is a possibility of small sales of hockey equipment. The proprietors have in mind renting or selling the skates and boots and the hockey paraphernalia. Small sizes in skates and boots will probably be in demand, the Chinese foot being smaller on the average than either the North American or European.

—o—

The next thing is the stream-lined potato. Down in Rochester, New York, they have developed yellow, red and purple potatoes, and some with stripes of color, according to the Agricultural Department of the Canadian National Railways. We presume these jazzy potatoes are being developed for use in night clubs and other places where their bizarre coloring will blend with the decorations. Stream-lined potatoes, we think, would go well for serving on streamlined trains.

—o—

They are going to try and get the people of the United Kingdom to eat more bread. A five year campaign is about to get under way with this object in view according to the Industrial Department of the Canadian National Railways. The millers and bakers are joining forces to endeavour to put the scheme across. If successful, it should mean greater imports of Canadian wheat.

"FROM LIVERPOOL ACROSS THE ATLANTIC"

The ancient association between Canada and Liverpool in England has been celebrated many times and oft in song and story, but evidently to make sure that there can no longer be any possible doubt about the matter, Canada has erected on the banks of the river Mersey the largest "Neon" sign ever known in the British Isles. It stands on the Cheshire side of the river opposite the Liverpool landing stage and at once offers an exhilarating welcome to arriving Canadians and a reminder to "the old folks at home" that Britain's premier Dominion is really on the map. The sign cannot be hid. It is 110 feet high and 83 feet wide. The word "Canada" on a maple leaf, with the smaller word "quality" enclosed in a triangle below, breaks the sky-line by day. By night it flashes in gay colours outwards across the rippling waters of the Mersey, and neither storm nor fog can hide its purposeful message. As a matter of architectural interest, the sign contains about a mile of Neon piping.

A DESPERATE BATTLE TO MAINTAIN PRICES

John I. McFarland: "No one will ever be able to estimate the benefits, the producer, and the people in general, have received as a result of the Government support of the price structure in the past five wheat crops of Western Canada, which reached the grand total of a billion, seven hundred and fifty million bushels. I want to say to you, without prejudice, and based upon my inside observations of our market conditions, in conjunction with those of the world's market in general, that in the absence of Government support, it is clear to me there would have been such chaos, that I am sure I would not care to have been a resident in those parts of the world. On many occasions it was a desperate battle to maintain the level of values which was achieved. There were only occasional faint gleams of hope in those dark years, until the unprecedented crop disasters occured this summer."

SOLVING FARM PROBLEMS

The two hundred and seven Illustration Stations at present in operation throughout Canada are connecting links between the farm problems of outlying districts and the centrally located Dominion Experimental Farms. Thirteen of these stations are operating in Prince Edward Island, twenty in Nova Scotia, nineteen in New Brunswick, fifty-two in Quebec, seventeen in Ontario, fifteen in Manitoba, thirty in Saskatchewan, twenty-two in Alberta, and nineteen in British Columbia. The stations are located on privately owned farms and are carried on co-operatively with the progressive owners who have not only a personal but a community interest in agricultural betterment. As fact-finding and community organizations in the solving of farm problems and in the advancement of practical farming, the stations have proved of immense value in the dissemination of agricultural knowledge, and where possible a field day is held during the growing season. According to the annual report of the Dominion Minister of Agriculture just published, 142 such field days were held during the previous summer on the various Illustration Stations and 14,000 persons were present to view and discuss the work with the supervisor and other Experimental Farm representatives present.

FARMERS STAND TO REAP GREAT BENEFITS FROM BIG MOTOR TOURIST INDUSTRY

Development of motor tourist traffic will mean the establishment of a new industry for the Alberta farmer, according to an address given recently at Edmonton by A. B. Mackay, president of the Alberta Motor Association.

Long has the farmer regarded wheat growing or mixed farming as his salvation, despite such hazards as drouth, hail, frost, and other menaces.

But in the last few years, this country has suffered from the loss of export markets, causing farmers many bitter experiences in respect to wheat and other farm produce.

Mr. Mackay pointed out, however, that the tourists coming into this country strengthen the markets for farmers in a wonderful way and to a degree hardly if ever realized.

Given proper support, this country could build up a tourist business with an annual turnover of a billion dollars he said.

"Our farmers see very little of the motor tourist unless it be his dust on the highway and for that reason, perhaps, they are inclined to overlook his market value for them," said Mr. Mackay.

"The first fact is that every tourist has a mouth and a stomach which need filling with food three times or more daily. And who, I would ask, produces and supplies that food in the first instance if it is not the farmers. No tourist can be in Canada more than a few hours before he pays his contribution to the farmers for food. Modern cars will bring the eating tourist, the cash customer into Canada by the million every year.

"If this truth gets home to our farmers and is given the house room which it really deserves, I feel that they will become ardent supporters of the policy of building hard surfaced trunk highways in Canada as the first necessity in setting up this potentially tremendous market, namely, motor tourist traffic."

It was a sound business proposition and would yield handsome dividends, he said. The traffic would pay back during the life of the highways every dollar that had been invested. Further, Canadians themselves would own and make use of many splendid highways paid for by motor tourist friends from outside this country.

Mr. Mackay also emphasized the fact that every one of the visiting tourists was a cash and carry customer. In serving tourists, there was no necessity to jump a tariff wall.

It would be wisdom of the finest brand when the government set out to build hard surfaced trunk highways he declared.

GOLD—

THE BUSINESS affairs of the customer are of prime importance to the vendor. This statement holds good as regards the affairs of the corner grocery selling groceries to the neighboring wage earner, and also as regards the affairs of an entire exporting nation depending upon selling its products to other nations in order that it may maintain a fair degree of prosperity. Consequently matters concerning other nations which at first appear to be only of little importance to Alberta farmers, as time goes on become matters of prime importance, as frequently an importing country's internal affairs have a bearing upon the volume of its imports.

Something along this line appears to have happened, when on Monday the United States supreme court by a majority ruling of three to four ruled that the government of the United States was not compelled to pay the holders of government bonds in gold. Not that the United States is such a large customer of Alberta products, but because this decision was awaited with keen interest by almost every nation of importance in the world and among these nations are included Alberta's best customers. Fortunately it would appear as if the decision would be of immediate benefit to Canada, whatever the ultimate results may be, and it should be remembered that in matters of such widespread magnitude many months and sometimes years elapse, before the effect upon the lives of the common people is felt.

Gold, a metallic element, has been known and valued since earliest times. Partly because of its occurrence in a free state; its unalterability by water and air; the freedom with which it can be beaten into fine ornaments, gold has always been greatly desired by mankind. Long before the using of gold for currency and as a basis of wealth, the individual who possessed a quantity of gold was considered well-to-do or rich and those who possessed none were considered poor. In addition to the physical properties of the yellow metal, the desire to possess has added a lure that has strangely effected the affairs of men and nations.

During the early days of the depression, when the United States was, due to the aftermath of the war, piling up gold reserves at an unprecedented rate, an editorial originally appearing in the Vancouver Sun enjoyed widespread publicity. It appeared in this paper. The theme of the editorial was that when a sufficient number of nations had by force of circumstances been compelled to go off the gold standard, gold would revert to a commodity metal and would be only of such value as it was required in the arts and crafts, presumably a value much less than that set by law for money purposes. We privately ventured the opinion that as nations one after the other left the gold standard, gold would increase in value, not decrease, and such has been the case.

For several years there has been a concerted and vigorous effort on the part of governments to possess gold. In England as far back as four years ago, men travelled from village to village offering to buy any old gold the residents had. Advertisements appeared in town and city papers asking for gold, and three years later the same thing occurred in this province.

Many men can remember when in England and America gold coins were quite common. As a matter of fact silver was not legal tender for amounts over forty shillings in England. We would like to see the time return when gold again was freely distributed. It is with a certain amount of uneasiness that we read of gold being taken from the mines, hills and rivers of the world, only in a short time to find its way to man made strongholds in the bowels of the earth. We seem to see in this procedure an affinity between gold and armaments, and of armaments much has been written and said.

HARD ON HENS—

"CLUCKING AS one hen to another, I don't mind telling you that the times are sadly out of joint," she grumbled, hopping rather dejectedly from a speck of chaff taken mistakenly for grain.

"Dear, dear me!" clucked back the other hen. "What in the world has happened now? It's most disturbing. The last time you acted that way was the day before the night when they first tricked hens into working overtime by pretending it was daytime and using electric lights."

"This is far worse, my dear. You know these human beings once got an idea that everything could be done by machine. Now they find it doesn't always work. Something alive has got to be back of the machine—deus ex machina, I think they call it."

"I don't understand, I'm afraid," fluttered her friend.

"Do be patient and stop interrupting me. A man in Connecticut—it takes a New Englander to think up such a thrift plan—makes his hens spend their nights this cold weather doing a calorific stunt to keep the engine of his motorcar from freezing."

"Goodness, that sounds dreadful. What does it mean, though?"

"This man from Connecticut found that the temperature of a setting hen is 102. Then he figured that two hens would be 204 Fahrenheit. Now every night he sticks two hens under the hood of his automobile and the engine turns over as sweetly as can be in the morning."

"It's a downright shame," clucked the other hen. "There should be a code or something to regulate it if there are any more letters left in the alphabet. The next thing you know, that man's wife will be using half a dozen hens for a fireless cooker when he goes to church on Sunday mornings."—Christian Science Monitor.

PARADED IN NIGHTIES FOR DOLLAR BET

Students partaking of a late repast in the Varsity Tuck Shop Wednesday evening following a meeting of the University Philosophical Society were amazed to see a bath-robed clad youth making steady and determined progress toward the eating establishment.

Cries of "sleep-walker" and "drunk" were heard on all sides.

The mysterious figure calmly entered the building and divested itself of the bathrobe, revealing a sedate and appropriate pair of pajamas. It next walked to the counter, and in business-like manner demanded a cup of coffee. The request was complied with. The coffee was drunk amid a dead silence. The focus of all eyes then proceeded to the coat stand, donned the bathrobe, and went forth into the night.

Excited rumors flew about the shop following the incident. Finally word arrived that the youth had been involved in a wager, in which, for the sum of one dollar, he was to accomplish that which has been described above. He collected his money.

Outside the fact that the youth is a freshman, no serious fears are held for his sanity.

BIG SUM FROM CAR LICENCES

Since 1906 when automobile licenses were first introduced into this province a total of $20,298,527.30 has been collected in license fees, according to a return filed in the legislature by Premier R. G. Reid at the request of Joseph M. Dechene, Liberal member for St. Paul, and since the gas line tax was instituted in 1922 there has been collected from that source a total of $14,581,008.22 or a combined total of $34,879,535 [illegible]

In the same period there has been expended from income account, exclusive of interest and sinking fund, on roads, bridges and ferries a total of $16,365,043, and expended from capital account on roads, bridges and ferries a total of $32,789,406 or a total of $49,154,449.

The first year automobile licenses were in force in the province the revenue totalled $123 while in 1934 it had grown to $1,673,000.45. The peak year in revenue from this source, however, was 1930 when it reached $1,963,940.

The first year the gas tax was in vogue, 1922 the return was $165,11[illegible] 53 and in 1934 the yield was $2,10[illegible] 240 55, the highest mark yet attained.

— —

"That's rather odd," remarked the dentist, "you say this tooth has never been filled before, but I find some flakes of gold on my drill."

"I think you've come to my back collar stud," moaned the nervous patient.

SEES POULTRY SUCCESS AT WETASKIWIN

WETASKIWIN, Feb. 18.—Mr. I. E. Sparks, ex-M.L.A., of Wetaskiwin, has completed his educational campaign in connection with the egg and poultry marketing plan and he reports the poultry producers generally favorable in the districts he has covered. He expects that the vote which started Saturday and during the whole week will be favorable and that he believes the scheme will go into operation to the advantage of producers as well as consumers of poultry products.

FIGHT FOR CHILD'S LIFE IS LOST AFTER TWO YEARS

Two years of effort by medical science in the Royal Alexandra Hospital ended in failure late in January when Elwood Dahl, three, of the Wildwood district, died from the effects of swallowing lye when he was one year old. Dr. Anderson, superintendent, told the Edmonton hospital board at Friday night's meeting.

Two years ago Dr. Anderson reported, little Elwood was brought to the hospital, his throat almost entirely closed from the effects of the lye.

Surgeons made an artificial opening through which he was fed and through which he breathed for two years.

Gradually they tried to stretch the opening so Elwood could resume normal life.

They fought a losing battle, however. Elwood's lungs gradually weakened, until, late in January, they failed him completely.

Nurses who had grown to look upon him as a permanent part of the children's ward, expressed their sorrow at his death. "The ward was no longer the same," they said.

THAT FIRST BRANCH BANK AND 500 MORE

The founders of the Bank of Montreal firmly believed in branch banking. [illegible] the Bank of Montreal [illegible] appointed an agent [illegible] the agent [illegible]

[illegible]

Thus they introduced one of the elements of stability for which the Canadian banking system has received so much praise.

Consistently throughout the decades, the Bank of Montreal has added branches wherever business warranted, giving to new and growing communities the advantages of banking strength, ample facilities and sound management. Today over 500 branches are serving Canada. Each branch is the Bank of Montreal, with all the facilities and public service for which the institution is known.

From the first branch at Quebec to the most recent one opened the spirit of the Bank of Montreal is expressed—and will continue to be expressed—in terms of useful banking.

REGULAR MONTHLY COUNCIL MEETING

M. D. BEAVER LAKE 486

The meeting was called to order by the reeve, all councillors present.

Dr. Griffith of Holden was appointed Medical Health Officer replacing Dr. Farrell deceased.

Relief was granted A. W. Tchir at $10.00 per month, Mrs. K. Shevchuk at $5.00 per month, P. Ogrodnik at $6.00 per month. Relief was refused Frank Saner, Mrs. Greta Prystash and Mike Porohyshan.

Lease was granted F. [illegible] on Lot 3 [illegible] 21 [illegible]

The auditor's report was accepted by the council.

Authority was given to cancel old seed grain accounts as follows:—

Berford 144.25 and interest
H. Hunka 102.80 and interest
A. Hyslo, 150.00 and interest
S. Rurka 150.00 and interest
Sherman 204.47 and interest

Permission was granted S. Cheyka [illegible] the N.E. 33-51-18-4.

The [illegible] of F. Halen, Mr. Philip [illegible] and Mrs. O. Hawrych were given authority for hospitalization.

The [illegible] Scott and Mr. Moen were appointed to interview the Royal Alexandra Hospital Board re a reduced rate for [illegible] accounts of M.D.

[illegible] seed grain accounts outstanding.

The months bills were passed for payment.

Adjournment at 5.40 p.m.

MEDICAL HIGHWAY SOCIETY MEET

The regular meeting of Highway No. 13 Medical Society was held at Daysland on Wednesday, February 6. Owing to the road and weather conditions the attendance was smaller than usual but what was lacking in numbers was balanced by enthusiasm. At a splendidly prepared luncheon at the Daysland Hotel the guests were welcomed by Mayor Burroughs and ably seconded by Councillor [illegible]. Comfortable quarters were arranged by Drs. Sherriffs and Geissinger at the Community rest room and the balance of the evening was spent in the discussion of two subjects of very practical importance. The first Pneumonia, an address delivered by Dr. T. B. Stevenson of Wetaskiwin and followed by then, a resume of the Toxemias of Pregnancy by Dr. Geissinger of Daysland, both papers brought forth very considerable discussion and were well received. The next meeting will be held at Camrose on Wednesday, March 6th.

ROPE AVENGES NORTH MURDER WHANNEL DIES

A quiet smile on his lips, James Whannel, 21, died on the gallows at Fort Saskatchewan jail at 2.13 a.m. Wednesday morning for the slaying last June of Matthias Schmidt, homesteader near Peace River.

Whannel, declared dead 11½ minutes after the trap was sprung by hangman Ellis, was the fifth man to die on the scaffold at the jail within 15 months.

After spending Tuesday evening in prayer, Whannel was prepared for death and told his spiritual advisor Major Matt Junkers, of the Salvation Army that he preferred death rather than life in the penitentiary and that he was looking forward to the "life after death," which he expected to enjoy. He said he had repented his crime.

He was silent from the time he left the death cell until the trap was sprung three minutes later. He was talking to Major Junkers when the execution party arrived at his cell, and he said quietly, "I guess I had better get my shoes on." He did not speak again.

Tuesday night he declared that the jail officials had treated him kindly.

"I'm feeling better than when I came in here," he said. His last meal, the fourth of the day, consisted of sandwiches and coffee shortly before midnight.

Born in Kirkcudbrightshire, Scotland, Whannel came to Canada in 1930 and his prayers, said Tuesday night as he kneeled in his cell asked that his sister in that country and his mother residing in Grimshaw, be cared for.

He wrote final letters to his mother and sister during the evening.

DUSKY GAL WILL HAVE LONG WAIT

NASHVILLE, Tenn., Feb. 16.—Willie Jackson, 21-year-old negro, stood before the bench, convicted on six charges which included robbery, purse-snatching and shooting a woman.

The judge sentenced him to prison for 70 years.

Officers started to lead Jackson to a cell, but his dusky sweetheart barred the way, kissed him and told him:

"I'll be waiting for you honey, when you get out."

AVERAGE FARMERS NEED HELP, IS VIEW

Not only the bankrupt but the average farmer must be aided even to the extent of scaling down debts 50 per cent, declared I. Goresky, U.F.A. Whitford, when speaking in the legislature Wednesday.

"I hold that this will have to be done sooner or later. The farm loan board also must enter the branch much more than in the past," said the member.

Stating that immediate pressure should be put upon boards to [illegible] action, Mr. Goresky said he would like to know how many loans have been granted in the northern part of the province during the past year.

The member denied the impression in some quarters that the government was occupied solely with the interests of the farmer and that the city dweller was "the forgotten man."

"Nothing is further from the true case," he said. "An attempt has been made to keep the farmer on his land. Highways have been built past his farm, but the benefits have all been to the city."

A rural housing scheme should be put into effect, said the member. It had been estimated that $60,000,000 would be necessary to bring clothing up to the pre-depression standard. While he was not advocating that loans be given for clothing, he desired to show conditions that rural residents had to contend with.

Educational problems also were taken up by the member, himself a school teacher. He urged the government to introduce a bill making teaching a profession. This would have a tendency to stabilize the profession, and give the teaching organization more time for endeducational research and education, he said.

FORESEES BOOST IN SCHOOL COSTS

In the future school students won't sit with geography books on their desks and try to memorize statements such as "Japan produces tea;" the teacher will switch on a television set and the students will see for themselves.

Such was the forecast of Thomas J. Hughes city school teacher in an address before the Edmonton Lion's club at their weekly luncheon meeting held Tuesday.

"In the school of the future," he said, "students will not learn from textbooks. They will be in a huge auditorium and if the teacher wants to talk about Japan, he will push a button and there will be Japan, with its sounds, on a screen. The children will see the places about which they are learning."

Mr. Hughes said that the school of the future will be the centre of community life, and that educational costs, while they have increased tremendously in the past, will increase so much in the future that the present scale will be "a drop in the bucket."

He found that in Edmonton the school is the "poor little Cinderella of the civic system instead of being the city's frontal piece."

"We must spend more," he said, "if the youngsters are to have their rights. Education some day will become a paramount business of the state."

Friendship

"Friendship is an expansive spirit that overthrows vindictiveness and takes in enemies, overpasses jealousy and embraces rivals."—Dr. Harry Emerson Fosdick.

Head Warder—"Ten prisoners have broken out sir."

Governor—"Have you given the alarm?"

Head Warder—"I have sent for the doctor. He thinks it's themeasles."

Tom Cookson's Unreserved

AUCTION SALE

FAVORED WITH INSTRUCTIONS FROM TOM COOKSON, WHO HAS SOLD HIS FARM AND IS LEAVING TOFIELD DISTRICT, I WILL SELL "WITHOUT RESERVE" ON THE NORTH-WEST QUARTER OF SECTION NINE (9), TOWNSHIP FIFTY-ONE (51), RANGE NINETEEN (19), WEST OF THE FOURTH (4th) MERIDIAN, SITUATED FOUR (4) MILES WEST AND ONE AND ONE HALF (1½) MILES NORTH OF TOFIELD, "1½ MILES NORTH OF RUBE HAMMERSLY'S CORNER ON THE GRAVEL HIGH-WAY" AND TWO MILES DUE EAST OF LINDBROOK STATION, ON

Our Mixed 'Spiel

For many years Tofield, as a small town has been well known as a curling centre. Long before the present rink was erected doughty battles were waged on the two sheets of ice adjoining the skating rink. There the Lee, McLaughlin, Somers, McCauley, Ferguson, Hammond and Jobb and no doubt other rinks curled with precision and swept like fury until with one award and another, curling trophies became more common than mounted moose heads. Bonspeils were held in the old rink, but the opening of the new curling rink paved the way for new curling glories not only in the way of regular mens' club and regular ladies' club curling, but more especially in what is known as the mixed spiel. In a mixed spiel two ladies and two men form an ordinary rink of four, playing another rink of four similarly composed. There have been other mixed spiels in the past few years but this article chiefly deals with the one just concluded. In this spiel there were twenty rinks of four persons each, and with the exception of one or two cases when one person played on two different rinks, all rinks together represented a personnel of eighty persons. There are four sheets of ice and each sheet is occupied by eight persons, which with two draws each evening seven o'clock and nine o'clock, makes a total of sixty-four persons curling each evening. To these of course are added the spectators, which in curling phraseology is termed a gallery.

As the clock in the waiting room draws past the 6:45 mark the first arrivals begin to come in, broom under arm. Some come in with the assurance of long practice, others rather diffidently and appear to be a little uncertain just exactly what the occasion calls for. But they soon meet up with their skip or some close friend and as the clock draws on to seven the hunt for rocks is on. Quite a number of regular members of the club, both ladies and gents own their own pair of rocks, others do not, but in the mixed spiel the percentage of players not owning rocks is much greater than those who do. Consequently there is a general chorus of "are you using your rocks, may I borrow them," which in most cases is answered in the affirmative as generally speaking, all club members owning rocks are generous in this respect.

After the toss to see which side throws first, the game commences, and with four games in progress on four different sheets of ice at the same time the observer can distinguish all the emotions of mankind. An observer will see desperate effort combined with elation and disappointment, joy and chagrin, hope and despair. He or she will see carefree light heartedness lined up with or against stern, even morose endeavor. The observer has an opportunity of studying human nature in all its moods and varying characteristics. Short and tall, stout and thin men and women throw and sweep, all with a style peculiar to themselves. You really would not think sweeping a rock down the ice could be done in such a variety of ways. Take for instance the efforts of a charming little lady who literally jumps up and down as she moves forward, her motion for all the world appearing as if she was governed by springs concealed in the rafters somewhere. Then there is the good natured gent who sweeps just like a barber dusting off a patron's face after a hair cut, quick light strokes artistically administered. Then there is the lady who nonchalantly sweeps six or eight feet in front of the rock but the rock gets there and all is well. But for real sweeping the observer must turn to the old timers. Flip flop, swish-swash go their brooms and the wonder is that they do not wear a channel in the ice for the next rock to follow. Hardwood handles sometimes fail to stand up under such treatment and a sharp crack lets the sweeper know a new broom is necessary.

They tell you that when throwing a rock you should have what is termed "the perfect stance." But at our mixed spiel the observer would have a real job finding it. It is probably there—somewhere—but there are so many "stances" that finding the "perfect" one is a bewildering task. Perhaps the enthusiastic young lady who throws her rock with a diving motion has it, or the gent who takes careful aim like an old time naval gunner, throws, and unlike an old time naval gunner, misses; or perhaps the lady who standing almost erect, lifts her rock clear off the ice and sends it away smoothly, reminding one of the good housewife throwing the cat out of the kitchen door; or perhaps the gent who after sending his rock away runs down the ice and midway, falls on one knee as if in supplication to Allah or the goddess of fortune, has it. The perfect stance still has to be found and labelled.

Curling has been described as "the roarin' game," but at our mixed spiel there is the beauty of contrast. On one sheet will be found players proceeding with the solemnity of a Quaker meeting, while on the next sheet as regards noise, the game reminds one of a riotous Saturday night. As regards

(Continued on back page.)

Local & Personal

Group 2, United Ladies Aid are holding a sale of home cooking and ice cream in Braces Store Saturday, March 2nd.

There will be a song service following the regular service in the United Church Sunday March 3rd. Mr. Broughton will sing. Silver collection.

Rev. D. K. Allan was called to officiate at the funeral of the late Mr. Wm. Clarke, Westlock. Graham and Mr. Allan left on Tuesday, 19th and conducted the funeral the next day (Wed). Interment took place in the Hazel Bluff cemetery.

Born:—To Mr. and Mrs. J. T. Bullock on Friday, Feb. 22nd, at Edmonton, twins, a boy and girl.

The Holy Trinity W. A. will meet at the home of Mrs. McCarthy on March 6, at 2:30.

Mrs. Pickett visited friends in the city this week.

Blake Clutterham was a patient in the Royal Alexandra hospital a few days of last week.

Mr. Geo. Brace is having some repair work done on his building. The contractors, from Camrose, were obliged to stop work due to the cold weather.

A number of young people attended the hockey game in Edmonton on Sunday.

Quite a few from town attended the dance at Ryley on Friday evening.

Mrs. Coatta was a visitor to the city this week.

The Tofield High School Students' Union are presenting a miscellaneous concert in the Variety Theatre on Friday March 8, at 8:15 p.m. The varied program consists of choruses, quartets, folk dancing and a one-act play entitled "The Lost Collar Button." Admission 35, 25 and 20.

HOLDEN CURLERS WIN N. UTILITIES' CUP

Tuesday night two rinks from Holden came to Tofield and lifted the Northwestern Utilities cup by defeating two Tofield rinks on total points. S. Edworthy skipping one of the visiting rinks got an early lead on Dr. Law, winning his game by a score of 14—8, while Swift won his game from N. B. Armstrong. He only had a margin of one point. Coming back to the 14th end a tie, Mr. Swift managed to squeeze out a win, the total score being 15—11.

The personnel of rinks: N. B. Armstrong, R. Emond, S. Black, W. J. Fleming; Dr. Law, J. O. Y. Letourneau, O. P. Thomas, L. A. Broughton; S. Edworthy, R. Newell, S. Heffel, W. W. Boyd; W. C. Swift, A. J. H. McCauley, A. P. Thompson, A. B. Clutterham.

KETCHAMOOT

* * *

Mrs. E. McMullen received a phone call Wednesday evening stating her son-in-law Mr. Archie Brown has passed away after a long illness from diabetes. Mr. Brown was one of Tofields earliest settlers, having a homestead on the farm where Mr. Moline now lives, but of late years lived with his family on a farm near Bawlf. He leaves to mourn his loss, his widow, two sons and two daughters, Tommie and Archie, Mrs. Sophie Tennent of Bawlf and Mrs. Emily Mercer of Calgary.

The regular meeting of the Ladies' Aid will be held next Thursday March 7, at the home of Mrs. Louis Carlisle. A cordial invitation is extended to all.

Mrs. W. A. Mitchell who has been in ill health for some time was taken to an Edmonton hospital on Monday for treatments.

Mr. and Mrs. Tollefson have rented the Clarence Mitchell farm and and are busy moving in.

The Brick and Ratigan families who have been living in the Clarence Mitchell house have rented the Maurice McGinitie house.

Mr. and Mrs. Herbert who have been living on the old Campbell farm have rented the late Mr. Hugh Mitchell farm.

Mrs. Shope and Irma, Mr. and Mrs. Sears and Charley and Mr. Schultz were entertained at the home of Mr. and Mrs. Nomeland Wednesday evening of last week.

We regret omitting the name of Mrs. Percy Sutton as hostess at the

Former Local Girl Weds Flier

[illegible] all the north region,
He [illegible] the test,
[illegible] when [illegible] homeward,
A bride [illegible] quest.

[illegible] very good parody [illegible] "Young Lochinvar," but at least it fits Pilot R. [illegible] House, Canadian Airways who came out of the north early [illegible] week and Friday returned north with his bride as his passenger. He was married quietly Thursday to Miss Malisa Kallal [illegible] Jasper ave [illegible] [illegible] in the T. Eaton Co. [illegible] Edmonton.

[illegible] House was [illegible] to make a relief flight to [illegible] and return [illegible] the bride [illegible] Edmonton airport again [illegible] with his bride as passenger. [illegible] when the bridal couple landed at McMurray [illegible] the [illegible] at the [illegible] along with [illegible] brass band which tooted triumphantly as the ship came in.

Miss Malisa Kallal is the daughter of Mr. and Mrs. E. Kallal, Tofield.

SOCIAL HOUR CLUB MEETS

The ladies of the Social Hour Club held their regular monthly meeting at the home of Mrs. Earl Wilson on the afternoon of Thursday February 14, 1935.

The meeting was opened with roll call which was answered with hints on [illegible] raising.

The parcel of remnants was distributed among as many members as [illegible] each member accepting a remnant will make it into some suitable garment for "Sunshine." It was decided that all those wishing to give something to "Sunshine" would bring their donation to the next meeting where the parcel will be made up for mailing.

The meeting was closed with tea at which a cake was served prettily decorated in honor of St. Valentine.

The guests present were Mrs. L. Gill and Miss Katie Loughead.

Next meeting will be held at the home of Mrs. Paul McMullen where Mrs. Genoski will give a demonstration marcel. Roll call will be answered with hints on home beautifying.

LINDBROOK

* * *

[illegible] fine weather is very agreeable although it makes travel for [illegible] and [illegible] rather difficult. Still for all that it beats the below zero stuff of last month.

A whist drive in aid of the funds of Holy Trinity Church (Anglican) [illegible] was given by Mr. and Mrs. Lancaster at their home here. It was well attended and everyone enjoyed the evening immensely. It is also gratifying to hear that the financial returns were not so bad either considering [illegible] old friend Lbunt De Pres [illegible] and the icy roads.

The prizewinners were:—Mrs. A. White, ladies first, Mrs. W. McHeffey, ladies' consolation, Mr. J. H. Brown, Gents first, Mr. X, gent's consolation. We don't know the name, [illegible] Mr. X won't mind anyway.

Lindbrook may be in the throes of a [illegible] building boom soon. Lot of logs have been hauled to the saw mill operated by Mr. Peter Enns, one half mile north of Lindbrook and are being converted into boards and scantlings. The logs are nearly all [illegible] may mean that [illegible] what we have got and [illegible] better conditions as [illegible] relatively any [illegible] the [illegible] Building Boom by Farmers [illegible] "spend" On [illegible]

Mr. [illegible] returned home after visiting with relatives at the coast.

INTERMEDIATES DEFEAT BRUCE

[illegible] of Tofield won from Bruce [illegible] Play during the [illegible] was very fast [illegible] tactics of the [illegible] one goal in [illegible] became rough [illegible] with referee N. Glover starting to give out penalties [illegible] twice and Tofield [illegible] what ended with [illegible] Tofield scored twice [illegible] after a few minutes [illegible] During the [illegible] half Bruce pressed hard and were [illegible]

[illegible] defeated goes into [illegible] week with the first game at [illegible] Monday March 4.

Those credited with goals were: Bruce [illegible] 2, Kortzman 1. Tofield: McCauley, 3; Burnett, 1. McLaughlin was credited with four assists.

A New Wheat

A new Alberta wheat, possessing strength in resisting root-rot and smut, will be sown in central and southern Alberta fields this year as a result of five years of development by Dr. O. S. Aamodt, professor of genetics and plant breeding at the University of Alberta.

Ten bushels of "Canus" a cross between Canada's famed Marquis wheat and the equally famed Kanred of the United States winter wheat belt have been distributed for planting Dr. Aamodt stated Monday.

The name is derived from a combination of "Canada" and United States. All the supply available for sowing this year already has been allotted says its creator.

Although the new strain is not designed particularly as drouth resisting, it has some strength in this direction, Dr. Aamodt declares.

Good Milling Qualities

Besides its disease-resisting qualities, he claims good stiff straw and good milling and baking qualities for Canus. It is bearded like its winter wheat ancestor from the United States.

In tests conducted by the National Research council of Canada and the Dominion agriculture department, the average yield was 32.4 bushels to the acre.

Plot tests at the University showed Canus wheat yielded equal to Marquis over a five-year period and matured in an average of 108 days compared with an average of 107 for Marquis plots. Dr. Aamodt found Canus had strong straw in contrast to Garnet when both were grown on summerfallow.

Average yield of wheat in Alberta over a period of years is 18 bushels per acre in actual practice. The yield tests on Canus were of course from plots.

The National Research council in Ottawa backed Dr. Aamodt and the University financially while he was developing the new strain.

A record has been set in the development of the new grain. Usually 15 years are required but in this instance experiments were commenced in 1930.

Some Criticism

Although Canus is criticized in some quarters as not having the advantage of resisting rust, this is not considered serious since rust is not a menace in this province.

Growing Time Is Same

It is said to take the same length of time to ripen that Marquis requires.

An Alberta wheat pool report has predicted the supplanting of Marquis wheat by Canus over a large area of the western Canada plains region where early ripening is not necessary.

Another high-grade wheat is still in the process of development by Dr. Aamodt. It is claimed to be equal in quality to Reward, and having the property of drouth resistance. It will not be ready for another five years, although experiments are under way for the past six years at the university laboratories have reached the point where success is almost a certainty, reports state.

Hon. F. S. Grisdale, minister of agriculture, said Monday he had observed the new wheat growing in test plots at the university last summer and had been quite impressed by its prospects. It grew strong, healthy and indicated a heavy yield. If disease resistant, it will have a real place in some parts of the province, especially large areas where root-rot is a factor, he added.

You Can Help Very Much

Publishing a weekly newspaper is rather a monotonous task. As the weeks roll round there is the same mechanical work to be done, the same searching for news to fill the columns and the same expended effort to procure sufficient advertising to make the venture a paying proposition.

But it is our work and as such, we must of course, keep going. Subscribers often help very much not only by paying up their subscription, but by giving us a few words of praise and encouragement and naturally, sometimes friendly criticism. We are always pleased to receive all three and there is no limit to the interest subscribers may take in this publication.

The Tofield Mercury is a country weekly published in the interests of this district. We neither aspire to or expect a huge circulation, but hope we have and are able to maintain the interest of the majority of residents of this district. Allied to no party or creed, the occasional expressions of opinion are given for what they may be worth at the time they are given and are always intended to be constructive—not destructive.

Readers may and can help greatly by taking an interest in their Home Paper.

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

WHOOPING-COUGH

Highly contagious at all times; highly dangerous for the child under three years of age and particularly so for the baby, is a fair description of whooping-cough.

Like several other complaints, whooping-cough starts as an ordinary cold, with the running of the nose, a dry cough and a little fever. Instead of clearing up like a cold, however, the cough persists until it comes as a series of explosive coughs, ending up with a crowing sound, or whoop, as the child is at last able to draw in his breath.

The child is frightened by this experience. Vomiting frequently occurs, and between loss of food and loss of sleep the little patient's weight and strength are apt to diminish. The younger the child is, the more serious the condition. In Canada, last year there were 552 deaths from whooping-cough, and no less than 388 of these were of children under one year of age. In the case of older children, whooping-cough is uncomfortable and distressing, but is seldom dangerous.

The responsible germ comes from the throat and bronchi of those who have the disease. The germ is thrown out in the mouth spray which accompanies coughs and sneezes. The patient is frequently too young to know that a handkerchief should be used to cover coughs and sneezes, and so he sprays his germs into the faces of those who are nearby.

A really practical difficulty in the control of whooping-cough arises out of the fact that, during the week or two when the child who is developing the disease but who apparently has nothing more than a common cold, the infection is being spread to those with whom he comes into contact.

It is obvious that it is the young child and, above all others, the baby, who must be protected. This means that no one who has a cough or cold should come near the child, and that no coughing youngster or sneezing relative should be allowed to hang over baby's crib or carriage.

The young child with whooping-cough requires abundance of fresh air and sunshine. Most deaths occur because a pneumonia develops; the whooping-cough seems to make the lungs ready victims for further disease, such as pneumonia. For some unknown reason, females suffer more frequently than males. One attack usually confers immunity for life.

There is lack of unanimity concerning the value of whooping-cough vaccine as a preventive measure. Some authorities have had good results; others have not. This is something to talk over with your family doctor, but, in the meantime, keep the young child away from those who have colds, remembering that what appears to be a cold may be the onset of whooping-cough or measles.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

As a result of unrestricted access to the British market, Canadian bacon exports in 1934 increased 52 per cent over 1933, while under quota restriction Danish exports decreased 22 per cent from 1933.

The sales of branded beef in Canada for 1934 totalled 39,575,754 pounds, an increase of 8,893,145 pounds over the sales of 1933.

The farm implement trade in Argentine is controlled principally by Canada and the United States, Canadian-made harvester-threshers, grain drills, riding ploughs, corn cultivators and planters being well established.

Hogs graded in Canada in 1934 numbered 3,038,155 a decrease of 134,831 compared with 1933.

Canadian National Weekly News Items

* * * * * * * * *

The gross revenues of the all-inclusive Canadian National Railways System for the week ending February 14, 1935, were $3,084,760 as compared with $2,747,848 for the corresponding period of 1934, an increase of $336,912.

Halifax, N.S., February 25—The last horse has gone from Cape Sable Island, off the south shore of Nova Scotia, and thereby hangs a tale. The story of the wild horses of Cape Sable Island goes back to the year 1598, when Marquis de la Roche set sail from France with settlers and effects for Acadia. Fearing Indians, he landed the settlers and effects on Cape Sable Island but, forced by adverse gales, he returned to France and many of the settlers perished before a ship could be sent from France to rescue them. Included with the settlers' effects were some horses and these became progenitors of a wild band, which in the beginning of the nineteenth century, numbered somewhere around 300. A Prince Edward Island vessel, skippered by Benjamin Chadwell, was driven on the island by a violent gale and he and his crew made a count of the horses off which they subsisted until rescued.

The island has had an unsavory reputation for shipwrecks and in this respect has been known as "The Graveyard of the Atlantic." The skipper found the hulls of upwards of forty vessels wrecked on this lonely wind-swept island. It has been said the island was the home of wreckers who lured ships to their destruction with false lights. One of the most tragic of the sea disasters which happened on Sable Island was the loss of the "Princess Amelia" in 1802 with all of her crew and passengers, soldiers, officers and their wives, two hundred in all. The island can be reached by way of Barrington Passage on the line of the Canadian National Railways, being approximately eight miles from the station. Since those early days, Sable Island has lost its unsavory reputation. Modern aids to navigation having been installed on the island.

In London, England, there has been established what is claimed to be the world's largest milk depot handling 70,000 gallons of milk daily, according to the Industrial Department of the Canadian National Railways. It covers an area of nearly 8 acres and is served extensively by railway sidings. Special railway tank cars of 3,000 gallons capacity convey the milk from collecting depots at Whitland, in West Wales; Wootton Bassett, near Swindon; Yetminster, in Dorsetshire; as well as other stations on the Great Western Railway. The depot has special facilities for pasteurizing, homogenizing and sterilizing the milk with a new research laboratory included.

Not only has many a braw hie'lander been raised on Scotch oats, but it would appear many a race-horse as well, Scotch oats being shipped to London, Eng., for that purpose. London is the great entry port for Canadian oats into the United Kingdom, where they are sold to home Counties either for feeding of horses or for the manufacture of Sussex ground oats used in the feeding of cattle and sheep. Generally there is no competition from Scottish oats, the Scotch article being kind of "snooty" and not deigning to be used as ordinary fodder. English oats, however, are in direct competition with Canadian. They seem to prefer Western Canadian oats on the London market in place of those from Eastern Canada. It would appear there will be a steady market for Canadian oats from February, when the oat trade usually picks up, until the end of June when the new English crops become available, according to the Agricultural Department of the Canadian National Railways. So far as Scotland is concerned, oats is the most important cereal and the yield for 1934 is estimated at 645,000 tons, as against 694,000 tons the year previous; normally there is no appreciable market for imported supplies.

In Java they have not only to take steps to preserve the food supply but also the receptacle. In the case of refrigerators, wood is vulnerable to the attacks of white ants. Metal refrigerators are, therefore, preferred but all exposed metal parts must be protected by enamel or chrome plating on account of the heat and high humidity. Chrome plating is necessary as nickel cannot stand the climate. Ice is produced artificially, there being six ice plants in the city of Batavia, with a population of 535,000, according to the Industrial Department of the Canadian National Railways. The total number of ice factories in Netherlands India, a Dutch possession, is 168. Java, the most important island in archipelago, has an average temperature of 80 degrees Fahrenheit. Although the islands comprising Netherlands India are all within the equatorial region, certain districts, owing to altitude, have a moderate climate and even some frost.

SCOUT NEWS

Ottawa, Feb. 22nd— Confidence that the lead of Lord Strathcona as a staunch supporter of the Boy Scout movement would be followed enthusiastically by far-seeing Canadians today was expressed by Rt. Hon. Lord Baden-Powell, Chief Scout of the World, in his message to Canadian Scouts on this, his 79th birthday. His message, sent from New Zealand, was in reply to felicitations extended by E. W. Beatty, K.C., president of the Boy Scouts in Canada, to Lord and Lady Baden-Powell, this being Lady Baden-Powell's birthday also.

Lord Baden-Powell cabled: Canada could not have devised more acceptable greeting on joint birthday Chief Guide and myself than announcement of determination to expand Scout movement. Recent experiences Europe, Asia, Australasia, show Scout Guide training definitely assisting education by developing individual character and health, national usefulness and international friendships. Therefore proposed expansion as encouraged by His Excellency Lord Bessborough certain to benefit Canada's further advancement. Since movements welcomes all creeds and classes alike to membership, has approval of churches, besides educationists. Holy Father personally expressed his approval. So all promises well for successful extension.

FINDS ANCIENT MAYA CITY

Tegucicalpa, Honduras, Feb. 20.—Discovery of big stone staircases, exposed by recent earthquakes, leading to subterranean galleries of a 1,700-year-old Maya civilization was announced Tuesday by Gustav Stromsvic, heading an archaeological commission of the Carnegie Institute of Washington, now working at Copan.

Stromsvic said the discovery revealed Copan as the most important centre of ancient Maya civilization yet found, and added he had established that the ancient Mayas knew uses of gold heretofore unsuspected. Big stone canals and a sewage system connecting large underground buildings were among the discoveries.

MAJOR DOUGLAS TO PAY RETURN VISIT—

THE PROVINCIAL Government's invitation to Major Douglas to return and Major Douglas' acceptance is rather difficult to understand. Putting aside all question of the soundness or unsoundness of Social Credit, concerning which this paper still has an open mind, it was fairly well demonstrated when Major Douglas was here before, that as at present constituted, Alberta is unable to put Social Credit into effect. Readers will perhaps remember the passage of words between Major Douglas and A. Matheson M.L.A., in which in reply to Mr. Matheson's statement that the British North America Act prevented the province from instituting a new currency system, the Major replied, "Well if you have not any powers, you cannot do anythng, can you?" In this respect conditions are exactly the same now as they were then, and unless the provincial government has information as to leniency on the part of federal authorities, it would appear that the best Major Douglas can do is to bring about a demand for social credit, not institute it.

Undoubtedly the presence of Major Douglas will produce an effect and create an interest which in his absence would be highly improbable if not altogether impossible. But after all, in government circles social credit should by this time be pretty well understood. Having had personal contact with its originator, access to a wealth of literature on the subject, the opportunity of listening to innumerable addresses concerning it, there should not be a sitting member who by this time is not prepared either to endorse or reject the plan. Furthermore the plan is not new, it is several years old, consequently it is unlikely Major Douglas has very much new information to impart.

Undoubtedly the visit of Major Douglas would be something in the nature of a grand gesture, but there is the possibility that his second visit would not have the same sensational interest as his first. Then he was heralded as an apostle of a new financial era, people were intensely interested in his visit, his addresses, his plan. But partly due to lack of executive power on the part of the Alberta government and partly due to lack of clear cut statements of policy on the part of the Major, interest rapidly cooled. It is even possible a second visit would as regard great public interest, fall quite flat.

There is plenty of interest in social credit however, particularly in the rural sections to-day, but it is interest in the plan, not interest in the man. In many cases it is the interest of men entangled in a financial morass from which there appears to be no avenue of rescue, and is truly interest born of despair.

Consequently it seems to us as if the government should take defnite action. It is too serious a matter to play with. An election is approaching. Individual members know now, or should know, as much about social credit as they ever will know, except lessons learned from its actual working. Candidates should go to the electors on a social credit ticket or anti-social credit ticket. If social credit is successful at the polls, the government could then take the matter up with Ottawa and in the event of non-co-operation there, could consider secession and all that secession implies.

If candidates felt it was unwise to tie all their other political beliefs to the one question of social credit and sink or swim by that score, a straight plebiscite on the issue could be taken. This of course would indicate the electors' wishes but place no particular responsibility on the individual member.

We believe the time has come when social credit should be either instituted or discarded from our list of remedies for the depression. In some quarters the belief is prevalent that the present depression is due to the work of an international group of financiers. While we do not fully subscribe to this belief, we can think of no better way of playing into their hands than becoming enmeshed in a continuous tangle of words.

A NEW CALENDAR—

IT BEGINS to look now as if, beginning with January 1, 1939, we would have another new calendar. The great Protestant church bodies of the world, the Church of England, and Pope and most of the national and international business organizations have agreed with the calendar committee of the League of Nations for a new international calendar, in which the year will be divided into four equal quarters, each containing two months of 30 days and one of 31 days, with an extra holiday, or "Year Day" between December 31 and January 1, and in Leap Year another intercalary day between June and July.

Easter would always fall on April 8, and every month would always begin on the same day of the week, every year. New Year's Day would always be Sunday, the Fourth of July always on Wednesday.

MANY COUNTRIES REGULATE WHEAT AND WHEAT PRICES

A dozen countries now have regulations governing wheat and wheat prices. Importing countries have raised tariffs against imports of wheat to encourage home production, and exporting countries are attempting by various means to expand export outlets in order to retain or regain export trade. Some of the restrictions and regulations are described as follows by the Department of Rural Economics of Ohio State University.

In Argentina a base price is set for wheat which is now the equivalent of 63 cents a bushel. If at any time the price of wheat falls below this, an agrarian board buys wheat and sells abroad at current market prices. The Government stands the loss in these transactions. Also, the Argentine Government advances liberal loans on wheat for short term periods.

In Australia the Government gives direct assistance to wheat growers. About $12,000,000 is distributed to growers on an acreage basis. Payments amount to [illegible] a bushel. The Government also [illegible] $16,000,000 to provide a bounty of [illegible] to maintain a [illegible] price for wheat at port of export. This bounty has not been needed as yet because the price at Sydney is about 70 cents. Funds for the payment are derived from [illegible] taxes on flour amounting to $17 a ton, from state revenues and from excise tax on flour.

In Chile an agricultural export board buys wheat from producers at $1.64 a bushel when there is a surplus for export. The home market is protected by a tariff. When the world market rises to $1.91 a bushel wheat may come into Chile duty free.

In Germany, a deficit country in wheat production, the tariff on imports of wheat is $1.62 a bushel. All imports are handled through a government office. If anyone wishes to import wheat through ordinary trade channels the tariff is $3.06 a bushel. All exports of wheat are prohibited. Prices are fixed. In the Berlin district, this price is equivalent to $2.14 a bushel. Until recently German millers were required to use 97 per cent home produced wheat in their flour. A current shortage caused the Government to lower this percentage temporarily to 80 per cent.

Sweden has eliminated imports for flour purposes by requiring millers to use 100 per cent domestic wheat in flour. Since June, growers have been guaranteed a price of $1.39 a bushel. The United Kingdom grants tariff preferences to empire countries. A production subsidy is given home growers guaranteeing a minimum of $1.50 a bushel. The estimated market price this year is 77 cents a bushel, so that a tax is placed on each 280-pound sack of flour to finance the subsidy.

France fixed the price of wheat at the mills at $2 a bushel. Acreage is allotted to French farmers. Each farmer who sows wheat in excess of his average acreage for the past three years is fined $1.50 an acre [illegible] excess. France recently entered the wheat export market. She pays a bounty of $1.63 a bushel on exports. French farmers also produce wheat behind a tariff wall. The minimum duty is 85 cents, the maximum $1.[illegible]

SPENT $200,000 THIS YEAR ON TOURIST DRIVE

The estimates to be passed by Dominion Parliament now in session at Ottawa provide $200,000 for expenditures this year by the newly organized Canadian Travel Bureau of which D. L. Dolan, of Ottawa, is director. The amount is double that voted last year, when the Bureau was brought into operation.

This development along tourist lines is of the utmost importance to Alberta, rich as it is in attractions that draw the motoring thousands from afar.

Time and time again the Alberta Motor Association has emphasized the need of improving highways in this province to meet the demands of the ever-growing tourist industry. It is evident that the Travel Bureau will wage an extensive campaign this year in order to attract tourists to Canada, and obviously Alberta, with its great national parks, will be a magnet.

That means more business for Alberta residents, whether they are city, town or rural dwellers. Business will be brought to their door, all providing of course, the highways are of a type that tourists are prepared to drive over.

Under such conditions people of this province can well be expected to present a united front in advocating better highways in all directions. It is an investment that should receive backing everywhere, particularly as it has been estimated by no less an authority than Mr. Dolan that the people of the United States spend the astounding sum of approximately $5,000,000,000 on travel each [illegible]

[illegible]

YELLS "I CAN KILL" MAN DROPS DEAD

NEW YORK, Feb. 2[illegible].—Frank [illegible] 67 year old sandwich-sign [illegible] fame and a better [illegible] worth $42,000 [illegible] them to the owner, [illegible] a rampage early Saturday [illegible]

[illegible] he shouted, "I can [illegible] at me." [illegible] police and a doctor were [illegible] to restrain him, a man [illegible] Robert E. Edwards of [illegible] Los Angeles, [illegible] and complained [illegible] Gregos shouted again, [illegible] "I can kill [illegible]

[illegible] dropped dead. [illegible] had sent one man [illegible] with a push down a [illegible] a police [illegible] removed [illegible] he shouted as a crowd [illegible] the hotel. "Nothing is [illegible] for me. The hat I wear is [illegible] I have on $10 shoes [illegible] too good for me.

People Stare At Me

[illegible] at me," he explained. [illegible] I found the money in [illegible] at me all the [illegible]

[illegible] a dollar a day [illegible] from his sandwich [illegible] a wallet from [illegible] February 5 [illegible] fear he would go [illegible] Gregos was unperturbed [illegible] the public.

Wealth Increases

[illegible] Company, the brokerage which had lost the bonds, [illegible] him in new clothes, gave him $100 and a better job. The surety company gave him a reward and a weekly [illegible]. Every mail increased his wealth with cheques from admirers all over.

A dis[illegible]aged, shabby derelict became the Croesus of the Bowery. He got a dollar a minute—in contrast to a dollar a day—for telling of his good fortune over the radio.

But the transition was too great for Gregos.

He was ascending the stairs in the hotel while James Kelly, also 67, was descending. Gregos sent Kelly plunging down the stairs, badly lacerating his scalp.

Gregos next walked into a reading room and shouted his boast before 25 other guests.

BRIDE PICKS GROOM ON DIME FLIP

Reno, Nev., Feb. 25.—The flip of a coin won a bride for Harold Nelson.

According to a story told today by county clerk Elwood H. Beemer, Miss Dorothy Williams of Fresno walked into the license bureau Saturday with two men, one of whom was Nelson, of Goodley, Calif.

"Which one is the groom," Beemer asked.

Beemer said Miss Williams replied she hadn't decided.

The county clerk drew a dime from the cash drawer and flipped it. Nelson said "heads" and "heads" it was. He and Miss Williams were married shortly afterwards.

ORANGE MARMALADE.

Six oranges, two lemons, sugar and water according to following directions. Wash fruit, cut off ends. Cut in half and remove seeds from lemons. Clip off very thin slices, cutting through the rind and pulp. Cover with cold water and let stand 24 hours. Put over the fire and bring to the boiling point. Simmer 30 minutes. Let stand again for 24 hours. Add three quarters cup of granulated sugar for each cup of fruit and juice and cook until thick.

NEW CABBAGE WON'T SMELL

Ithaca N Y Feb 26—An odorless cabbage, something new in the vegetable world was announced today at Cornell University

It will not smell up the house while cooking yet dietetically and gastronomically it is a perfect cabbage

The way Prof C H Myers of the department of plant breeding got rid of the odor proves the ladies have been right in turning up their noses at it

The [illegible] turned out [illegible] ary hang-over which disappeared when good breeding was introduced

It took 4,000 cabbages and six years to produce the [illegible] vegetable

Leave Tofield for Edmonton 9:10 p.m.

(Continued from front page)

making noise the skip is chief and again as regards making noise, there are skips, skips—and skips You would not believe the job could be done in such a variety of ways There is the skip who says or rather sings, wait, wait, wait! and on another occision, hurry, hurry, HURRAY Then there is another who says yes, yes, yes, quick, quick, quick, in rapid jerks And still another who sonorously intones, "don't look at it, don't look at it." And another who yells hard like a blast from a bugle, then stop, then hard, then stop, then now. But instructions to sweepers varied as they are, reaches a climax when from one end come cries of hard, hard; and from the other, wait, wait, WAIT! Only a sweepers union, squaring the circle, or finding the fourth dimention can solve the problem of the sweepers at a time like that

In our mixed speil many games were played, some close, some with one sided scores. But perhaps the most interesting game, even including the finals was that played early in the speil between the Jacob rink and the Jobb rink. The personnel of these rinks were Mr and Mrs. T. W. Jacobs, Esther and Thomas Jacobs on one side and Mr. and Mrs. Jobb and Mr. and Mrs. McIntyre on the other. The game had progressed with varying results to both sides until at the last end the score was 7—7, a tie. By this time there was quite a large gallery, players were coming in for the nine o'clock draw and the other rinks had finished their game Papa Jacobs was marshalling his forces well and was showing intense and concentrated interest in the game, so much so as to catch the general good humor of the gallery

Here we must digress a little Only on Saturday the writer was told by a prominent farmer, that townspeople were indifferent to the welfare of the agriculturist, a statement which the writer hastened to correct

Well here was a game, fought move by move between literally, country and town. Curling unlike most other sport, has no rabid fans and while there was no cheering or razzing, it was plain for all to see that the good natured crowd were almost all "pulling" for Jacobs. Not that they wished to see Jobb lose, but because here was a farm family, more or less inexperienced in curling, battling on even terms with a town rink well versed in the game. They wanted to see the farm team win.

In the two skips there was great contrast. Skip Jacobs was anxious, desperately anxious, throwing carefully and sweeping feverishly and following the course of every rock with intense interest. Skip Jobb was cool and smiling, and even went out and helped to sweep in an opponents rock. As the end drew to a close the Jacobs rink were laying shot and Jobb throwing the last rock of the game found himself faced with the responsibility of winning or losing the game for his side. Trying for a draw shot into the house his rock ran foul of a guard and caromed into the house to win the game. As the rock came to rest Mr. Jacobs who had been desperately serious, relaxed, smiled a broad smile entirely devoid of rancor and shook hands with his rival skip. The spectators moved over to fresh interests

There are many things very much more important than curling. Social problems to solve, financial security to be found. But the old-time proverb "all work and no play makes Jack a dull boy," is not without foundation So when reading of or listening to curling activities it is wise to remember "curling is just a game."

DIONNES TAKE FINAL CURTAIN BOW TO HURRY CALLANDER-WARDS

Indianapolis, Feb. 26.—Homesick and anxious to see their 10 children, including the famous quintuplets, Papa and Mama Oliva Dionne, trod the boards of a local play-house last night for the last time. They planned to leave immediately for Callander, Ont., winding up a tour which took them to Detroit, Chicago, South Bend and Indianapolis.

The famous father expressed the hope that when Mrs. Dionne and he returned to their northern Ontario farm they can go across the road and visit their five new babies "not as strangers but as father and mother."

"We have been treated worse than strangers," he said. "When outsiders come to the hospital they are shown the babies, but when we go there we are made to feel that we are intruding.

"The nurses won't even say good morning," he grumbled. "After all, we're just the parents."

In an effort to end the controversy over control of the Dionne quintuplets once and for all, Hon. David Croll Ontario minister of welfare, Monday tabled a motion in the legislature asking the guardianship of the babies be vested in his department, the Toronto Star said Monday.

This would give the government the right to name the guardians who will be responsible for the welfare of the children, the newspaper continues.

The Star adds: "This step is proposed by the government with a view to preventing any promoter from getting control of the babies, or exploiting them. When Chicago promoters attempted to take the babies to place them on exhibition, attorney general (Arthur W. Roebuck) took them from immediate control of their parents and had them placed under the guardianship of W. H. Alderson, Red Cross official; Kenneth Morrison, Callander general merchant; Dr. A. R. Dafoe and Oliver Dionne, grandfather of the quintuplets."

"In the ordinary course of events," the Star says, "this guardianship would automatically expire July 28, 1936, and the quintuplets would be returned to the control of their parents.

"According to the terms of a contract with Mr. and Mrs. Olivia Dionne, Leo Kervin, Callander businessman, and Leon Dionne, Olivia's brother, would then become managers for the babies, and would be empowered to sign contracts on their behalf. At present [illegible] and Leon Dionne are acting as managers of Mr. and Mrs Dionne on their vaudeville tour [illegible] the United States

Corticelli Thistlebloom Wool 18c

Workers Offer Pay-cut--Employer Balks

(Christian Science Monitor)

Lawrence, Mass., Feb. 28—When 800 shoe workers meet to ask their employer to reduce salaries in their plant 10 per cent, New Englanders sit up and take notice—but when the employer rushes to the meeting, jumps on the platform, refuses to accept the cut, and promises his employees an increase in wages—that's rare news!

Exactly that happened here last night. Nathan Brindis, owner and treasurer of the Milchen Shoe Company, balked a vote by his employees to accept a wage cut, which they hoped would lighten the Milchen Shoe Company's wage burden. Instead of accepting, he startled them right out of their seats. He told them business was so good they could expect a raise in pay in July.

"We're making money here in this plant and every hard-working American deserves a break!" Mr. Brindis told his employees, who sat bewildered at his rapid entrance into the hall where they had gathered. "As long as business is good I can see no reason for wage cuts. In fact you all deserve a raise and I'll see that you get it just as soon as the orders for our fall business come through," he declared. He wanted to continue but the first 10 rows jumped on the platform cheering. Women kissed him. Men thumped him on the back. Little Mr. Brindis, who came to the United States as a Russian emigrant in 1889 and begged a Fall River Shoe manufacturer for a job, was a hero.

Four years ago he opened the Milchen Shoe Company He makes women's shoes—7300 pairs a day. The NRA code doesn't interfere at all with his plant, he says. In fact things just couldn't be better.

He has always been on good terms with his employees, the Monitor learned. In the past two years the Milchen Shoe Company has given two salary increases amounting to 27 per cent.

Yesterday morning Mr. Brindis caught wind of the meeting scheduled for last night. He heard that the president of the American Shoe Workers Local No. 1, Stanley P. Mixon, had just returned from Washington. The purpose of the meeting, Mr. Mixon declared, was to lighten the employer's burden by offering employees co-operation. The Milchen Shoe Company employees decided to make a good example of themselves and were ready to accept a 10 per cent cut.

Mr Brindis hurried to Boston. He held a series of conferences with his buyers. Yes there would be an increase in orders for next fall. Then Mr. Brindis—who now proudly points to his status as an American citizen—rushed back to the employees' meeting just in time to prevent a vote.

"I'm very happy today," he said in an interview. I think every good American today should make all the concessions he can in these trying times. My employees were willing to help me and I am going to help them." New England certainly saw a New Deal in employer-employee relation last night.

The Major Problem

(National Home Monthly)

These are the days in which we are regaled or surfeited with economic theories—some ancient and some modern, some untried and some exploded, some original and some borrowed, some thriving and some still-born, some springing like Minerva, full-armed from the head of Jupitor, others old and decrepit no longer fitted for service in a changed world, some that promise better social conditions and more enduring prosperity, and others that if followed would surely lead to anarchy and moral ruin. It may be profitable to consider some of these theories at another time. Today it is more fitting that we should concern ourselves with a concrete problem—one that is growing to be more and more serious, and which must be solved if any of the economic theories now advanced can be rendered workable

The basic industry in Canada is agriculture. The basic product in agriculture is wheat. The basic need in the wheat industry is marketing. The basic condition of marketing is exchange of values. The basic condition of exchange is open trade. That is lacking at the present time. For four years we have deliberately closed the door. We have thereby encouraged countries which might have exchanged goods with us to grow their own grain. Now we are shut out—some people say forever. True, of late there has been an attempt to undo the mischief, but there has been no apparent success. An accidental shortage of food for stock in the United States made it possible to dispose of some low-grade products, but the granaries are still filled with the best the country ever produced. The figure has been given as 286,000,000 bushels. We do not say this is correct, but the exact figure is not essential. Should we sell 4,000,000 bushels a week from now

(Continued on back page)

Local & Personal

I, (on behalf of the Anglican Vestry) take this opportunity of thanking those who so kindly helped in any way whatsoever, with the play "The Absent Minded Bridegroom."
Rev A Wallis.

The Tofield Rangers are holding a dance in the Kingman hall on Friday March 15.

Miss M. Malcolm visited the city on Sunday.

We are glad to see Pat Moan back on the job after his recent illness

Mr. and Mrs. Wuetherick and Mr and Mrs Stan Yakabuski visited the city on Friday

Quite a few from town attended the final Intermediate hockey game at Bruce on Wednesday evening.

Mr Jacobs sr. of Tacoma is visiting at the Jacobs' home here

Two rinks skipped by Mrs Hammond and Mrs Rogers curled in Holden on Friday Mrs Hammond's rink captured first prize.

The personnel of the rinks Mrs. Rogers, Mrs Innes, Mrs Chapman, Mrs. Thomas, Mrs Hammond, Mrs. De Law, Mrs Letourneau, Miss Malcolm

We are glad to see Thelma Noland at her old place in the bank after her illness Miss Mateer who has been relieving at the bank returned to Edmonton Saturday

On Thursday afternoon last, at the home of Mrs N Scott, Mrs. M. McHeffey was pleasantly surprised with a shower in her honor The afternoon was spent playing games and talking Little Norma Scott, daintily dressed in pale yellow, presented Mrs. McHeffey her gifts in her dolls carriage Many lovely and useful gifts were received A delicious lunch was served by the hostess

We are sorry to hear that Mrs E. W Rogers is sick with an attack of bronchitis.

WELL-KNOWN OLD TIMER PASSES AWAY

Mrs Minnie Aruna Wood, widow of the late Mr W F. Wood of Tofield, passed away at her home here on Wednesday, March 6th. Mrs. Wood had been ill for some time

Mrs. Wood was well known through out the district, she having resided here for many years, living upon her farm just north of town About three years ago she took up residence in Tofield

Left to mourn her loss are two sons, Frank and Glenn of Tofield; three daughters, Mrs. M Blanchard of San Diego, Cal and Mrs M Hannan and Mrs N Spangler, both of Tofield

The funeral will be held at 2 30 p.m at the Tofield United Church on Friday, March 8th

WESTLOCK AUDIENCES HEAR TALENTED ARTIST

The concerts given by La Soha Pelmater Pincott, assisted by local artists on Tuesday evening at Hazel Bluff and Westlock on Wednesday evening were particularly well received by both audiences.

Mrs Pincott, who is a talented elocutionist and violinist excels in both branches of her art, being very generous with her encores She presented a most varied program which included many numbers both of a humorous and serious nature She handled a particularly heavy program exceptionally well. The following local artists assisted on the program: Mrs E. F Henderson, Mrs H Stanton, Rev. J. T Gordon and E W Stitchbury —Westlock Witness.

Mrs Pincott was the guest of Rev and Mrs Gordon during her stay in Westlock and reports a hearty welcome by them and an excellent reception and applause from both her audiences Mr and Mrs Gordon made her stay most pleasant

ALSO GOOD COMEDY

Admission: 15c., 20c., 30c.

Local Company Present Comedy In Fine Style

THE "ABSENT MINDED BRIDEGROOM" GREATLY ENJOYED BY TWO FULL HOUSES

On Friday and Saturday night of last week the Variety Theatre was well filled by good natured assemblies gathered to see the presentation of "The Absent Minded Bridegroom," a three act farce-comedy presented by a local company under the sponsorship of the Anglican Vestry

The play itself as well as the presentation was on the whole funnier than those presented during the past year or so, and there has been some excellent plays presented. The humor was easily observed, spontaneous and of course in good taste

As the Absent Minded Bridegroom, Timothy Shea, Bert Calvert made a great hit. Together with Patrick Rooney, (Wm. Lancaster) his friend, they made a great pair, and if their schemings did bring about embarrassing situations, their acting and characterization was first class

As a friend of the family and suitor for the hand of Kathleen O'Connor (Mrs Smith) W Duckfield as Fred Grady played an excellent part. Persuaded by Kathleen to masquerade as a notorious bandit's wife, "Ducky" kept up the fun for a considerable time As Kathleen O'Connor, Mrs. Smith was exceptionally good, delivering her lines splendidly. A bridegroom characterization just naturally calls for the appearance of a bride and Mrs Paul Thomas as Daphnay Rooney filled the part very well indeed In the battle of wits, both in line and action, the bride kept pace with the uncertain moves of the bridegroom

The pair of young lovers, a necessity to most comedy successes, was played by Reg McCarthy and Betty McCarthy The parts were well played and if the course of true lovers do not run smooth both on and off the stage, on the stage at least, there is always the happy ending Jimmy Rooney and Nora Shea found, after many upsets, the joy of seeing their hopes fulfilled.

As Tessie Connors, a maid, Charlotte Forster was especially good Her battle of wits with the detective was exceptionally good and Tessie did not exactly come off second best

A character part, splendidly even spectacularly performed was that of Slade the detective, taken by L. McLeahy. Larry played and looked the part to perfection. With traditional derby effectively worn, the detective barked his questions one after the other, and the more questions he asked the more mixed up he got. Anyway, at the end he made a more or less graceful exit. Realism was increased by the appearance of Marion Smith, Doris Coatta and Bruce Moody (Yennie, Yaney and Yonnie) supposed to be the children of the bandit

During the intervels between the acts Rev. Wallis rendered pianoforte solos.

STORY OF THE PLAY

Timothy Shea and Daphnay Rooney are going to be married. Both have been married before, and the coming marriage has to some extent been engineered by their two children, Nora Shea and Jimmy Rooney, who are in love. By marrying off their parents they hope to pave the way for their own wedding Timothy Shea is not very keen on getting married and enters into an agreement with his friend and neighbor, Patrick Rooney whereby Patrick will get him out of it Patrick suggests that Timothy contract Aphasia and consequently Timothy remembers nothing, and a wedding that day is impossible Daphnay Rooney is suspicious of a trick and Kathleen O'Connor is sure of it. Timothy says his name is Peter Peterson, a name chosen at random, but Peter Peterson is a notorious bandit with a wife and three children To call Timothy's bluff, Kathleen persuades Fred Grady to masquerade as Peterson's wife and bring in three children off the street Fred does this but picks up two white and one colored About this time Daphnay Rooney receives a telegram announcing the death of her uncle who left her half an acre of land in the centre of Chicago, and now she believes herself to be a millionaire This change of fortune causes Daphnay to believe Timothy should marry one within his own station in life and also causes Timothy to have a rapid recovery But the telegram has been mis-read and the half acre of land is really worthless In the meantime Tessie hoping to receive the reward for the capture of Peterson informs the police he is in the house, and Slade the detective comes to arrest him During During the mixup Nora and Jimmy quarrel and explanations are not forthcoming until Slade attempts to arrest first one then the other of the men whom he is informed is Peterson. At this point explanations are made and so the audience is led to believe the wedding of Timothy Shea and Daphnay Rooney goes forward

Tofield Intermediates Win Gas Line Hockey League

On Monday the Intermediates won the first game of their league finals, defeating Bruce by a score of five to four

Tofield opened the scoring in the first five minutes of play when McLaughlin scored Bruce rallied however and D Stanbaugh scored twice unassisted Tofield going into the second period with the score 2—1 against them Swift tied the score after about two minutes play on an assist from Burnett Bodinsky scored for Bruce and Burnett for Tofield on a pass from McLaughlin, the period ending with the score 3—3. In the third period Burnett put Tofield in the lead but D Stanbaugh evened it up again Less than a minute before the final bell Burnett scored the winning goal on a pass from McCauley. Bob Whyte refereed the game to the satisfaction of all

On Wednesday night the Tofield team won the Intermediate league championship by defeating Bruce 4-3 Due to a mistake on the part of the Bruce referee the game went into overtime

McCauley opened the scoring for Tofield in the first minute of play on a pass from Burnett Bruce evened it up in the second period but McCauley again put Tofield in the lead on assist from McLaughlin Tofield scored again but the referee over-ruled the goal judge and assistant referee, and the goal was not allowed. In the third period Bruce scored again and Burnett put Tofield into the lead Bruce then scored on another disputed goal and the game went into overtime McCauley scored the winning goal for Tofield

This is the twelfth win for Tofield out of 16 games 4 games being tied. Tofield has a total of 52 goals to their credit, 29 having been scored against them

You Can Help Very Much

◆

Publishing a weekly newspaper is rather a monotonous task. As the weeks roll round there is the same mechanical work to be done, the same searching for news to fill the columns and the same expended effort to procure sufficient advertising to make the venture a paying proposition.

But it is our work and as such, we must of course, keep going. Subscribers often help very much not only by paying up their subscription, but by giving us a few words of praise and encouragement and naturally, sometimes friendly criticism. We are always pleased to receive all three and there is no limit to the interest subscribers may take in this publication

The Tofield Mercury is a country weekly published in the interests of this district. We neither aspire to or expect a huge circulation, but hope we have and are able to maintain the interest of the majority of residents of this district. Allied to no party or creed, the occasional expressions of opinion are given for what they may be worth at the time they are given and are always intended to be constructive—not destructive.

Readers may and can help greatly by taking an interest in their Home Paper.

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

CONVULSIONS

Convulsions, or spasms, may arise from any one of many causes. Those conditions which lead to chill in an adult will often precipitate a convulsion in a young child. Convulsions not infrequently occur at the onset of a communicable disease, during childhood, as they do also when there is inflammation of the brain or its coverings—encephalitis and meningitis.

A convulsion strikes terror into the heart of those who witness it. It is well to remember that death rarely occurs during a convulsion, although the unconscious, twitching body which may turn blue appears to be in a helpless condition.

During the convulsion, the child should be protected from injury; a spoon placed between the teeth protects the tongue from biting. A hot mustard bath is indicated while waiting for the doctor; care should be taken not to burn the child.

Epilepsy, a disease which is marked by periods of unconsciousness accompanied by convulsions, usually begins early in life. The cause of epilepsy is unknown. Heridity plays a definite part. Some cases are associated with chronic alcoholism of the parents.

The typical attack of epilepsy is ushered in by an "aura", which is the occurrence of some particular sensation or feeling which precedes the attack and, as such, is recognized by the patient. The onset is sudden; consciousness is lost, the eyes roll upward, the face becomes purple and the body rigid for a few seconds; this is followed by jerky convulsive movements. The attack lasts for several minutes, after which the patient sleeps from exhaustion. During the attack, the patient should be protected from injury through falling, striking objects, or biting the tongue.

Jacksonian epilepsy is a form of the disease that is due to irritation of the brain following upon injury. The onset is seen in the twitching which begins at one particular point. Consciousness is not lost in most cases, and if it is lost, it happens late in the attack.

Petit mal is another form in which the loss of consciousness is momentary and there are no convulsions. The patient stops talking or doing whatever he was engaged in, the eyes stare and the face is pale. After a second or two, the patient resumes what he was doing, and possibly is somewhat dazed.

Epilepsy is usually incurable except where the ill effects of an injury may be corrected by surgery. Much can be accomplished through proper treatment. Nothing but harm results from spoiling the epileptic child through mistaken kindness and lack of training.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

WHAT NEXT IN WHEAT LINE

Most of the agronomists throughout the world know that Russia has made tremendous strides in plant breeding and that the group of scientific agriculturists in the Soviet Republics are leading the world in that respect. Now Niels E. Hansen, head of the Horticultural Department of South Dakota Agricultural College, who spent several months last summer in Russia, states that a group of able scientists at Omsk, Western Siberia, have actually achieved the production of a perennial wheat. For several years these men have worked to bring about the desired end and have been startled by the success resulting from a cross between a native grass known as Agropyron Elongatum, found on the high mountain steppes of the North Caucasus, with a wheat plant. There is much work to be done of course, before a practical perennial wheat with resistance to disease and ability to pro- ed, but the Soviet scientists are very hopeful, and Dr. Zyzin in charge of the work says he hopes to have some varieties ready for distribution within two years. If the objectives of Russian scientists are achieved, one seeding will last for many years, and there will be a revolutionary change in the industry of wheat production throughout the world.—[illegible] Alberta Wheat Pool Budget.

Canadian National Weekly News Items

Winnipeg, Man., March 4th.—"It is impossible for those in this part of the country to visualize the difficulties the railways had in clearing up their recent troubles in the mountains. It was a momentous task and a task well done to get it cleared up and traffic moving as soon as they did," stated A. E. Warren, vice-president of the Canadian National Railways, who has just returned from a western inspection trip.

Mr. Warren went all over the company facilities in British Columbia and closely inspected the work done in the mountain divisions. "I was particularly interested in the increased activity at Prince Rupert," declared Mr. Warren. A considerable amount of fish is moving and another ship was loaded from the grain elevator. The city is very optimistic over the proposed pulp mill.

"It looks as if this will be a great tourist year on the Pacific Coast and advance information is that Alaska will be a very popular trip. So encouraging are the reports that we are reconditioning our SS Prince Robert and will operate four special eleven-day trips to Skagway, taking in the old Russian capital of Sitka en route. We all look for a Pacific Coast travel season," said Mr. Warren.

Victoria, B.C., March 4th.—Six and one half feet of railroad ticket, the longest ever issued from the Canadian National Railways office here, was handed over the counter in rooms a few days ago.

Purchaser of the transportation was Edna Jaques (Mrs. W. E. Jamieson), well known to newspaper readers for her delightful verse, who is leaving on an extended lecture tour of Western Canada, under the auspices of the National Association of Canadian Clubs.

She will begin her talks at Pouce Coupe, in the Peace River district, and her itinerary will also include Edmonton, Saskatoon, Prince Albert, Winnipeg, Fort William, Regina, Moose Jaw, Calgary and many other places. She will speak over the air at Moose Jaw and Calgary. The title of her lecture will be "My Own Country in Poetry and Song."

"ZONATION" OF BARLEY AREAS

Progress is being made in the work of the sub-committee on Production and Breeding of the National Barley Committee. Some of the work of this committee has been in connection with the locating of areas in Western Canada considered to be particularly suitable for producing high quality malting barley.

Several hundred samples have been recently subjected to critical examination with a view to ascertaining the adaptability of this barley to areas where grown. These samples are also tested to determine their protein content and malting qualities.

On the basis of what these tests disclose, the committee will be able to define, at least tentatively, several districts in the Prairie Provinces where high-class malting barley can be produced. In this "zonation" of barley areas the malting companies of Canada are very much interested and are co-operating with the committee in every way possible.

It is hoped by the committee, when their research and experimental work has made further progress, to assist materially in adjusting the problem in connection with the production of cereals in Canada.

There is now a wide demand for high quality malting barley and it is known that it can be grown in Canada even better than in some other countries. At some of the leading shows in recent years, including the International Grain and Hay Show, Canadian exhibitors have carried off the highest awards.

EUROPEAN DEMAND FOR WHEAT STILL DORMANT

Dust storms in the United States southwestern wheat belt have caused apprehension over the winter wheat crop in that country. Two failures in successive years have been experienced (1933 and 1934) and a sudden face about in weather conditions is required to harvest even a fair crop in that region now. A dry windy March will mean ruination for that important crop.

Argentina's 1934 crop is low grade. That fact has been pretty well established. But all bullish news fails to register a scratch on the imperturbable Winnipeg Grain Exchange.

Grain dealers, watching Europe, notice that imports of wheat so far this crop year are even less than for the same period last year. This is most disappointing. The Orient has come gallantly to the rescue of the international wheat trade by taking considerably more wheat than during the same period last year.

Canada's exports last week were some better—about 3½ million bushels going overseas.—Alberta Wheat Pool Budget.

62-YEAR-OLD WOMAN GETS HER LIBERTY

Manchester, England, March 2.—Mrs. May Brownhill, 62-year-old woman who was condemned to die for the "mercy murder" of her imbecile son, was released today from the Strangeways prison.

Mrs. Brownhill was sentenced Dec. 1 to be hanged. A jury after five minutes deliberation found her guilty and recommended she be shown mercy. The judge ignored the recommendation but the jury's suggestion was caught up by sympathetic persons from all over the British Isles.

George Lansbury, veteran Labor leader was one of those who was most insistent that mercy should be shown in the case.

Two days after the sentence was passed the home office informed Lansbury there would be a reprieve.

The frail Leeds woman testified she gave her son Denis sedative tablets and gas because she feared an operation she faced might be fatal and deprive the helpless son of her attention. She had nursed him for 30 years.

After sentence was passed it was learned the elderly woman would have to undergo another operation before she can be restored to health.

The release was by order of the home secretary whose perogative it is not only to grant a reprieve from a death sentence but also to decide if a term of imprisonment should be served in its stead.

The poignant case of Mrs. Brownhill was one of the rare instances where reprieve was followed by a release. Likewise there is no parallel in recent years of the rapid sequence of events in which a person was sentenced to death one day and decision to act on the part of the home office followed two days later.

TO PROHIBIT HUNTING ON FENCED LAND

Prohibition of hunting on enclosed land without the consent of the owner is a feature of a bill to amend the Game Act, introduced into the legislature by Hon. F. S. Grisdale, minister of agriculture. The amending bill also provides that a person shall be deemed to have that consent unless he is notified by the owner to the contrary or unless the owner keeps affixed upon the land "No Shooting" notices in the manner set out in the Act.

Provision is also made for licensing of dealers in skins and pelts by prohibiting any dealing in skins and pelts by unlicensed persons.

The minister is empowered to cancel any license or permit issued under the Act to any person convicted of an offence thereunder.

The Dominion Experimental Station at Morden, Man., specializes in horticulture work, especially in the selections of varieties of fruits suitable to prairie conditions. Among the apples now doing well are twelve which were originated at the Central Experimental Farm at Ottawa, namely, Melba, Patricia, Joyce Galletta othra, Melvin, Mendel, Pinto Herald Atlas, Horace and Rupert.

FORTUNE TELLING—

IT IS not often that one comes across a reference to fortune telling in such a matter of fact manner as the despatch from London on Monday of this week. In this despatch it is stated that Lloyd's Ltd. has issued a $50,000.00 policy for a premium of $2,500.00 against Adolf Hitler ceasing to be ruler of Germany before March 31st. According to the story, a motorist gave a gypsy a lift. At the end of the journey the motorist said the gypsy told him, "there will be a dead man in your car by evening as sure as Hitler will be dead before the month is out. At dusk the man found the victim of a motor accident dying beside a road and the man died as the motorist hurried him to the hospital. The motorist said he then remembered the gypsy's Hitler warning and immediately took out the Lloyd's policy.

There are two remarkable things connected with the story. First that the first half of the gypsy's prophecy should be fulfilled and second that anyone would invest $2,500.00 on the prophecy of an unknown gypsy.

Fortune telling or divination is of very ancient origin. Curiously enough although men and women are endowed with reasoning powers there is an universal craving to peer into the future and search for signs indicative of future happenings. This procedure is of course outside of the realms of reason, but so great is the craving that there are few people who at some time or other have not given their attention to it. Degree of culture, nationality, race, color or creed makes no difference, the fortune teller is, in some guise or other, always to be found. Among savage and uncivilized peoples this craving to learn of the unknown result in many, sometimes harmless, sometimes cruel, customs. Among educated peoples it is just one thing among thousands of others that make for money changing. Readers will remember that some time ago, an international radio station had some kind of seer on the air, who for a dollar a throw would tell you anything you wanted to know. It is reported that thousands and thousands of dollars flowed into this station daily, and perhaps because of this, some Canadian radio stations began leasing time to "friendly advisors."

There is plenty of evidence that the art of divination and power of prophecy is not all humbug. That somewhere on the borderline of the known and unknown there is a connecting link that makes itself manifest with certain people at certain times. But at best the powers of divination are very elusive, capable of extreme variation and generally speaking unreliable. This is especially true when fortune telling is carried on as a profession and purely for the purpose of earning money. It is not reasonable to believe that any one person can offhand, foretell the future happenings for every Tom, Dick and Harry who makes a request either personally or by letter.

But this prophecy regarding Hitler is in a different class. Is it inspiration or nonsense? The man who laid down $2,500.00 must think there is something in it but, on the other hand Lloyd's Limited is not binding itself to pay out $50,000 for the fun of writing the cheque. With all due respects to the powers of prophecy believed to be enjoyed by gypsies, our idea of a good bet would be a 20 to 1 chance that Hitler will still be the official head of the German people on March 31st.

SAME KIND EVERYWHERE—

A STRANGER halting at a village spoke to one of the inhabitants.

"What kind of people live here?" he asked. "I have it in mind to settle here."

"What kind of people did you live with before?" enquired the villager.

"Oh, in the town I come from the people are mean and narrow."

"Then I'm sorry," said the villager, "but you'll find the same kind here."

The stranger drove on, and somewhat later another stranger accosted the villager and inquired about the people of the village.

"What kind of people did you live with before?" the villager again asked.

"The finest in the world," the stranger said, with a smile. "Only business reasons forced me to leave."

"Then," said the villager, "you'll find the same kind of people here."

A lady had a favorite pet dog which she called "Perchance."

"What a singular name for your beautiful pet," said a visitor, "and I would like to ask how you came to choose it."

"Oh," she drawled languidly, "it was named after Lord Byron's dog. You remember when he speaks of it and says, "Perchance my dog will howl."
—Youth's Comrades.

BREAD A LA FRANCAIS

A residence of five or six months in France has led me to one or two conclusions. We ought to eat more white bread in the United States—at least twice as much per capita as we are now eating. We will do this if we make the kind of bread they eat in France. A Frenchman or a French woman eats eight bushels of wheat in a year; an American four bushels. White bread is the diet of the Frenchman, the French woman, the French child. And the results of this constant white bread diet? The poorest paid Frenchman (hence the biggest bread eater) is the coal miner and the common soldier or poilu. Yet for feats of physical endurance under prolonged strain, these men hold the world's record. And as to the French woman with her generous diet of white bread, well, she is still famous for her svelte figure, her beauty, her charm and her grace.—Alberta Wheat Pool Budget

A WHEAT SHORTAGE IN THE FUTURE?

Sir Herbert Robson is chairman of the Baltic Exchange, president of the London Corn Trade Association and a partner in the firm of Ross T. Smythe & Co., London and Liverpool. For years he has been considered one of Britain's leading grain men.

Several years ago when the Earl of Crawford was speaking about wheat speculation in London, he said, "In my opinion, year in and year out, the gambling in Chicago tends to reduce the price to the consumer here. Isn't that so?" Sir Herbert Robson replied, "That is true."

That by way of introduction. On July 20th last, Sir Herbert issued a statement predicting that the great decrease in wheat production the world over, due to adverse climatical conditions in 1934 would result in the greater part of the excess wheat surplus disappearing during the crop year. The result of this, Sir Herbert suggested, should be to cause wheat prices gradually to rise.

On February 5th Sir Herbert, speaking at a luncheon of the Royal Empire Society, London, England, had this to say, "To-day there is a plethora of wheat in the world. In five or ten years' time there may be a shortage. I dare not think of the price we might have to pay for our bread if there were a real shortage of wheat and the whole movement of wheat controlled by governments. Sir Herbert said further that with the exception of Great Britain, Belgium and Holland, every European country had abnormally high bread prices with quality abnormally low. He gave the prices of pure wheaten bread in the leading countries based on the four-pound loaf as follows:— France 20c; Italy 20c; Germany [illegible]; Denmark 30c, Norway 34c; Spain 36c; Belgium 12c; Great Britain 12 to 13c.—Alberta Wheat Pool Budget

HOW TO MAKE MORE MONEY ON CHICKENS

Canadian dressed poultry are booming on the British market, the shipments for the month of January totalling no less than 871,000 pounds. Of that amount 684,000 were chickens, 140,000 pounds turkeys, and 47,000 ducklings. A comparison with the corresponding January of 1934, when only 50,850 pounds were exported, clearly demonstrates the decided advance in this industry. Chickens from three to four pounds in weight command a ready sale in the British Isles, and while reports from London indicate that the quality of the Canadian chickens being sent forward is pleasing the British consumer, Canadian experts are aware that the Canadian producers could obtain higher revenue for these chickens by still further improving the quality with little more trouble to themselves.

There is nothing new in this. It will be recollected that only 23 93 per cent of the chickens inspected in Canada in the fiscal year 1933-4 qualified for "A" grade. Many of the chickens which are now being exported in such large numbers to Great Britain also do not qualify for "A" grade, for the simple reason that they were not sufficiently fattened before being marketed. As the Chief Market Poultry Inspector points out, the matter of fattening birds, and thus increasing the producers' revenue, is entirely in the hands of the producers themselves. By a simple method of crate fattening on a mixture of finely ground home grains, there is no reason whatever why a very high percentage of the poultry marketed should not be made to qualify for grade Special and grade "A."

Six hundred bushels of potatoes shipped by the Boys' and Girls' potato club at Nominingue, P. Q. to Montreal sold at 18 cents per bag over the current market price because of their high quality and uniformity.

Three Major Canadian Problems

Tariff, agriculture and railway situation discussed by E. W. Beatty, K.C., LL.D., Chairman and President, Canadian Pacific Railway. Urges unified effort to solve questions threatening integrity of State.

A tariff structure based solely upon the actual economic needs of the country, a deeper appreciation of and a wider and more active application of sympathetically intelligent thought to agricultural problems, and the unification of Canadian railways for the purpose of operation, [illegible] the only means of overcoming present disastrous deficits created through public ownership, were the three major themes emphasized by E. W. Beatty, K.C., LL.D., Chairman and President, Canadian Pacific Railway, during the course of a forceful outline of this country's problems before the Regina Board of Trade on February [illegible]. Basing his appeal upon the firm foundation that a "service of individuals, individual groups, and sections of the country to the whole State is the only safe road for the future," Mr. Beatty appealed to the country at large to make this theme the dominating note in approach to the problems of the day.

E. W. BEATTY, K.C.
Chairman and President Canadian Pacific Ry.

[illegible]

In the light of this argument Mr. Beatty felt that he had every right to discuss the tariff, since the fact that the Canadian Pacific has always been decidedly susceptible to the effects of unstable tariff conditions. "Give me a tariff policy advantageous to the Canadian National Railways and I shall be quite content," he said.

Mr. Beatty was neither a believer in protection with no limit nor in free trade. He believed in the maximum of national wealth fairly distributed among the citizens. "The Canadian tariff should be one which would keep our internal and external trade [illegible]

Mr. Beatty illustrated his argument by citing the fact that Canada enjoyed a greater foreign commerce per capita than other [illegible]

[illegible] was what the farmer [illegible] and the expansion of livestock operations [illegible] that was what others could do to help Western agriculture. The capital invested in the farms of Canada [illegible] could not hope for the permanence of a level of wages too high above the earnings of labor on the land. Mr. Beatty expressed unwavering confidence that private business would find a road, now being eagerly sought, whereby it could render material assistance to agriculture.

Pointing out that the Canadian people pay for the railways [illegible] and the costs of Government, Mr. Beatty stated that the railway problem was in reality the problem of every individual citizen. "The cost to the public in freight charges of moving a ton a mile in Canada was as low as in any major country in the world. The people get the full advantage of these low rates but not [illegible] because taxes paid or to be paid to meet the annual deficits of the Canadian National Railways must be added to the actual freight charges. The real cost of transportation in Canada was not as cheap as it seemed [illegible] as it should be. Two current suggestions for improvement in operating efficiency were, first the adoption of modern equipment and secondly a drastic reduction in wages. Owing to the huge investment in existing equipment and the difficulty of finding capital to finance new equipment he indicated that progress along the lines of the first suggestion would of necessity be slow.

Mr. Beatty argued strongly against reduced wages, and pointed out that railway employees spent wages as well as earned them. He felt that railway as well as other wages were out of line with the returns to the farmers for their labor but emphasized his belief that the remedy lay in an increase in the farmers' earnings rather than a lowering of the standard of living among railway workers.

Another suggested solution was the proposal to increase freight rates. The freight rate trend was downward and Mr. Beatty would greatly regret to see an increase in rates until everything possible was done to eliminate waste.

The argument that there was no waste in transportation, and all that the country needed to do was to await the return of prosperity was not, Mr. Beatty considered, sound. Restoration of business to the high levels of 1928-1929 would not come as a gift of heaven, or overnight, but only as a result of national industry and thrift.

Mr. Beatty replied to arguments that under his unification proposal the Canadian Pacific would take over the assets of the Canadian National while the liabilities would be left to the Government.

"Unified management will do nothing of the kind. The physical assets of the Canadian National will remain the property of its owners. Similarly the liabilities of the Canadian National must remain the responsibility of the Government and the liabilities of the Canadian Pacific must remain that of its owners. However if the assets of both companies are administered as a unified [illegible] to meet their obligations."

The fact that only 2% of the excessive debt of the Canadian National Railways was due to [illegible]

[illegible] the ownership of the Canadian National Railways in the [illegible] of the public — since they could not possibly get rid of it — [illegible] devote our entire energy to [illegible] method of making the burden of this ownership as light as possible to the people of Canada.

[illegible] that as business men you would not wish to gamble with a burden of railway deficits which already threatens the financial stability of the nation when a reasonable alternative is available. I have suggested what seems to me to be the only adequate course — the unified management of the two major railway systems. The amount which can be saved annually — now, not in some bright day to come — was calculated by officers of the Canadian Pacific Railway, and their figures tallied closely with those given to the Royal Commission by the late Sir Henry Thornton and by Mr. S. J. Fairweather of the Canadian National Railways. My estimate was based on the traffic conditions of 1930, an average traffic year, and on that basis I put the figure at $75,000,000. Sir Henry Thornton, who opposed my plan, gave his estimate as $60,000,000 and Mr. Fairweather suggested $56,000,000 for a year of normal traffic. In justice to Mr. Fairweather I must state that he has since said that he told the Commission that his estimate could not be realized. I believed then and believe now that mine can be."

Mr. Beatty said his proposal had met with much criticism — that no one group of men could properly administer the unified railways, that he was talking of setting up a great monopoly, that rates might be raised, and that he proposed to throw thousands of men out of work. Mr. Beatty disposed of these criticisms by pointing to the efficiency and loyalty of the employees of both railways, to the supervisory body set up by the Canadian Government to control railway rates and in connection with labor, solemnly pledged himself to do everything he could within his power to prevent such a development. Savings in this regard would be made gradually, wisely and considerately and without hardship to those now dependent on railway employment.

He said: "It is indeed my hope and belief that the methods which I suggest will operate to prevent an even more disastrous period of low wages and unemployment than that through which we are passing. Surely the labor leaders of this country are the intelligent men that I have always found them to be and will tell their constituents that waste of the country's wealth on useless services can damage no one more certainly and more severely than those who depend on their labor for their living. I venture the prophecy that as events develop and the increased thought being given to the subject produces its effect, railway employees generally and particularly the recognized representatives of organized labor which forms such a considerable part of railway staffs will not only recognize the inevitability of, but will come to urge rather than to oppose some such measure as I have suggested as in their own best interest."

Stressing that the report of the recent Royal Commission stated that some of the Commissioners would have preferred a plan which would take the Government of Canada out of the railway business and that the Canadian Pacific was not a bankrupt undertaking, but on the other hand a thoroughly solvent one, Mr. Beatty went on to say:

"What I have suggested, and suggest today is that we should start to divide the net earnings of the unified properties to give to each group of owners the net earnings which would have resulted if each had operated their own railway, together with a fair share of the savings resulting from unification. There is much misunderstanding in this regard. Many have confused the total net earnings after unification with the savings from unification. The earning power of the two separate systems is a matter of record. The increased earning power of the combined properties arising from unification is another matter. My plan contemplates the division of such increased earnings on a fair basis. This is a matter which can only be settled by negotiations between the interested parties but obviously the shareholders of the Canadian Pacific would have to concede to the Government at least one-half of the net gain resulting from unified management. Those who have said the Canadian Pacific would claim the lion's share have either misunderstood my proposal or purposely misrepresented it."

In conclusion Mr. Beatty again pointed out that if such a plan had been adopted 20 years ago, or even 15 years ago, the national debt of the country would be hundreds of millions of dollars less than it was today. "You and your children will pay it. Are you in favor of piling it up?"

CANADIAN EGG INCUBATOR CAPACITY

Few people realize the extent of the capacity of commercial egg incubators in Canada. It is estimated to be between 8,000,000 to 9,000000 eggs. These incubators are filled three or four times, sometimes oftener, during the season. At least 36,000,000 eggs, or the equivalent of 100,000 cases, or 220 cars of eggs, are withdrawn each spring of an average year for use in commercial hatcheries alone, not to mention the large quantity used in smaller incubators and under hens at home. This is a development of the last few years, and, as the Dominion Department of Agriculture Egg and Poultry Market Review points out, it is just possible that the return of at least one setting of all incubators to general market channels during the months of late May, June, and early July has more effect than is generally recognized in disturbing the market at that time, causing a slow unsteady situation and occasioning more movement into storage in July than would otherwise be the case.

CANADIAN SHEEP AND WOOL.

The number of sheep in Canada since 1929, according to the figures of the Imperial Economic Committee, was 3,639,000 in 1929; 3,609000 in 1930, 3,617,000 in 1932; 3,330000 in 1933 and 3,424,000 in 1934. The estimated wool production (greasy basis) was 20 2 million pounds in 1929; 21.0 million pounds in 1930; 20.4 million pounds in 1931; 20.6 million pounds in 1932; 19.2 million pounds in 1933, and a provisional estimate for 1934 was 19 4 million pounds

The fourth shipment of dairy cattle exported from British Columbia to the Orient this winter consisted of 26 head of Ayrshire heifers shipped February 1 to a dairy in Hong Kong

New Zealand was the principal source of butter imported into the United Kingdom during 1934, supplanting Denmark as the premier exporter

(Continued from front page)

till harvest we should yet have some in store. Some weeks we cannot hope for any such sale as that.

It is beyond our wisdom to say which is better to hang on to the surplus in the hope of better days or dump a lot on the market at greatly reduced prices in hope of clearing the way for next year's supply. That is the problem for Mr. McFarland, the government, and the farmers to settle.

Yet it is a major problem. There is nothing to be gained by side-tracking it in discussing general economic theories. They need to be discussed without doubt but just now they are secondary. The first problem for Canada is the restoration of world trade. This means the re-writing of the tariff schedule. Is our government prepared to re-write it? Is Mr. Stevens prepared? Is the opposition?

MUNICIPAL BANK IS NEW AMBITION OF VANCOUVER COUNCIL

Vancouver, Feb. 26.—Mayor G. G. McGeer's proposal that the city seek statutory authority to establish a municipal bank was endorsed by city council Monday. The resolution provides for the city to seek a charter amendment authorizing it to ask the Dominion government for a municipal bank charter.

An amendment, sponsored by Alderman A. G. Harvey and W. H. Lembke, urging postponement of action pending a report from Thomas Bradshaw of Toronto who is here to make an investigation into the city's financial and taxation problems, was defeated.

Opposing the resolution Alderman Harvey said:

"I can't see why, if our financial position is as bad as it has been described, the city should go into the banking business. If a bankrupt person were to go into the banking business we would be amazed; but if a leader of a government or municipality proposes such a plan we regard him as a great leader and reformer."

Alderman H. D. Wilson suggested one of the first steps to be considered was the security of the depositors.

"What?" exclaimed Alderman Harvey. "Why should you consider them?"

"Well," he concluded, "We will all be bank directors. I suppose that's something."

CHIPMAN GOALIE SUFFERS INJURY

Chipman, March 1.—A general fist fight and a trip to the Lamont hospital for the Chipman goalie marked a hard-fought exhibition hockey game here Thursday between the local "ex-pros" and Ross Creek, ending with a 7—3 win for the "ex-pros."

Chipman ran in two tallies in the first 10 minutes of play. Floyd McLoughlin lifted one catching Bill Calvert under the left eye cutting a two inch gash. Time was taken out while Magnuk donned the pads and Calvert left for the hospital to have his eye attended to.

With only thirty seconds to go in the final period Wiltson and McComb tangled beside the Chipman net and a free-for-all resulted.

Chipman— Calvert, Magnuk, McComb, Kulha, Shulba, Grant Foster, Peterkin, Motyka, Gordon Foster and H. Weatherich and Kudryk.

Ross Creek—Angle, Peterson, Wiltson, F. McLoughlin, G. McLoughlin, Shampeau, A. McLoughlin, G. McLaughlin, J. McLoughlin.

Referee—L. Weatherich.

FOR SALE— Used Bull Dog fanning mill —good condition. A bargain. Also Viking fanning mills. Apply M. C. Hammond.

MRS. A. W. MACBETH WINS AT TOFIELD

Two rinks of women curlers from Edmonton invaded Tofield curling circles on Friday and took the honors of the day. Mrs. A. W. Macbeth got away to a good start against Mrs. Biernes and had such a lead there was never any doubt as to the final outcome.

Mrs. P. Quesnel of Edmonton played Mrs. Hammond in a closely fought game that went to an extra end, the visitors winning by the odd point.

Personnel—Mrs. A. W. Macbeth, Mrs. E. G. Warham, Mrs. W. L. Freeman and Mrs. A. C. Flood.

Mrs. Biernes, Mrs. Abbott, Mrs. McLaughlin and Mrs. Reher.

Mrs. P. Quesnel, Mrs. W. R. Clark, Mrs. W. Robinson and Mrs. L. C. McIntyre.

Mrs. Hammond, Mrs. F. F. Law, Mrs. J. W. Chapman and Miss M. Malcolm.

Following the games the visitors were entertained at dinner by the members of the club.

Pilchard oil fed to poultry at the rate of two per cent of the feed mixture during the winter at the Dominion Experimental Station at Scott, Sask., eliminated leg weakness.

HOUSE FURNISHING WEEK

DRAPERIES

Added interest is furnished by new large mesh designs in heavier weight nets, by brightly colored dots and figures plain scrims and charming futuristic effects in Rayon Nets

Country Teams Have Hockey Tournament

A truly animated scene was witnessed at the Tofield skating rink on Tuesday evening of this week when country and town teams intermingled in a hockey tournament.

At one time, between the first and second game there must have been at least forty players on the comparatively small sheet of ice, all with a stick and vigorously chasing a puck, apparently all having a wonderful time.

The programme opened with a game between Ministic and Tofield resulting in a win for the All Stars by a score of 4—0. It should perhaps be said that the All Stars are a group of fellows some of whom ordinarily do not play much organized hockey. We do not know who did the scoring in this game.

The second game was a closely fought contest between Ketchamoot and Lakeshore, Ketchamoot winning by the score of 2—0. The goals came after the game was well advanced Ingram scoring two and Sears one. In spite of the score the play was fairly even. We noticed Roy Lee for Ketchamoot and Harold Weatherill for Lakeshore, both players being members of the Tofield senior team of the early 1920's. Roy can still stickhandle a puck through a forest of legs and sticks and Harold showed surprising speed and stick handling.

Ketchamoot then met Hastings Lake in the third game, beating their opponents from the west 3—1. Jim Redel made the first and only score for Hastings Lake and was a constant threat throughout the game. Nice combination between Sears and Lee brought about Ketchamoot's three goals, Lee getting two and Sears one.

The final tournament game between Ketchamoot and All Stars was played to a tie, the two teams were evenly matched and had time permitted overtime play, the game could easily have gone to either side.

The final game was an exhibition game between two Tofield teams. It was billed as an intermediate vs. senior game but was really two teams with seniors and intermediates intermingled. One side won and the other lost—it really does not matter which—the players had their fun and perhaps, the spectators their thrills.

It appeared to be a good, lively and pleasant evening for both players and spectators, and while the first of its kind, will probably not be the last.

A moccasin dance with the Tofield Rangers supplying the music brought the event to a close.

TOFIELD CURLERS WIN

Two rinks from Alberta Ave. club skipped by Roy Kingsbury and F. Nicholls journeyed to Tofield Monday and each took the low end of the score in closely fought games. Kingsbury playing Dr. F. F. Law, forced a 13-end game but the local skip got the winning counter, the final score being 10—9. Nicholls playing Hammond, was two down coming to the final end but could only squeeze in a single counter and lost 12—11.

Personnel of the teams: Roy Kingsbury, H. Layton, R. Vanderburg, L. G. Beecroft; Dr. F. F. Law, A. A. Beirnes, A. C. Dodds, J. O. A. Letourneau.

F. Nicholls, R. Rae, J. McFarland, E. East; M. C. Hammond, A. E. Calvert, J. G. Jobb, A. B. Clutterham.

Tofield Curling Club Presented With Trophy

On Monday last, two lady curling rinks skipped by Mrs. Hammond, and Mrs. Chapman journeyed to Edmonton to curl with rinks of the Granite Curling club. While there, they were entertained to tea by the Granite Curling Club and Mrs. Munshaw presented the Tofield Club with a Challenge cup, kindly donated by Mrs. W. E. Clark. Mrs. Calvert responded on behalf of the Tofield club. This cup is to be competed for by out-of-town clubs. The personnel of the rinks that went, Mrs. Hammond, Mrs. (Dr.) Law, Mrs. Letourneau, Mrs. Beirnes, Mrs. Chapman, Mrs. Calvert, Mrs. Innes, Mrs. Firth. Both teams won their games.

On Tuesday evening a rink from Chipman skipped by Mrs. Nicholls of Chipman curled Mrs. Clutterham at the Tofield rink. Mrs. Nicholls took the long end of the score. The personnel of the rinks: Mrs. Nicholls, Mrs. Rollin, Mrs. Hennechuk, Mrs. Grogan; Mrs. Clutterham, Mrs. Jobb, Mrs. Bardon, Mrs. L. W. Smith.

The visiting rink was entertained to lunch by the local club.

The Ladies' Club is having a three day jitney draw, which will finish on Saturday with masquerade.

MRS. WIGGS of the CABBAGE PATCH to be SHOWN NEXT WEDNESDAY

For Wednesday, March 20th, the Purdy Road Shows are presenting an unusually interesting all talking feature, "Mrs. Wiggs of the Cabbage Patch." Few people will need a description of this well known picture adapted from the book of the same name. Characters that you have learned to love and admire are portrayed by brilliant film stars, and a really enjoyable evening is assured to those attending this performance. Remember the date, Wednesday, March 20th at the Variety Theatre. No increase in prices, the admission is 30c, 20c, and 15c.

St. Patrick's Concert

Sponsored by the Tofield C.W.L., a St. Patrick's Day concert, featuring visiting and local artistes will be held at the Variety Theatre, Monday, March 18th at 8:30 p.m.

Miss Olive Brosseau, celebrated violinist will be present and will render several numbers. Miss Brosseau has played at Tofield on one other occasion and thrilled and delighted her audience with her masterly renditions. A favorite radio performer, Miss Brosseau's playing has a depth of expression only reached by masters of the violin. Miss Brosseau will be accompanied by Mrs. McQuaig, a talented pianist. Madeline Turgeon, well known junior radio star will also be present and will delight the audience with her numbers.

The local artistes will include Mrs. Pincott, elocutionist. It is needless for us to say much regarding Mrs. Pincott's elocutionary work. She has been among us for many years and it is true to say her work has never been surpassed by visiting professional artistes. The Misses Faye, Lola and Cleo Wilson will add to the charm of the programme with vocal and instrumental numbers. The Misses Wilson are well known and favored as entertainers. Mrs. Fontaine, Mr. Broughton, and Mr. C. Stutzman, soloists, will render pleasing vocal numbers and Rev. Wallis, talented pianist, will render instrumental numbers. The Tofield Girls' Tap Dancing Team will give a demonstration of this popular form of dancing.

The programme is full and complete and an enjoyable evening is assured for those attending.

12 YEAR OLD DAUGHTER OF MR. AND MRS. HOHN OF DODDS PASSES AWAY

The death occurred early this week, of Jean Elizabeth Hohn, 12 year old, daughter of Mr. and Mrs. Hohn of Dodds. The funeral was held on Wednesday, Rev. Wallis of Tofield officiating.

There were a large number of friends present, the service being held in the church at Roundhill. The choir sang "Some Day We Will Understand," and a trio sang "Will The Circle Be Unbroken." Rev. Wallis gave a suitable address. Interment was made at Roundhill cemetery.

COMMUNICATION

NATIONAL CREDIT

What is wrong with the present system?

Banks have the privilege of loaning currency and credit. Every loan made by the bank creates a debt which cannot be paid except by the exchange of goods. There is created an actual medium of exchange to cover the loan, but not to cover the interest.

Further as bank statistics prove that on the average only 10 per cent of currency is drawn out of the bank on each loan, it is quite possible for a bank to loan $10,000.00 for each $1000.00 of currency actually in existence so that at the end of the loan period the debtors would owe at 3 per cent interest $2300.00 which could not be paid back except by the exchange of goods.

This unpaid debt has multiplied to the extent that at the present time banks are restricting credit and as there are less loans being made than is being paid off, the currency actually in circulation is soon withdrawn. Creating by its scarcity an artificial value of the dollar and depreciating the value of all property.

At the present time the flow of credit is from productive channels into non-productive.

What is needed: A medium of exchange having no or very little earning power in itself. That is not given an artificial value by its scarcity in circulation, or by outside influences as Wall St. or London money markets.

A medium of exchange that will permit an equitable exchange of the products of one form of labor for another.

A currency controlled so that its own actual earning power is reduced to the extent that the flow of credit will be towards productive channels.

A method of putting currency in circulation so that there will be enough actually in circulation to cover both principal and interest at all times.

A medium of exchange controlled so that a just price is set up for the products of Canada consumed in Can., and a fair exchange for the country's surplus for the products of other countries.

A way of putting into circulation so as to increase the buying power of the people as a whole and also a National Dividend or share in the whole production of the people to those who are not able to contribute in production, by way of old age pensions, disability pensions and State Health Schemes.

A National Bank

In two branches—International Branch

Handling all debits and credits with other nations.

An issue of gold certificates for use only in International business backed by all the gold resources of the country.

A law passed making all gold subject to the governments call and a survey taken of all gold in Canada.

Note: So long as other nations use a gold base as a restriction on the amount of money issued we must put in operation a scheme of National Credit which they will refuse to accept and force ourselves into a position where we are either isolated from the rest of the world or forced to a Barter system as Russia.

Domestic branch—An issue of currency backed by all the created wealth of the country.

Loaned to Gov't paying off bonds and to the present banking system at a rate permitting a handling charge and limiting their loans to the actual amount of currency in their possession. A further issue of currency to cover total interest charged the public either their elected representative or direct and paid out in Old age pensions, Disability Pensions and Health Schemes. These bills could be issued as a promise to pay in gold certificates and a rate of exchange set by Parliament and varying as desired.

Or as up to a percentage of the total created wealth of the country, and a further issue each year, by survey taken each year, and a further issue at the same percentage on the increased value through rise in values of property and production and a fixed rate of exchange.

Or by exchange rate set by permitting sale of gold certificates on exchanges in Canada.

A National Credit Plan along these lines would accomplish:

1 Through inflation up to the rate of exchange set, increase the value of production.

2 Through credit now tied up in Gov't financing being released [illegible]

(Continued on back page)

Local & Personal

We hope the person who purchased and lost a Charity Sweepstake ticket makes his fortune, but should he require the ticket a good place to inquire would be the Mercury office.

The Tofield High School Students' Union wishes to thank the public for their splendid attendance at the concert held in the Variety Theatre last Friday. Thanks are also extended to the various members of the Executive, students and any others who helped to make the concert a success.

Mr. Frank Dunn spent the greater part of the week attending the Ford School. He also attended the banquet.

At a meeting held in the municipal hall on Monday, March 4th, to discuss the question of economics it was decided to organize a Tofield Study Club and the following officers were elected: President, A. J. Hargis; Secretary, A. P. Moan. Geo. Ab[illegible] addressed the meeting taking as his subject "What is Money." This led to a very lively discussion. The next meeting will be held Monday March 18, at 8 p.m.

Mrs. E[illegible] and Mrs. Bagnall are delegates to the Annual W. A. Convention in Edmonton. Primate of Canada will speak on Restoration fund.

A dance is billed to be held at the Variety Theatre, Tofield, on Friday, March 15th. The music will be by the Edmonton Colored Syncopators. Admission 50c per couple. Ladies free.

Geo. B. Brace is having new windows installed in his store block. Contractors from Camrose are doing the work.

McLAUGHLIN—HILL

On Tuesday evening 12th of March, Miss Ruth McLaughlin, eldest daughter of Mr. and Mrs. George McLaughlin was united in marriage to Mr. Edward D. Hill, Tofield.

The wedding ceremony took place at the home of the bride and before the immediate members of the family. The Rev. D. K. Allan officiated.

The young married couple are very popular and highly respected in Tofield and District.

The best wishes of all go with them. Mr. and Mrs. Ed. Hill will reside in Tofield.

CARD OF THANKS

We wish to take this opportunity of expressing our thanks to those kind friends who by their practical help and expressions of sympathy assisted us in our recent sad bereavement. To those who sent floral offerings we are especially grateful.

The Wood Family

KETCHAMOOT

Born— To Mr. and Mrs. Ralph Barnes, on Thursday, March 6, a son.

Miss Helen Manning spent the week end at the home of her parents in Edmonton.

Miss Lillian S[illegible] was able to return home Thursday from an Edmonton hospital.

Mr. and Mrs. Roy Lee and daughter visited at the home of Mr. Lee's parents, Mr. and Mrs. Wm. Lee, Sunday afternoon.

Miss Helen Schultz took in the concert in Tofield Friday evening, remaining the rest of the night with her friend Lois Thompson.

Mrs. L[illegible] Carlisle entertained the Ladies' Aid at her home Thursday afternoon of last week. Mrs. Whillans conducted the meeting in the absence of the president Mrs. McCowan. A goodly number of members and visitors were present. A delicious lunch was served by the hostess and a pleasant afternoon was spent.

Mr. G. W. Sears and son Charley, were passengers to Edmonton Friday.

Mr. Sam Stirret met with a painful accident one day last week, while at one of the garages in Tofield he struck his head on a bolt. Several stitches had to be put in by Dr. Law.

Mrs. Torrie organized a junior U. F. A. at the Sear's home Monday evening, 18 young people being present. Stanley Sears was elected president; Allen Harrison vice president; Miss Margaret Mitchell secretary. Directors, Ethel Coombes, Irma Shupe and James Ingram; Program Committee, Charley Sears, Mildred Ingram, Wendal Wyley.

Splendid Program Presented by Students' Union

On Friday evening, last, at the Variety Theatre, an excellent concert sponsored by the Tofield High School Students' Union was staged. The concert given entirely by members of the Union was ably presented and each number was heartily applauded by the audience.

The program opened with O Canada after which two choruses "The Soldiers' Chorus" and "The Ash Grove" were presented by the students. These choruses were directed by Mr. Broughton and Isabel Robinson was the accompanist. Mr. Thomas then sang a solo, "The Gypsy Trail" which was enjoyed greatly.

The next item was purely a local one, a one act play written by Bill McCauley and directed by Gwen Firth and Bill McCauley. This play gave the audience plenty of good laughs and received hearty applause. A vocal duet was then given by Faye and Cleo Wilson, "The Georgia Lullaby," which was well received. Then we were entertained by a visit from Koran. Some of the audience were much surprised when Koran answered their questions, but all questions were taken in good part and Koran (Don McLaughlin) received a good hand from the crowd. Four of the High School girls then sang a quartet, "Out of the Dusk to You" which was very well done. The next number, a skit, directed by Edythe Barker was one of the evening's best. [illegible] Jessie Munro made an exceptionally fine maid of the 'nineties and Ken Munro a very studious and stern parent. The words were sung by Don Ellerton. Lola Wilson then gave a reading "The Song of Brotherhood."

A folk dance followed this item danced by a number of high school girls directed by Mrs. Thomas. The costumes for this dance were very pretty and the dance was done very gracefully. An instrumental duet, "The Russian Waltz" was the next item played by Peter and Henry F[illegible]. Peter played the violin and Henry accompanied him on the guitar.

At this time Lola Wilson, president of the Union, thanked the audience for their support and also thanked all those who helped to make the concert a success. The Union presented Mrs. Thomas a bouquet of carnations and Mr. Broughton a book in appreciation for what they had done. Betty McCarthy then sang "Today and Tomorrow." The play "The Lost

(Continued on back page)

Funeral of Mrs. M. A. Wood

The funeral of Mrs. M. A. Wood was held on Friday last. Service was held at the United Church where a very large number of relatives and friends assembled to pay their last respects to the esteemed departed. Rev. D. K. Allan delivered a comforting address and favorite hymns of the departed were sung. Interment was made in the Tofield cemetery. Floral offerings were numerous and beautiful and included United Church Ladies' Aid; Staff of the Alberta Government Telephones, Mr. and Mrs. Glover and family; Mr. and Mrs. E. R. Kallal; Mr. and Mrs. Noland and family; Mr. and Mrs. C. Kallal and family, Mr. and Mrs. W. McIntyre; Mr. and Mrs. Jobb, Mr. and Mrs. P. McAlister and family, Mr. and Mrs. Billman, Mr. and Mrs. J. D. Hannan; Mr. and Mrs. Gonglein and family. Mrs. Paradis, Ruth and Ted; The Beaudette Family, Reg., Alice and Gertie, Mrs. Bethel and family; D. B. Mullins and Donald. Mr. Duckfield and Mr. Bellamy, Mr. and Mrs. Jim Carver, Esther and Joe; Iva and Bill, Horace, Nina and Ardie, Aunt Ella, Maggie, Lloyd, Mr. Mary and John.

Admission: Adults 35c., Students 25c., Children 15c

In a Way of Speaking

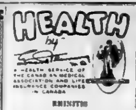
In a way of speaking, the buying public owns every retail store in town. It pays the rents and salaries and all the other costs of our stores in our town. It informs the owners of these stores what to buy and what to sell And it demands from retailers a communication service—meaning news of what retailers have in stock, and what their prices are And of course it does most of its business with those retailers who report to it regularly and fully—by the agency of advertisements in our newspaper. And if any retailer says—in effect—"I'll not give you—the real owners of my business—any information about my business," then the buying public says—in effect—"Right you are! As for us, we shall go in largest numbers to those retailers who communicate to us regularly and adequately via the medium of our local newspaper."

This way of putting it is not just fanciful—it is a stern fact. Retailers who decline to maintain communication via means of the newspaper which it reads lose business to those who are faithfully communicative

Some retail business is languishing today—unnecessarily Its attitude to the public is wrong. It says—in effect—to the public "You come and find us," and the public attitude is: "You tell us about your business and your merchandise You are our employee Report to us regularly and adequately on how you are serving us. If you convince us that you are our faithfull and efficient servant, we will keep on employing you, and will pay you well."

The way of making a business grow and making it healthy is as plain as the nose on one's face. It is the way of maintaining a steady communication relationship with one's employers— via the one effective and economical agency—the advertising columns in the

THE MERCURY



HEALTH
by
A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

RHINITIS

One of the most common and, consequently, best known afflictions of mankind is acute rhinitis or cold in the head Unfortunately the lining membrane of the nose may suffer not only from acute inflamation, rhinitis, but also from a chronic inflamatory state which is generally known as chronic nasal catarrh.

During the course of a cold in the head, the blood vessels of the nose are swollen and the glands pour out an excess of secretion. Upon recovery, all this subsides and the interior of the nose returns to its normal state If, however, one cold follows upon another so that there is no time for recovery between attacks, the lining membrane of the nose with its blood vessels and glands, becomes permanently altered. It is obvious that the proper care of colds prevents catarrh

The normal healthy mucous membrane of the nose, is bathed in fluid which is so thin and watery that as it flows back into the throat it is unconsciously swallowed with the saliva In catarrh, the fluid is changed into a sticky substance which either remains in the nose until it is blown out, or else accumulates in the back of the throat until it is coughed out, hence the constant "hawking" of the victim of catarrh.

There are other factors which predispose to the development of catarrh, such as the inhalation of dust and irritating vapours associated with certain occupations; adenoids, or other conditions which obstruct the nose, such as a defect in the structure.

Germs which have been coughed or sneezed out by someone close at hand are liable to be breathed in by another person The flushing of the nose with the normal secretion washes these germs along so rapidly that they have not sufficient time to multiply and set up trouble The reverse is true with the altered sticky secretions of nasal catarrh which hold the germs instead of washing them along, thus providing the opportunity for the germs to grow, which they do very rapidly.

Other symptoms are distressing, such as inability to breathe through the nose at night, interference with taste, and offensiveness of the breath. It cannot be overlooked that inflamation tends to spread so that sinuses and ears may become involved

The first step in treatment is to correct any defect in the structure of the nose, and to remove any obstruction, such as adenoids or other growth. Much comfort can be gained and many complications avoided through keeping the nose clear by use of a spray (not a douche) of properly prepared salt solutions Every case requires medical care to determine and correct the underlying cause.

Questions concerning health, addressed to Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

Editors note:—

HIGHWAY MEDICAL SOCIETY MEET

Highway No. 13 Medical Society held their regular monthly meeting on March 6.

The members present were guests at the Windsor hotel for dinner where they enjoyed apart from the splendid and elaborate dinner provided, a number of readings by Mrs. H. Freeman, which were enjoyed, also artistic tap dancing by the Campbell sisters of Camrose, which was also very much enjoyed and appreciated.

The Clinical aspect was held in the class room of St. Mary's Hospital where Dr. L. M. Rogers led a discussion on Spinal Anaesthesia, which brought forth very considerable response from all those present and much general consideration of the merits of this newer form of Anaesthesia. Dr Lamb, local member of the College of Physicians and Surgeons gave a resume of the activities of the College for 1934 and to date, thereby enlightening the members as to the undertakings and accomplishments of the Society. This also brought about very considerable comment and suggestions and a general round table discussion. Other matters of general interest received the attention of the meeting.

The next meeting will be held in Wetaskiwin.

Exports of Canadian dressed poultry to the British Market have been larger than ever since the recent amendments to the Dressed Poultry Regulations pertaining to the individual bird marking and compulsory inspection of poultry became the law on November 10, 1934.

COREY FORD and ALISTAIR McBAIN ELECTED TO FISH LIARS CLUB

(Condensed from an article in Colliers Magazine

We were elected to the Fish Liars Club in Fairbanks, Alaska. The ceremony was held on the sidewalk outside the Model Restaurant, where we had just purchased a dead grayling to use in a few photographs. In vain we tried to explain that we were not in the habit of buying fish for photographs, that we had caught plenty of grayling ourselves, that unfortunately we just happened to forget to put any film in our camera—wrote Corey Ford and Alistair McBain in a recent issue of Colliers Messrs Ford and McBain are both very prominent in the American magazine field and are also devoted fishermen The secretary of the Fish Liars Club interrupted us solemnly, cast a brief but significant glance at his fellow members gathered about us on the sidewalk, and cleared his throat.

"It gives me great pleasure," he said, tucking our membership cards in the bands of our fishing hats, "to congratulate you upon your unanimous election to the Fish Liars Club."

To be sure, there is nothing very exclusive about the Ancient Order of Fish Liars Any angler can qualify. The organization bars neither race or color nor creed. It draws no fishing lines

There are no regular meetings of the Fish Liars Club They are held any time, any place, on the bank of a stream, in the Pullman smoker, in the parlor, wherever there are two or more fishermen gathered together.

For example, as self-appointed field secretaries of the organization, we made a careful survey this past summer of some half-dozen of the famous fishing lakes that are dotted across Canada, strung like glassy beads along the tiny thread of the C.N.R from Montreal to Vancouver.

In the course of our spectacular sea top flight from coast to coast, we worked the famous waters of Lake Nipigon for speckled trout, we tried for muskellunge and great northern pike in Western Ontario, we fished for natives and Dolly Varden in Jasper park in Alberta, for rainbow and makinaw in Stuart Lake in British Columbia for steelhead trout and coho and tyee salmon on Vancouver Island, for grayling in Alaska.

Wherever we went, we found a local lodge of the Fish Liars Club in open and violent session.

Our first official meeting was held at Mud River Bridge, in Ontario, Lake Nipigon Chapter, Bill Bruce Lodge No. 1. It was pouring rain and had been for forty days and nights, flooding the streams. "You ought to be here when conditions are good," said Bill. "Six to eight pounders are common," and the first meeting of the Fish Liars Club ended.

Mike Ament, of the Hudson, Ontario Chapter, called the second meeting. "If you want muskies, we'll show you more muskies around here than you ever saw before We got muskies here so big you have to cut them in half to take their pictures "

We finally hooked a beauty, but after forty minutes the swirling, fighting tiger-muskie got away Mike figured it weighed thirty pounds but, before the second meeting closed it most of weighted seventy.

At least, the Jasper Park Chapter of the Fish Liars Club can do nothing much about the scenery. That is tops. For a million years Nature groaned and sweated to evolve this stupendous circus of mountains and sheer ridges, high, gleaming glaciers and icy torrents that wind in silver ribbons down the precipices into the valley. You cannot say much.

At least, we had never cast a fly in more beautiful surroundings. We fished Beaver Lake, an expanse of flooded muskeg that boiled with one-pound trout like a hatchery at feeding time, and offered a fighting native for every barbless fanwing Cahill that we laid upon its placid surface.

With Major Fred Brewster, big-game hunter, sportsman and outfitter, in charge of horses and camping equipment in Jasper Park, we packed by saddle from Jasper Lodge to the connecting ponds of Buffalo Prairie, and worked for rainbow in the windy Valley of the Lakes.

We left the cushioned ease of the Lodge, moved north by motor, by launch, by horse, by canoe and by foot to Medicine Lake, and along the course of the rushing Maligne River, now and then trying a tempting pool along the trail on to the unparalleled grandeur of Maligne Lake, a nine-mile stretch of glacier-cold water six thousand feet in the air and ringed by lofty peaks capped with snow, the climax of the whole unbelievable show.

From Fort St. James, forty miles north of Vanderhoof on the C.N R., there extend some two hundred miles of connected lakes and streams, all of them navigable by launch, offering perhaps the largest continuous stretch of rainbow trout waters in North America We trailed Stuart Lake, Takla and Trembleur; we took rainbow up to ten pounds; reluctantly we returned to Douglas Lodge, ready to meet the Pacific-Alaska plane that would swoop us up from Stuart Lake like a fish hawk in the following morning, and bear us in its talons to Alaska.

While fishing for Tyee salmon, off Campbell river on Vancouver Island, Corey Ford had the great fortune to land a fifty-six pounder which qualified him for a Gold Button under the Tyee Salmon Club rules. The gold button is one of the most sought-after prizes in the fishing world.

With heavy hearts the members of the Fish Liars Club lifted the salmon and hung it on the scales. The salmon weighed fifty-six pounds. Very solemnly we took our worn membership cards from the bands of our hats and placed them in the salmon's gaping mouth.

It is with deep regret that we have tendered our resignations to the Fish Liars Club of Fairbanks, Alaska. We feel that we are not worthy of the honor after all We resign in favor of that fish

BILLION DOLLAR TOURIST TRADE FROM HARD SURFACED HIGHWAYS

Hard surfaced trunk highways and the right kind of enterprise in going after the business will build up a tourist business for Canada with a turnover of one billion dollars a year, says A. B Mackay, president of the Alberta Motor Association.

"That figure is by no means out of reason Whether it will be reached or not depends upon the enterprise of the people in Canada and nothing else," says Mr. Mackay.

"Even if that is approximately true, it should be enough to fire the imagination of every farmer and business man in Canada. And I ask you what are we all thinking about when we do not move heaven and earth to arrange for that mammoth business

"The answer to that question is two-fold: (1) As a people we do not grasp the fact that tourist traffic is a splendid lucrative source of new business ranking with the best; (2) highway building, the very first necessity in building motor tourist traffic, is the business of the provincial governments.

Think these two points over well They contain the story of Canada's failure so far to cash in on the biggest business immediately to hand.

"I leave it to the farmers. I leave it to all Canadians as to whether motor tourists from the United States will not be travelling over highways in quantity for all time to come, provided you offer them the modern hard surfaced motor ways," said Mr. Mackay.

THE DIONNE QUINTS—

SOMEONE ONCE Wrote "There is nothing new under the sun," and in many respects it is a true statement. But at least amid the welter of discussion, argument and recrimination arising out of economic problems, something has emerged which if not exactly new, is certainly refreshing. For many years men and women have discussed and argued the principles of Liberalism vs. Conservatism, and later the principles of the Progressives, U.F.A., C.C.F., the Douglas plan, the Aberhart plan, in fact, as if to prove beyond a shadow of doubt that man is a contrary animal, people have been hitting at each other verbally and otherwise, for a long, long time, perhaps since the dawn of creation. The latest and perhaps the "argument that is different" centres around the Dionne Quintuplets, where it is claimed by some that the sacred rights of parenthood are being deprived by the state. The parents claim, particularly the father, that at the hospital, built especially for the five babies, the parents are treated as strangers, the officials there assuming a proprietory right so far as the little ones are concerned. To give strength to their feelings, there is at present before the Ontario legislature, a bill, which if it passes will make the five members of the Dionne family wards of the state. The parents, so states the father, do not want this, they want their family united, they having five other children. Of course, as with every other thing in which the public becomes interested, there is a difference of opinion and this difference of opinion is being expressed both verbally and in print.

Of course it is easy to understand that the State's interest in the children is based purely on the fact that there are five of them. Had only two or three been born, the parents would have to muddle along as best they could, and if they needed it, dependent upon the very ordinary system of municipal and government relief. But because there were five and it being very unusual for five babies to arrive at one time, the state stepped in, retained a doctor and nurses and built a private hospital especially for their benefit, all of which is very praiseworthy, for if the state had not provided for this extra care it is more than likely one or more of the babies would have succumbed during the very critical periods of their very early infancy.

No doubt the good people of Ontario feel highly honored because the whims of fate caused such an unusual event to happen within their borders, and it is not surprising that they would like to be assured that all five children will grow up to be true and loyal daughters of Ontario and perchance live to a ripe old age. All of which is of course praiseworthy. But no amount of provincial pride or even practical help can overide the reasonable, logical and inexorable claims of parenthood. One or five it makes no difference, Mr. and Mrs. Dionne should have the final say as to the upbringing of their children. The only exceptions are the same exceptions that apply to every other Canadian family, viz. neglect or inability on the part of the parents to take proper care of the children.

It is common knowledge, that because of the birth of five children at one time is an extremely rare event, financial offers by the United States promotors have been made to the parents, the idea being to make a public exhibition of them. It is to be hoped that wiser counsel will prevail and that the children will be allowed to develop into normal happy childhood

THE BLUE EAGLE BECOMES A DOVE—

THE GREATEST and most spectacular legislation ever to be passed and put into effect by a modern democratic government was the National Recovery Act of the United States. Heraldel with much enthusiasm with which was mixed no small amount of patriotism the N.R.A. entered into the lives, for better or worse, of millions of Americans. Business, both big and little felt its force. Codes of many descriptions were drafted and those firms adopting them (and there was little choice) bravely displayed the emblem of the N.R.A., the Blue Eagle. Prices were drafted for such common tasks as suit cleaning and other personal services as well as retail and wholesale merchandising and small and large scale manufacturing. From the first the enforcement of the codes was difficult and at least one court case resulted because a suit was cleaned for five cents less than it should have been. At first the Commander in chief of the N.R.A. was Brigadier General Hugh Johnson but after many hectic months General Johnson resigned and appointed in his place was Mr. S. Clay Williams, former president of the Reynold's Tobacco Company Announcement is now made that Mr. Williams has resigned but will stay on for a week or two. It is understood that the N.R.A. is willing to drop 75 per cent of the codes, dropping those dealing chiefly with retail merchandising and small business, but reclaiming control of big industries. So it would seem as if the most extensive attempt of modern democratic government to control the entire business of a country must be written down as a failure or at least a partial failure. The Blue Eagle becomes a dove.

Are You Interested in Flax?

The following article issued from the office of McCabe Bros., Grain Company, deals with a grain crop more or less neglected by the average ffarmer. While lengthy, we believe it to be interesting reading

Canada Becomes a Grain Importer

As a striking contrast to the current difficulties Canada is having in the disposal of her burdensome wheat stocks, recently published figures reveal an astonishing situation in regard to her flax stocks. For many years, Canadian flax exports were a source of considerable income to the country—on several occasions amounting to more than ten millions of dollars. Even as late as 1931, the exports of this grain amounted to nearly two million of dollars. Since that year the situation has completely reversed itself so that during 1934, Canada spent upwards of a million and a half dollars importing flax and linseed oil. Not since 1931 has this country produced enough flax to supply her own needs which amount to over two million bushels annually. In view of the 1934 Canadian flax carryover of less than half a million bushels and her 1934 crop of less than one million bushels, present indications are that unless a much larger flax crop is raised this year, Canada will have to spend close to $2,000,000 importing flax from Argentina and India.

The Plight of the Canadian Flax Mills

Due to the rapidly decreasing Canadian flax crop, Canadian crushers have, for several years, been forced to import large quantities of this grain from Argentina and India. Inasmuch as about half of the oil cake produced in Canada must be exported, this has put Canadian mills at a decided disadvantage in competing with cake crushed in Holland During the last two years, however, this disadvantage has vastly increased, in that Canadian mills now are forced to compete with foreign linseed oil being imported in great volume Holland's position as an oil exporter is strengthened by the fact that while flax comes in free their cake is protected by a ten dollar duty, thus allowing their oil to be sold at a lower price. Last year ore than one million gallons were imported and indications are that an even larger quantity will be brought in this year. Paint Manufacturers are being forced against their will to use this low-priced foreign oil not only in preference to oil produced from Canadian flax, but against oil produced from foreign flax milled in Canada. The result is that all Canadian mills have been shut down for extended periods during the past two years, with consequent loss in employment and profits.

Canada Being Forced Out Of Grain Production By Argentina

Ten years ago, Canada supplied nearly 40 per cent of all flax imported into the United States—the remaining 60 per cent being supplied by Argentina and Uruguay. Last year Canada not only dropped out of the export picture entirely but actually purchased from Argentina and India nearly one million dollars worth of flax—not including over six hundred [illegible] linseed oil crushed in Holland Not since 1931 has Canada raised enough flax for her own needs and it is likely that 1935 will see even larger imports of this common grain than was the case last year. A survey of the situation in Western Canada indicates that dissatisfaction with flax yields is the main reason for the rapidly decreasing acreage seeded each year Intensive work on the part of research workers at the various experimental farms has resulted in the development of seed varieties and new methods of culture which [illegible] claimed to overcome this difficulty An extensive educational campaign is now being conducted by the Extension Departments of all Western universities and governments in the hope of showing the way to better flax yields and larger crops.

A Brief Survey Of The Canadian And World Flax Situations

Figures recently released indicate that world supplies of flax seed are at the lowest point in many years Although consumption of flax products has suffered during the past few years, production in the major flax producing countries was lowered in close accordance with the demand World production of flax averaged 120,000,000 bushels between 1925 and 1930. The average yearly production since 1930 is below 100,000,000 with a figure of about 96,000,000 for 1934 Total world imports appeared to have reached the low point in 1933, and since then have gradually increased with prospects of further increase this year. Canada's carryover of flax has exceeded one million bushels on only two occasions since 1929, and this year reached a new low figure of [illegible] bushels. Canada's production has decreased steadily from 1912 when a total crop of over [illegible] bushels was harvested to 1933 when the [illegible] crop in twenty years, 612,000 bushels, was produced. [illegible] flax seed for the [illegible] that 2,000 [illegible] the [illegible] Canada increases her production markedly in 1935 [illegible] again spend more than a million dollars for foreign seed and oil for domestic use.

Canada's Lost Export Market

Ten years ago, in the days when the finding of markets for Canada's exports was a light task, this country shipped nearly six million bushels of flax to the United States That same year, United States imported about 9,750,000 bushels of flax from Argentina Since that year, although total United States imports rose steadily to a high of twenty-four million bushels in 1929 Canada's [illegible] of flax decreased steadily [illegible] that year her total shipments [illegible] U. S. [illegible] eight [illegible] Canada supplied only [illegible] bushels. Last year these imports [illegible] supplied by Argentina and India, and that year Canada bought nearly three-quarters of a million bushels from Argentina also This year due to small crop in both Canada and the United States, Argentina will be called upon to supply even larger shipments to both countries, while Canada continues to stagger under her burden of unsold wheat The export market for millions of bushels of a common grain remains open to Canada [illegible] advantage is being taken of the opportunity offered

New Developments in Flax Culture

During the past twenty years, flax in Western Canada has generally been a "pioneer" crop used primarily on new breaking As the volume of new breaking decreased, so also did the acreage seeded to flax Not since 1931 has Canada raised enough flax for her own needs and with imports of this common grain rapidly increasing, the importance to the country of a larger flax crop has become a national issue A careful survey of flax as a crop has revealed the fact that most of the reasons commonly given for the lack of interest on the part of possible flax growers have [illegible] recent years been proven to be entirely avoidable by the use of up-to-date methods of culture Average yields secured at experimental farms vary between 17 and 21 bushels per acre as computed with the provincial averages of 8 and 7 bushels A comparison between common practices and scientific recommendations is interesting:

Type of seed: Formerly any available seed was used Now new varieties have been developed which are highly resistant to "wilt", which are [illegible] and which mature earlier than old type varieties

Seeding: Common practice calls for seeding any time up to the latter part of June. Experiments have definitely proved that flax should be seeded not later than June 1 and usually [illegible] ten days after wheat seeding commences.

Land and Seed Bed. New breaking has been preferred as being fairly free of weeds No particular preparation of seed bed has been done and flax is often seeded two or more inches deep The best results are now being obtained from clean fallow land. Seed bed should be carefully [illegible] and [illegible] as possible after which the flax is seeded at a [illegible] depth [illegible] inch.

Harvesting: Flax usually late in [illegible] together with small acreages sown have been the chief causes of high threshing costs Early seeding brings flax to maturity in good time [illegible] acreage is seeded in each district, threshing costs decrease markedly

It has been found that the use of [illegible] will [illegible] almost all common objections to flax as a crop Tests prove conclusively that flax is not hard on the land, is not subject to excessive damage from late frosts, nor from early frosts if seeded reasonably early. Practical growers in all three provinces report yields ranging from ten to twenty-eight bushels per acre, secured largely through the use of up-to-date methods in flax raising

Linseed oil production in the United States during the 12 months ending July 1934, totalled 443,000,000 lbs. —the largest output since 1930—1 Consumption of linseed oil was well above that of the past two seasons reflecting the improvement in industrial and building activity being experienced In an effort to increase the acreage seeded to flax for domestic consumption, the Federal Government has in store in Minneapolis, some 300,000 bushels of flax which will be distributed for seed. Even though all this flax is seeded, however, import requirements for the next few years are bound to be heavy.

Increasing Demand For Linseed Products Offers Opportunity For Canadian Export Market

As was the case with almost every raw product, the demand for flax seed products suffered severely following the crash in 1929 The following year world imports of flax dropped about 30 per cent. For the next two years, as the price of flax decreased, linseed products began to undersell competitive vegetable oils and demand improved somewhat- particularly in Europe where a large percentage of linseed oil is used for edible purposes 1933 saw another drop in consumption but last year the situation had been more than met by drastic curtailment of world flax acreages and short crops The result is that at the present time, world supplies are at the lowest point in years—and demand is definitely on the upturn Inasmuch as the market for Canadian flax is largely found in Canada and the United States, the situation in these two countries should be examined In contrast with European distribution, the bulk of the linseed consumed in North America is for paints and varnishes, linoleum and soap—very [illegible] being used for edible purposes [illegible] then, the volume of new building being done is the important factor in flax consumption The most recent report issued by MacLean's Building Reports, shows that contracts let in January 1935 were about [illegible] per cent over those of the previous January and vastly in excess of those let in the preceding December A distinct upward trend is noticeable in Canadian building which is reflected in the statement of one of the Western paint manufacturers, that the business done by that company had steadily, though gradually increased each month for the past twenty months Conditions in the United States showed a radical upturn last spring, but during the summer slipped off again and is only now showing a real improvement Imports of flax into the United States increased nearly fifty per cent, however,—due to the very small domestic flax crop last year. Inasmuch as a good portion of the flax growing area south of the Line is still suffering from drought conditions, it is entirely unlikely that the 1935 U.S crop will do more than keep up with the increasing domestic consumption in that country—leaving their import requirements for 1935 at a high figure. The conclusion to be arrived at from this general situation is, therefore, that a ready export market for

The Voice of the Drums

(The Christian Science Monitor)

The effect of the drums upon his pulses annoyed Ben as he stopped in the park. It annoyed him that the blood should pound in his veins as the parade swung past, the long column of high school cadets, their eager feet pounding out the rhythm of the march.

For he had long since come to the conclusion that it was all part of a false show, a calculated manipulation of human weakness. He knew that so well. And, yet his pulses did pound to the tempo of the drums, and something in his breast was warm and thrilling. It annoyed him exceedingly.

But, because he could not cross the street until the parade had passed, he sat down and watched the marching column. He was not aware of the other fellow on the bench until he spoke. Then he turned to look at him, nondescript in his shabby overcoat and the weather-mottled hat. But underneath the hat the face was worth a second look. There was a gleam in the dark eyes that touched him, a twist to the gently-smiling lips that was tolerant without being ironical or cynical.

"It gets you, doesn't it," the man said gently. "It gets you." He was watching the parade with steady eyes as he spoke

Ben only shifted uneasily on his seat. It did get him. That's why he was annoyed.

"It gets you," the man repeated. "If we could only understand why it gets us we would never have a war again." He turned to Ben, his smile deepening. "You don't mind my talking this way?"

"Go ahead " Ben didn't mind. In fact the stir that he felt was like that produced by the drums, except that it was deeper and more promising. The tempo of the drums was promising something. But that was an empty promise, he knew.

"I went over there," the man went on, "and I found out why. So many went over and didn't find out why. Would you like to hear?"

Ben found himself nodding again. He did want to know why. The parade still blocked the street. And, in any event he was in no hurry. The stranger's voice beat in the tempo of the drums, but it was deeper, somehow. And the promise was surer.

"I was just a youngster when I heard the drums. I had a job in an office. There was a window in the office that looked down into the street. And sometimes I would stand there, gazing down at the people below. It used to bother me, although I didn't know why at the time, to watch the people. They moved so aimlessly. There was no coherence. They moved individually here and there, as though there was no common purpose

"And the men who came into the office, the men I met on the street and in the subway, they were like that too. They talked to each other, but they didn't seem to be saying what they wanted to say. It was almost as though they were afraid to speak what was in their hearts. I used to be ashamed of my thoughts. I imagined they were queer. It was long afterward that I found out that all men feel like that in their hearts.

"Then one day I heard the drums. The country was at war then. Still, that hadn't meant much to me. But this day the thunder of the drums came up and filled the room. And they were saying things to me. They were making promises. They seemed to be drawing me toward a purpose that would bring me close to the men about me.

"I walked to the window and looked down. Soldiers were marching through the streets. The crowds were withdrawn and quiet. The only movement there was that swinging, crushing motion of the column on the march. The men were in step, they moved together. They were marching toward a goal, and that goal was not of selfishness or desire. All that was gone. These men were free somehow. I felt that, although I didn't figure it all out as easily as that

"Then I knew I had to go. I got my hat and went down to the street. The troops had marched away. The people had filled the streets again, jostling, each one going his own way. But there was still something there of the marching. It was as though the troops had left their imprint on the street. And I pushed through the crowd without being conscious of the people around me at all. The thunder of the drums was still in my heart. I could feel the swing of men on either side of me, men who marched together.

"I learned to march with them after that. I was part of the great unending column that was pouring out of the country. And I liked it. I still didn't know why, but I was supremely happy. And I found myself looking forward to the fighting about which I heard so much. But I wasn't afraid. I listened to the voice of the drums, and the voice filled me with

(continued on back page)

Local & Personal

You are probably waiting for the biggest money saving event of the season. Well, here it is. We have decided to run a Spring Rexall one-cent sale. The dates, April 11, 12 and 13. Three days of marvelous values. A. A. Biernes.

Mrs. Ellis, Joan and Ray, and Miss Cherry spent Sunday at the Malcolm home.

Mrs. Fontaine of Fort Saskatchewan, who has been visiting at the Jim Yakibuski home left on Tuesday.

Miss Gladys Denny of Prince Edward Island is visiting at the Bruce home.

After the concert on Monday night visiting and local artistes and others were entertained at the home of Mrs. Smaltz. The hostess served a delightful lunch.

Don't fail to attend the concert in the Variety Theatre, Friday, March 29th, under the auspices of the Ladies' Aid of the United Church. Splendid varied programme. Admission: Adults 40c, Students 25c, children 15c

Mrs. Bert Lovell returned from from Calgary where she attended the Rebecca Convention I O O.F. During the sessions she was successful in winning the provincial Nelson Cup with a total of 89.5 points. This cup is given for the highest mark obtained in an oral test of ritualistic work, open to all lodges in Alberta. The Ryley lodge presented Mrs. Lovell with a lovely bouquet of carnations in appreciation of the work she has done.

On Saturday afternoon at the Swift home, Miss Annie Swift and Mrs. Bert Calvert entertained in honor of Mrs. Ed Hill, bride of last week. A pleasant social afternoon was spent and the bride received many useful and beautiful gifts. A delicious lunch was served accenting the colors green and white for St. Patrick's day.

Mesdames Robinson, Baptist and Bailey attended the 21st Annual Meeting of the Women's Auxiliary to the Missionary Society of the Church of England in Canada, Diocese of Edmonton, which was held at All Saints Parish Hall from March 12th to March 15th. Mrs. Robinson is a member of the executive and is now entering her third year as Thankoffering Secretary Treasurer for the Diocese of Edmonton.

The Tofield School report and the full programme of Monday's concert are unavoidably held over until next week.

Mr. Charles Gordon and Mr. Neil Primrose were Tofield visitors last week. While here they made arrangement for a liberal organization meeting to be held at the Town Hall on Wednesday March 27. Mr. Gordon is the Liberal candidate in the forthcoming provincial election.

LAKESHORE

On Wednesday of last week Mrs. J. Jacobson entertained at a miscellaneous shower in honor of Ellen Walker. About fifty ladies were present and the afternoon was pleasantly spent with several contests which more or less taxed the thinking apparatus of the guests. The bride-to-be was told in rhyme where to find some of the gifts. The remainder was brought into the room in a gayly decorated basket by little Vernon Walker and Vivian Moos. The gifts were both useful and beautiful testifying to the esteem in which Miss Walker is held in the neighborhood where she has lived since early childhood. The best wishes of all go with her to her new home for a long and happy wedded life.

Miss Grace Mackinnon and Lynn Phillips spent the week end of last week at the Mackinnon home in Mannville.

Mrs. M. McConnel returned home on Monday from Nebraska U S A after spending the winter there.

Mr. and Mrs. Phillips were guests at the T. D. Ferguson home on Friday evening.

Donald Cameron of the University of Alberta gave an illustrated lecture in the school house on Friday evening.

Mrs. M. Latam and H. H. Phillips of Edmonton and Grande Prairie respectively, visited friends and relatives here several days last week.

Messrs. Truman Jacobson and Donald Phillips and Miss Virginia Barrows visited at the Barrows home in the Woodlawn district on Sunday.

The ladies' aid meeting which was to have been held on Wednesday at the home of Mrs. Graham was postponed owing to the storm.

Wedding

Walker—Steen

A very pretty wedding took place at the residence of Mr. and Mrs. Guy Walker, Lakeshore, when their eldest daughter Ellen, was united in marriage to Mr. Alvin O. Steen on Wednesday, March 20.

To the strains of the wedding march, the bride took her place beside the bridegroom. The marriage ceremony was performed by Rev. D. K. Allan. During the signing of the register Miss Edna Steen sang "I Promise You."

Mr. Melvin Walker assisted the bridegroom and Miss Edna Steen the bride.

A dainty wedding lunch was served.

The bride was the recipient of many beautiful and useful gifts.

The bride and groom left on the evening train to spend a short honeymoon in Edmonton.

STUDY CLUB MEETS

The Tofield study group held a regular meeting at the municipal hall Monday evening, the subject under discussion being social credit. Quite a number of visitors were present. Mr. Geo. Edwards opened the discussion with a short address on the subject and after the discussion it was decided to invite a speaker to completely explain the workings of the social credit plan.

CURLERS WIND UP SEASON WITH MASQUERADE

On Friday evening last the ladies' and gents' curling clubs wound up the curling season with a masquerade. A great deal of fun and frolic ensued, the costumes being many and varied, in fact it has been cited as the best Tofield masquerade gathering in many years.

Among the outstanding costumes were: Old gentleman, Mrs. Thomas; Tuxedo, Mrs. Abbott; Gypsy, Mrs. Jobb; Sailor lass Mrs. Swift; Clown, Mrs. Calvert; Santa Claus, Mrs. H. Law, Cadet, Mrs. Hicks; Social Credit, Mrs. Forman; Darky, Mrs. Beirnes; Hobo, Mrs. Letourneau; Pirate, Mrs. Clutterham; Old man, Mrs. McLaughlin; Old Lady, Mrs. Hammond; Old Lady, Mrs. Innes; A Gentleman Dandy, Mrs. Ob[illegible] Law, comic costume, Mrs. E. Rogers.

Members of the men's curling club served lunch attired in fancy costumes. The prizes for masquerade costumes were awarded as follows: Mrs. O. P. Thomas, as best comic costume and Mr. [illegible] Law best dressed costume.

TOWN COUNCIL MEETING

A regular meeting of the town council was held in the Town Hall on Monday evening, March 18th. Present were Mayor Bruce, Councillors Bellamy, Lovell, Hammond, Taylor and Swift. The minutes of the previous meeting were read and adopted. Communications from the secretary to the Prime Minister of Canada, the Minister of Trade and Commerce and Canadian Chamber of Commerce were read. Each acknowledged receipt of a letter from the secretary-treasurer accompanied by a copy of the resolution passed by the council endorsing the Hornby Land Settlement Scheme. Other communications on various matters from the Department of Municipal affairs, Department of Public Health and Board of Public Utility Commissioners were read.

A number of accounts were ordered paid. A statement of receipts and expenditures for the month of January was read and ordered to be incorporated in the minutes of the meeting.

At the request of Mr. W. Marichuw, a selling price was set on the building used as a shoemakers' shop, and Mr. Marichuw indicated that he would probably purchase same for such.

Council also set a price of $15.00 per acre on the cancelled subdivision lying south of the C N R right of way.

The following were omitted from the list of floral offerings to the late Mrs. M. A. Wood, published in our last issue: Mr. and Mrs. Shupe and Irma; Mr. and Mrs. H. McGinitie and family; Mr. and Mrs. J. McGinitie; Mr. and Mrs. B. Mitchell and family; Mrs. Henderson and Jason; Mr. and Mrs. J. Appleby and family; Mr. and Mrs. F. Carlisle and family.

Good News! The Rexall Original one-cent sale—Your opportunity to save 50 per cent is coming soon at Beirnes. Rexall Store.

C.W.L. Sponsor Fine Concert

A splendid concert was held under the auspices of the Tofield C W L on Monday evening of this week at the Variety Theatre. The hall was well filled and the splendid variety of the programme provided numbers that immensely pleased every person present.

The audience was particularly fortunate in having an opportunity to hear Miss Olive Brasseau, violinist and vocalist. Miss Brasseau had promised to come some time ago, but in the meantime arrangements were made for the official opening of radio station C J C A. The station had moved to new quarters and celebrated by having a special program on Monday evening. Miss Brasseau was playing in the radio studio near eight o'clock and was immediately rushed to Tofield where she delighted and thrilled her audience. All her numbers were encored and on the last encore the audience persistently called for a third number which she graciously gave.

The years go by and many things pass into the limbo of forgetfulness but the popularity of Mrs. Pincott's readings remain as bright as ever. We have heard Mrs. Pincott give "The Parson at the Football Game," many times, but never has she given it to better effect than she did on Monday night. Her number "Home" was very effective and brought forth much applause.

Miss Lola Wilson greatly pleased the audience with her reading "The Song of Better Understanding", a thoughtful reading admirably rendered. Mr. Cleo Wilson's pianoforte solo was greatly enjoyed also, encores being called for in both cases. Mr. Broughton both as a soloist and as a member of the male quartette greatly pleased the audience with his singing. Mrs. Fontaine, for a number of years a resident of Tofield very pleasingly rendered two solos. Two numbers which appealed very much to the audience was the Irish Jig dancing number by Mary Nahrebeshi and Ella Ewanovich and the waltz clog dance by Julia Francis Hansen. Both these numbers received encores. The male quartette rendered numbers which were greatly enjoyed and Mrs. McQuaig of Edmonton pleasingly rendered "Danny Boy" as a pianoforte solo. The Tofield tap dancing team gave a splendid dancing number which was heartily applauded and encored.

Much credit is due the committee in charge, particularly Mrs. Schmaltz president of the C.W.L., who acted as chairman.

The C W L. wishes to thank the artists, helpers and all those who contributed in making their St Patrick's concert a success.

LINDBROOK

A party was given in honor of Mr. and Mrs. T. Cookson and family at the home of Mr. and Mrs. W. Morden. Cards were the order of the evening and all present thoroughly enjoyed themselves.

Another party the next week was given by Mrs. Smith. Court whist was the order this time. The presentation, a steamer rug to Mr. and Mrs. Cookson was made as a token of remembrance from friends of the district. Mr. and Mrs. Cookson are now en route to make their home at the Coast.

The sale held at Mr. T. Cookson and auctioned by Mr. F. Ball was exceptionally well attended despite the cold weather and on the whole the prices realized were very good.

On Saturday the annual Irish-Scandinavian birthday party gathered together to do honor to Mr. Otto Lindgren whose birthday is the 17th of Ould Oireland. It seems the stork got tired of carrying him and instead of taking him to Oireland he dumped him in Sweden, possibly he was using a plane and had to make a forced landing. Songs and dancing were indulged in and everyone present enjoyed Otto's birthday. We hope he does and may he have many of them.

Mrs. E. Anderson made a trip to Rochester, Alta, this week to visit her husband Mr. E. Anderson who is relieving foreman of the C N R there.

Mr. J. Whittle of Wainwright visited for a couple of days at the home of Mr. and Mrs. J. Bracegirdle here.

Important -- To Wheat Growers

Under wheat grading regulations coming into effect August 1, 1935 the matter of purity of variety is one of primary importance.

Regardless of whether your wheat be Marquis, Garnet, Reward "222" or any other variety, it is desirable from a marketing standpoint that it be uniform in type

Excessive admixture one way or the other will be liable to grade penalties under the amendment to the Canada Grain Act

HEALTH
by
A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

MEASLES

One of the most common of the really serious menaces to the lives and health of young children is measles, a disease which is considered by many parents to be nothing more than an annoying incident in the life of a child.

Measles is the most readily spread of all the communicable diseases. It is the most difficult to control of all because the patient may transmit the disease to others before the rash appears, at a time when measles is not even suspected.

The ordinary symptoms of a cold in the head mark the onset of the disease. The only safe way to deal with the child who has the symptoms of a cold is to put him to bed in a room by himself. This protects the child, for bed is the best place for him if he has a cold, or if a communicable disease is comming on. It also protects the other children to whom he might spread whatever he has if he is allowed to be up and around.

The younger the child, the more serious is measles. It is during the second year of life that so many young children die from measles. It is for this reason that every care should be taken to protect the child from exposure during the first five years of life.

It is almost impossible to escape measles entirely because the disease is so contagious. The parents who succeed in protecting their children during the first five years of life have accomplished a great deal. The parents who heedlessly or thoughtlessly expose their young children to measles are taking a grave risk with the lives of their little ones.

The child with measles should be in bed in a well-ventilated room. Most of the deaths from measles are due to complications, notably pneumonia and these complications very frequently develop from negligence, particularly in allowing the little patient to get out of bed too soon.

When it is known that a young child or delicate child has been exposed to measles, the family physician should be consulted. The injection of blood drawn from a person who has recently recovered from measles will prevent or modify the attack. Because practically all adults have had measles at some time, blood drawn from the parents may be used for this purpose.

To secure results, these injections of convalescent measles blood serum or adult serum must be given as soon after exposure as can be arranged. The protection conferred is transient, and unless the child develops a mild attack, no permanent resistance remains. Much has been accomplished and much more can be done to safeguard young children who have been inadvertently exposed to measles through the use of the blood from convalescents or parents.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

CANADIAN CATTLE SHIPMENTS TO UNITED STATES

Due to the rapidly rising cattle prices in the United States, some 10,000 Canadian cattle have crossed the boundary line and been sold in the markets of that republic. Shortage of stocker and finished cattle in the United States is due to heavy slaughterings as the result of feed shortage and also restrictions of production. Canadian cattle 700 lbs. and under are subject to 2½c a pound duty, and over 700 pounds to 3c a pound duty. But when prices for prime beef run as high as 14c a lb. in Chicago while they have been around a quarter of that in western markets, the duty does not effectually stop imports.

At one time the Canadian cattle trade with the United States was a thriving one but the Fordney- McCumber tariff ruined it.

TRAPPING STILL IMPORTANT IN THE NORTH

Moncton, N.B. March 17.—Nearing the end of a 4,000-mile trai' from the Great Bear Lake district, Ulric Arsenault, a native of Summerside, P.E.I., climbed aboard the Canadian National Railways train recently for his home in Summerside. For fifteen years the prospector has searched for radium and silver in the Great Bear Lake district.

There is a great contrast, he said, in travel facilities when he went into the far north in comparison with today. When he first went to Fort MacMurray, headquarters for exploration parties and prospectors, it took many days to reach there. Today, he said, the airplane does the trip in a day or two.

While money can be made at prospecting, Mr. Arsenault stated, trapping is still a big money maker in the north, some trappers making as high as $30,000 in one season, which lasts for eight months.

The thermometer during the winter drops to 70 degrees below zero, he continued, but it is a dry cold and everyone is clothed to suit the climate. There is great fishing, the lakes being full of trout with fifty-pounders often caught, while large herds of caribou abound, moose are plentiful, also bears and timber wolves. Fresh vegetables, he said, were the only articles a prospector misses, but he has grown potatoes, lettuce and radishes successfully.

The radio, according to Mr. Arsenault, has been of great service in the far north, both in the matter of entertainment and in keeping people living there in touch with civilization.

CURLERS USE IRONS IN QUEBEC

Winnipeg, Man., March 18.—"We were extremely sorry that Quebec did not see their way clear to join the newly formed Dominion Curling Association at the organization meeting in Toronto. The doors are still open and we hope they will soon come in. We will give them a hearty welcome, as Quebec is the only province without membership," stated J. T. Haig, K.C., first president of the new body, who arrived in Winnipeg recently with the Saskatchewan and Manitoba curlers over the Canadian National lines.

"The main point of objection on the part of Quebec apparently is the fact that they use irons almost exclusively, while the other provinces use granites. They consider the difference in style of game would create confusion. This is entirely an erroneous idea.

"I have been invited to attend the annual meeting of the Saskatchewan Curling Association early in April and will accept. Early next fall I will make a trip east and visit the Quebec Clubs and hope at this time to discuss the matter with the prominent curlers of Quebec, Montreal and other cities of the Province.

"The Dominion Curling Association will not interfere in the slightest with administration of the game by the Provincial Associations. The Provincial bodies will continue to handle their work within their territorial limitations and there will be no interference from us. Quebec can still play irons and come into the fold and I hope they will do so soon," continued Mr. Haig.

NEW PRESSURE OILING

A unique method of flooding connecting rod bearings with a surplus of lubricating oil at high engine speeds is one of the new mechanical features of the Chevrolet engines in all 1935 models. The new oiling system assures an extra supply of oil to the bearings when most needed, that is, when the car is being driven above 70 m.p.h. for long periods.

At lower engine speeds, lubrication of the crankpins is provided by oil picked up from troughs by dippers on the connecting rods. At high engine speeds, as the pump pressure increase, oil is forced from those nozzles with sufficient force to cause high pressure streams of oil to be thrown clear across the crankcase, directly in the path of the connecting rod dippers. Because of the high speed of the dippers as the engine turns over 3000 or more r.p.m. they hit the solid stream of oil with so much force that tremendous pressure is created. The oil flows through the outlet in the top of the dipper and is forced through the deep grooves in the connecting rod bearing. The force of the impact of the oil stream provides positive lubrication to the entire surface of the bearing, and carries away any obstruction in the oil grooves, much as high pressure stream of water from a fire engine rips roofing from a building.

WHY WHEAT IS SHIPPED

Sydney S. Campbell, British grain statistician, writing recently in The Miller, London, England, on the world wheat situation says: "We must read a dozen times in Canadian publications that Mr. So-and-so estimates world requirements at 570 million bushels; that all other countries combined will supply 294 million, and that 'therefore' importers will have to come to Canada for 280 million bushels which will reduce the end-season carry-over to 50-60 million.

"Now even if the premise about the 280 million were correct, the carry-over estimates certainly would not be. Exports of that amount would leave the carry-over much nearer to 160 million bushels than to 50. But the whole thing is unrealistic. No bushel of wheat ever yet was imported as a result of such calculations. Shippers put wheat afloat because it can be 'worked' or because they think it can be worked, at a profit. In other words prices in the exporting country stand sufficiently low in relations to those in importing countries and in relation to prices in other exporting countries (quality considered) as to pay the costs involved in the transference and to leave a minor margin to pay the shippers' own expenses. If these price relationships do not hold, then the wheat can stay in the exporting country till it rots, and not all the statistical calculations in the world will alter the fact. Wheat exports are a matter of price not of statistics."

THE GROWING OF GARNET WHEAT

A technical agriculturist located in central Alberta with long experience in agriculture in this province writes as follows:

"Personally, what I would like to see with Garnet is a few shiploads of really pure, high grade Garnet sent over to the Old Country so as to give the British millers a chance to thoroughly test good Canadian Garnet wheat. Partly with this thought in mind, I have told some farmers that while I was not prepared to advise any farmer to grow Garnet wheat, because I could not tell what effect the separate grading may have on price, yet if I were a farmer in Central Alberta, I would continue growing Garnet wheat. There has never been any variety nearly as satisfactory in Central Alberta, particularly the district west of Calgary and Edmonton as Garnet. It yields very much higher than Reward, is very much earlier than Marquis, and stands adverse weather conditions sometimes very much better than either Reward or Marquis. As a result, the grade is usually higher than either of these other two standard varieties, and I am of the opinion that unless there is a very drastic cut in the price of Garnet, the increased yield, earliness and average higher grading of Garnet will much more than offset any discrimination in price."

The question as to whether or not wheat growers should stay with Garnet is a matter which the grower must decide for himself. The main thing is to keep the strain pure. Again it is emphasized that admixtures of Garnet with Marquis types is very liable to cause a lot of trouble once the segregation of the Garnet is put into effect. - Wheat Pool Bulletin.

Home canneries for fruits and vegetables on the farm and in rural centres are a recent development of great importance and possibilities. It is estimated that in 1931 there were about 1,700 registered establishments operated in Quebec with a production of probably 230,000 cases. The movement is spreading in Ontario where 100,000 cases were produced in 1934.

SOCIAL CREDIT—DOES IT FILL THE BILL?

MR. ABERHART came to Banff on Monday [illegible] and expounded his Social Credit theories [illegible] audience that filled every available bit of [illegible] theatre and overflowed to the Rotary [illegible] the Mount Royal Hotel, where loud speakers [illegible] set up.

[illegible] judge by the remarks heard on the [illegible] wherever two or more men met together [illegible] day, Mr. Aberhart has left those who [illegible] state of bewilderment. The only [illegible] which seems to be clear in their minds is that [illegible] Credit if and when put into force will pay a [illegible] nd of twenty-five dollars per month to each [illegible] of twenty-one years of age in the province. [illegible] seems to have a clear understanding of [illegible] his dividend is to be financed.

Mr. Aberhart and his lieutenant Mr. Manning, [illegible] a demonstration of how easily it would be to [illegible] Credit dividends—simply a matter of [illegible] in a pass book. In the first instance [illegible] put up as collateral for a loan in the [illegible] banker makes a credit entry in a pass [illegible] simple. The Social Credit end was then [illegible] recipient of a dividend goes to [illegible] office and after giving assurance [illegible] bona fide resident a credit entry is put [illegible] for twenty-five dollars and he can [illegible] spend that amount of credit. [illegible] difference in these transactions is that [illegible] instance the bonds have been created, [illegible] earned through service. The issuing [illegible] entry in a pass book does not [illegible] behind it. Quite true the divi[illegible] the credit of the province behind [illegible] it is possibly true that the pro[illegible] a limited amount of this form of [illegible] would seem to the Crag & Canyon that [illegible] later a day of reckoning would arrive.

[illegible] & Canyon is fully agreed that some [illegible] has got to be made, and that change [illegible] but it is not fully convinced that [illegible] system is a sound one. The writer [illegible] the system, nor is he boosting for [illegible] ing in the dark. He may be mentally [illegible] ing able to grasp this simple nos[illegible] economic ills, and if he is he has lots [illegible] Not one of the dozens of people talked [illegible] able to give a clear definition of how [illegible] work out.

[illegible] five dollar bait that has been dang[illegible] eyes of the provincial electorate is [illegible] thoroughly and well. Citizens of all [illegible] flocking to the support of Social [illegible] know nor do they care much [illegible] they are looking anxiously for[illegible] when these dividends will start. [illegible] These citizens are sick and tired of [illegible] through which they have passed dur[illegible] five years, and like a drowning person, [illegible] grab at anything that might save them. [illegible] electorate of Alberta should keep their [illegible] firmly on the ground at this time. [illegible] a critical stage in public affairs. So[illegible] may be the cure-all it is held up to be— [illegible] it may not. It has never been tried out. [illegible] time for sane and logical reasoning on the [illegible] people. If we are firmly convinced after [illegible] complete an exhaustive study of Social [illegible] that it can be worked to advantage in the [illegible] then it is our right and privilege to put it [illegible]

[illegible] not let ourselves be led into a wrong path [illegible] promise of twenty-five dollars per month [illegible] credit dividends. [illegible] that promise and study the question [illegible] every angle first of all. Try to see daylight [illegible] before plunging into a dark tunnel that [illegible] to complete destruction. [illegible] people are noted for "taking a chance" [illegible] doubt but what that chance will be [illegible] case of Social Credit. Politicians of ev[illegible] are hastening to get on the [illegible] They see the hand writing on the [illegible] following a hunch. Politics for the [illegible] forgotten in this mad rush. Reason is [illegible]

[illegible] Aberhart states that he is trying to keep [illegible] of the movement. It is to be hoped that [illegible] do this. If we are to have a Social Cred[illegible] in Alberta—and signs point very [illegible] that way—then by all means let it be free [illegible] in the old sense of the word. If politics [illegible] the movement will find tough going from [illegible]

[illegible] through his talks over the radio and by his [illegible] outlying towns in the southern part of the [illegible] Mr. Aberhart has been able to rouse the [illegible] thinking a little for themselves. In Banff [illegible] past two weeks there are more people [illegible] economics than ever before. Nine out of [illegible] population can tell you more about [illegible] of government than has ever been [illegible] that science is TWENTY-FIVE DOLLARS PER MONTH EASY MONEY.

SAY NOT THE STRUGGLE NAUGHT AVAILETH

Say not the struggle naught [illegible]
The labor and the wounds [illegible]
The enemy faints [illegible]
And as things have been the[illegible] main.

If hopes were dupes, fears [illegible] liars,
It may be, in yon [illegible]
Your comrades [illegible] fliers,
And, but for you, pos[illegible]

For while the tired [illegible] breaking,
Seem here no painful [illegible]
Far back, through creeks and [illegible] making,
Comes silent, [illegible]

And not by eastern [illegible]
When daylight comes, [illegible] light;
In front the sun climbs slow, [illegible] slowly!
But westward, look, the land [illegible] bright.

Arthur Hugh Clough

PLAN TRIP TO FINLAND

A personally [illegible] excursion to [illegible] way and Swe[illegible] ship of [illegible] Detroit, Mich. [illegible] Norwegian Ame[illegible] the Canadian N[illegible] are generally [illegible] Eastern Canada.

The excursion [illegible] the N[illegible] S.S. Bergensfjord [illegible] June 12, 1935 [illegible] sons of Finns [illegible] well as others [illegible] opportunity to travel and visit [illegible] land under delightful conditions and to enable the traveller to see [illegible] of glorious N[illegible] route. Dr. S[illegible] of Finland and [illegible] cian in Detroit, [illegible] hand during the entire [illegible] York to Finland are [illegible] joyment of [illegible] group by his intimate [illegible] that country.

Leaving New [illegible] S.S. Bergensfjord [illegible] at Bergen, N[illegible] then proceed [illegible] way to Oslo, [illegible] and Kristians[illegible] ner passengers [illegible] some of the magnifi[illegible] ful Norwegian [illegible] capital, the [illegible] train across [illegible] "The Venice of the N[illegible]" this city the group travel across the Baltic to Finland [illegible] nized as one of the [illegible] countries in the world.

Helsingfors [illegible] land, boasts of many sights, including Europe[illegible] tiful railway station and [illegible] iament building present[illegible] ample of modern Europ[illegible] tecture. In addition to its 34,000 lakes and thunder[illegible] Finland also offers the only [illegible] highway in the world [illegible] Sea. Music lovers [illegible] in a visit to Finland [illegible] the Big Singing Festival [illegible] Finland, on June 2[illegible] and [illegible] pola also expects to [illegible] Finland's city on the Arct[illegible] anyone who travels [illegible] cross the Atlantic [illegible] his visit to Petsamo [illegible]

Three classes of a[illegible] be featured on the [illegible] fjord when she sa[illegible] on June 12, a we[illegible] class, the popular [illegible] a most inviting [illegible] tion to which will [illegible] of Norwegian variety.

AUTOMOTIVE TAXES [illegible]

Alberta's prov[illegible] be in a sorry pli[illegible] ers of the [illegible] trucks distributed [illegible] cent of the ro[illegible] some interesting [illegible] from the [illegible] last five years.

These show [illegible] 1930-34, the [illegible] the province [illegible] and of this $[illegible] from gasoline ta[illegible] from licenses [illegible] therefore, that [illegible] tal revenue in the [illegible] $16,870,450 has [illegible] two taxes alone, a[illegible] the average [illegible] cent of the [illegible] from one class of the [illegible] confined to two tax[illegible]

After a special [illegible] ow, the only [illegible] in North America has [illegible] a tomato field [illegible] ish Columbia [illegible] forwarded to the [illegible] ogist from many inter[illegible] the province, includ[illegible] Nakusp, and from End[illegible] the international bound[illegible]

HOW TO PREVENT LOSSES [illegible] PIGS IN [illegible]

[illegible] to any extent [illegible] during the [illegible] months when they [illegible] the sunshine and [illegible] free access to [illegible] vegetation [illegible] pigs die suddenly while [illegible] usually there are symptoms [illegible] indicate the presence [illegible] as lack of vigour and [illegible] paleness of color, a [illegible] breathing [illegible]

The Voice of the Drums

(Continued from front page)

[illegible] do the [illegible] I [illegible] until [illegible] the men [illegible] drums [illegible] danger [illegible] and why [illegible] We [illegible] We [illegible] guns [illegible] The [illegible] swallowed [illegible] go on [illegible] with the [illegible] rushing [illegible] other men [illegible] struggled [illegible] toward some objective in that [illegible] in the [illegible] He was hit [illegible] water and [illegible] so much [illegible] that [illegible] voice [illegible] want [illegible] "No [illegible] with you [illegible] the fore [illegible] asking myself [illegible] if this [illegible] missed [illegible] when [illegible] you do [illegible] there was [illegible] else that [illegible]

it was as though I dreamed. And in the dream I saw all the other armies that had ever marched. I heard the drums, the drums that have marched [illegible] war [illegible] began. And I knew that [illegible] generation [illegible] as though I stood [illegible] of all those [illegible] away [illegible] heart [illegible] And [illegible] glorious [illegible] to [illegible] did really. The [illegible]

[illegible] us. They took the other [illegible] away and I never saw [illegible] again. They [illegible] back to the [illegible] station. And as I went I was happy, happier than I'd ever been [illegible] I had found [illegible] what [illegible] the drums had been promising [illegible]. And I was more wonderful than I had ever imagined.

As he [illegible] passed. The [illegible] of the [illegible] was gone from the air. The stranger [illegible] the streets again. The stranger got up and stared at Ber.

"You [illegible] It's mighty important [illegible] we get [illegible] straight. It's [illegible] important." He turned away, and [illegible] swallowed him. [illegible] and walked [illegible]. The voice of the [illegible] could still [illegible] his heart. The [illegible] that it was [illegible] voice that beat [illegible].

[illegible] The drums had [illegible] and strife. Yet [illegible] the message of the drums. [illegible] more [illegible] stranger had asked it. What [illegible] men to [illegible] "Love." The [illegible] to know each other [illegible] another. The temple [illegible] was that temple [illegible] time toward [illegible] the brother [illegible].

[illegible] drums would [illegible] again. He knew [illegible] were trying to say. The stranger had known it. Now he [illegible]. He wondered how many [illegible] knew it. The thought was [illegible]. How few more must [illegible] before the truth began to [illegible] before the message of the drums would be understood by all men?"

[illegible] understanding war would cease; there would be no need [illegible] need of treaties [illegible] the drums, the drums that [illegible] would be leading [illegible] direction, the direction [illegible] which men had always wanted to be led.

TOFIELD MAPLE LEAFS DEFEAT ROUNDHILL

On Friday night the juvenile Maple Leafs defeated the Roundhill high school team by a score of 1-2. Both teams played a good game but Tofield had the edge of the play due to the [illegible] checking of the forwards. [illegible] scored for Tofield in the first period [illegible] the second period Roundhill [illegible] it up when Johnson [illegible] Swift scored for Tofield and [illegible] from [illegible] with the [illegible] scored the winning goal for Tofield a few minutes from the end of the game.

[illegible] Barrett refereed the game to the satisfaction of all.

[illegible] Tofield: Davis [illegible] Pincott, Smith, McClymont, G. Smith, Swift, Swinton, Beirnes, Letourneau.

Roundhill: Hutchart, Tuell, G. La Belle, [illegible] Johnson, [illegible] La Belle [illegible]

[illegible] Mr. [illegible] daughter Norma and son Paul returned on [illegible] from a three months [illegible] [illegible] are [illegible] a [illegible] where people [illegible] a different kind [illegible] system.

By the calendar spring is here and [illegible] Murray Mc[illegible] a lively butterfly [illegible] Thursday, March 21. The [illegible] and sporting itself [illegible] store, but as well [illegible] is still some little [illegible] the flowers.

AMISK CREEK

Our deepest sympathy is extended to Mr. and Mrs. Brown and family in their recent sad bereavement.

Born—To Mr. and Mrs. H. Pederson, February 24th, a son.

The Ladies' Aid held their annual [illegible] meeting at Mrs. P. O. Flaaten's on March 5th. The next meeting will be held at the home of Mrs. A. Haugen.

Hilmar Moen and Arnold Berg had the honor to get a free trip to the seed fair at Edmonton. The boys spent several days in the city and had a very interesting and pleasant time.

[illegible] Erickson visited her parents at [illegible] on Friday of last week.

The Young People held their annual meeting in the church on Sunday evening March 10th. A short programme was rendered and some business done. It was decided to take up and study the book of Matthew.

A number of the Young People are practising a play which it is expected will be presented early next month.

Mr. and Mrs. E. A. Moen and Marvin, Mrs. T. Anderson and Mrs. G. Langstrom motored to Lindbrook and visited with Mrs. E. Anderson Sunday, March 10th.

Arthur Patterson who spent most of the winter in California returned home about two weeks ago.

Mrs. E. A. Moen entertained the neighbor ladies at her home on Wednesday of last week in honor of her mother and sister, Mrs. T. Anderson and Mrs. G. Langstrom. Fourteen ladies were present and a very enjoyable afternoon was spent. A delicious lunch was served by the hostess.

Ingmar Olson motored to Camrose last Friday returning with Lilly Haugen, Lilly Berg, Glen Olson and one of his comrades, all from Camrose College. They returned to Camrose again Sunday evening by car with Ingmar Olson.

Mrs. Pederson, little daughter and son Alfred visited at the Flaaten home last Thursday afternoon.

Do you believe in the stars? Magic hours are coming next month when you can save half on your drug store needs. Its the Rexall Original One-Cent Sale at Beirnes' Rexall Store.

ADDITIONAL LOCALS

Some of those who spent the week end in the city are—Muriel Malcolm, Mrs. Noland, Thelma Noland, Dan Purcell.

A number of Tofielders attended the hockey game in Edmonton on Saturday.

The Glover boys spent a day in Edmonton last week.

Miss Dorothy Hay of Edson spent a few days at the Scott home last week.

Mrs. Broughton left on Wednesday morning for Viking where she will visit relatives.

The Class Of 1885

Editor's Note:—The following is a report of an address given by Mr. A. J. H. McCauley of Tofield, at a gathering recently assembled at Edmonton for the purpose of celebrating the 50th anniversary of the forming of the Edmonton School District.

By A. J. H. McCauley

Mr. Chairman, Ladies and Gentlemen:

It is quite an honor to represent the pupils who attended Edmonton's first school in 1885, at this celebration commemorating the 50th anniversary of the organization of Edmonton School District No. 7 and I wish to thank the committee in charge for this privilege.

The first school had home-made wooden desks and seats. An iron box stove, using long billots of wood, heated the room.

Mr. Richard Secord, who recently passed away, was our first teacher. He was very strict and made liberal use of heavy willow switches to keep our minds on our work.

One of the lessons taught the beginner was: "Is it an ox?—it is an ox." The teacher taught us numbers by moving coloured pieces of wood on wire attached to a wooden frame. Old Ontario readers were used by the classes. For writing we used slates and slate pencils. Scribblers were then unheard of.

Some of the games we played out of school were Pom-Pom-Pull-Away, Pussy Wants a Corner, Drop the Handkerchief, ball, as well as jumping and running. We made our own balls by wrapping a piece of rubber with yarn and covering it with deer skin. With this ball we played ante-over and catch. Percy Hardisty used to win all the running races. As the people of Edmonton know, Percy afterwards became famous as a foot-ball player, cricketer and oarsman. In the winter we had a toboggan slide right behind the school. Only one or two had toboggans; most of us used barrel staves. At times we would choose sides for a rabbit drive through the bush below the school; whichever side produced the most rabbits at the finish was declared the winner. Some winters the rabbits were very thick, so it was not a difficult matter to kill one. In the summer we went to the river quite often to fish and swim, if the water was low. One day some of us visited the North-East tower or bastion of the Fort; while there we uncovered a stock of colored beads, which the Hudson's Bay Company used to trade with the Indians. The towers, or bastions had loop-holes for riflemen to shoot through.

The spring of 1885 was an exciting and anxious time, for the Indians had started the North-West Rebellion, about 150 miles East of Edmonton. We saw the North West Mounted Police under Major A. H. Griesbach, come up from Fort Saskatchewan and the Edmonton Home Guards, of which my father was a member, drilling on the brow of the hill, between this church and the MacDonald Hotel. A dispatch, urging that troops be hurried to Edmonton, was sent by special messenger, Mr. J. Mowat, to General Strange at Calgary. By changing horses on the way, Mr. Mowat made the ride in the fast time of 36 hours. Further precautions were taken by building a second high wall at the Fort, the bush along Jasper Avenue, between the Imperial Bank and First Street, was mostly cut down and scouts were posted to watch all roads. It was arranged that the old Methodist Church Bell should be rung, if the scouts reported the Indians coming.

I remember my father one evening putting out a dummy man holding an immitation rifle near the barn. He was afraid the Indians might attempt to steal his horses. One day, while coming home from school, we saw an Indian, all painted up and carrying a rifle, riding past the post-office, of which Mr. A. D. Osborne, father of Edmonton's first lady teacher, was Postmaster. This Indian was afterwards arrested as a spy.

For a great many nights we could hear the beating of the Indian tom-toms. It was a question whether the Indians on the reserve near Bears' Hill, or Hobbema, and on the reserves less than twenty miles west of Edmonton, would rise and attack Edmonton. A number of people moved within the walls of the Fort and some families moved to the mission at St. Albert.

With a great deal of interest we watched the soldiers, who had come from Ontario and Quebec and camped at the Fort. One Sunday my sister, Lillie, Mrs. W. R. Howey, and I were surprised by two French soldiers. At first we could not make out what they wanted, but finally understood that it was a drink of milk.

The Indians thought a white woman was worth two horses; the market was high, owing to the demand for good saddlehorses. During the fighting around Frog Lake the Indians had taken Mrs. Gowinlock and another white woman prisoners. A friendly Indian gave two horses for each woman and allowed them to escape.

The latter part of June seeing the end of the re-

(continued on back page)

Local & Personal

Put a ring around your calendar for Thursday, April 11th, 10 to 11 a.m. when you get three large tubes milk of magnesia tooth paste for 50c. Also many other big bargains at the Rexall Original One-Cent Sale at Beirnes' Drug Store.

H. W. Love of Irma was a visitor to Tofield on Thursday. Mr. Love called at the Mercury Office and left a frame of pure honey. It certainly is an ideal product and we doubt if it could be surpassed anywhere.

Mr. Reg. Skitch, formerly of Tofield and now of Grande Prairie, spent a day in town this week visiting old friends.

Born.—To Mr. and Mrs. "Bud" Hannan, on Sunday, March 24th, a daughter.

The regular meeting of the W.A. will be held at the home of Mrs. W. Bailey on April 3rd at 2:30 p.m.

Miss E. Hardy, L. Stevenson, G. Craig spent the past week visiting Miss Mabel Barker of Viking, while there they attended the St. Patrick's dance in the Elk's Hall Monday evening.

TOFIELD MAPLE LEAFS WIND UP SEASON WITH BANQUET

On the evening of Thursday, March 21, a banquet was held for the Intermediate Hockey Club at the home of Mr. Thomas for the purpose of ending the Intermediate's hockey season for the year 1934—35. Much thanks goes to Mrs. Thomas and those who contributed to the culinary part of this banquet, as a splendid dinner was offered to the players, the feminine part of the organization and those who so ably handled the whistle at the games.

After a great deal of food had been disposed of, Mr. Thomas was thanked by Captain Graham Allan on behalf of the club for the time and energy extended in piloting the team to the Gas Line League championship.

A presentation was made to Mr. Thomas by Dorey Letourneau on behalf of the club.

Mr. Thomas then thanked the officers of the team for helping him with the managing end of the club.

Mrs. Thomas and the girls who helped, were heartily thanked for preparing such a fine banquet.

The tables were cleared and the guests settled in comfortable chairs while Mr. Thomas rendered a number of selections on the piano. At about nine o'clock all left for their respective homes after heartily thanking the hostess.

Those present were: Mr. and Mrs. Mrs. Dunn, the Misses Firth, Allan, E. Taylor, Hull and Dodds, and the players, Dan Dodds, Frank Dunn, Jack Smith, Allistair Swinton, Graham Allan, Bill McCauley, Lee Burnett, Don McLaughlin, Bill Taylor, Al Lee, Jack Whyte, John Swift, Don Beirnes, Clifford Pincott, Dorey Letourneau and the referee, N. Glover.

SCHOOL NOTES

By I M E R

The Tofield High School Students' Union held a most successful masquerade dance in the Variety Theatre on Friday, March 22nd. Some forty odd were present.

Bell Boy, Dan Dodds; M.P.'s, Jack Beirnes, Thomas Jacobs, Bill Davison; Cowboy, Bob McClymont; Mandarin, Jack Smith; Red Devil, Dorey Letourneau; Negro, Mr. Thomas; Cadet, Alan Swinton; Butcher, John Swift; Turk, John Moore; African hunter, Clifford Pincott.

Prizes went to: Girls' Fancy, Gwen Firth, Sir Walter Raleigh.

Boys' Fancy, Donald Edwards, Spanish Cavalier.

Girls' Comic, Jessie Munro, Negro gentleman.

Boys' Comic, Gordon Smith, Pirate.

At midnight a delicious lunch was served. We are very grateful to Dorothy Drebert, Cleo Wilson, Kathleen Ingram, Mr. Thomas, Jack Beirnes and Donald Edwards for supplying the music at various periods throughout the evening.

AMISK CREEK

Born.—To Mr. and Mrs. Joe Hanson, of Shonts, on March 19th, a son.

Some of the young people of this district have been practising a play "Efficient Aunt Emma" that will be put on next Saturday evening, Mar 30th at 8:30 in the church here. Admission, Adults 25c., children 10c. Everybody welcome. Ladies Aid are to serve lunch.

Miss Alvina Eggen who has been visiting with Mrs. P. O. Flaaten for the past month, left for her home at Chauvin last Friday morning.

Mr. and Mrs. H. Pederson, who have been staying at the R. Olson place this winter, are moving this week to a place north of Tofield.

Mr. and Mrs. H. Hillerud and family were visitors at the R. O. Berg home last Sunday evening.

Mr. and Mrs. H. Pederson and family visited at the P. O. Flaaten home last Sunday.

Mrs. K. Bruhn visited with her daughter, Mrs. Ferguson, near Tofield for a few days last week.

Mr. and Mrs. J. Berril visited at the E. A. Moen's home last Sunday.

Mr. R. O. Berg made a business trip to the City last Friday, returning the same evening.

Mr. and Mrs. Dordack attended the funeral of Mrs. Nordack's sister's infant twins, who both recently passed away at the same time. Interment took place near Haight.

Hazel and Evelyn Hillern, Hilmar, Myrtle and Marvin Moen and Conrad Patterson attended a hockey game in the City recently.

Do you want to save half the money you usually spend for drug store needs? And get higher quality too? Then wait for the Rexall Original One Cent Sale on April 11, 12 and 13 at Beirnes' Drug Store.

GLAZED SWEET POTATOES

Wash and pare six medium sized potatoes. Cook in boiling salted water until soft. Drain, cut in halves lengthwise, and put in a buttered pan. Make a syrup by boiling one half cup sugar and four tablespoons water three minutes; then adding one tablespoon butter. Brush potatoes with syrup and bake until brown, basting twice with remaining syrup.

Canned peas have the size of the pea stated on the label of the can. No. 1 is a very small pea; No. 2 is larger; No. 3 still larger and so on. The size of peas in no way depends on the quality nor the quality on the size.

LOCAL AND PERSONAL

Mr. Ab. Sinclair, C.N.R. station agent here, is on holidays at the Pacific Coast. Mr. Lloyd Simmons is relieving until Mr. Simmons return.

The Misses Ella Taylor, Bess Allen, Graham Allan and Donald McLaughlin spent the week-end in the city.

Mrs. S. Innes entertained the jolly Eight Bridge Club on Wednesday.

Mr. Frank Wood is at present in Edmonton serving on the jury.

A number of the younger set attended the dance held at Ryley on Friday night of last week.

Miss Thelma Jobb spent Friday in Edmonton.

Miss Winnifred Worton spent the week visiting with friends in Edmonton.

Bees and Bee supplies. Send for price list.—H. W. Love, Irma, Alta.

KETCHAMOOT

Born.—To Mr. and Mrs. Strommer (nee Martha Soma) on Thursday, March 15th, a daughter. Congratulations.

Mrs. Minnie McDonald arrived Monday evening from Auburn, Neb. and will make her home in the Tofield district for the summer.

Mr. Joe Sutton is making the round sawing wood and doing chopping before the spring work commences.

The Ratigan and Brick families moved into the Maurice McGinnis home one day last week.

Mrs. J. H. Ingram had the misfortune to badly sprain her ankle on Sunday.

Mr. and Mrs. Campbell and family, Mr. and Mrs. Roger Ray and family, Mrs. Keitha Oliver and family and Stanley Brown were guests of Mr. and Mrs. Chester [illegible] Friday evening of last week.

Mr. and Mrs. [illegible] Carlisle and family, Mrs. Louis Carlisle and daughter Belva, Mrs. [illegible] Carlisle and daughter Doreen, were Sunday dinner guests of Mr. Robert Berreclough and family.

Mr. and Mrs. Whillans entertained a few friends and neighbors to a card party last Friday night. Those present were: Mr. and Mrs. Thompson, Mr. and Mrs. C. A. Ingram, Mr. and Mrs. Shupe, Mr. and Mrs. Sears, Mr. and Mrs. J. H. Ingram and Mr. Shultz.

Mr. Ralph Whillans returned home on Tuesday for a visit at the parental home. Ralph has been working on a farm near Barrhead the past year. His cousin Mrs. McDowell accompanied him from Edmonton and is also a guest at the Whillans home.

Don't be fooled. Wait for the Rexall Original One Cent Sale at Beirnes' Rexall Drug Store.

SPRING PLOWING WANTED.—Man with outfit open to do spring plowing. Good plowman. Terms reasonable.—Apply to A. Lehman, Tofield. 12p

FOR SALE.—Or will trade for pigs, 12 or 15 black face ewes, four yrs. old or younger; lamb the latter part of April. These are all good thrifty ewes.—C. R. Borrhard, ¾ mile north of Creamery. Phone 1410 Tofield 12p

LAKESHORE

Mr. J. Majahey left on Wednesday for Coronation to take up teaching duties.

Mrs. Graham entertained the "bridge addicts" namely, mesdames Wood, Phillips and Majahey on Friday afternoon. The game resulted in a draw after two and a half hours play, which decision gives the ladies an excellent excuse for another session soon.

Mr. and Mrs. J. H. Johnston were guests of Mr. and Mrs. John Wood on Friday evening.

Mr. Jack Murray of Biggar, Sask., came on Tuesday for a few days visit with his brother T. R. Murray and family.

Mrs. Will Anderson and Harold went to Edmonton Friday where Harold entered hospital and was operated on for appendicitis on Saturday morning. We are pleased to say he is progressing splendidly. Mrs. Anderson returned home the first part of the week.

A reorganization meeting of the Junior U.F.A. was held at the T. R. Murray home on Friday evening. Marvin Walker was elected president, Alice Campion, vice-president and Mildred Graham Sec.-Treas. The evening was pleasantly spent with court whist and singing.

Nola Shaw and Henry Penner won

In a Way of Speaking

✻

In a way of speaking, the buying public owns every retail store in town. It pays the rents and salaries and all the other costs of our stores in our town. It informs the owners of these stores what to buy and what to sell. And it demands from retailers a communication service—meaning news of what retailers have in stock, and what their prices are. And of course it does most of its business with those retailers who report to it regularly and fully—by the agency of advertisements in our newspaper. And if any retailer says—in effect—"I'll not give you—the real owners of my business—any information about my business," then the buying public says—in effect—"Right you are! As for us, we shall go in largest numbers to those retailers who communicate to us regularly and adequately via the medium of our local newspaper."

This way of putting it is not just fanciful—it is a stern fact. Retailers who decline to maintain communication via means of the newspaper which it reads lose business to those who are faithfully communicative.

Some retail business is languishing today—unnecessarily. Its attitude to the public is wrong. It says—in effect—to the public. "You come and find us," and the public attitude is: "You tell us about your business and your merchandise. You are our employee. Report to us regularly and adequately on how you are serving us. If you convince us that you are our faithfull and efficient servant, we will keep on employing you, and will pay you well."

The way of making a business grow and making it healthy is as plain as the nose on one's face. It is the way of maintaining a steady communication relationship with one's employers— via the one effective and economical agency—the advertising columns in the

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

ACIDOSIS

During the past year, the Health Service was asked by many correspondents for information concerning the acid forming foods. It is a significant fact that these people did not enquire about the alkiline or base forming foods. For one reason or another, there is a popular fear of what is commonly called acidity or acidosis.

When foods are burned in the body to produce heat, energy, etc., carbonic acid gas is produced, which is eliminated from the lungs. An ash is left, which may be acid, alkiline or neutral. If the acid ash is in excess and this continues to pile up over a period of time, the alkalinity of the blood will be gradually reduced, and the condition known as acidosis results.

The common symptoms of this form of acidosis are fatigue, headache, a sense of weakness, and pain in the muscles, with loss of appetite. The symptoms are mild when the acidosis is mild, but if the acidosis progresses, the symptoms become more severe, the urine and the sweat being strongly acid. The condition, in a mild form at least, is fairly common among those who consistently use acid forming foods to excess.

The body does its best work on a balanced diet. To maintain health, the diet must be reasonably balanced in all ways, including the acid and alkiline foods. A continued excess of acid-forming foods leads, as has been said, to acidosis, while an alkalosis, which is just as much to be avoided, will follow upon a diet that is excessive in its alkaline content.

It is not a question of one or other food being a good food; it is rather that an excess of any one kind of food is undesirable and may actually be harmful or dangerous.

Meat, fish, eggs, bread and other cereals are acid forming foods. The alkaline foods are vegetables, excepting rhubarb; fruits, excepting plums, cherries, cranberries and prunes; almonds; and milk. Fat foods, such as butter, cream and lard, together with sugar and starch, and the fats of meat, fish and fowl are neutral foods.

It is not necessary to become faddy with regard to diet to secure the balance which is essential to good health and physical fitness. To the diet of meat, bread and other cereals, add liberal amounts of fruits, vegetables and milk; this will ensure the balance. There are other reasons why fruit, vegetables and milk should be used every day; they are the protective foods which guard against lack of minerals and vitamins as well as against an excess of acidity.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

THE VALUE OF BACON GRADING

Exports of Canadian bacon to the British Isles last year totalled 127,080,000 pounds and brought $20,000,000 to Canada. Yet the total amount of bacon was not half of the quota allotted to Canada by the Empire Trade Agreement made in Ottawa in 1932. Further, the ability of Canada to export the product of 1,000,000 hogs increased the value of the remainder and gave an impetus to an industry from which farmers derived an income estimated at between $90,000,000 and $100,000,000 in 1934. To support this important industry, the Dominion Department of Agriculture maintains a number of services which cover the breeding, feeding, and marketing of hogs and bacon. When considered collectively, these services form a comprehensive policy. Bacon grading is one of these services. Grading standardizes the quality, grade and appearance of the product exported, raises the level of that export, establishes a basis of merchandising Canadian bacon as a national product, and consolidates Canada's position for the future on a highly competitive market.

A NEW HEN!

Canada has contributed materially to the making of what is claimed as a new hen which has been evolved by agricultural scientists at Cambridge University, England. The bird at the moment is the object of considerable attention in the Old Country, and concerning it the "Spectator" says:—"Few successes of greater interest and practical possibilities have been won in the field of agricultural biology than the making of the new Cambridge hen. Her chicks declare their sex at birth, because the males and females are differently marked. This is a great advantage to the poultry industry, since chicks travel safely and well only during the first two days of their life. The new breed, known as Cambar, was developed by Dr. R. C. Punnet and his associates at Cambridge, England, by the application of Mendelian principles. By the use of the Canadian Barred Plymouth Rock (supplied by the University of British Columbia to Cambridge University) both silver and golden Cambars have been evolved. They are prolific layers of large colored eggs, whilst still possessing the virtue of sex-linked chicks. These chicks mark an epoch in the scientific breeding of poultry."

REINDEER TAKES JOB FROM FARM DOG

The Laplander uses his reindeer as a beast of burden but down on a farm near Riley Brook, New Brunswick, a doe not yet two years old has taken over the job of driving cattle to water from the farm dog, according to the Fish and Game Department of the Canadian National Railways. The doe now makes her home in the barn after having been domiciled in the kitchen during her baby hood. When but a fawn she was found abandoned near the roadside. She took on the job of driving the cattle herself and when the farm dog attempted to dispute her sway she charged him so that he decided to resign in her favor.

SPECIAL RAILWAY FARES FOR EASTER

In order that the travelling public may take advantage of the Easter week-end, arrangements have been made by the Canadian National and Canadian Pacific railways for special low rates over the holiday period, according to Joe. B. Parker, secretary of the Canadian Passenger Association, Western Lines.

Three offerings have been arranged. There will be a fare and a quarter return, good going from April 19 to 21 inclusive, leaving destination not later than April 22. The second is a fare and one third return, good going April 18 to 21 inclusive, leaving destination not later than April 23.

A special offering is made to teachers and students of a fare and one quarter return, good going April 12 to 23 inclusive reaching destination not later than April 30. This gives teachers and students an opportunity for an 18 day holiday.

THE GARNET WHEAT PROBLEM

The prospective carryover of Garnet wheat into the 1935—36 crop year has provided a problem which is causing the government of Canada some worry. On August 1st of this year Garnet wheat will be graded separately. Much of this grain has been bought on a 2 Northern basis and it is said it will have to be placed in 3 Northern after that date because of the new regulations. Between 40 and 50 million bushels of wheat with a large Garnet content is affected by the new ruling. This volume is in the hands of the grain companies who have asked the government to protect them against losses. It is estimated that such protection will entail the expenditure of around three million dollars.

Note:—It has been intimated since the above was written, that separate grading of Garnet wheat may be postponed for another year in view of the situation outlined above.

"GIVE US BREAD"

An essay competition was conducted in the United States to increase the popularity of bread. The following is one of the prize winning essays:

"Give us bread that we may live!" cried the Egyptians as they milled about the royal gates.

"Give us bread that we may live!" cried the peasants as they stormed the palace of Louis XVI.

"It was bread that they feverishly demanded bread, the staff of life; bread, the most wholesome and nutritious solid food that we have; bread, the greatest energy food known to man.

"Give us bread that we may live!" is the unuttered cry of the million youths in our schools today.

"Give us protein that we may build up our bodies into strong, healthy structures. Give us minerals to develop our bony framework and to acquire a grainy, manly posture. Give us roughage to keep our bodies regular. Give us a tasty food to satisfy appetites jaded by sweets and sometimes, cigarettes. Give us an energy food that helps us to stay on the football team, on the school honor roll, on the debate team, that results in a likeable personality—the outgrowth of physical fitness, mornings, afternoons. Give us an economical food within the reach of all children—rich and poor."

"To this cry comes the answer, 'You shall have bread, the outstanding energy food.'"

THE COST OF RAISING TURKEYS

(Experimental Farms Note)

At the Dominion Experimental Station at Scott, Sask., turkeys have been grown for the last six seasons with quite satisfactory results. The hatching and brooding have been done artificially. The turkeys were kept separate from chickens and confined to yards where no poultry had been for several years and a fresh yard was provided each year.

Records kept of fuel used for incubators and brooders together with feed records of grain, grit, oyster-shell, mash and milk for turkeys until they reached market weight show that when the price of mixed grain is about one cent per pound and the price of the other feed stuff is normal the cost of fuel and feed rarely exceeds one dollar per bird.

The cost of fuel for incubators and brooders may be eliminated by resorting to natural incubation and brooding which is usually satisfactory when only a small flock is to be raised. The turkey hen is to be preferred to the chicken hen for this purpose.

It has been found that the turkey produces a pound of meat more economically than cattle, sheep or swine and sells for a higher price. In some seasons, the price of turkey is practically double that received for the other common meats. The growing pig is the nearest contender for the honours and requires from 300 to 400 pounds of grain for each hundred pounds of pork produced.

NORWAY MODERNIZING MERCANTILE FLEET

Norway is the leading ship-owning country per capita in the world. Her fleet is fast being modernized, 23 new vessels being taken over during the past year, more than double the new additions in 1933. Thirty-seven new vessels are on order, more than twice the number last year; 63 vessels were sold during 1934. Forty-seven per cent of Norway's present fleet are motor vessels and 24 per cent oil burners.

Much benefit is expected to flow from this modernization in shipping with the steady decrease in idle shipping, much of it being obsolete, and the indications of revival in this industry. Norway's merchant fleet is a potent source in her foreign exchange to meet the normal surplus of imports over exports, her imports being greater than her exports. Norway's imports increased approximately ten and a half per cent in 1934 over the year previous and exports about 2.6 per cent, according to the Industrial Department of the Canadian National Railways.

THE MAYORS' CONFERENCE, RELIEF and FINANCE—

THIS WEEK there has been a conference of Canadian mayors taking place in Montreal. They come from cities both large and small, but no matter whether they are from metropolitan centres or cities of meager size, all the mayors have the same cry—help us with our financial burdens. Their cry is to the federal government asking that the government share a more equitable portion of relief costs.

To the individual mayors it is a matter of vital concern as to who pay the immense sums required for relief to-day, but to the average man who is just wondering where it will all end, the amazing thing is that so much has to be paid at all. In a three minute address at Montreal on Monday night, Mayor Webb of Winnipeg said that Winnipeg had been compelled to pay out in relief over 5 million dollars and as the greater portion of it was borrowed money, before it was repaid the interest would bring it up to eight million, and of course relief is still required. Is Winnipeg and other cities too, to go on borrowing indefinitely? Nor does it change matters very much if the federal government becomes more liberal in its relief payments to the cities, because as far as can now be seen the money will have to be borrowed anyway. How long can the financial system—any financial system—stand repeated borrowings? Isn't there bound to be an end sometime and that time soon?

The conference of mayors at Montreal are demanding as a group in session, something which separately, they have been demanding for some time past. And up to the present time the federal government has stood out against paying a larger proportion of relief costs. Why? Not so much because they did not want to, but because they felt they could not. In other words the government apparently felt just like you and I when faced with an unusual expenditure—that we could not afford it.

We have often stated that if the present financial system was ever materially changed peacefully, it would be because conditions would be placing too great a strain upon those citizens of the country who are often classed as "those that have."

SPRING! JUST AROUND THE CORNER—NO, IT'S HERE!

WE HAVE a novel, if somewhat crude thermometer here at the Mercury Office. Not exactly at the Mercury Office either, but just across the street there stands the Club Cafe, and in cold weather, like those of other buildings, the windows freeze. As soon as the weather begins to moderate, even a little bit, a thin ridge of clear glass appears at the top, but even lacking this sign, the frost assumes a different shade with the changes in temperature. Should a thaw set in, the windows quickly become clear.

As we looked across the street today, the windows were frozen with a light frost and we were fully convinced, despite the figures on the calendar which indicated several days into spring, that we were still in the midst of winter. The windows said so.

Then Frank Pruden came in with our semi-weekly supply of water. Frank was cold—and said so. But he said, "I wonder where all the crows that have arrived went to, and what are they living on." Frank said he saw several around early this week, but during the storm they vanished. Frank knows his crows even better than we know the Club Cafe windows, and while the frost still lingers on the windows, it is a fairly safe bet spring is here, because even the weather man can't fool a whole flock of crows. Only Professor Rowan can do this.

WAR CLOUDS—

Events of the week just passed in Europe, causes one to pause and wonder. The Treaty of Versailles which was imposed on Germany is repudiated by her. No longer does Germany secretly arm, it is done openly, and as a gesture that would brook of no mistake as to her intentions, flew 50 bombing planes over Berlin. Insistent in her desire for peace, present day Germany does not intend to lay herself on the altar of sacrifice and makes no secret of it. Undoubtedly the Treaty of Versailles as originally drawn was very severe. At that time, shortly after the close of the war, feelings ran high, and "make Germany pay" was the popular cry in Allied countries. The treaty was drawn up on this basis, but not only have Germany failed to live up to the financial part of the treaty, but she now demands full equality with other nations as regards armaments. And from all reports it looks as if she will get it—or take it. For a few days, war clouds hovered over Europe, but to most observers war in the immediate future is unlikely. At least an European war with Great Britain involved. International credits are now strained to the breaking point and without money and credit few nations would care to go to war. German statesmen headed by Hitler knows this which probably accounts in part at least for her bold stroke of repudiating the military clauses of the Versailles treaty.

YOUNG LIBERALS' CONVENTION

The Campaign Committee of the Calgary Young Liberal Club has announced through its chairman R. W. Watson, plans for a conference of Young Liberals to be held in Calgary on April 26 and 27. It will be the first of its kind tobe held in Canada and already promises to be a success far beyond the most extravagant ampitions of its sponsors. Enquiries have elicited enthusiastic support from all parts of Alberta. Numerous senior Liberals including [illegible] R. Howson, K.C., M.L.A., J. T. Shaw, K.C., P. L. Hyde, J. J. Bowlen M.L.A., W. Harry Ross, M.L.A., and many others have lent generous support and have signified their desire to attend all meetings.

The machinery of organization is already in operation with numerous sub-committees arranging details. C. V. Bennett, chairman of the Resolution Committee wishes all resolutions for debate at the conference to be forwarded to him at an early date in care of the Young Liberals Campaign Committee, 601 MacLean Block, Calgary.

Among the varied social activities to take place in Calgary during the conference definite arrangements have aready been made for a big dance and a trip to the Oilfields at Turner Valley.

Inspected exports of dressed poultry from Canada for the period from January 1 to March 1, 9135, totalled [illegible]. The amount for the corresponding period of 1934 was 1,[illegible]

RECIPE FOR LAMB ROAST

The most popular roast is leg. With less money, however, a shoulder roast, rib roast, loin roast or even a breast roast may be purchased. The shoulder roast is usually boned and rolled and in this form is the easiest roast to carve. Rib, loin and breast roasts are usually stuffed and when served with dressing are most delightful.

Now to get down to the details of roasting lamb. The meat should always be wiped with a damp cloth, then rub the surface with three-quarters of a teaspoon of salt and one eighth teaspoon of pepper. Dust with flour and lay on a rack in the pan flat side up. The oven should be at 480 degrees F for the first half hour then lower the heat to a moderate temperature, say 300 degrees F and cook slowly until finished. Lamb usually requires a half hour of cooking for each pound of meat. Do not add water to the pan and do not baste. If using a coal or wood oven, cook at a moderate temperature of 350 degrees F till cooked.

When the roast is cooked remove it from the pan. To make gravy use about two tablespoons of fat. In this brown two tablespoons of flour, add one and a half cups of boiling water. Stir until it thickens and cook two minutes. Season with salt, finely cut mint leaves or watercress and a little lemon juice.

Potatoes to be served with lamb may be parboiled for 10 minutes and then placed in the roasting pan till cooked. Green peas or young carrots may be served with any roast of lamb.

In closing let us again remind you of the many advantages of using lamb at this season of the year. Besides being young and tender you will find it reasonable in price and roasts, chops or stews will be pleasing dishes for all members of the family.

BANFF BEAUTY WINTER QUEEN

Ski-joring behind a fast running horse; mushing with a team of huskies; skating, or ski-ing on the mountain trails all come under the heading of real sport according to Miss Dorothy Standish, who reigns this year during the winter sport season in the Canadian Rockies. Visitors from many United States cities as well as from Canadian centers are enjoying all the thrills which only this area can provide and which reach a peak during the annual Banff Carnival held this year February 13-17 [illegible]

GLASGOW REDS GO ON RAMPAGE

Glasgow, March 25.—Seventy-thousand persons, many women and children among them, shouting "Down with the King," marched to Glasgow green today waving red banners and flags in the largest demonstration against the unemployment act the city has seen.

"Down with the National Government!" "Down with Ramsay MacDonald and his parasites!" they cried. The demonstration passed off quietly under the eyes of 1,000 police. No arrests were made.

Three thousand of the demonstrators came from all parts of Scotland. The visitors were accommodated overnight in various public halls belonging to the city corporation, which has a socialist majority.

Meanwhile, the Scottish Socialist party completed a two-day conference by adopting a resolution damning "the war policy of the National Government, as expressed in the white paper," and reiterating determination for the mobilization of the working classes to resist any policy which might result in war."

12 REDS SHOW [illegible] RESPECT NATIONAL ANTHEM . BOUNCED

Reputed to have Communistic leanings, 12 persons who refused to stand during the singing of the National Anthem were ejected from a patriotic meeting in the Ukrainian Catholic hall 9620 109 ave., Edmonton Sunday. Members of the audience chased the alleged "Reds" down the street but police were not called until after the fracas was over. No one was injured.

V. Kupchenko was the principal speaker at the meeting which was called in the hope of counteracting communist activities. Some 500 attended.

"The Communists didn"t stand up so we put them out 'in a hurry,'" explained Kupchenko with a grin after the affair.

"We are out to stop all this disloyalty to the British Empire," he added. "We are against grain strikes, Communistic propaganda and this agitation. This is a good country to live in and we want to keep it that way." Kupchenko told the Edmonton Journal.

LAND RENDERED USELESS HUNDREDS LEAVE FARMS

Crop in Western Kansas Only 15 Per Cent of Normal

Springfield, [illegible] March 25th.—Mountainous [illegible] of powdered soil [illegible] smothered [illegible] eastern Colorado and nearby portions of Kansas and Oklahoma Monday burying wheat fields and pasture lands, fences and farm machinery.

It was the 18th consecutive day of howling gales and blinding dust and authorities estimated damage of "many millions of dollars."

No longer [illegible] farmers find the storm a [illegible] It has become a roaring [illegible] their existence, [illegible] erasing the [illegible] means of [illegible] they have salvaged from [illegible] successive years of extreme drought.

An exodus [illegible] of residents of the stricken farm areas has been started.

Hubert L. Collins, [illegible] government statistician, said thousands of acres of [illegible] land would be useless for farming and grazing for [illegible] years [illegible] as a result of the storms.

Collins predicted on the basis of the present [illegible] complete crop failure [illegible] the history of the western plains." He said he referred to Eastern Colorado and [illegible], western Kansas and Nebraska and the Texas and Oklahoma panhandle sections.

[illegible]

F. K. Reed, federal statistician [illegible] which last year [illegible] 000,000 bushels was 15 per cent of normal.

Dust covered feed is a menace to the health of farm animals. In some sections cattle have refused to eat what grain feed they can find because of the dirt and sand.

VICTIM OF IMPOSTOR IN U. S. ALBERTAN SEEKS SON VAINLY

J. M. Tatosky [illegible] Alta. [illegible] Myrnam, is home again after travelling to Chicago to meet his long lost [illegible] to find that the [illegible] who had been corresponding with him and who had been receiving his money was an impostor.

The alleged impostor, who is charged by United States federal officers with taking advantage of a father's [illegible] for his son whom he wanted [illegible] Bates. He is held [illegible] in default of $5,000 bail, at St. Paul, Minn., under the direction of A. A. Wicht, postal inspector, who alleges use of the United States mails to defraud.

Mr. Tatosky advertised last December for word of his son, and on January 1 received from Chicago a letter signed "Joe Tatosky." It said that the writer was destitute, starving and sick.

The father quickly sent money. On two more occasions he sent money, $300 in all. On the fourth request for money he went to Chicago.

"My coming was a surprise to him," Mr. Tatosky said on his return here. "Instead of meeting my son, I met an impostor who had been receiving my money. He also received money from my relatives in Chicago whom I had asked him to meet."

Bates has been arrested 13 times in the United States and has served four penitentiary sentences. The offences include larceny in Oklahoma, [illegible] Michigan, and horse stealing in Nebraska.

The accused was reared in an orphanage at Topeka, Kansas, and approximately 12 years of his life have been spent behind prison bars.

Bates is being held at St. Paul for presentation of his case to the federal grand jury. Inspector Wicht has announced that as a result of the [illegible] actions he will seek to have him sentenced to life imprisonment under the provisions of the Baumes [illegible] an.

ABERHART CONVINCED CITY WILL FAVOR HIS PROPOSALS

Calgary, March 25th.—Social credit party would elect four out of six Calgary members of the legislature according to returns of a recent straw vote, William Aberhart, Alberta Social Credit leader, declared in a speech here Sunday. He said that the results of a straw vote in Calgary showed 20,367 persons willing to vote for Social Credit, 672 persons favorable to the idea but holding a party preference and only 602 definitely opposed.

Mr. Aberhart said that 80 per cent of the organizations voting on the invitation of the government to have him draft a plan of Social Credit for Alberta were opposed to him accepting at this time.

Some thought that if Mr. Aberhart were to draft such a plan, he should submit it to the next government, not this one with its term expiring in June.

Mr. Aberhart said he had found correspondence with Premier Reid, relative to the government's invitation very confusing.

He warned his followers not to think of the $25.00 a month dividend as the only thing. "Let us make life a real thing," said Mr. Aberhart.

THE CLASS OF 1885

(Continued from front page)

bullion, Edmonton had its usual celebration on July 1st that year. Foot races and horse races provided most of the programme. The mile race was won by a horse named Sorrel Tom and the half mile race by a horse named Rorry, both horses having Tommy Lauder up. Mr Thomas Lauder, who was one of the most popular jockeys in the west, still lives in Edmonton.

One of the great [illegible] of the summer was the arrival of the Hudson's steamer from Prince Albert. That summer [illegible] arrived with freight and passengers, the North- [illegible] the Northwest on July 31.

In 1885 [illegible] were in the low grades [illegible] happiest time we spent [illegible] under Mr James Ma[illegible] was our principal when the second room was added. He gave [illegible] in most of the [illegible] to memorise [illegible] ers of England [illegible] we would have singing and recitations, or a spelling match. Mr Martin taught [illegible] Hee, Men of Harlech [illegible] Row, Row, Row Your Boat, [illegible] Charlie now, and many others.

Some of those who would recite and sing were Robena Henderson (Mrs. Wm. Wilson Innisfail); Annie Robertson (Mrs. Dr. J. D. Harrison); Eliza McKernan (Mrs. R. Turnbull); Eliza McDonald, (Mrs. Duncan McLennan); Howard Cameron and James Ross. [illegible] used to bring down the house when he recited, "The Boy Stood on the Burning Deck" and "Taffey Was a Welshman, Taffey was a Thief."

At one of the first concerts held in the school after the second room was added a short play was put on by Mr Donald Ross, one of the trustees, and Mr Harry Anthony. Mr Anthony was shown as suffering from an illness, falling on the floor and becoming unconscious. Mr Ross tried several kinds of restoratives but without success. He walked up and down the stage in an agitated manner wondering what to do. At last Mr Ross found an empty whiskey bottle, which he held to Mr Anthony's nose. Mr Anthony came to life right away.

Mr Martin who was very patriotic, taught us to respect Queen Victoria and British institutions.

Of the class of 1885, numbering about fifty, forty are still living, fifteen in the city of Edmonton, fourteen in other parts of the Province and eleven in other Provinces and in the Old Country.

LAKESHORE

first prizes at cards and Myrtle Burrows and Ralph Tuerondine got the consolations.

Mrs Murray served a sumptuous lunch at midnight to which the young stors did full justice.

Mrs Leslie Jones is visiting relatives at Camrose this week.

Grade marks on honey containers are required only in respect to honey moving from one province to another or out of Canada. The grades of honey in the order of quality are No. 1, No. 2, and No. 3. Within the grades are different classes designated as white, golden, amber and dark.

FIRES FOUR BULLETS— KILLS FOUR BEARS

Four bullets were all that were needed by this farmer to bag four bears, and he got them all while standing in one spot.

Farmer Wagner, Pierceland, Sask., east of Cold Lake, became annoyed by bear tracks around his buildings, followed them and found the bear's den.

He waited for an hour and mommy bear came out with a two-year-old offspring and two yearling cubs. Farmer Wagner fired four times and four bears dropped. The mother bear weighed 575 pounds and the pelt measured seven feet, six inches.

IMPERIAL EX-SERVICEMEN TO HOLD RE-UNION

It is the intention of the Imperial Ex-servicemen in the Province of Alberta to hold a Re-union and Conference at Sylvan Lake some time in June of this year. The idea is to foster a better understanding of the Imperials and their needs; also to present concrete proposals to the Canadian and British Governments, through the existing ex-servicemen's organization.

Imperials desiring to attend should register early so that reduced fares and billeting arrangements can be made. Write Canadian Legion, 310, 7th Avenue West, Calgary.

GRAIN BOARD LEGISLATION DELAYED

The illness of Premier R. B. Bennett is delaying the presentation in parliament of the Grain Board legislation. The Premier desires to father the legislation in the Commons and as he will not be back before the middle of April nothing will be done until then. It is understood that Mr. Bennett proposes to endow the Grain Board with all the powers the Dominion government can give.

Wanted—At once, somebody to clear, break, and cut brush either by hand or power, 60 acres of land in Roundhill district. Growth is light willow with few odd poplars. Apply to the Mercury Office.

FOR SALE—Several purebred Yorkshire sows to farrow April 1st. Apply W. F. H. Swinton, Box 20 Tofield.

FOR SALE—New and second hand Singer Sewing Machines. Expert repair work done on any make of machine. Leave your orders with the Tofield Mercury or write H. Martin 9108—106 St. Edmonton.

MINUTES OF STATUTORY MEETING M.D. BEAVER LAKE

The statutory meeting of the M.D. of Beaver Lake was held at Ryley, Wednesday, March 13th and was called to order by Reeve Lucas at 10:25 a.m.

All councillors were present.

New councillors Lucas, Hillerud and Fane took their oath of office.

E. A. Moen was elected Reeve.

Wm. Lucas was elected as deputy reeve.

Medical Health officers Dr. McPherson, Dr. Strilchuk and Dr. Griffith were re-appointed.

Patriquin and Johnson were appointed auditors.

E. A. Moen, Wm. Lucas and J. S. Kubin were appointed as a hospital and relief committee. The secretary was appointed Mothers' allowance inspector.

The secretary was also appointed assessor.

A motion was adopted whereby all schools in the District will be requested to have children vaccinated and inoculated against small pox and diptheria.

Applications for seed grain were tabled until the April meeting.

The following rates were set for labor:

Man and four horses, $5.00 per day.
Dragging 40c per return mile.
Single man $2.50 per day.
Foremen, $3.00 per day.

All labor to be credited to municipal taxes only.

Moved by Mr. Lucas that the municipal mill rate be struck at nine mills.

Moved by Mr. Chetney that we allow ratepayers to work out $10.00 per quarter of their municipal taxes.

The following mill rates were struck for schools.

Amisk Creek 10; Anderson 12; Bathgate 9; Beaver Lake 11; Ingram 9; Nilsemon 15; Marioal 11; Shaw 9; Solberg 5; Talbot 8; Ukraina 9; Unity 12; Vermilion Valley 12.

The Reeve and Secretary were empowered to borrow not over $10,000 for municipal purposes and not over $27,000 for schools, with the object of paying all school requisitions in full.

United Church Concert Much Enjoyed

The concert and play sponsored by Group 2 of the United Church Ladies' Aid on Friday, March 29th, was quite a success.

The condition of the roads kept quite a few away but notwithstanding there was a fair attendance. The Rev. D. K. Allan acted as chairman and spoke words of encouragement for the enthusiasm and energy of the women folk. The singing of the Bardo male choir was appreciated and well received. They did much to enrich the programme. Indeed all the items on the programme were of an excellent order and heartily applauded by the audience.

Mrs Biernes acted the part of Aunt Sally perfectly, and the play held the attention of the audience to the very last. It was well acted.

"The Quin[illegible]" scored a huge uproarous [illegible]. It was a splendid portrayal [illegible] famous Dionnes.

Mr and Mrs [illegible] entertained the members of the male choir and others at the close.

The complete program is as follows: Remarks by the chairman; Selection by Bardo Male Chorus; Male Quartette, Reading, Miss Lola Wilson; Selection, Bardo Male Chorus; Play, "Aunt [illegible]"; Violin solo, Mrs [illegible]; Solo, Mr. Broughton, Selection, Bardo Male Chorus; Male Quartette, Bardo Male Chorus; Reading, Mrs Piecott; Bardo Male Chorus; Sketch, "The Quintuplets," Bardo Male Chorus; God Save the King.

LAKESHORE

* * *

Miss Grace Mackinnon was the guest of Mrs Elgin Seale over the week end.

Mrs George Francis entertained Mrs T. D. Ferguson, Mrs Graham and Mrs Phillips on Thursday afternoon of last week.

Neil Phillips returned from Vancouver on Tuesday evening after spending the winter there taking a course in Diesel engineering.

Mr and Mrs. George Francis and family spent a few days last week at the Jas. Francis home.

The U. F. W. A. will meet with Mrs. Jim Francis on April 11. The quilt is to be stitched, so please bring thimbles.

Farewell Party

On Thursday evening last in the curling rink the Tofield younger set gathered to bid farewell to their friend, Mr. Cliff Stutzman, who left on Monday evening's train enroute to Kansas, U. S. A.

The evening was taken up with dancing with about fifty to sixty couples present.

Lunch was served at midnight by the girls, after which Mr. Dan Purcell presented Cliff with a handsome desk fountain pen. Dan in a few well chosen words said that we were all sorry to see Cliff go and that he would be sadly missed in the town's athletic endeavors in which he took an active part. We were all sorry to see him leave and all wished him the best of luck in his new home.

Clifford then responded and thanked those present for the party and for the lovely gift. He said he would never forget his many friends in Tofield.

Everyone then joined in the singing "For He's a Jolly Good Fellow."

[illegible] Cliff as he [illegible] filled in the Tofield [illegible] pecially in the realm of [illegible]. He took an active part in [illegible] basketball and hockey and could always be counted on to do his part like the true sportsman he is.

The very best wishes of his many friends in Tofield and district go with him to his new home.

THE MODERN FARMER

There is no question that the farmer's occupation is a skilled one. Many city dwellers have little idea of the amount of skill and detailed knowledge necessary for success in farming. This skill must take several forms. There is the manual dexterity and mechanical sense needed for operating both ordinary and modern farm machinery and the knowledge required in dealing with horses and stock. And above all there is the judgment which decides the right moment to carry out this or that operation on any particular area of soil. The degree of forethought and skill demanded is much higher than is expected of the ordinary recipient of the basic wage for unskilled labour.—From the report of the Royal Commission on the wheat industry in Australia.

Local & Personal

Bees and Bee supplies. Send for price list. H. W. Love, Irma, Alta.

Among those who visited the city for the week end are Miss L. Ross, Mr. H. Robinson and Mr. G. P. Thomas.

Mr and Mrs Hannan of Camrose spent a day in town last week.

Miss Muriel Malcolm entertained a few friends to dinner Sunday evening.

Miss [illegible] Looney spent the week end at her home in Holden.

Mr Clifford Stutzman left on Monday evening for Kansas U. S. A.

Mrs. Bert Swift and little son are visiting friends and relatives here.

Miss Agnes Johnson returned to Falls [illegible] after spending several months in Tofield.

In a Way of Speaking

In a way of speaking, the buying public owns every retail store in town It pays the rents and salaries and all the other costs of our stores in our town. It informs the owners of these stores what to buy and what to sell. And it demands from retailers a communication service—meaning news of what retailers have in stock, and what their prices are. And of course it does most of its business with those retailers who report to it regularly and fully—by the agency of advertisements in our newspaper. And if any retailer says—in effect—"I'll not give you—the real owners of my business—any information about my business," then the buying public says—in effect—"Right you are! As for us, we shall go in largest numbers to those retailers who communicate to us regularly and adequately via the medium of our local newspaper."

This way of putting it is not just fanciful—it is a stern fact. Retailers who decline to maintain communication via means of the newspaper which it reads lose business to those who are faithfully communicative.

Some retail business is languishing today—unnecessarily. Its attitude to the public is wrong. It says—in effect—to the public. "You come and find us," and the public attitude is: "You tell us about your business and your merchandise. You are our employee. Report to us regularly and adequately on how you are serving us. If you convince us that you are our faithfull and efficient servant, we will keep on employing you, and will pay you well"

The way of making a business grow and making it healthy is as plain as the nose on one's face. It is the way of maintaining a steady communication relationship with one's employers— via the one effective and economical agency—the advertising columns in the

THE MERCURY

CREAM AND CUSTARD PIES

At this time of year when many fresh fruits are out of season in Canada, cream and custard pies will undoubtedly be frequently made in homes where pie is a favourite dessert When serving either cream or custard pie, both of which contain milk and eggs, there is the satisfaction of knowing that pies of this type will add materially to the nutritive value as well as the enjoyment of the meal The following recipes are recommended by the Dominion Department of Agriculture

Cream Pie

1-2 cup sugar 2 egg yolks
1-3 cup flour 1 tbsp. butter
1-8 tsp. salt 1 tsp. vanilla
1-2 cup cold milk 2 egg whites
1 1-2 cups hot milk 3 tbsp.
Pinch of salt fruit sugar

Mix together the sugar, flour and salt Combine with cold milk. Stir into hot milk and cook in double boiler about 10 minutes, stirring constantly. Beat egg yolks, combine with a little of hot mixture and add to mixture in double boiler Cook 2 minutes Remove from heat and add flavouring Pour into baked pie shell. Beat egg whites until stiff, add the sugar gradually and spread the meringue over filling Bake in slow oven (325 degrees F.) about 15 minutes or until delicately browned

Chocolate Cream Pie

Follow recipe for Cream Pie Melt 2 squares unsweetened chocolate, grated, with the milk Beat with dover beater Use 3-4 cup sugar

Coffee Cream Pie

Follow recipe for Cream Pie Add 3 tablespoons coffee to the milk and bring to the boiling point Let stand 10 minutes. Strain.

Butterscotch Pie

Follow recipe for Cream Pie, increasing butter to 2 tablespoons, and using 1 cup brown sugar Melt butter and blend with sugar, and add to hot milk

Fruit Cream Pie

Follow recipe for Cream Pie. When filling is cooked, add 1-2 cup chopped dates or 1 cup chopped fresh or cooked fruit.

Custard Pie

3 eggs 2 1-4 cups hot milk
1-3 cup sugar 1 tsp. vanilla or
1-4 tsp. salt few gratings nutmeg

Beat eggs slightly. Add sugar, salt and flavouring, then milk gradually. Strain and pour into pie plate lined with pastry. Bake in hot oven (450 degrees F.) for 15 minutes, then reduce heat to 325 degrees F. and bake until custard is set—about 25 min.

Fruit Custard Pie

Follow recipe for Custard Pie. When pie has cooled, spread sweetened sliced fruit over filling and cover with whipped cream.

Caramel Custard Pie

Follow recipe for Custard Pie, melting the sugar in a frying pan, then adding it to the hot milk.

Apple Custard Pie

Place a layer of slightly sweetened apple sauce, flavoured with cinnamon, in bottom of pie shell. Pour over this the custard mixture.

Coconut Custard Pie

Follow recipe for Custard Pie, adding 1-2 cup shredded coconut to custard mixture.

Maple Custard Pie

Follow recipe for Custard Pie, using 1-2 cup maple syrup or grated maple sugar instead of the sugar.

Date Custard Pie

3-4 cup chopped dates
2 cups milk
2 eggs
1-4 teaspoon salt
1-2 teaspoon vanilla or
1 teaspoon lemon juice

Cook dates and milk together in top of double boiler until dates are soft. Rub through sieve. Combine with beaten eggs, salt and vanilla. Pour into pie plate lined with pastry and bake as Custard pie.

JAPAN SELF-SUFFICIENT IN WHEAT GROWING

Three years ago Japan commenced a five-year plan to attain self-sufficiency in wheat production. The principal feature of the plan was the subsidizing of wheat growers. The wheat growers responded so enthusiastically that the condition of self-sufficiency has already been reached. This has occasioned considerable concern to authorities, according to Canadian commercial attache at Tokio. The plan is being revised and greater emphasis being laid on improvement in quality instead of increased production In 1934 Japan's wheat crop reached the record figure of 46,875,740 bushels as compared with 39,744,663 bushels in 1933. This crop relieves Japan of any shortage of wheat for local requirements. A certain volume of wheat must be imported in order to produce a higher gluten flour for import. The commercial secretary estimates the total import requirements for the year at three million bushels.

Japan has among its industries quite an extensive flour milling group, the total daily production capacity being 40,000 barrels of flour. The Nisshin and Nippon company corporations are the biggest flour milling concerns, the former being able to turn out 22,300 barrels a day and the latter 17,700 These companies are the dominant ones in the Japanese flour milling industry and are controlled by the great commercial houses of Mitsubishi and Mitsui. Owing to the nature of the flour milling process used in Japanese roller mills, it is absolutely necessary to use at least 10 per cent of foreign wheat The Japanese are normally rice-eating people and wheat flour in Japan is used mostly in the noodle manufacturing industry which takes nearly 80 per cent of the total consumption. A considerable quantity of flour is exported, last year's total being 5,844,133 cwts. as against 7,001,600 cwts for the previous year, a reduction of 16 5 per cent This reduction was due to a decline in shipments to Dairen where Australia took considerable portion of the market

One time Canada supplied Japan the greatest percentage of imported wheat However, in 1930 when Australia inflated her money, Canada lost the greater part of the Oriental market. Monetary inflation gave Australia a 40 per cent advantage which Canada could not meet. The last two years the percentage of each country's share of wheat imports into Japan were as follows:

	1931	1933
Australia	64.7	77.4

STYLE INFLUENCE

Beauty of exterior appearance and quality of interior appointments have never been more evident in any car yet built by Chevrolet than in the new 1935 Master models

Credit for the greater part of this emphasis on appearance and beauty is ascribed to women's increasing influence in making the selection of the automobile. The mechanical perfection of the automobile gave women the confidence in their ability to drive and drive well. Mechanical features are no longer a mystery to the majority of feminine motorists. But whether or not mechanical features are a more potent factor in selling the ladies, remains in doubt. Beauty in appearance and quality of appointment transcends every other factor in appealing to the feminine buyer.

Chevrolet's 17½ to 1 steering ratio—making it easy to turn the car—was incorporated for the dainty feminine hand. The powerful cable-controlled brakes which respond to the lightest touch of the pointed slipper, were designed for the light feminine foot. Likewise it was for the ladies with their delicate gowns that wide doors and spacious interiors were designed.

In the expansion of Canada's foreign trade, Canadian tobacco has established a market in Sierra Leone, British West Africa, where it enters under Imperial preference of eight cents per pound.

TROUBLES OF AUSTRALIAN WHEAT FARMERS

Debt-ridden, hampered by inadequate markets, and troubled by drouth, grasshoppers and weeds, the wheat farmers of Australia have much the same troubles as those of Western Canada Recent publications from "down under" recapitulate the vicissitudes of the wheat farmer in that great island-continent

An estimate of the private debt of Australian wheat farmers in one paper presents the figure of a billion and a half dollars While compromises and debt adjustments have been made the problem still presses heavily and seems to be insuperable.

When Australia raises a two hundred million bushel wheat crop it is considered unusually large The 1934 crop was but 135 million bushels and even at that difficulties are experienced in securing markets for the surplus. One farmer stated at a meeting at the Victoria Chamber of Agriculture that the prospects were that Australia never again would export wheat like it once did and wheat is no longer a main industry. France, Germany and other European countries which once imported large quantities of wheat now buy none whatever from Australia and these markets appear to be lost for good. Another farmer said the trouble with the wheat growing industry was that the other spoon-fed industries were parasitically feeding on the wheat growers

The skeleton weed, a species of which Western Canada is free, is causing much anxiety in sections of Australia This weed is a biennial which is spreading rapidly in many regions and the failure of attempts of scientists to cope with the menace has alarmed the country. The president of the Farmers and Settlers Association of New South Wales recently said. "The weed is completely out of hand and has become a national menace Despite years of experiments scientists in this state have failed to evolve a reasonably cheap method of control The time has come to offer some big reward in order to interest scientists abroad. I would suggest the sum of $500,000."

Other matters that are interesting Australian wheat farmers are the building of terminal elevators (called silos in Australia) and also a plan to standardize railway gauges. There is opposition to both schemes. The grain companies, the companies who sell bags and the men who do the manual labor of loading the bags on ships are opposed to the terminal elevators with their mechanical methods of grain handling Each state has its own railway gauge and some cities are opposed to standardizing the gauges for fear of losing trade. The Land says: "As things stand it seems certain that the question of unification will be decided by the consideration of what effect it will have on this or on that bloated capital. The Gordian knot of inter-state jealousy and city selfishness can only be overcome by the Commonwealth taking over all the railway systems and running them in the same way it does the post and telegraphs."

CONVICTED OF SELLING IMITATION MAPLE SYRUP

Alexander Aubin, of Ottawa, pleaded guilty in the Ottawa Police Court on March 25th to a charge of selling a table syrup imitating maple syrup in old wine bottles on which the nature and origin of the syrup was not clearly indicated.

Magistrate Strike imposed a fine of $10 and $2 costs or in default three days in jail. The charge was laid by the Fruit Branch, Dominion Department of Agriculture under Section 3 of the Maple Sugar Industry Act and Regulations which states:

3. No person shall manufacture for sale, sell, or offer, expose or hold for sale any sugar or syrup resembling or being an imitation of Maple sugar or maple syrup, which is not pure maple sugar or pure maple syrup, unless the nature and origin of such sugar and syrup be clearly indicated

ECONOMY WAVE AT THE CAPITAL—

THE GUNS of economy artillery have been trained on the government within parliament assembled and the members have been literally caught between two fires, which is a dangerous position for any craft desiring to remain afloat.

First came Mr Howson's emphatic demand for a substantial decrease in the amount paid to sitting members, cabinet ministers and the premier. A rather stony silence greeted the economy proposals by the leader of the liberals, but in the vote that followed the motion, it was obvious the members were of the opinion that they still needed all that was coming to maintain a living according to standards to which they were accustomed. It is not surprising that the members voted this way. Few people voluntarily reduce their income, though it has been done, and it is a rare event for a political group to reduce their income **upon pressure from the opposition**. Great capital of this event was made by the liberals, but this capital should be tempered by the knowledge that as at present constituted the Liberals and U.F.A. are as two armed camps, and any suggestion, even a good suggestion, coming from either one is vigorously opposed by the other. As to whether the salaries of sitting members should be reduced, it is our opinion the government missed a wonderful opportunity to find favor with the people by not doing this, one or even two years ago. If we remember aright the conservative leader broached this subject in the early days of the present parliament but nothing came of it. Political strategy involving self sacrifice appears to be a lost art.

The other volley fired at the government came from close quarters, a cabinet minister, Hon. Mr. Hoadley making the proposal that the number of members be cut from some sixty-odd down to twenty. He is also of the opinion that these twenty members should be elected by proportional representation, which automatically throws into the discard the established party system. He would have the legislative body meet once a month and further suggests a salary of $500.00 for ordinary members with additional amounts to heads of departments and the premier.

As regards Mr. Hoadley's proposals to lessen the number of members, this same proposal was made many, many months ago. And even the suggested election of members by proportional representation is not new. Mr. Hoadley's reference to it is probably a combination of political strategy and a sincere belief that a more tranquil form of government is needed at the capital. The party system has many advantages, but it is liable to much abuse. The measure of advantages derived from its use and the measure of the abuse with which it is assailed, is precisely the measure of the intelligence of the legislature. As to whether a person favors a government along the lines of a glorified council or a parliament along party lines, depends to a certain extent on how important as citizens of Alberta we deem ourselves to be. Obviously, in spite of the advantages of the party system, it is unnecessary and unwise to extend the system to city, town and rural municipal councils. Consequently, it can be argued with reason that if it is unwise and unnecessary within town and city councils, it is equally unwise and unnecessary for the province to use the party system of government. But suppose we work the other way. If the province is all the better for a non-party system of government, why not the dominion? So it would appear that unless one is opposed to the party system in any way, shape or form, it is just a question as to where to stop using it.

Professor Wallace of the University of Alberta when speaking recently on political science is reported as follows:

"Despite defects in the party politics system, it appears to be the only way of organizing the public at large on matters of national importance, said Dr. R. C. Wallace, president of the University of Alberta, speaking at the university to students of the Political Science club.

Dr. Wallace, who said that he spoke as a man outside the system, talked on "Politics and Public Affairs."

He declared that consistently efficient administrations dull public interest and this is not good, having within it the seeds of decay, whereas the social order must progress and can do so only by the synthesis of opposing doctrines.

At the same time, the speaker deprecated the frequent changes in administrative offices and the resultant waste of good experience secured by leaders during their brief terms.

Dr. Wallace declared himself as favoring a future system whereby members of parliament would be elected on the basis of their own individual policies, the group elected selecting from its number the departmental heads who would be responsible to parliament as a whole rather than to party. In this way, members would be free from rigid party lines on various questions as they came up, he said."

Our opinion regarding reducing the House to 20 members devoid of party affilliations, is that the suggestion has come too early or too late. At the present moment a change or attempted change in our financial system is occupying the attention of the public and this is of such far reaching importance, that the question of party or non party government is dwarfed by comparison.

CANADIAN POULTRY APPRECIATED

The following is an extract from "The Fish Trades Gazette," London, England, March 2, 1935:—

"There is one very good point this year when buying Canadian turkeys or chickens without inspecting them whatever grade they are, or shall I say, whatever grade is put up to you for sale, you can rely on the marking, as all goods are under Canadian Government supervision and turn out according to what they are represented to be.

"Since writing about ducks and ducklings in these notes of February 16, I have seen some of the finest Canadian ducks that have ever been shipped to this country. These Canadians are quite as good as the Long Island ducks, which as you know are the produce of the United States In fact the Canadian packing is far superior, being graded as 12 and six per case, which, as the trade is at the present time, is a very handy size for any tradesman. The quality is excellent as they are ducklings of all sizes and cannot fail to please the most particular. Also, in my opinion, they will make a vast difference to the sale of the States ducks, as, if they have come to stay and the shipments can be relied upon, the demand is bound to increase as the season advances As we all expect London to be the first on the list for a bumper time as far as poultry is concerned, these birds should hold first place amongst the imported ducks They are Empire produce, which will go a long way when displayed for sale in the poulterers' shops, as no doubt they will be when better known."

WHAT IS A WORLD WHEAT PRICE?

The English millers claim the Dominion trade agreements are being damaged by Canada's action in not selling wheat at world prices. The Canadian Milling & Grain Journal points out, and then it goes on to ask the question: Are not Canadian wheat prices world prices? Where is there as good quality wheat for less than Canadian? What is the world price of wheat to-day? Where does it come from?

France is exporting wheat at a price that seems altogether too low and the farmers are being subsidized by the French government and the export price therefore is not a world price. Argentina is trying to get France out of the English market and out of the export market Right or wrong the United States is presently accepting the price they can get for their wheat in England but this does not make the world price for Canadian wheat

Some European countries are asking a still higher price than Canada for their wheat. Is this to be considered as the world price? There is no international market relation Is it the price English millers are asked to pay for Canadian wheat that is causing them to do so much kicking? Or is it because they consider there is a slump in their trade coming and that their substantial profits are going to drop before long? They have had a long run which cannot last forever Lately there have been mergers on a large scale of English milling companies and stock revision until the English flour milling business resembles a national trust During these years the mills have made large profits, the quality of English bread has gone down There are some English importers who still pay the Canadian price because of the superior quality of Canadian flour English mills have gone along without worrying about the price of Canadian wheat, reducing the quality of their flour by using far more European or Argentina wheat, thus producing inferior bread They have been content as long as they were assured of their low-grade wheat supplies But now we hear a cry that comes from some English millers who realize they will have to come back to Canada for wheat before long as there is a distinct demand for an improved loaf They tell the world Canada is cruel and heartless and is holding up the price of the people's bread. The Canadian farmer is told that he has lost his market. Have the English millers been waiting to make the world price the Argentine price and then come to Canada offering this as the world price? Could we sell our wheat at a price ruinous to our farmers because English millers cannot make so large a profit if they pay what is being asked at present for Canadian wheat?—Wheat Pool Budget

---

The available supply of Canadian flax for the 1934 season sold well in Northern Ireland, particularly during the month of October. At the same time, the Free State Government was in the market for flax seed supplies from Canada but could not obtain them except from Northern Ireland sources

REED CANARY GRASS

(Experimental Farms Note)

Information is frequently sought concerning an agricultural grass suited to low-lying poorly drained lands This grass must be hardy enough to withstand the rigorous conditions of Western Canada and capable of producing satisfactory crops of hay or pasture These qualities are found in reed canary grass Once it is established, this grass will thrive where there is free water near the surface of the ground. It will withstand considerable flooding during the dormant period Usually however, it is injured by deep stagnant water during the growing season Further, it is not suited to alkali soils

Strangely, while it is a moisture-loving plant reed canary grass will withstand hot, dry conditions It will be productive on good upland soils provided there is plenty of moisture for spring and early summer growth At the Dominion Experimental Farm at Indian Head, during 1934, when moisture conditions for crop growth were well below normal, reed canary grass on good upland soil yielded as well or better than the best adapted upland grasses However, it is not an upland grass It is a coarse, tall growing, creeping-rooted perennial that will live for many years once it is established As it shatters readily, seed is collected with difficulty and is therefore somewhat expensive

Reed canary grass is an excellent pasture grass starting growth early in the spring, continuing well into the fall and furnishing a great deal of succulent palatable forage Owing to the fact that it is usually sown rather thinly it takes several years to form a sod fit for pasturing During this period it is usually best to cut the crop for hay The quality of the hay will be inferior if it is cut after the heads make their appearance. Frequently a second crop of good quality hay may be obtained

The seed is small and should be sown shallow [illegible] satisfactory. [illegible] account of expense [illegible] frequently used in which case it takes much longer for the grass to form a satisfactory sod. [illegible] are suitable. The [illegible] should be thoroughly prepared in the fall and the seed sown early the next [illegible]. It is likely to be [illegible] after all [illegible] to past. If [illegible] ground has to be prepared [illegible] should be delayed [illegible] weed growth has been satisfactorily controlled. A little thought and care at this stage will ensure success.

ALBERTA VOTE BEFORE JULY 11 ESSENTIAL, OFFICIALS BELIEVE; MID-JUNE ELECTION LIKELY

A general election must be held in this province by July 11 next

That was the opinion expressed in official circles at the parliament buildings Monday

Some confusion has been caused by suggestions that there are various legal angles which would make it possible for the election to be postponed indefinitely

As Premier Reid has made the definite statement that no legislation will be brought down with a view to extending the life of the present house, it is regarded as a certainty that the election will be held around June 15 to 20, as has been predicted time and again Color to this is given by the fact that the U F A nominating conventions are being called in various parts of the province

Here is a specific provision in section 5 of the Legislative Assembly act:

"Every legislative assembly shall continue for five years from the date of the return of the writs for the election and no longer, subject to being sooner dissolved by the lieutenant governor-in-council"

The last general election was held on June 19, 1930 Under the Election act 10 days are allowed within which the deputy returning officer makes his declaration of the result of the poll Another ten days then are allowed for the purpose of giving an opportunity for applications for recount This means that the writs mentioned in section 5 of the Legislative Assembly act, must be returned to the clerk of the executive council within 20 days of the date of the general election

As that date, allowing 20 clear days was July 11, 1930, the general election must be held, therefore within five years or by July 11, 1935

In some quarters there are suggestions that the election date counts from the time of the return [illegible] Beaver River constituency in August 1930, following the general election which would bring the election into August.

Examining this suggestion, government officials pointed out Monday that the act refers quite clearly to the writs of general election and not to the "writ" arising from a [illegible] byelection

Hon. J. F. Lymburn attorney general had no comment to make when queried Monday, remarking that he might have something to say later.

[illegible] Hunt K.C. clerk of the executive council, declined to express any opinion as to when the election must be held

Asked when the five year period [illegible] the Legislative Assembly act would end, Mr Hunt said it evidently would be July 11 1935

W. R. Howson K.C. Alberta Liberal leader declared that in his view there was no doubt that the election had to be held by July 11

TURRET TOP BODY BY FISHER
BLUE-FLAME ENGINE
KNEE-ACTION RIDE
CABLE-CONTROLLED BRAKES
FISHER NO DRAFT VENTILATION

5 famous FEATURES

and you get them Only in the STYLE and QUALITY Car in the Low-Price Field

FOR 1935, the Master Chevrolet offers you five famous modern features, not one of which can you get on any other car in Chevrolet's price class!

"Turret Top" Fisher body—the first real all-steel body ever offered in the low price field! Knee-Action—for safety and comfort! Blue Flame Engine—the valve-in-head type used in costly cars! Weatherproof Cable-Controlled Brakes! Fisher No-Draft Ventilation!

When you can get all these features in only one low-priced car . . . see and drive that car before you buy! Call in today at our showrooms

DEATH OF HITLER PROPHESY FAILS

London, April 1 — Mysterious warning that death was imminent for Reichsfuehrer Hitler, reportedly made by a gypsy a month ago, turned out to be an April fool joke Monday for all concerned except possibly the London insurance companies. The underwriters were reported to have cleaned up several thousand dollars "easy money."

Several British firms trading in Germany were said to have decided to take out insurance after the gypsy story began to circulate.

SPRING PLOWING WANTED.—Man with outfit open to do spring plowing. Good plowman. Terms reasonable.—Apply to A. Lehman, Tofield. 12p

FOR SALE.—Or will trade for pigs, 12 or 15 black face ewes, four yrs old or younger; lamb the latter part of April. These are all good thrifty ewes.—C. R. Burchard, ¾ mile north of Creamery. Phone 1410, Tofield. 12p

FOR SALE—Victory seed oats. Germination test 97 per cent. Six good work horses, weight 1500 to 1600. One two-year-old pure bred Hereford Bull, with papers. Apply Ed. R. Kallal, Tofield. Phone 1015

FOR SALE— Used Bull Dog fanning mill.—good condition. A bargain. Also Viking fanning mills. ..Apply M. C. Hammond.

Wanted—At once, somebody to clear, break, and cut brush either by hand or power, 60 acres of land in Roundhill district. Growth is light willow with few odd poplars. Apply to the Mercury Office.

FOR SALE—Several purebred Yorkshire sows to farrow April 1st. Apply W. F. H. Swinton, Box 29 Tofield.

FOR SALE—New and second hand Singer Sewing Machines. Expert repair work done on any make of machine. Leave your orders with the Tofield Mercury or write H. Martin 9108—106 St. Edmonton.

SCIENCE FORGETS QUINTS; WHITE FROG NEW SUBJECT

New York, April 2 – An Albino pond frog, pale saffron-tinted specimen with bulging pink eyes, judged by scientists as a biological phenomenon of greater rarity than human quintuplets, is being studied at the American Museum of Natural History, it was learned today. The prized amphibian is kept under glass and fed upon delicate grubs raised in the laboratory.

Scientifically the almost-white frog is looked upon as a conspicuous mutation representing an almost diagrammatic step in the mechanism of evolution. It is of the species known as Rana Clamitans. Its natural coloration is a brownish green.

Dr. G. Kingsley Noble, curator of herpetology, said the frog was the first Albino specimen of Rana Clamitans he had ever seen.

NOT IN RUNNING FOR ELECTION, SAYS ABERHART

Calgary, April 1.—William Aberhart, founder-leader of the Alberta Social Credit league, will not run as a candidate in the provincial elections and he has no intention of seeking the premiership of Alberta, he said Sunday.

Discussing plans for the southern [illegible] convention of the league here next Thursday and Friday, at which the league will draw up a platform and decide whether it will enter provincial politics as a new party, Mr. Aberhart said:

"I shall gladly let someone else seek the premier's office. I am becoming more determined not even to run as a provincial candidate."

The prophet of a new economic era based on the principles of Major C. H. Douglas, said he hoped to reach a decision at this week's convention as to whether he will accept the invitation of the U.F.A. government to go to Edmonton and prepare a social credit plan for Alberta.

An enjoyable dance was held at the Variety Theatre on Monday last, the Edmonton Colored Syncopators furnishing the music. There was a fair attendance, mostly country folk, and an enjoyable time was had.

Members of the Tofield younger set wish to express their sincere thanks to the Tofield Curling Club for the use of the rink which they so kindly donated for the farewell party on Thursday night. Also they wish to thank the Tofield Ranger Orchestra for their services which they so kindly donated.

Canada supplied 20 per cent of the total wheat imports into Japan; Australia 55 per cent, and the United States 23 per cent. Canada is also the chief exporter of lead to Japan, as well as being a leading source of lumber, pulp, newsprint and zinc.

ERRATIC TRUCKMAN HAD TARANTULA IN HIS PANTS

Montgomery, Ala., April1. —A truck loaded with bananas bounded erratically down the street, finally coming to a stop against the curbing as Policeman Bill Collins raced up and bounded on the running board beside the driver.

"Who do you think you are, Sir Malcolm Campbell?" shouted the officer. Came the driver's quaking answer:

"Officer, I've got a tarantula in my pants."

Collins "operated" on the driver's pants with his knife and out dropped the big, poisonous spider.

A slap from the officer's blackjack killed the tarantula and Collins placed his summons book back in his pocket.

A little shaky, R. L. Hathaway of Pensacola went back to his drivers seat.

Large Number Attend Social Credit Meeting

MRS. W. W. ROGERS DELIVERS SPLENDID ADRESS

At the Variety Theatre on Monday afternoon a large number of country and town people assembled to hear Mrs. W. W. Rogers speak on the subject of Social Credit and in support of the social credit party which at the present time is in the making.

The chair was occupied by Mr. Johnstone Ferguson, who in a few brief statements introduced the speaker.

Mrs. Rogers wasted little time with preliminary remarks but briskly commenced her address and for two and a half hours commanded the keen interest of her audience which packed the hall and overflowed to the lobby. She was she said, pleased to see so many out on such a stormy day, as the last time she was at Tofield, only about two dozen attended the meeting. The question in many persons' minds was were there two systems of social credit, the Douglas system and the Aberhart system? To this she would answer, no. Major Douglas in his written works had only laid down general principles and these general principles had been studied by Mr. Aberhart and incorporated into a scheme adapted to the province of Alberta. In this scheme provision was made for a dividend to be paid each bonafide resident of Alberta over a stated age, probably 16 or 17 years. The dividend, she said, was possible because we were living in a machine age and with so much work now being done by machines, there was no room for many men and women in gainful industry. The plan was to make Alberta as a Company with every citizen a shareholder and dividends would be paid much as company dividends were now paid. Man power to-day was not important in the production of goods and if men do not work they cannot get purchasing power. Purchasing power is vitally necessary for recovery of a degree of prosperity and they proposed to supply purchasing power by paying dividends. It sounded like getting something for nothing, but was really the result of living in an age of plenty. The code of our fathers was that if a man does not work neither shall he eat, but those days are past and that doctrine was obsolete. The only money many men in the future will be able to get is what the state pays them. The machine has taken away their opportunity to work. The state, she said, must control prices of goods and must not allow prices to go up. William Aberhart has drafted an Alberta plan upon Douglas principles. Many people believed the chief friends of social credit were the unemployed and those close to destitution. This was not the case. Many business men throughout the province were behind the plan, believing it to be for the good of all. The man who had a stake in the country was as keen for social credit as those numbered among the unemployed.

The estimated wealth of Alberta was $2,406,000,000. Last year Alberta produced $237,000,000 worth of products which were sold both in and out of the province. To be a member of this company one must be a British subject and a bonafide resident and every day now many were taking out naturalization papers. Those who had been living in the country for years without becoming naturalized were now doing so.

Social credit dividends, said the speaker, were to be spent and she wished to emphasize that the $25.00 mentioned was a minimum amount. The speaker here turned to a chart and showed how the money would circulate outwards from the central clearing house to the people and through the channels of trade back to the clearing house again. She spoke at some length on banks and banking saying that the banks manipulated currency so as to make it plentiful or scarce as they wished.

In addition to the payment of dividends another feature of the plan was to provide interest free credit for farmers. Credit was, she said, merely a matter putting figures in a book, and that was what the social creditors planned to do, put figures in a book. The speaker was very emphatic on this point, stating that credit cost the banks nothing but the cost of paper and ink.

Speaking of big finance, she said the big financial powers controlled the world even to the extent of creating war when it suited their purpose. Allied to big finance were the armament manufacturers who were an international body. It mattered not whose sons were brutally butchered, the armament group and the big financial group profited anyway. It has been found out that during the last war armaments originating in a country were used against the men of that same country. It was known that while battles were raging and while other property was being ruthlessly destroyed, armament factories were spared. One general who refused to abide by this ruling and who destroyed enemy armament works was severely reprimanded.

She announced that a convention would shortly be held at Ryley where a number of men would be chosen from whom a candidate for this constituency would be chosen at a later date.

At the close of her address Mrs. Rogers was accorded hearty applause.

Local & Personal

Bees and Bee supplies. Send for price list.—H. W. Love, Irma, Alta.

The Anglican W.A. are holding their Easter tea and sale of daffodills on Saturday April 20, at the Institute rooms. Orders for Easter lilies will be taken by Mrs. Clutterham.

Mr. Sinclair arrived back on Wednesday morning after visiting at the coast for a short time.

Mr. and Mrs. Gravelle and family, formerly of Edmonton, have moved to the farm recently vacated by Mr. Tucker.

Mr. McLaughlin and Bud Hannan made a business trip to Camrose last week.

Mrs. Swift and Annie visited the city on Saturday.

Quite a number attended the dance at Ryley last Friday. A good time was reported.

Mr. and Mrs. M. McHeffey are visiting in the city for a few days.

Mr. and Mrs. Coutts visited the city over the week end.

Mrs. Bruce and Miss Gladys Denny were visitors to the city on Friday.

Mr. Frank Ball of Edmonton was a business visitor in town this week.

Mrs. Davies visited the city last week.

SCHOOL NOTES
by
I M E R

The Tofield High School Student's Union and grades 7 and 8 were favored with a lecture by Mr. R. W. Pinnott, on Friday afternoon, April 5th. He dealt with the different phases of life in Africa, education, the Zulu language etc. This proved most interesting and instructive to all.

Misses J. Brown and Eva Hay, representatives of the Ryley High School Debating Society accompanied by their principal met the executive of the Tofield Student's Union on Saturday, April 6, at the Tofield school. Plans were made for a forthcoming inter-school debate.

On Monday afternoon April 8, the Tofield High School students and teachers attended the lecture on Social Credit given by Mrs. W. W. Rogers.

SOCIAL HOUR CLUB MEET

The ladies of the Social Hour Club held their regular meeting on the afternoon of Thursday March 14, at the home of Mrs. P. D. McMullen.

The attendance was fairly good considering the sudden blizzard which hampered travel.

Mr. Genecki entertained by giving demonstration on marcels, much to the interest of all and especially to the four who secured the marcels.

On account of the attendance it was decided to postpone the Sunshine parcel until next meeting.

The guests at this meeting were Mrs. L. Gill, Miss Ethel Coumbes and Miss Elizabeth MacDonald.

INTERESTING VISITORS STAYING AT HOME OF MR. AND MRS W. KALLAL

Mr. and Mrs. Kunesh and two children of Honolulu arrived last week for a few days visit with Mr. and Mrs. W. Kallal of this district. Mrs. Kunesh is a sister of Mrs. W. Kallal. Mr. Kunesh who is Assistant Chief Engineer of the Board of Water Supply for the city of Honolulu is enroute to Cincinnatti where he will attend the American Water Works convention to be held in that city. An interesting feature of their visit is the reaction of their two boys aged 9 and 7, to the snow covered prairies. This is the first time they had seen snow or ridden in a sleigh. At first they were dubious about touching it wondering if it would harm them. Two short weeks ago they were amid the sun kissed pineapples of Hawaii and after their first surprise they were delighted to be able to throw snowballs in Alberta.

Mr. Kunesh says the depression was late in reaching Hawaii, economic conditions up to the last two years being very good. There is much Oriental labor there and rather strange to any general [illegible] high.

Mr. and Mrs. Kunesh and two [illegible] will leave on Tuesday enroute to the States. Mrs. Cabalek, the mother of Mrs. Kallal and Mrs. Kunesh, who has been staying at the Kallal home for some months will accompany them to the States.

LINDBROOK

Oh! Baby! What a spring! Well we won't dwell on that, guess you've all had quite sufficient of it.

Mr. Pointer has sold out his farm, implements and stock to Mr. Tucker, who "took over" last week. Welcome and the best of luck, Mr. and Mrs. Tucker and family from all your new neighbors.

Mesdames Scott and Whitely organized a farewell party at the home of Mr. and Mrs. A. Scott last Friday evening in honor of Mr. and Mrs. Pointer and Ann who are leaving shortly for the coast. An "overflow" crowd was present testifying to the popularity of Mr. and Mrs. Pointer. Whist was played, and then the "[illegible]" that collection that [illegible]. Then dancing and songs [illegible] the cover until the wee sma hours and then all joined hands around Mr. and Mrs. Pointer and sang "Auld Lang Syne" after which all dispersed wondering who's next? As it seems as if a migration Coastwise is in the making, and no wonder either after the weather we've been "enjoying" of late.

Word has been received from Mr. and Mrs. Thos Cookson who arrived in Vancouver O.K. It took them about four days, having to wait while some of the roads were cleared!

Mrs. Dyer of Edmonton, a former resident of Lindbrook has been the guest of Mrs. E. W. Hooper for the last few days prior to leaving for the coast.

A birthday party was given at the home of Mr. and Mrs. Sherlock in honor of Mr. Clark Lindgren. Cards and dancing were indulged in and all enjoyed themselves immensely.

Mr. Elmer Anderson has returned home from Rochester, Alta., where he has been employed the last few weeks.

Mr. and Mrs. F. Evans are staying with their relatives Mr. and Mrs. J. Bracegirdle at the Store here prior to leaving for the coast. The Coast! again, we wonder who's next and how many more are to go. Mr. Evans was farming up at Athabasca till a few weeks ago but sold out and is now a prospective British Columbian.

Mr. T. Gould made a trip to Big Valley, Alta., last week and returned bringing the balance of his effects by car via C.N.R.

Sorry the column has not been in evidence much of late the last few weeks but when one has a cold and is bucking the cold and winds and doing a job as interne in a lambs' maternity ward, well you can imagine it is a pretty "full" life.

MRS. SMOLIAK TO GO FREE

Mrs. Alex Smoliak, Myrnam housewife, will not face trial for the murder of her husband, killed by a bullet fired through the window of the Smoliak farm home on the night of December 29 last. The Bulletin learned Tuesday that the widow of Alex Smoliak, who was committed to stand trial at a preliminary hearing in Vegreville some months ago, will be released, the crown being convinced that evidence would not be sufficient for a conviction.

John Skrut, hired man at the Smoliak farm was sentenced to hang for the murder of his employer and is now awaiting execution in the death cell at Fort Saskatchewan jail.

UNITED CHURCH NOTES

The Young People of the United Church is holding its last meeting for the season on Friday April 12th, at 8 p.m.

The Easter Thank Offering meeting of the Women's Missionary Society of the United Church will be held at the home of Mrs. McCauley on Thursday April 18th at 3 p.m. Mrs. Allan will be the speaker for the afternoon. Everyone welcome.

On Sunday 21st—Easter Sunday—the glad message of the first Easter will be the theme of the whole service. The choir will render special music. At the close the sacrament of the Lord's supper will be observed.

On Sunday evening 14th April, the service in the United Church will be largely choral. The choir will render a theme, having as its theme the Easter message. [illegible] quartette [illegible]

CARD OF THANKS

Mr. and Mrs. P. C. Nicherson [illegible] many extended during their recent bereavement. Also for the beautiful floral tributes.

FRIENDS
of the . . .
FAMILY

Look at the packages on your pantry and bathroom shelves, and see what a multitude of brand names you recognize. Some of them have been familiar for years. You may have made the acquaintance of others only a few weeks ago. But even these are not suspected strangers. You have bought them confidently because they were advertised. And it is the same with your sheets and towels, your shoes and clothes, your electric appliances, the car in your garage—nearly everything you use.

Advertised products have a standing that commands respect. They are not nameless, but vouched for by responsible firms. The fact that they are advertised is in itself an indication that their standards of quality are strictly maintained, that they represent honest value.

As science and discovery go on, newly developed products are constantly being advertised—ready to help you save money and improve your standard of living. Every advertisement of such a product you read in your newspaper is a letter of introduction to a new and possibly useful friend.

It will pay you to read the advertisements in this paper. By doing so you will meet many choice products—worthy to become friends of the family. .

HEALTH
by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

FILTRATION

Almost complete and efficient filtration system is at work in every normal human body. The kidneys contain several thousand filtration units through which the blood flows in order that waste materials may be filtered out and any excess of one or other chemical removed so as to maintain the proper chemical balance of the body.

These filtration units may be disorganized by changes which occur in them. This disturbance of the kidney function is called nephritis or Bright's disease. Richard Bright was an English physician who first described this condition; this is why his name is associated with the disease.

There are several forms of nephritis but they may all go into either of two groups, acute or chronic. The acute form, seen in children and young adults, is due to an infectio, (germ causing an inflamation.) It is commonly seen following an attack of tonsilitis or scarlet fever.

Acute nephritis is recognized by the pallour of the patient with puffiness of the face and ankles. An examination of the urine shows that the kidneys are not able to do their work, and so waste material and an excess of fluid collect in the body. Acute cases usually recover under proper treatment. The most important item in treatment is rest in bed until the infection has cleared up entirely. Some cases pass into a chronic nephritis.

Chronic nephritis in early adult life is usually the result of an acute nephritis. After that age, it is a part of a general change which includes the hardening of the smaller arteries of the body. For this reason, chronic nephritis is commonly associated with high blood pressure and arteriosclerosis or hardening of the arteries.

Chronic nephritis is not curable but under proper treatment, the progress of the disease is checked and the patient may live for many years. The earlier the disease is detected, the more can treatment accomplish. Chronic conditions steal up on the victim and their presence is likely not suspected. A periodic health examination is desirable because it reveals the presence of unsuspected chronic disease, including nephritis.

An accurate diagnosis of the particular form of the disease present must be made in order to institute proper treatment. Self-medication is, to say the least, highly dangerous. Plain simple foods; the avoidance of any excess in food or drink; the use of plenty of water; a quiet life with freedom from worry are essential in treatment.

From the point of view of prevention it is known that, after forty most people eat too much, put on weight and over work their kidneys in the effort to get rid of waste materials.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.
Scouts Will Light King's Jubilee

"BUTTER FOR PASTRY"

The majority of women who pride themselves in their cooking take particular pride in their pastry, for it is generally felt that the ability to make delicious, tender pastry is a real accomplishment in mastering the culinary art.

It is not a difficult matter to make good pastry, provided the proper ingredients are used and care is taken in combining them. Shortening is an important factor because it has much to do with the texture of the pastry as well as the flavour. A combination of equal parts of butter and a soft shortening, such as lard, is ideal for the purpose, since the butter provides both flavour and colour while the other shortening assures tenderness.

Pastry No. 1

1½ cups of pastry flour
⅛ teaspoon of salt
¼ cup of butter
¼ cup of lard
cold water (about ⅓ cup)

Sift flour and salt, cut in shortening with two knives or pastry blender. Moisten with cold water, adding just enough water to combine ingredients. Put into shape. Chill thoroughly before rolling. Bake in a hot oven.

Pastry No. 2

1½ cups pastry flour
⅛ teaspoon salt
¼ cup butter
¼ cup lard
cold water (about ⅓ cup)

Sift flour and salt, cut in lard with knives or pastry blender. Moisten with cold water. Toss on slightly floured board. Roll in rectangular sheet ⅛ inch thick. Dot butter on half of sheet, fold, press down edges, roll lightly. Fold and roll again. Chill thoroughly. Bake in hot oven.

NOTE: For those not expert in pastry making, the first of the above methods may be more satisfactory, although the second method gives a more flaky pastry.

BOY SCOUT NEWS

Beacons From Atlantic to Pacific

Following announcement from Dominion Headquarters that the scouts of Canada will celebrate the King's Silver Jubilee on the eve of May 6th, by lighting a chain of beacons from the Atlantic to the Pacific, Scout troops and district organizations are discussing and reporting plans for this display of loyalty. Wherever possible the lighting of the beacons will be preceded by a royal salute of 21 rockets. In the Old Country a similar chain of beacons will extend from John O' Groats to Land's End.

Woodcraft Calls Replace Bugles

When Scouting was less well understood bugles were a frequent item of troop equipment. For some years they have been "tabu," as "neighborhood nuisances," and because birds and wild animal calls are more consistent with woodcraft. Which explains why a For William man, seeking someone to sound a bugle, could not find a scout who could blow one.

The Scouts Found Her

It has become almost routine throughout Canada to "call out the Scouts" when persons are lost, and the number found in a year would make a fair-sized group. The latest case was the search at Galt, Ont., Scouts for a four year old girl, when police and neighbors had failed, and her discovery in a remote corner of a large park at 10:30 p.m.

European Politics Do Not Affect Boy Scouts

Indicating that the political differences of their elders mean little to them, Boy Scouts of Britain, Hungary, France, Spain, Belgium, Holland, Poland, Sweden and other European countries are planning their usual exchange of camping and hiking visits this summer. Troops of English and Scottish Scouts will be camp guests in Denmark, Poland and Hungary, and smaller units will visit other countries. Similar groups from these countries will visit England and Scotland.

RHAPSODY IN RHUBARB

Canadian forced rhubarb which is now available on the market may be used in various ways in the household. For the purpose of cooking and canning, the fresh young stalks, particularly the first cutting, have better flavour and colour, and are more tender and juicy than the older ones. As the rhubarb grows older, the stems become more acid and may be used principally for juice. Each stalk should be washed carefully and the ends trimmed but the skin should not be removed. It gives the beautiful colour to the cooked rhubarb and helps to hold the shape of each piece.

The easiest way to prepare rhubarb is in sauce. Some food experts think that the best way to make the sauce is to make a thick syrup of sugar first and then drop the rhubarb pieces, each about half-an-inch long, into it and cook until tender. This takes only a few minutes, and is in place of the usual method of mixing two parts of the fruit and one part sugar together and cooking them until the liquor comes out and forms a syrup. Some people declare that one of the finest combinations ever tasted by man is rhubarb and strawberries cooked together, while all admit that the juice from the old rhubarb stalks makes a delicious, cooling drink in the summer time. Also, the tart juice combined with sugar and the stiffly-beaten white of an egg makes an enticing creamy sauce. Rhubarb, as it is well known, gives the distinctive touch to tapioca puddings, tarts, sherbets, gelatine and shortcakes.

Baked rhubarb can be made when the oven is cooking some other food. The rhubarb looks especially attractive if a glass baking dish is used.

The method of procedure is:—butter a covered baking dish; spread a layer of rhubarb over the bottom; sprinkle a layer of sugar; then add another layer of rhubarb, and so on until the dish is filled. Sprinkle sugar over the top; then add small pieces of butter and the grated rind of a lemon. Some people prefer cinnamon or nutmeg flavour to the lemon. Cover the dish and bake slowly until the fruit is tender. Long, slow baking gives rhubarb a rich, red colour. For variety rhubarb and bananas can be baked together.

BROILERS FOR MARKET

Broilers may be considered in the luxury class of food products, when properly prepared for market. When disposing of the surplus cockerels as broilers it is well to bear this in mind and market the birds in the most attractive way. It pays to please the buyer, and when there is keen competition it becomes still more advisable.

When catering to a select private trade it may speed up sales if the carcass is completely dressed and put up in an attractive carton. When sold drawn, the shrinkage will be about 40 per cent of the live weight, and a proportionate price must be realized to pay for the loss in weight and extra labour. Those birds should be selected that have made good growth, and are plump and well feathered. The well feathered birds have less pin-feathers and consequently dress better.

Starve the birds for at least twelve hours, but give plenty of fresh drinking water before killing. Kill them by braining and bleeding, and dry pick. Sometimes to save time the semi-scald may be advisable. In this case bleed, and thoroughly immerse the carcass for not more than 30 seconds in water heated to a temperature of not more than 127 degrees F. It is important to keep the water at an even temperature; over-heating will give a skin-cooked, unattractive appearance.

Cost of production records at the Dominion Experimental Station, Harrow, show that it requires approximately five pounds of feed to raise a broiler on range from chick to two-pound weight. The total cost will vary according to the number raised, price of feed, mortality, price of chick and brooder fuel consumed. It may be roughly estimated that the feed cost is slightly under half the total cost at present prices and under average conditions.

SOCIAL CREDIT

THE VISIT to Tofield of Mrs. W. W. Rogers, has, to say the least, electrified the community: The complete assurance by her, that in the event of the social credit group being returned to power, each person of 16 or 17 years of age onwards would receive a stipulated credit dividend, good for the purchase of necessities of life, at little or no increase in present prices, created amazement mixed with hope and expectation.

Mrs. Rogers' address was a masterpiece in the field of political oratory. For two and a half hours she spoke fluently, never at loss for a word or phrase and ejected just enough humor into her address to cause the dry dust, usually associated with the subject of economics, to vanish. Before a crowd that filled every available seat in the hall and overflowed to the lobby, Mrs. Rogers gave as good an election address as has ever been given from a Tofield platform.

Not only was a dividend promised, but by means of a chart depicting a money and goods cycle, she explained how it could be done. The explanation was quickly and somewhat glibly given it is true, but the chart was in full view throughout the entire meeting.

At the present moment there are three separate approaches to the subject of social credit for Alberta. One is strictly political, another strictly economic, and the third strictly legal. First hailed as a non-political subject, in the course of a few weeks the movement has grown into a separate political group, having for its objective parliamentary candidates in all constituencies and ultimately, by a majority vote, complete control of the Alberta legislature. There's progress for you! Centreing around the social credit studies and work of Mr Aberhart of Calgary, will ultimately be found genuine students of economic affairs who desire to give their support to a movement aimed at alleviating present distress in the province, and also a number of opportunists who see in the popularity of a social credit dividend promise, an opportunity to climb on the band wagon and ride to legislative glory at the head of the procession. Alberta electors have been, in the past, promised many things. Liberals, Conservatives, U.F.A., have all been prolific of promises, many of which have never been realized and many of which the candidates must have known at the time they made them, could not be realized. Is the social credit dividend an election promise, the ultimate feasibility of which is to be discovered **after** the party is returned to power? If so it should be recognized as such now.

The second approach is strictly economic, and presents a bewildering array of thought and sensation. Between the keen desire and hope that it could be possible and the inevitable doubts that it might not be, added to which are fears that should it be tried and found a failure and we all find some fine morning that we had to line up in a queue to obtain our groceries and then only get a fraction of what we get now, one gets a big headache. These are not too fanciful visions, given the right set of circumstances and that queue might easily become a reality.

Unless people are prepared to entirely change their conception of money, which firstly is a standard of value and secondly a medium of exchange, and thirdly an article of real value as exemplified by the act of saving, we doubt very much whether the free printing of provincial credits would prove a success. If people are prepared to change their conception of money to the belief that it is nothing more or less than a medium of exchange, "a ticket system," that it has no value in itself that it is to be spent and not saved and lastly subject to the vicissitudes and vagaries of a political system, then perhaps it would work for a time and after a fashion. Confidence is so intimately connected with currency, but always in varying degrees, that given sufficient confidence anything would work as currency, but the test of time would inevitably wear this confidence away and then what? Within a country supplying practically all the necessities of a modern civilization strictly fiat money (money brought into being by order of those in authority) might work. But Alberta is not such a country. Everybody knows most of our daily requirements come from outside the province and that the greater portion of our products are sold outside Alberta.

Then there is the legal approach. The opponents of social credit claim the Alberta Provincial Legislature has no authority to institute a currency system, openly or by intent. The sponsors of social credit claim that strictly within the province, provincial authority has that right. We will leave it to those more versed in law than ourselves to decide the issue, but the very fact that there is a difference of opinion as regards the legality of the venture, makes its early adoption less likely.

Abstruse Mathematics

The lady of the house was much perturbed to find that the three pounds of meat she had purchased had disappeared. Her husband, aiding in the search, noticed what he took to be a guilty look on the family cat's face, and pointed to her and said: "There's your meat."

"Why, no," objected the wife, "that little thing couldn't get away with all that meat."

"Well, let's weigh her and see," suggested the husband.

They did so. The scales registered exactly three pounds.

"Yes," admitted the lady, "there's the meat all right; but where's the cat?" —Toronto Globe.

YOUNG LIBERALS OF ALBERTA PLANNING PROVINCIAL PARLEY

Calgary, April 9.— For the first time in the history of the province young Liberals throughout Alberta will assemble in Calgary this month in a provincial wide conference with a view to co-ordinating the activities of the youth of the province in an effort to solve the youth problem brought about by the present economic situation in Canada.

Plans now underway for the calling of the conference are practically completed and April 26 and 27 will probably see the conference an accomplished fact. About 400 young Liberals from various parts of the province are expected to attend.

The conference is the outcome of the economic conferences called at various parts of the province by W. R. Howson, K.C., Alberta Liberal leader, last summer and fall. At these conferences the Liberal leader stressed the youth problem and stated that one of the principal matters which would be taken in hand by a Liberal government if elected would be to solve this problem and see that the young men and women of Alberta were given an opportunity of finding employment and living wholesome and effective lives, making their own homes and bringing up their families. In fact an opportunity to make their way such as the fathers and mothers had done in the past and to live their own lives as useful citizens of a country which is rich enough in natural resources and opportunity to give all an equal chance to make something of their lives, an opportunity which under present conditions is denied them.

While Mr. Howson and other prominent men and women of Alberta are expected to be speakers at the convention the main business of the conference will be shouldered by the younger delegates.

This conference of young Liberals will be a challenge to the people of Alberta by the generation of young men and women who realize that this period of depression is not just another trade decline but rather the death of an old order upon which must eventually but none the less surely, be built up a new social order. This conference will undoubtedly reveal the attitude of Canadian youth to Canadian problems, especially as they relate to Alberta, and the part youth can play in their solution," stated H. J. Beveridge, secretary-treasurer of the conference in outlining the plans already made.

Definite Aims

Certain definite aims will be the work of the conference. Briefly the are outlined as follows:

1. To set up a provincial executive to co-ordinate all young Liberal clubs in Alberta.

2. The drawing up of a Young Liberal platform.

3. To set up a provincial Young Liberal headquarters.

4. To start up a Young Liberal newspaper.

5. T[illegible] tribution of [illegible] to get the views of th[illegible] before the public.

6. T[illegible] organizat[illegible] considered necessary to [illegible] organization a live and [illegible] the life of the province.

A number of resolutions [illegible] forward the Young Liberal th[illegible] and action in the province dealing with agriculture, taxation, education, government administration, health, municipal administration, unemployment, monetary reform, industry, immigration, railways and other important matters will be discussed. Indications are that every section of the province will be represented, the call for action by the youth of the province having received a wide response.

FOR FIRST TIME IN LIFE BROTHERS MEET AT CHURCH

Salt Lake City, April 9.— How two brothers, attending the annual conference of the Latter Day Saints church met by chance for the first time in their lives was related Monday.

They are Sterling J. May of Raymond, Alberta, and Richard May of Rupert, Ohio. Richard heard his name spoken as he was passing through the conference throng. He introduced himself as the man addressed and they found they were brothers.

They are sons of the late James May, one of the Mormon pioneers who settled in Cardston, Alberta in 1889. Sterling May is a native of Raymond, where he publishes a weekly newspaper. Richard has resided in Rupert for the last 14 years. Both are prominent in Latter Day Saints church affairs.

Richard did not accompany the family to Canada.

RAILWAY ASSISTS BACK TO LAND MOVEMENT

Winnipeg, Man., April 8.— "A great re-adjustment of [illegible] taking place [illegible] Canada's [illegible] the return of [illegible] [illegible] stated Dr. W. J. Black, [illegible] of Colonization and Agriculture for the Canadian National Railways, who arrived in Winnipeg a few days ago from the West. Dr. Black conferred with Robert England and other officials before proceeding East.

"It is very interesting to point out," continued Dr. Black, "that the offices of our company in the Western region [illegible] five thousand [illegible] enquiries in 1934. From these enquiries it has developed that 935 families [illegible] other parts of Canada, United States and drought areas were placed [illegible] [illegible] closely with the Provincial governments under the Dominion, Provincial subsidized Back-to-the-Land schemes.

"In the three prairie provinces 852 relief families in addition to the [illegible] 1,757 [illegible]

"During [illegible]

"More tha[illegible] placed in employment directly by our western offices and [illegible] in the Port Arthur district. A large percentage of single men placed in farm employment did not return to urban centres.

"Several new settlements were commenced in the northern areas of Manitoba, Saskatchewan and Alberta. These are off-shoots of various national and religious parent [illegible] whose younger generation is anxious to found farm homes [illegible] Canada [illegible] of the prospective settlers have only a limited capital and it is, therefore, [illegible] at a minimum expense [illegible]

"There is a strong [illegible]

[illegible] ment has completed a survey of the unoccupied lands in the northern districts of the prairie provinces and is in an excellent position to advise prospective settlers," said Dr. Black.

[illegible] for C.N.R. [illegible] her 11-day Alaska cruises which commence June 28, is the historical shrine of the North Pacific.

Famous in the early days as a Russian outpost, it was permanently established in 1804 by Alexander Baranof. Bells and metal were cast, ships were built and [illegible] when San Francisco [illegible] Russian and many Canadian [illegible] were yet unthought of.

[illegible] a panorama of sea, mountains and [illegible] Sitka National Monument [illegible] been called the most beautiful spot in Alaska.

Other points of interest are the newly reconstructed Pioneers Home, the Sheldon Jackson School for Indians, a museum of Indian relics, Princess Maksoutoff's grave and the Sitka National Cemetery.

[illegible]

[illegible] have their heads cut off before they are canned. [illegible] with the heads on. The future "captains of industry" immediately saw an opening for some strategy so they wrote to the sardine canning factory at Black's Harbor and asked for a can of sardines with the heads on explaining the circumstances. Well, a can of sardines, heads and all, arrived and the teacher took [illegible] Canadian National Railways.

The [illegible] England still continues at satisfactory prices. 20,412 boxes having been [illegible] Canada [illegible] 1934.

PROBERS URGE STRICT CONTROL ALL INDUSTRY

Ottawa, April 9.— More strict control over all business and all industry in Canada, more intense government [illegible] in company financing, in the relation between employer and [illegible] and in labor itself are among recommendations made in the report of the mass buying and price spreads committee due to be tabled in the house of commons this week, probably Thursday or Friday.

The Canadian press learned Monday that the report deals with every phase of Canadian business [illegible] and seeks to set up government appointed boards to control [illegible] operations along a wide front.

Following are 13 major points contained in the report.

1. Reduction in the standard hours of labor not to exceed 44 hours a week as a maximum, but flexibility in administration of such laws, permitting long hours when necessary [illegible] time and a half and double time for overtime.

2. More complete regulation of [illegible]

[illegible] statement that a company's [illegible] statement, together with the [illegible] report should be published [illegible] press [illegible] such a way as [illegible] the widest publicity and in the Canada Gazette.

[illegible] should be made illegal [illegible] no par value shares unless the [illegible] for the shares [illegible] consideration in cash property [illegible]

[illegible] Amendments to the [illegible] act [illegible]

6. Establishment of a federal trade and industry commission to consist of five members, appointed by government [illegible], to "supervise generally [illegible] in the administration of existing laws relating to merchandising and business practices for which no other agency exists.

Rule on Standards

7. Creation of a consumer commodity standards board, as a section of the federal trade and industry commission to establish consumer standards and specifications and to enforce such standards.

8. Recommendation that penalties for breach of the weights and measures act should be more severe, but that the principle of net weight be altered to permit the inclusion of paper bags or wrappers in the weight of bulk goods sold over the counter and weighed at time of sale.

9. Creation of a federal department of labor [illegible]

Urge Strict Control all Industry

(continued from page three)

ision, "under thoroughly competent supervision," for general research into industrial relations

10 National regulation of employment conditions, preferably by dominion legislation if feasible, or, alternatively, by inter-provincial co-operation

11. Revision of the present system of culling and weighing fish purchased from fishermen by distributing companies, and the gradual discontinuance of trawler operations by government prohibition

12 Establishment of a fisheries control board "to make every possible effort to raise the price to the fisherman "

13 Reduction of freight rates on livestock for export, and establishment of a livestock board with administrative jurisdiction in matters connected with all phases of marketing and in disputes between producers and processors.

Livestock Suggestions

The primary producer receives considerable attention in the lengthy document with cattle and hog-raisers especially concerned The report recommends regulations to permit producers, where they so desire, to sell stock by auction on the public stockyards

To remove complaints of excessive "dockage," the commission suggests the extension to all canning plants, and to all produce, of the experimental inspection service which is designed to check deliveries of fruit and vegetables for quality, grading and weight

Direct shipments of livestock to packers' yards would be subject to the same rules of weighing, grading and competition as shipments are to the public stockyards

Livestock commission agents' charges would be based on a lower specific charge, plus a commission reckoned on the value of the livestock sold, and all the commission agents would be licensed. Truckers would be prohibited from selling stock themselves and would be licensed and bonded

Grades Separated

Sale of hogs by fixed differentials would be discontinued with the exception of the premium on selects. Each grade of hogs would be sold separately "at whatever price it will bring."

Grading of hogs on the rail would be introduced and developed where producers desired it and where conditions made it possible.

All live cattle would be graded and sold on grades, including those for export to Great Britain Municipal and small abattoirs would be placed under a department of agriculture branch

A percentage of cutter and canned beef would be removed from the meat trade and diverted to other uses, such as fertiliser or tankage

Duties of a livestock board, government appointed, would include the following:

Dissemination of information to producers and the trade generally respecting production, marketing, stock and prices both export and domestic, licensing and supervision of truckers dealers and export packers in co-operation with provincial authorities; co-operation with producers and the trade to insure a balance between production and available markets.

To Help Producer

The board's broad business would be the utilization of all available means to secure fair returns to the primary producers of good stock. It would survey the British market with a view to revising and trading of export bacon so as to insure the highest possible price for Canadian "selects" and "bacon" hogs

Only 10,953,150 bushels of foreign wheat entered France in 1934. Of that amount Canada supplied 9,094,530 bushels

HANGING REPRIEVE DOESN'T 'TAKE'

Los Angeles, April 9 —More than three days late, appeal papers which would have deferred the execution of Rush Griffin, Negro, hanged last Friday at San Quentin prison for murder, were delivered by special messenger late Monday to the clerk of the supreme court.

A few minutes earlier the appeal papers were served on the attorney-general.

The appeal motion was filed Jan. 21, and while it lay hidden somewhere between the county clerk's office and the state supreme court Griffin was hanged.

Complete statistics of the production of dairy factories in Canada date from 1900, when the total value of the products was $29,731,922. In 1933 the value was $97,218,311, representing an increase of $67,486,389, or 198 per cent during the period.

SOIL DRIFT BOARD HOLDS CITY MEET

Proper farm management will control soil drifting and one of the most effective methods has been strip farming, declared members of the provincial soil drifting committee, following their first meeting in the city to consider this problem. In addition to soil drifting, the committee discussed general farm practices and policies suited to dry areas.

While strip farming was an effective way of dealing with drifting, that in itself was not sufficient, stated members. But used with such methods as sowing cover crops, or creating a trash cover by plowing in stubble and other trash, with a ridged and granular soil, it was the best method of controlling drifting, they said.

Specified control measures suggested by the committee were:—

1. Strip farming the entire area of the farm, strips in no case to exceed 20 rods in width.

2 Owners should avoid having bare summerfallow in any year of a greater width than 10 rods within 40 rods of the boundary of his farm.

3 In those districts in which there is sufficient moisture, cover crops might be used as summerfallow.

4 In the wooder areas it is recommended that a strip of natural or planted tree growth five rods wide should be left along the boundary line of each farm.

The committee is further of the opinion that dairying should not be encouraged as an industry in the very dry wheat growing areas.

Stock Policy

Recommendations of the committee regarding a livestock policy for the dry areas were as follows:—

1 Dairying should not be encouraged in those areas beyond the point where cows are required to supply the immediate needs of the farm family.

2 In dry wheat growing areas the encouragement of a breeding herd of cattle would be a dangerous practice owing to the feed shortages incurred in dry years.

Some consideration might be given to the encouragement of sheep and horse raising in these areas.

On feed relief, the committee was of the opinion that applicants for relief should dispose of all surplus stock before becoming entitled to feed relief for stock necessary to carry on farming operations.

Farmers should be encouraged to sow small seed plots of grasses or legumes on their farms. These should be sown in rows three feet apart on suitable farms, for production of seed for the farmers' own use.

O. S. Longman, provincial field crops commissioner is chairman of the committee. Others on the committee are:— Dr. W. H. Fairfield, Lethbridge; Lawrence Keal, Monarch; M. L. Freng, Lethbridge; A. C. B. Grenville, Morrin; E. L. Gray, Edmonton; Dr. F. A. Wyatt, U.F.A. J. Strang, Claresholm and Donald Cameron, U. of A.

The amount of branded beef sold in Canada during the month of February, 1935, was 3,274,855 pounds. In February 1931 the amount was 983,571 pounds; in 1932, 1,549,556 pounds; in 1933, 2,909,908 pounds and in 1934, 2,778,358 pounds.

Cowhides to the value of $977,947; sheepskins, $134,444; calfskins, $117,441, and "harness leathers," $688,940, were used during 1933 by the Canadian miscellaneous leather goods industry, which includes harness, saddlery, trunks, bags, purses and belts. Other farm products in the shape of goatskins and pigskins were also used in smaller quantities.

The weight of a loaf of bread in Canada is not standardized but it is regulated by municipal by-laws in the various provinces with the exception of Ontario In Ontario the legal standard weight of a loaf is fixed at 24 and 48 ounces, except that in the case of "small bread" the limit is fixed at 12 ounces

Good Number Attend Liberal Organization Meeting

On Tuesday evening of this week at the Town Hall quite a number attended a meeting held for the purpose of Liberal organization for the forthcoming campaign.

Mr. Charles Gordon, Liberal nominee was present, also Mr. Neil Primrose of Vegreville.

The chair was taken by Mr Joseph Rogers who announced the reason for the gathering and expressed pleasure at seeing so many turn out.

At the outset it was stated plans had been devised to make the organization as interesting as possible to all classes of society Ladies, gentlemen and young people. It was proposed to have study clubs in these separate classes, a nucleus of three in each class being appointed that night, they to endeavor to procure seven others to form the foundation of the club and of course have as many attend their meetings as possible.

The meeting then proceeded with the organization of officers, the following being elected.

President—Joseph Rogers.
Vice President—T. McBratney.
Secretary-Treasurer—A. J. H McCauley.
Second Vice Pres.—Mrs. McCauley.
Third Vice Pres.—Joseph Kallal

Messrs. [illegible] Cookson, A. Williams and W. F. Swift were appointed as the nucleus of the men's senior study group club.

The ladies' section was left open. There were three ladies present at the meeting but all declined the honor.

The three chosen to form the nucleus of the young people's study group were Blake Clutterham, Graham Allan and [illegible] Carver.

Mr. Neil Primrose then gave an address on Public Expenditure and Cost of Government. Prefacing his remarks with a reference to Social Credit, he said the Liberal Party's stand on social credit was clear cut. Mr. Howson had publicly stated that if the Liberal government were elected they would employ three social credit advocates to study social credit and submit a plan to the legislature. While he, the speaker, was not on the band wagon of social credit, he certainly was not against it.

He said it was unnecessary to remark, it was time for a change. He emphasized the fact that at present the Liberals had eighteen seats and at the last election had only lost a number of seats by narrow margins. He felt that the people are tired of a government that makes every kind of promise but only puts the province more and more into debt. The estimated provincial revenue for 1935 was $15,000,000, the revenue for 1934 was $14,450,000. The speaker cited the famous McCauber edict from Charles Dickens' novel "David Copperfield," whereas if you spend a little more than you receive you have as a result, misery; while if you spend a little less than you receive you have as a result, happiness. In a period of hard times, he said, we have to economize. That the government were not economizing as much as they could was proven by the salaries of the ministers. When a motion was made in the house that they be reduced, it was defeated.

The governmental revenue was, he said, spent as follows: 45 per cent went to pay interest, 25 per cent went for public welfare; 15 per cent went for education; and three per cent for agriculture. He thought this far too small an amount to spend for basic industries saying during the Liberal regime, half of the revenue was spent on basic industries. The debt of the province in 1921 was $61,000,000, in 1934 the debt had risen to $144,000,000. In 1920 the per capita debt was $94.00, in 1930 it had risen to $199.00.

Mr. Gordon then addressed the meeting saying in part, he had no antagonism to social credit. The Liberals view point on this question was clear cut. The Liberals had taken the lead in all kinds of social reform since the province was formed They gave the women the franchise, gave it so that they might have a higher standard in our political life. We need this now more than ever before. The Liberals had advocated a national bank. During the depression the people have become money conscious and are studying to find out what the monetary system is all about. To the social creditors must go much of the credit for making people think.

Mr Howson is an excellent leader and he is very much interested in the young people of the province The liberals while in the minority in the house, have been responsible for proposing much advanced legislation.

Refering to Alberta wheat, the speaker said not a dollar had been spent in advertising Alberta wheat in the old country. During the time No. 5 wheat was at a premium the government could have saved the farmer 7, 8 or 9 cents a bushel had they taken proper action. These were some of the things the government could have done but had not done.

Speaking along the lines of finance Mr. Gordon said the government was spending $7,000,000 a year interest. He advocated a central bank to furnish funds to governments and municipalities at administrative charges. He believed in rigid government control of the banking system rather than the socialization of money. He pointed out that it cost more to ship wheat to Vancouver than to Liverpool, and said he felt the government should have done something in an endeavor to have freight rates on wheat to Vancouver reduced. Logically, Vancouver was our sea port.

During the question period Mayor Bruce asked if the Liberals were elected whether Mr. Gordon would use his influence in having the road running north from Tofield to Ross Creek gravelled. Mr. Gordon replied that he was in favor of building up market roads. While the tourist business was valuable the mainstay of the people was their every day business. He thought it a mistake to have all highways lead to cities.

The meeting then adjourned by the singing of the National Anthem.

A sorrowing widow, having a monument erected in memory of her late husband had the following inscription carved upon it:

"Good-bye Henry; My Light Has Gone Out."

Three months later, when she was remarried, some wit added to the inscription: "But I Have Struck Another Match."

BY-LAW RE RESTRAINING DOMESTIC ANIMALS RUNNING AT LARGE

Public Notice is hereby given there has been introduced in the Council of the Municipal District of Cornhill, No. 487, a By-Law of which the following is a short synopsis:—

A BY-LAW of the Municipal District of Cornhill, No. 487, for the purpose of Restraining Domestic Animals from running at large.

Under the authority and subject to the provisions of The Domestic Animals Act (Municipalities) the Council of the Municipal District of Cornhill, No. 487, enacts as follows:—

ALL Domestic Animals are Hereby prohibited from running at large from the first day of January, to the Thirty-first day of December, inclusive, in each year, within the limits of—

Sections, 3-4-5-6-7-8, in Township 52, Range 20, W4M.

Sections, 31-32-33-34-28-29-30-19, in Township 51, Range 20, W4M.

Sections, 13-14-15-16-17-18-22-23-24-25-36, in Township 51, Range 21, W4M."

And, further that unless within thirty days from the publication of this Notice, at least ten resident electors of the Municipality, within the area affected, petition the Council to submit such BY-LAW to the vote of the resident electors of the Municipality, within said area, the Council will proceed to pass the same.

J. O. A Letourneau, Sec. Treas.

Local & Personal

Bees and Bee supplies. Send for price list.—H. W. Love, Irma, Alta.

The Anglican W. A. are holding their Easter tea and sale of daffodills on Saturday April 20, at the Institute rooms. Orders for Easter lilies will be taken by Mrs. Clutterham.

Mrs. Rudy House is visiting at the Kallal home for a few days. Mrs. House was formerly Miss Mallion Kallal.

Among those who visited the city are: Mr. Taylor, Mr. Innes, Mrs. Malcolm, Eric Edwards, Mr. and Mrs. Lovell and family, and Charlie Edwards.

Mrs. Edwards is visiting friends in the city for a week or two.

Miss Eleanor Weeks is visiting at her parents home here.

Mrs. Mel Myers visited the city for a few days last week.

Mr. and Mrs. Geo. Glover of Edmonton are visiting at the Glover home.

Mr Ed Kallal sr. visited the city for a few days attending the horse fair while there.

The Jolly Eight bridge club met at the home of Mrs. Coutts last week. The prizes for the month were won by: first Mrs. Coutts, second Thelma Jobb and consolation Winnie Worton. The meeting for this week was held on Wednesday evening at the Jobb home.

Miss Spangler is a visitor at the Bob Spangler home here.

Mrs. McCauley spent the past week visiting friends in the city.

Dr. McGugan will shortly deliver and address at Tofield, regarding the proposed health scheme of the province.

This subject is being given much attention at the present time and will include such topics as health insurance, state medicine, etc. The exact date is at present unknown, but the date and any other information to impart will be published in this paper.

HOLY TRINITY CHURCH

Good Friday	7:30 p.m.
Anthem	"Abide With Me"

EASTER DAY

Holy Communion	10:30 a.m.
Evensong	7:30 p.m.

Anthem and Special Easter Music.
Rev. A. Wallis.

Tofield United Church

Easter Sunday, April 21st.
Special Easter Service—
Easter Music—Hymns and anthems.
Solo by Mrs. L. W. Smith.
Life, the supreme Easter message.

On Sunday 21st—Easter Sunday—the glad message of the first Easter will be the theme of the whole service. The choir will render special music. At the close the sacrament of the Lord's supper will be observed.

On Monday 22nd, at 8 p.m. the Rev. C. Lonsdale, Banff, will deliver an illustrated lecture on Canadian Rockies in the United Church. This is an exceptional treat. Those who have seen these pictures say, "They are the finest, most interesting, most beautiful ever shown." They represent bird and flower life and show the magnificent scenery of our Rockies. They are colored. Don't miss this treat. A collection to meet the expense will be taken.

SOCIAL HOUR CLUB MEET

The ladies of the Social Hour Club held their regular meeting at the home of Mrs. J. W. McMullen on the afternoon of Thursday April 11.

The attendance was fairly good considering the condition of the roads.

April marks the end of the Club Year and in honor of the retiring officers the hostess served a very large, beautifully decorated cake in addition to the usual lunch.

Master Harold McMullen entertained with accordian music while Miss Hazel Sears and Miss Edith Davison gave an impromptu demonstration of some new dance steps.

The visitors present were Miss Margaret Mitchell, Miss Irma Shupe, Miss Hazel Sears and Miss Edith Davison.

The wisest man that ever you knew
Have never dreamed it treason
To rest a bit—and jest a bit,
And balance up their reason;
To laugh a bit—and chaff a bit,
And joke a bit in season

KETCHAMOOT

Mrs. Jesse McMullen entertained the Social Hour Club at her home Thursday afternoon.

Mrs. McDowell returned to her home in Edmonton after spending three weeks visiting at the home of her cousin, Mrs. Whillans.

Miss Nora Manning of Edmonton is spending a week with her sister, Miss Helen at the Roy Lee house.

Mr. J. H. Ingram has been ill the past week with sciatica rheumatism.

Miss Signie Winder of Miquelon is assisting Mrs. C. A. Ingram with her spring work.

Mrs. Elsie Carlisle and daughter Doreen visited at the Berrecloughs home in Bardo the past week.

Mrs. McDowell, Mrs. Whillans and family and Mr. Thompson were guests of the Sears family Monday evening of last week.

Mrs. Donald McCowen entertained the Ladies' Aid at her home Wednesday afternoon In spite of bad roads a splendid crowd of members and visitors were present and a pleasant afternoon was spent.

Mr. and Mrs. Roy Lee entertained Misses Helen and Nora Manning, and Marie and Evelyn Lawson over the week end.

Mrs M McConnell returned to the home of he brother Ott Schultz after visiting a few days at the home of her brother A. F. Schultz.

Mr and Mrs. Wiley and family have moved into the McKenzie home near Tofield.

Mr. and Mrs. Joe Sutton are moving into the Owen house.

Mr Ralph Whillans returned to his work near Barrhead after visiting several weeks at the parental home.

Mrs. A. J. Harrison visited over the week end with her mother and sister in Edmonton.

A successful whist drive and dance was put on at the Carlisle home Friday evening under the auspices of the Junior U.F.A , thirteen tables [illegible]ing, more young people coming in later for dancing. Miss Irma Shupe won ladies' first prize and Mr. Wiley the gents Consolations were won by Miss Marie Lawson and Mr. Coombes. After lunch was served dancing started. The music was supplied by Mr. Wm. Craig and Miss Mayme Craig, also Mr. J. Lerbek, and Mr. C. Coulle. On behalf of the young people of the U.F.A we wish to thank all those who kindly helped in any way to make the evening a success, especially Mr and Mrs. Carlisle for the use of their home.

U.F.W.A. NOTES

On account of the drifted roads the U F.W.A. held their April meeting at the Municipal Hall. A quilt was stitched and the decision made that it should be raffled for the benefit of the treasury. This quilt will soon be on display at the Co-operative store. At the close of the afternoon it was felt that a very profitable and enjoyable social time was spent, as several interesting discussions took place. The May meeting will be held at the home of Mrs Torrie when Mrs. McNaughton will be present, the date to be set for Mrs. McNaughton's convenience.

Cattle exported from Canada to Great Britain in 1935, from Jaunary 1 to February 21, numbered 4,781.

SOCIAL CREDIT ORGANIZATION GOING FORWARD

Organization for a social credit party in this constituency is going forward. A meeting was held at Ryley on Tuesday, but we understand Tofield was not represented Dr McPherson of Ryley accompanied by Mr Wilson of Camrose was in Tofield on Wednesday, but whether definite organization will result we are unable to say. By a system of conventions four men from each constituency are chosen as suitable candidates. From these four men, one is chosen by Mr. Aberhart or a board headed by him to be the official social credit candidate for the constituency At the present time while several names are mentioned there is no definite information regarding the most likely candidate

TEACHER'S ALLIANCE TO HOLD CONVENTION EASTER WEEK

The annual convention of the Teachers' Alliance will be held at the MacDonald Hotel, Edmonton Monday April 22 to Thursday April 25. In addition to business of an important nature, a play "The Rivals" will be given in the Empire Theatre on Tuesday evening and a banquet will take place on Wednesday evening

Town Council

A regular meeting of the town council was held Monday evening April 15th, at 8 p m Present were Mayor G B Bruce, Councillors [illegible] Lovell Taylor, [illegible]

A number of routine [illegible] were dealt with and [illegible] accounts passed for payment

By-Law No. 252 a by-law setting the tax rates for the year 1935 was given its third and final reading The [illegible] rate on land and [illegible] the same as [illegible] one-half mill [illegible] Supplementary Revenue [illegible] The tax levy [illegible] will be 60 mills A [illegible] per cent will be allowed [illegible]

A statement of the receipts and [illegible] for the month of March [illegible] and ordered to be [illegible] the minutes [illegible]

The [illegible] of surveying [illegible] cemetery was [illegible] and [illegible] for further [illegible] at a later meeting

[illegible] 75,000 cattle and [illegible] calves were exported from Canada to the United States from February [illegible] 1935.

Order Hambley Electric Chicks Now!

For delivery when you want them. White Leghorns $10.75; Barred Rocks $11.75; Rhode Island Reds $12.75; Buff Orpingtons $13.75 per 100. All chicks are from Government Approved and Blood-tested Flocks and are hatched in the very latest all Canadian Mammoth Electric Incubators under Dominion Hatchery Approval regulations. Custom hatching $3.00 per 100 from tested flocks only.

FRIENDS
of the . . .
FAMILY

Look at the packages on your pantry and bathroom shelves, and see what a multitude of brand names you recognize. Some of them have been familiar for years. You may have made the acquaintance of others only a few weeks ago. But even these are not suspected strangers. You have bought them confidently because they were advertised. And it is the same with your sheets and towels, your shoes and clothes, your electric appliances, the car in your garage—nearly everything you use.

Advertised products have a standing that commands respect. They are not nameless, but vouched for by responsible firms. The fact that they are advertised is in itself an indication that their standards of quality are strictly maintained, that they represent honest value.

As science and discovery go on, newly developed products are constantly being advertised—ready to help you save money and improve your standard of living. Every advertisement of such a product you read in your newspaper is a letter of introduction to a new and possibly useful friend.

It will pay you to read the advertisements in this paper. By doing so you will meet many choice products—worthy to become friends of the family.

HEALTH
by
A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

CARE OF THE INFANT

We believe that every mother desires to do what is best for her child. All of us hope that every baby will receive proper care, so that he may grow up into a healthy adult.

A great responsibility rests upon every mother. A great responsibility and, at the same time, a great privilege. For upon the mothers of this country today depends the health of the citizens of the next generation.

The infant is absolutely dependent upon his mother. Beyond his ability to express pain and hunger by means of crying, he is a very helpless creature. It is this extreme helplessness that in many ways is so appealing to the mother, while at the same time it makes great demands upon her.

It is a fact that a great deal of the sickness which occurs amongst infants is due to the fact that mothers, instead of breast-feeding their babies, put them on artificial feedings. There is no artificial feeding that can compare with the natural food. The child who is deprived of the natural food loses something that cannot be replaced, and has not an equal chance to grow up strong and well as compared with his naturally-fed brother.

Why are babies artificially fed? There are a few who are so unfortunate as to lose their mothers, and also, in a few cases, the mother's illness, as for example when she has tuberculosis, makes it impossible for her to nurse her child. But in the vast majority of cases it is because the mother does not know that she is doing the wrong thing when she weans her baby. Indeed, she thinks, for some reason she cannot nurse her child. As a matter of fact there are very few women who cannot nurse their babies, but in many cases they need some instruction as to how to do it or they will fail in their attempt.

We therefore urge upon all mothers, in fairness to themselves and to their children, never to wean their babies because they are finding difficulty in nursing, or because they think the child is not doing well, or because some well-meaning friend or neighbor tells of some wonderful artificial food. To do so is a serious mistake. Seek advice from your family doctor; he will tell you what you need to know so that you can nurse your baby and so give him the best chance to grow up into a healthy adult. Never wean the baby unless advised to do so by your family physician.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

CAR DEMAND WIDESPREAD

"Far above last year" only partly describes the retail automobile demand in Canada or the first three months of 1935. Analysis reveals that orders this year are pouring in on the factories from all parts of the Dominion, notably Western Canada, where demand lagged early last year while Ontario registered great activity. Significant, too, is the flood of orders for trucks. C. E. McTavish, General Sales Manager of General Motors Products of Canada, Limited, points out that factory shipments of G.M.C. and Chevrolet Trucks in the first three months of 1935 more than parallel passenger car shipments, which are up 70 per cent. Exports, too, are good. First quarter of 1934 was considered to be good, but 1935 export shipments have been double those in the same period last year.

Due to the large amount of pectin contained in Canadian-grown apples, the juice of the Canadian apples may be used in other fruits to give a jelly consistency to jams and marmalades. There is no waste to a good apple, even the paring and core may be used for jelly.

COMPULSORY STRIP FARMING

Legislation calculated to minimize the effect of soil drifting in Alberta has been introduced into the Alberta Assembly at Edmonton. In fact the provisions of this new Act compel farmers to put into effect strip farming as a method of control of soil drifting.

The devastation and misery caused in certain areas of the mid-western United States by soil drifting has aroused Alberta to the possibilities of similar calamities happening in this province. The combination of drouth and winds in the States referred to above have wrought unparalled devastation and threatened desert conditions over a wide area. Alberta, particularly in the south, is a region which frequently experiences strong winds. Past cultural practices were introduced without any calculation of the menace of soil drifting. In 1918 and '19 and in the early '20's bad drifting developed in certain areas in southern Alberta and strip farming was found to be the most effective method of control. In later years the soil drifting extended to the northern and central portions following the cutting down of trees. Now there are few areas in Alberta which have been long under cultivation which are not susceptible to soil drifting.

When a series of dust storms take away one inch of top soil on one acre of good Alberta farmland they carry off 300 pounds phosphorus, 1500 pounds nitrogen and 15 tons of organic matter. $200 worth of commercial fertilizer won't restore this loss of plant food. Twenty wheat crops each of 50 bushels to the acre would not use up the phosphorus carried off that acre by the wind.

When farmers realize the situation they will see the infinite possibilities for evil if soil drifting is allowed to go uncontrolled.

They will also see the necessity of themselves and every individual and every organization interested in agriculture in this province uniting to check the danger of a devastated countryside.

A committee has been studying the problem and have presented the following recommendations:

"The most effective method of dealing with soil drifting is strip farming. This alone will not prove effective but methods of agriculture calculated to control soil drifting, such as sowing cover crops or creating a trash cover by plowing in stubble, must be employed.

Specified control measures by the committee are:—

(1) Strip farming the entire area of the farm, strips in no case to exceed 20 rods in width.

(2) Farmers should avoid having bare summer fallow of a greater width than 10 rods within 40 rods of the boundary of their farms.

(3) In those districts in which there is sufficient moisture, cover crops might be used on summer fallow. A cover crop is a crop of spring grain sown not later than August 10th at a rate of not less than 20 pounds per acre on the whole area of summer fallow.

(4) In the wooded areas it is recommended that strips of natural or planted tree growth five rods wide should be left along the boundary line of each farm.

(5) The strip farming method has proven effective in portions of southern Alberta where properly used. When combined with cultural methods outlined above soil drifting can be effectively checked." —Alberta Wheat Pool Budget.

Since 1929 there has been a steady decline in the per capita consumption of bread in Canada. This, says the statistical report of the industry for 1933, is no doubt due to two factors, viz., the lessened demand resulting from a decrease in purchasing power and the changes in the dietary habits of the people.

With regard to the excellence of quality of Canadian ducks seen on Smithfield market, London, England, mentioned in the London Fish Trades Gazette, advices show that the large duck farm, Eastern Townships, Quebec, whence the ducks came is purchasing 35,000 export tags and is starting packing for export in the near future. The farm expects to double its shipments to England this year.

ABERHART AGAIN READY TO RESIGN HIS LEADERSHIP

Calgary, April 15.—Further light on the Alberta Social Credit League's policy was shed here Sunday by its leader and founder William Aberhart, Calgary high school principal, in an address at his Prophetic Bible Institute.

"I have no anti-racial nor anti-religious feelings," Mr. Aberhart said in denying charges he was anti-semitic. Social creditors were not anti-Jewis but believed in "live and let live," he added.

After stating certain allegations had been made regarding his great-grandfather, Mr. Aberhart declared he was willing to retire from the league, "if necessary." "I am willing to drop out if I am a hindrance to it," he asserted.

"I have not the authority," he said, "nor did I ask for any, to appoint your candidates. You choose three or four names and your constituency delegates advise the advisory council.

"They tell us all about them and one is chosen. The delegates will come and talk with us behind closed doors and we will decide on one of the three or four. It will stop this wirepulling."

Here and There

Lt.-Col. F. A. Gascoigne, recently retired secretary-treasurer, Canadian Pacific Steamships, has been elected president of the Dominion of Canada Rifle Association at the annual meeting of the Association held recently, succeeding Lt.-Col. R. C. Crowe, of the Ministry of National Defence.

D. S. Thomson, who has been appointed assistant superintendent, Canadian Pacific Railway, Smiths Falls, was, prior to his promotion, chief clerk in the office of the vice-president and general manager of the railway at Montreal. On leaving to take up his new appointment he was presented with a gold standard railroad watch and a purse of money by his fellow-workers in the office.

Just 150 years ago the first Daly settled in Napanee and a few nights ago his descendants, Marjorie and John Daly celebrated the momentous occasion at a supper dance at the Royal York Hotel, Toronto. This makes the sixth generation of the Daly family continuously resident in Canada.

Sixty-two calls at European ports will be made by the five express "Beaver" class cargo steamers of the Canadian Pacific fleet this summer, according to the season's schedule recently issued by Canadian Pacific Steamships. Crossings will take nine and a half days in each direction and will touch at London, Antwerp, and Hamburg.

An appeal to the press to mould public opinion in support of larger grants for medical research, particularly into the cause and control of cancer, was voiced by Lt.-Governor Bruce of Ontario at the Royal York Hotel recently at the banquet which wound up the seventh annual convention of the Canadian Weekly Newspaper Association, Ontario-Quebec Division.

Ski-ing and bear-hunting were combined at the Chalet Camps, Metagama, recently, when two women skiers of Toronto accompanied by a photographer, routed a bear out of his den and stood near while the animal was "shot" by a movie camera.

The Orient with its mystery and its allure, its brilliant colors and picturesque scenes will form the inspiration for the Beaux Arts Ball, biggest event of the spring season, to be held the week after Easter at the Canadian Pacific Royal York Hotel, Toronto. The historic theme for the ball is the great festival at Samarcand held in 1404 to celebrate the Emperor Tamerlane's conquest of India.

Musical and literary England, and the England of the great cathedrals will be visited this summer by a party under the leadership of Dr. Alfred Whitehead, organist of Christ Church Cathedral, Montreal. Itinerary of the tour which will take about a month has been arranged by Guy Tombs, Ltd., in conjunction with the Canadian Pacific Steamships.

Had the same research been put into other industries as has been employed in the automobile business, you would not hear so much to-day about the high cost of living, said Col. Frank Chappell of General Motors, Ltd., speaking at a lunch at the Lord Nelson Hotel Halifax, recently.

MONETARY REFORM—ORTHODOX STYLE—

SO MUCH is being said and written today regarding monetary reform that we often imagine the casual reader must be bored to death. Yet it is a vital matter concerning the lives of all people and a problem that eventually must come to a comparitively tranquil anchorage if not to a complete solution. The worlds' financial landscape presents a curious picture. Prior to the war most of the occidental nations of the world were on the gold standard which means each nation's currency token was valued in troy ounces of gold. During the war and particularly during the depression one nation after another dropped the gold standard, and today France is the only large country on the gold standard. Strangely enough, while gold was a prewar basis or yardstick of value, and France remained on a revaluated franc gold standard, in a storm tossed international currency field, it was the pound sterling which was used as a sort of currency anchor. This was partly due to a huge stabilization fund set up by the British and partly due to their skill and prestige as international financiers.

Connected with currency of the gold standard type is the subject of inflation. Inflation simply means more currency per ounce of gold. Goods and services invariably become dearer, basic product prices and wages rise and for a time at least business becomes good. These changes are as much due to psychological reasons as mechanized money reasons. People think prices should go up and up they go. This has actually happened in Belgium within the past two weeks. Recently Belgium went off the gold standard, revaluated its currency 28 per cent below that of its previous value, and while doing it the Belgian premier assured the people there was no reason why internal prices should rise. But rise they did and last week newspaper reports announced that Belgians were buying like fury, almost to the extent of emptying the stores. The causes that forced Belgium off the gold standard and to re-valuate its currency need not be described here.

Most people are to some extent aware of the trend of events in the United States during the past few years. President Roosevelt, called to power during the greatest depression of the country's history, was given unprecedented presidential powers. To relieve distress in its manifold forms, money was made to flow almost like water, the result being temporarily an unbalanced budget. An unbalanced budget, among other things is considered a forerunner of inflation and today we have economic experts almost to a man predicting a forthcoming inflationary period. H. B. Elliston, financial editor of the Christian Science Monitor writing on the subject of inflation quotes Professor Ebersole of the Harvard School of Business Administration and former advisor to the U.S. Treasury as saying:

> "we should not be surprised to see wholesale prices three times the level of the present."

Mr. Elliston also cites other experts but is not himself so sure of its immediate liklihood.

Mercury readers will remember early in 1933 wheat and farm products were at an absurbly low level. Then came a measure of improvement. Almost simultaneously came the "59 cent U.S. dollar." In the United States the cut in the gold value of the dollar was greeted with much newspaper publicity, but in Canada something of the same sort must have occurred as our dollar soon became within a few points lined up with the American dollar. We in Canada heard little about it, but the evidence was there in the steady rise in prices of farm products from the early 1933 level to the level to-day. It would appear, though this is purely conjecture on our part, as if we were financially linked by loans to the United States and to a certain degree can only follow their inflationary trails.

Whether this is so or not, the prevailing opinion in the United States is that they are headed towards inflation, controlled or uncontrolled, and comparitively recent events seem to show that if they are, we are.

To the Alberta farmers, with the Aberhart Social Credit theories ringing in their ears, all the above may sound as a voice from afar off, but as surely as day follows night, inflation appears to be the only immediate thing which will enable them to pay off their mortgages according to the terms under which they signed them.

To our way of thinking there are only three ways in which the majority of farm mortgages can be paid off during the life of those who made them. One is war with its consequent high prices for farm products; the other is a general scaling down of all debts, a laborious undertaking; and inflation, the least painful of the three—to the farmers.

FREEDOM OF THE PRESS—

THE WEEK in Edmonton has been marked by the bitter fight in the legislature over the bills to regulate the reports of judicial proceedings and an act to amend the libel and slander act. Both these bills are of an extreme nature, so extreme as to cause surprise that a modern democratic government would attempt to hammer them through. We dealt with this matter more fully last fall, and are still of the same opinion—the bills should not be passed.

ALBERTA CROP REPORT NO. 1 1935

With practically all of the rural sections of the province still blanketed with snow of varying depth, Alberta is experiencing one of the latest spring seasons in its history. Work of any kind on the land will be delayed for another ten days at least while seeding operations can scarcely be commenced much before May 1st, from two to three weeks later than in 1934.

The late spring conditions are causing no anxiety in agricultural circles [illegible]. In fact conditions at present are the most promising in some years not only by reason of the [illegible] added moisture the recent heavy falls of snow will provide for the somewhat dry soil, but also because a late start on the land in the southern areas, with the good moisture conditions, means much less danger of serious soil drifting, from which these areas suffered so extensively last year. The later hatching of grasshopper eggs is also a [illegible] factor in reducing the hopper menace.

Agricultural conditions, generally [illegible] are much improved over the past few years. There is a greater feeling of optimism and confidence among the farmers, due to the promising crop outlook and to the increasingly better prices for products, and improved market conditions generally. Though the winter has been a long one, it has not been particularly hard upon live stock, except sections which have been, and still are, suffering from shortage of feed. [illegible] there is a considerable number of cattle in poor condition. The continually satisfactory market for hogs, coupled with the [illegible] of the American [illegible] beef cattle has [illegible] live stock in [illegible] and hope is [illegible] market for cattle will [illegible] more permanent [illegible]. Since the beginning of the winter nearly [illegible] head of prime Alberta beef have found their way to the United States markets at good prices, and shipments are going forward continually, while shipments to the British market, which for the past few years have been the only outlet available have fallen off [illegible] during the past two months.

[illegible] annual bull sales at Calgary and Edmonton with the result that these sales were the most satisfactory in [illegible] year. At Calgary, nearly 700 bulls were [illegible] of which some 100 [illegible] the highest [illegible] was $1,500 for the champion of the show, Prince Domino [illegible] purchased by a Alberta [illegible] was a American [illegible] a number of animals. The Hereford sale alone was described as the largest ever held on the continent. At Edmonton where some 100 bulls were [illegible] the top price was $150. There continues to be a good demand for farm horses, and the annual horse sale has been very successful from the standpoint of price and number sold.

Soil conditions in most of the districts of the province south of [illegible] [illegible] dry [illegible] but recent heavy snows will serve partially to remedy this defect. The northern districts appear to be satisfactory [illegible].

There [illegible] to reduce the seeded acreage in any of the grains for this year. It is possible that in view of the more promising conditions there may be some slight increase in the total.

The districts designated as dry areas in the south eastern portion of the province are covered heavily with snow, and moisture conditions there are likely to be improved.

High winds in the latter part of March caused soil drifting to a certain extent in some of the southern districts [illegible] heavy snowfalls.

Arrangements for provision of seed grain and [illegible] are to be lessened to some degree this year, both as to area and intensity of infestation.

The committee on soil drifting, appointed by the provincial government, has held meetings [illegible] before the Alberta Legislature which [illegible] by the farmers residing in the areas most seriously affected.

[illegible] between the government and the Canadian Sugar Refineries for the erection of a second beet sugar factory in the south, to be located on the Lethbridge Northern irrigation district just north of the city of Lethbridge, has stimulated interest in the industry, and will result in a [illegible] acreage in beets during the coming season.

Extension of the system of district agriculturists will be carried out this spring by the provincial department whereby the number of these will be considerably increased.

WHAT'S IN THE CAN

Have you ever opened a can of peas and found to your disappointment that they were hard and perhaps not the size you like best? Yes, this has happened often, but quite unnecessarily.

All fruits and vegetables sold in tin cans in Canada are graded and the grade designation is plainly marked on the label. FANCY QUALITY, CHOICE QUALITY and STANDARD QUALITY are found in retail stores. The lowest grade—second quality—is rarely seen. These grades of quality are enforced by Dominion Government inspection and if products are bought by quality satisfaction is assured.

"FANCY QUALITY" is as nearly perfect as possible, selected for appearance and care in preparation. It may be used when uniformity of size and colour are considered important. Use it as it comes from the can, or for special salads.

"CHOICE QUALITY" is not so perfect in appearance but quite as good in flavour and is packed from tender products. It may be used to advantage where flavour and tenderness are important, but appearance is not so essential.

"STANDARD QUALITY" lacks uniformity, but is quite as good in food value. It may be used where economy is essential. Fruit of this grade is excellent for puddings, gelatine dishes or frozen desserts. Vegetables may be used in escalloped dishes, some salads and for soups.

Commercially canned foods have left the emergency shelf and taken their place in every day meals. If bought by grade and if different grades of each product are kept on hand, the menus may be varied and economical.

The size of the can is important. It is always economy to buy the largest sized can which may be conveniently used. The following table shows the common sizes may prove helpful.

Can Size	Approx. Measure
No. 1 special	¾ cup
8 oz.	1 cup
No. 1	1¼ cups
No. 2½ flat	1 2-3 cups
No. 2	2½ cups
No. 2 squat	2¼ cups

The average family will use Nos. 2, 2½, or 2 squat. No. 1 special, No. 1 and 8 oz. may be useful in very small families, or for luxury foods. No. 2 squat is the same diameter as No. 2, but not so tall and the two may be easily confused.

RADIO SINGER FIRST HEARD IN TRAIN

Saint John, N.B., April 15.—Many a prima donna and radio star started out their singing careers through some chance happening. In the case of Charlie Chamberlain, the "Singing Lumberjack," who has been heard over the Canadian Radio Commission network from Saint John, it was while holding an impromptu "recital" on the Canadian National Railways train, while travelling from Bathurst, in the same province, to Saint John. Another passenger on the same train heard the voice and, being impressed, made his way into the passenger coach from whence the vocal sounds where proceeding. On arriving, he saw the "vocalist" with a group of other passengers gathered round him. Realizing the voice he heard had possibilities, the passenger gave the singer his card, with the result that the former lumberjack is now singing before the microphone. Previous to this he could not read a note of music. He is 22 years of age, a trifle under 6 feet and weights 174 pounds. And by the way, he is a real lumberjack. A little over a month ago he was logging in the woods around the Lower Nepisiguit River, in New Brunswick. At present he sings ballads and shanty songs, but his teacher says he has great possibilities.

BENNET OUTSIDE AFTER SIX WEEKS

Ottawa, April 15.—Prime Minister Bennett emerged Sunday from his sick-room and took a drive of more than an hour, the first time he had been out of doors since Feb. 24, when he was taken ill. He was paler than usual and his step less buoyant, the result of more than six weeks' confinement.

[illegible] going out again Monday and if the improvement continues he will leave the end of this week for London to attend His Majesty the King's silver jubilee.

RAILWAYS SPEND AS WELL AS RECEIVE MONEY

Winnipeg, Man., April 15.—The place which Canada's railways occupy in the Dominion's affairs is strikingly shown in some statistics recently released. Last year 60026,000 tons of freight were transported by Canadian railways and 17,952,000 [illegible] passengers travelled on their trains. The total payroll of Canada's railways for the year amounted to $141,078,000 [illegible] to an average of 119,000 employees. The railways are one of the largest consumers of Canada's coal [illegible]. Some figures in this respect [illegible] the Canadian National [illegible] that out of every dollar of the $[illegible] 936,078.56 spent last year in operating the railway approximately 10 cents went for fuel. The fuel bill for the locomotives amounted to $11,[illegible] 802.33 for the year, the water bill amounted to $893,700.04. Approximately 60 cents out of every [illegible] of expences went for labor. Information as to commodities handled by Canadian National lines throughout the year gives a sidelight on the extent to which Canada's mining industry has grown. Products of mines constituted the largest portion of the total revenue tonnage, 12,092,346 or 32.7 per cent. Agricultural products account for [illegible] per cent, forest products 12.2 per cent, animal products 2.7 per cent, miscellaneous 20.06 per cent.

BEAVER CLIMBS TREE

Toronto, Ont., April 15.—The woes of the telegraph linemen are never over. Something is happening all the time. The latest cause for wire trouble has been [illegible] from a point on the Canadian National Railways right of way about 20 miles north of Washago on the transcontinental line of the National System. The report received by the despatcher of the Canadian National Telegraphs was a short one. It read "Two [illegible] linemen chased a beaver [illegible] the C.N.R. right of way about 20 miles north of Washago, which climbed a tree. The only way to get the beaver was to cut the tree down. The latter did so. It fell across the wires and [illegible] them until the linemen reached the spot to effect a clearance." It was a short notice [illegible] but it started a big argument. Naturalists claimed that a beaver is incapable of climbing a tree unless the tree is on a decided slant, or has plenty of low limbs up which it could scramble. In any event if the beaver [illegible] get up the tree, an agile boy, or man, could also do so without trouble. Therefore, why bother to cut down the tree? But the linemen who were on the spot claim that they investigated the report and found it correct. The main question is, "Are beavers in Northern Ontario developing [illegible] habits?"

CITIZENS FEED THOUSANDS ON CAMP STRIKE

Vancouver, April 15.—[illegible] relief camp strikers and their sympathizers Sunday staged a mass demonstration in Cambie street grounds and later marched through Stanley Park in what strike leaders said was a "celebration parade" following citizens' response to the campers' tag day Saturday, claimed to be the best response to the city's history.

Strike headquarters here announced last night that more than $5,[illegible] had been taken in on street corners Saturday, despite the [illegible] refusal to grant a tag day. An arrangement was made with a [illegible] bank to receive the bulk of the donations last night. The remainder was taken to police headquarters and locked up in the police safe over the week end.

Matt Shaw, youthful chairman of the strike committee, who presented the strikers' petition for changed camp conditions to the Earl of Bessborough, last week before the Governor General left for the east, said the sum would supply the men with food and shelter for at least ten days unless there was a large influx of additional strikers to Vancouver within the next few days.

The majority of farms in Western Canada are [illegible] closely to a family business. For instance, during the year 1930 in five main areas in Alberta and Saskatchewan, 82.7 per cent of all the farm labour on 573 farms was supplied by the farmer and his family.—The Economic Annals of Dominion Department of Agriculture.

"The well-being of a people is like a tree; agriculture is its root, manufacture and commerce are its branches and life. If its root is injured, the leaves fall, the branches break away and the tree dies."—Shou-nung, Chinese Emperor and inventor of agricultural implements, 2800 B.C.

AGED INDIAN RELATES HIS OWN DEATH, RESURRECTION

With British press reports of a [illegible] case of a man who was reported dead, but who was brought back to life and was able to tell his experiences of the "other side" receiving world attention, N. Jampolsky, old [illegible] resident of the Spadler district [illegible] recalls the tale he had [illegible] Nathan [illegible] Sunday, Good Friday, [illegible] in which the aged Indian [illegible] of a [illegible] after a [illegible]

[illegible]

Fetched From Pony

[illegible]

[illegible] and beautiful meadowlands [illegible] side of the road, framed [illegible] the distance. But the trees [illegible] all dressed in white. I walked [illegible]

[illegible] "[illegible] yet," he said. "Your time has not come yet, you must go back [illegible] and you will live many more years. When you do you will come back to me." Then he pointed with his finger into the valley [illegible] I saw many grand buildings [illegible] as we see here they all looked like cathedral. There was [illegible] that I could not [illegible] buildings and the light was like the flutter of leaves in the breeze. It was a lovely city of light.

"Who is that?" I asked the man in white. "That is the City of God. I will take you [illegible] come to me."

Pointed Out Path

"Now you must go back [illegible] I'll walk down the hill with you."

"I did not like [illegible]," the man explained, "[illegible] I had to return."

[illegible] said Nathan.

"He had a [illegible] face [illegible] a fair reddish beard."

"How tall was [illegible]?"

"Not very. About [illegible] inches."

"How old did [illegible] appear to be?"

"About forty."

"Do you know who that man was?"

"Sure, I know that was Jesus. Have you ever [illegible]?"

Nathan [illegible]

[illegible]

"Well [illegible] the other side [illegible] running like [illegible] he said "The [illegible] hell the [illegible] take you home."

Saw Own Corpse

"So I walked up the narrow path up the hill. All of a sudden I saw a dead body lying on the path. It was my body. I [illegible] I wanted to pass [illegible] move. I could not [illegible] back so with fright I fell [illegible]. Then I heard a ringing in my [illegible] bells and opened my eyes. [illegible] crying [illegible] dead 24 hours," [illegible] said.

"I am hungry, give me something to eat," I said.

[illegible] Heaven [illegible] the story [illegible]

Literalist

[illegible] into the stream [illegible]

"How did you come to fall in?" asked a bystander.

"I didn't come to fall in," the boy explained. "I came to fish."—Toronto Globe.

The Method

The facetious young man asked the organ grinder if the last piece that was played was by Beethoven.

"No sir," was the reply, "by Handel."—Royal Arcanum Bulletin.

WALKS 31 MILES TO ATTEND HEARING

Slipshod in business as may have been, as his own counsel admitted, but a Thorsby district farmer walked 31 miles over [illegible] roads to the nearest [illegible] in order to attend [illegible] in Edmonton [illegible] and under the farmer's [illegible] arrangement act. He [illegible] assistance in straightening [illegible] financial difficulties which [illegible] debt load of about $7,500.

Mortgages [illegible] land and chattels, $2,500 [illegible] implement companies, and $[illegible] unsecured debts [illegible] troubles from which [illegible] relief. Poor crops [illegible] prices and [illegible] costs are [illegible] difficulties.

Though he has the reputation of being a good farmer [illegible] man was shown [illegible] business affairs [illegible] proposals made [illegible] to help him [illegible] were made [illegible] his having [illegible] voluntarily [illegible] as additional [illegible].

[illegible] chairman of the [illegible] during the hearing [illegible] are to say that [illegible] witness" for a [illegible] threshing [illegible] turned in to [illegible] have collected [illegible].

The [illegible] meaning an [illegible] expected to [illegible] eight weeks. Applicant [illegible] of the [illegible] with proposals [illegible] settlements between [illegible] and their creditors.

A first [illegible] of $1,904 with [illegible] $146 has been paid [illegible] second and third mortgages [illegible] $2,000, tax arrears [illegible] chattel mortgage [illegible] that had already been [illegible] and unsecured [illegible] represented another [illegible] tangled affairs. The board was [illegible] creditor [illegible] who lives in the Radway district [illegible] a poor farmer who has not made success on three previous locations. At present he is trying to farm without a plow, it was declared.

Topping the list in amount of debts a Vermilion farmer was shown to be in the red to the extent of about $14,000 but agreements already made by him with his land creditors on two quarter-sections, by which he will undertake to make certain payments in the next two years, will probably be incorporated in the board's judgment and proposed scheme for settlement.

CAR DRIFTED OVER BY SNOW NEAR CAMROSE

Caught in the blizzard of Saturday morning when riding in an automobile between Camrose and Wetaskiwin, Ernie Holland of the Capital City Sign Co., and a companion of Edmonton had a nerve wracking experience when their car was completely drifted over with snow in the space of a few minutes about three miles out of Wetaskiwin. Both men had ears and faces frozen and had great difficulty in getting to a farmhouse for assistance.

Thinking to reach Wetaskiwin before the blizzard was at its worst they left Camrose early on Saturday morning but shortly after 7 o'clock they were stalled in an impassable drift. Snow quickly covered the car and the men were forced to dig themselves out. Three times they made attempts to reach a farmhouse but each time were driven back to the shelter of the car. Finally at 5 o'clock in the evening they made shelter but the car was still left in the drift.

"If we had women and children along we could not have saved them. As it was it was all that we could do to struggle against the blizzard after we were forced back to the car three times," said Holland's companion. "A road patrol either by police or highway crews to see if anyone was in trouble might save lives in the future, as we certainly feel that we had a narrow escape and others might not be so fortunate."

URGE M. L. A'S TO PROVIDE ALBERTA WITH BETTER ROADS

Modern and hard surfaced roads form a primary and basic need of this province. Nothing will prove a greater impetus to tourist traffic than highways of such construction.

Any motor driver knows the delight of reaching a hard surfaced road, particularly after having difficulties on other highways. Just 50 per cent of the pleasure of holidaying is found in the condition of the highways, that is, providing it is good, and 100 per cent disappointment if a trip can be laid to a bad road. Is there anything that will keep people away from some places more than the knowledge of a route that is honeycombed with driving problems?

Now that members of the legislature are considering the appropriations for road maintenance and new construction for the present year, the need of modern hard surfaced roads should be impressed upon them strongly.

Now is the time to tell members in clear, emphatic terms that public money should be expended in a way that will give the most satisfactory and most permanent benefits. They should have it brought clearly to their attention that the tourist business of the future, benefitting farmers, rural and city business and all other activities though indirectly, will be measured by good highways.

The Alberta Motor Association has conducted a campaign year after year for modern highways in this province. It is continuing to do so, firmly of the belief that this policy will put Alberta, with its wonderful attractions, firmly upon the tourist maps of this country.

BRITISH STUDY PLANS TO SEND SETTLERS HERE

Great interest is being shown in England in plans for future British emigration of British families to Canada, stated Lord and Lady Rodney in an interview here Monday. They returned at the week-end after spending four months overseas.

They are anxious to see more British emigration for the Canadian prairies when times improve and were following up the campaign they started in England six years ago.

Visiting many country migration committees and discussing plans, they found all enthusiastic over finding an outlet for British settlers in Canada, and there was evidence that the government there was taking more interest. It was being realized that in the coming years Canada desired more population but had her own problems of rehabilitation of unemployed and had no money to spend on immigration, so that the British must provide funds to settle their surplus population of types suitable for farming.

It was freely admitted that families settled on farms with a heavy debt burden to start with and no experience could not be expected to succeed, hence the failure of some previous settlement schemes, said Lady Rodney.

Lord Rodney said need of supervision of new community settlements was admitted.

They had seen in England some of the allotment settlement schemes for the unemployed but they were a temporary sort of thing, offering no future for the children, as settlement in Canada would.

Whenever they could they had backed the Hornby settlement scheme. They found three main objections offered, in its present form, first, that it was on too large a scale, second, that the prospective settler did not relish the idea of being turned out of the training centre in five years to seek his own home, rather desiring all efforts from the first to count on the establishment of a home in the new land; and third, most migration committees wanted to experiment in a small way.

FOR SALE—Brome grass seed, government tested. Grade 1, 9 cents per pound. Apply S. M. Hole, Kingman, Alberta.

BAHR WINS CASE OVER FORCLOSURE

Seattle April 17.—Andrew Bahr, taciturn Laplander who for five years drove a herd of 3,000 reindeer across the Arctic wastes for the Canadian government, returning home to find that he had lost his home because of a mortgage foreclosure, won relief in superior court here Tuesday.

Superior Judge J. Ronald ruled the courts had been hasty in foreclosing a mortgage held by the Provident Mutual Life Insurance company on two apartment houses owned by Bahr.

He denied the company a writ of assistance which would have evicted the Bahrs from their apartment home. Bahr never had been served with the complaint asking foreclosure of the mortgage he ordered the company to answer a complaint filed by Bahr's attorney asking it and the sheriff be enjoined from selling the appartment house. The sale has been completed but counsel for Bahr said it could be declared illegal.

KENTS BACK HOME FROM HONEYMOON

London, April 17.—Sunburned and happy, Duke and Duchess of Kent landed at Croydon aerodrome Tuesday after a flight from Paris completing their wedding trip abroad. The royal couple entered the duke's sport car and he drove it home.

The Story That Was Not Completed

BY M. Z. IN THE CHRISTIAN SCIENCE MONITOR

The main stream of traffic has long since shifted from the road that ran past our house and now follows the great National Highway, and the travelers move in motorcars instead of covered wagons or on horseback. But in our childhood one of the principal trails to the Southwest lay before our gate and sooner or later all those who passed that way stopped to get water at our well and to exchange greetings with us.

In this fashion we children caught glimpses of many personalities, and heard the beginnings of many tales which might be continued at some later date or might stop off short.

We have not forgotten a young man who came one day riding, like young Lochinvar, out of the West, with only his mustang for company and with all his possessions bestowed in light saddle-bags. He wore without ostentation, a cow hand's outfit—sombrero, well-worn chaps, a bandana around his neck; and in his eyes the recklessness of youth was already giving place to the philisophic melancholy that comes to men who live much alone in rugged surroundings.

He had dinner with us and thanked us with the courtesy and native dignity which seemed also to belong to that time and place. Then he said, with almost boyish diffidence, to our mother:

"I wonder if I could leave something with you? It's a thing that belonged to my mother, and I'd like to keep it, but there's no fit place for it in my bags. It'll only get spoiled."

"Of course," Mother agreed, and the young man went to his saddlebags and came back with an object that set us gaping with admiration. It was a pincushion, fashioned in the shape of a carrot, fully fifteen inches long and so cunningly made of orange and green velvet that anyone must, at first glance, have planned to add it to the stew immediately.

"Maybe," the young man said, a bit wistfully, "I'll come back some day, with more of an outfit, and get it."

We watched him ride away over the crest of the hill, sitting his horse with an utterly unconscious grace and we put the pincushion away carefully, tenderly, in the top drawer of the bureau, wrapped in white tissue paper. He would come back for it soon, we told each other. Perhaps, we thought romantically, he would bring a bride.

We learned, before we were old enough for school, to judge the character of those who passed our way in covered wagons. Those whose wagon wheels did not squeak; who watered their horses before they themselves drank and who came into sight and disappeared at the same slow, steady pace, were likely to go west but once and be seen by us no more. Those whose wagons were overloaded, who allowed their canvas to go torn and unpatched and who spoke in loud and glowing terms of the Paradise of opportunity to which they were going, usually reappeared within the year, complaining of the hardships they had endured.

There were variations to the rule. One family, named Douglas, stopped with us for a day and a night. They planned to take up land in eastern Colorado. They filed on their homestead at the beginning of a protracted drought, and for some years they could neither increase their herds nor raise wheat. So, in order to secure money to live on, they went East every year to the harvest.

In the spring and fall they would stop and make camp beside our gate. The sons, growing astonishingly taller each year, were level of eye and steady of hand, as was that other Colorado boy who in recent years conducted himself with equal composure in a blizzard and in the White House. Mr. and Mrs. Douglas were capable persons who had no difficulty in finding work.

There came a spring when the time for the annual migration came and passed but brought only a letter from the Douglas family. They had, it said, wheat of their own at last, and they doubted that they would be "making the harvest" again. And, indeed, we never did see them again, although we heard from them from time to time, and reports filtered through by way of those returning, discouraged, to the East, of the prosperity and "luck" of the Douglases.

So some of our stories were rounded off, but one never was. Our lonely horseman never returned for his carrot, although we waited long for him. One year faded into the next until suddenly we were young women with a room of our own in the white frame house that supplanted the old soddy.

We took the wonderful pincushion out of its white wrappings then and placed it on our dresser, but we never brought ourselves to stick a pin into its velvet surface, because who knew that even then the young man might not come back to claim his keepsake?

Beauties With Their Beasts

Just another beauty and the beast picture, but the beasts are overshadowed by the beauties in this display of feminine and pachydermic pulchritude.

The girls hail from three nations, Canada, the United States and Great Britain, and the handsome elephants were acquired by them during a visit to Ceylon. They are bringing them home in their baggage (pardon us, trunks), but that won't be until their world-cruise in the Canadian Pacific liner Empress of Britain is over in May. The picture was made on the boat-deck of the Empress of Britain at Colombo.

Local & Personal

The Misses Myrtle Bethel and M. Berkman of Sedgewick are visiting at the Bethel home for the holidays.

Mrs. Ellis, Jean and Raymond spent Easter at the Malcolm home.

The Misses Ella and Ina Taylor are spending the holidays in Edmonton.

The Misses Alice and Kathrine Mean are spending the holidays here.

Born—To Mr. and Mrs. Ed Wuetherick on Tuesday April 23, a daughter. Congratulations.

Mr. and Mrs. Coatta and Doris visited the city for the week end.

Mr. E. Wuetherick motored to the city on Wednesday.

Mr. Mel Woods spent the week end in the city.

Mr. B. Kendall spent a couple of days in the city last week.

The teachers of the Tofield Public and High School are on their vacation.

Mrs. L. G. Smith and daughter of Edmonton visited town one day last week.

Mr. Bert Swift visited town for the week end. Mrs. Swift has been visiting friends here for a few weeks.

Miss Margaret Allan of Westlock, Miss E. Allan of Barrhead and Mr. and Mrs. Provost of Edmonton visited at the Allan home for the week end.

Mr. and Mrs. Norman Scott and Norma spent Easter in Edmonton.

Mr. and Mrs. Brace and Miss Benny visited the city on Wednesday.

Mr. and Mrs. F. Dunn and Beryl Edwards visited the city on Monday.

Frank Carter spent the week end in the city.

LOCAL W. A. JUNIORS ATTEND RALLY AT EDMONTON

The Junior W. A. Rally (Diocesan) was held in All Saints Cathedral and Parish Hall on Wednesday April 24th, commencing at 2:00 p.m. with a special children's service in the church. Canon Clough gave a suitable address. The children then went to the Parish Hall where the various branch reports for 1934 were read, after which the President of the Diocesan Board (Mrs. H. P. Reid) assisted by Mrs. E. S. Wilson (Diocesan Junior W. A. Sec.) presented prizes to many of the Juniors. Tofield Juniors (under the leadership of Mrs. J. Robinson, assisted by Isabel Robinson) had the honor of receiving the most Special Awards. Those receiving certificates of Honorable Mention in the Memory Competition were:— Marion Smith, Doris Coatta, Elaine Thomas, Miriam Seale, Diana Davis, Jean Davis, Betty Pincott, Edith Robinson, and Euphemie McBratney. With the exception of one younger member, who had only been affiliated a short time, all received 100 marks. In the sewing competition Doris Coatta received first prize for the best bag for Social Welfare for the out-of-town branches. Euphemie McBratney was awarded a Special Prize by the Social Service Secretary for her bag. In the written examination on the study book "The Adventures in Canada," Edith Robinson had the distinction of receiving the highest marks in the diocese and hence received the Bishop's Prize (a large portrait of His Lordship). In this competition Edith also won first prize in 1931 and second prize in 1934. Her sister Isabel won first prize in 1932, this being the first time it was won outside of the city. Betty Pincott had the honor of receiving the second highest marks in her branch (Tofield) for the written examination, and received the branch prize, a book entitled "The Life of Our Lord." Betty Pincott has had perfect attendance for one year. Betty has had the distinction of winning this two years in succession. Euphemie McBratney has had perfect attendance for two consecutive years. Isabel and Edith Robinson have had perfect attendance for four consecutive years. The leader and her assistant, nine juniors and three mothers attended the rally.

The Tofield Juniors accompanied by Isabel sang their Memory Work hymn in a delightful and happy manner. Cake, sandwiches, ice cream, and lemonade were served to all present. Our special thanks are due Mrs. Davis, Mr. Coatta and Mr. Seale for driving the cars and to Rev. Wallis for the use of his car.

LOCAL BOY SCOUTS STAGE SOCIAL AND PROGRAM

On Wednesday evening the local troop of boy scouts under the leadership of Scoutmaster Wallis assisted by Blake Clatterham and Jack Smith staged a very enjoyable social and programme to which the parents and friends of the boys were invited. There was a fair number of parents present and they all thoroughly enjoyed the various numbers presented.

In addition to a number of humorous skits, choruses, dialogues and recitations, demonstrations of first aid work was given. One supposedly broke his leg pole vaulting and quickly his leg was bandaged, and an improvised stretcher from poles and two coats was made and the lad carried out on it. Another demonstration of first aid work was given in which various kinds of bandages were applied.

Following the programme the boys served lunch to the guests assembled. Mr. R. Pincott gave a short interesting address saying that those in the outlying sections of South Africa during the Boer war had unlimited confidence in Baden-Powell.

DR. McGUGAN TO SPEAK HERE APRIL 29th.

On Monday evening, April 29th, Dr. McGugan will speak at the Tofield Town Hall on the subject of State Medicine. The meeting will get under way at 8 p.m., and is being sponsored by the U. F. W. A. and the Tofield Board of Trade. At the present time the subject of State Medicine is receiving much attention and Dr. McGugan's address should be both interesting and timely.

LEDUC BASKETBALLERS PRESENT PLAY AND DANCE

A company of young people from Leduc came to Tofield on Wednesday and presented the three act comedy play "Listen to Leon." Chiefly due to a number of events following each other in rapid succession the attendance was not as good as was desired, but the company put on the play in good style and those who did attend enjoyed it.

After the play a dance was held, the Leduc orchestra furnishing the music. A fair number attended the dance and the music was decidedly good.

Your opportunity to meet and consult the Tip Top Tailors'

STYLIST

W. D. LOWDEN
who will be at our store

Sat., May 4th

MEN! This is important! Mr. W. D. Lowden, the Tip Top Tailors Stylist, will visit our store, where he may be consulted without obligation by men of this town on any questions of style, fabric or color pertaining to a well-dressed appearance.

The benefit of Mr. Lowden's experience is of course given without obligation and is offered as just one more reason why you should come to our store, at least to compare, before you order Spring and Summer clothes anywhere.

More woollens than ever make up the Tip Top Spring and Summer range - more styles - better tailoring and finish - yet the price remains $24.75 for your unrestricted choice.

SMART GIRL RUNS CROOKS INTO PRISON

Toronto, April 23.— Confiscation of 87 counterfeit United States $10 banknotes followed the arrest of five men here Saturday, and police last night were checking the possibility that the prisoners were associated with a gang whose engraving plant in New Jersey was raided by Federal agents some weeks ago.

Three of the five arrested are residents of Guelph, Ont., about 55 miles west of Toronto, and two are from Hamilton, 40 miles west.

Those in custody and charged with passing a counterfeit U.S. $10 bill are: Cosmo Carere, former light-heavyweight prizefighter, 26 years old; Domenico Renattis, 37, and Sam Sorbara, 2[illegible] of Guelph, Samuel Ronco, 24 and Dominick Sorbara, 23 of Hamilton.

The suspicions of a 20-year-old salesgirl in a bakery led to the arrest of the five. When a man came in with a brand new U.S. $10 bill and ordered 10 cents worth of macaroons, Miss Annie Gary felt dubious. She looked out the window and noted the license number of the auto outside with five men in it as it drove away with the customer, the change and the macaroons.

She called a neighboring shopkeeper into consultation and then telephoned the police, supplying the auto license number. The auto and the five men were picked up in a west-end police division.

FRIENDS of the . . . FAMILY

Look at the packages on your pantry and bathroom shelves, and see what a multitude of brand names you recognize. Some of them have been familiar for years. You may have made the acquaintance of others only a few weeks ago. But even these are not suspected strangers. You have bought them confidently because they were advertised. And it is the same with your sheets and towels, your shoes and clothes, your electric appliances, the car in your garage—nearly everything you use.

Advertised products have a standing that commands respect. They are not nameless, but vouched for by responsible firms. The fact that they are advertised is in itself an indication that their standards of quality are strictly maintained, that they represent honest value.

As science and discovery go on, newly developed products are constantly being advertised—ready to help you save money and improve your standard of living. Every advertisement of such a product you read in your newspaper is a letter of introduction to a new and possibly useful friend.

It will pay you to read the advertisements in this paper. By doing so you will meet many choice products—worthy to become friends of the family.

THE MERCURY

MILK WITH MEAT OR FISH

It is not without good reason that milk is so often used in cooking meat or fish. True, all three foods, milk, meat and fish belong to the animal protein class and to some it may not seem wise to use more than one of these body building foods at a time, but it should be remembered that no matter what other foods form the daily meals, milk should be included, allowing at least one pint per person every day. By combining milk with meat or fish, part of this daily milk quota is supplied and at the same time the addition of milk to any meat or fish dish provides extra nourishment. Still another point in favour of the milk-meat or milk-fish combination is the fact that when meat or fish is cooked in a milk medium, it is made most digestable. The following recipes have been tested and approved by the Milk Utilization Service, Dairy Branch, Dominion Department of Agriculture.

Fish Loaf

2 cups cooked fish, flaked
1 cup soft bread crumbs
[illegible] teaspoon salt
[illegible] teaspoon paprika
[illegible] teaspoon grated onion
[illegible] teaspoon lemon juice
[illegible] eggs beaten
[illegible] hot milk
[illegible] teaspoon finely chopped parsley

Mix all ingredients together. Pack into buttered baking dish. Bake in a moderate oven 350 degrees F. until firm in centre—about 30 minutes. Serve in Drawn Butter or Egg Sauce.

Chicken and Ham Loaf

Follow recipe for FISH LOAF using 2 cups diced cold chicken and one cup chopped cooked ham, instead of fish. Use only [illegible] cup bread crumbs. Serve hot or cold.

Ham Baked in Milk

1. Use slice of ham 1 inch thick. Pack about ½ inch thick with brown sugar. Measure 1 cup of milk and add to it one tablespoon Worcestershire sauce. Pour around ham in shallow baking pan. Add sufficient milk and Worcestershire sauce to almost cover ham. Bake at 400 degrees F. until ham is tender and milk evaporated.

2. Use slice of ham ½ inch thick. Rub 1 teaspoon of mustard well into both sides of ham. Place in small baking dish or casserole. Pour 1 cup of milk over ham and bake in moderate oven—350 degrees F. for one hour.

INFERIOR WHEAT IS TROUBLE WITH BRITISH BREAD

As to the charge "that the people of Britain are learning to like the taste of bread made either without Canadian wheat or with the very minimum mixture the flour millers can use" and that "protests from British bread eaters are almost entirely lacking." I might remark that such statements are not true. They are protesting very effectively by eating less bread and I quote the following extract from a letter written by Andrew Law, a British flour importer in reference to the £2,500,000 "Eat More Bread" advertising campaign recently launched by British millers and bakers:

"Our Government by guaranteeing the farmers, mainly in the east and south of England who grow wheat in quantity, a price double the open market price, has stimulated the growth of the same kind of soft wheat with which France is embarrassed, and is thus compelling the English millers to buy inferior wheat which they do not want to buy so largely."

As the quality of English flour goes down the quality of bread goes down and the consumption diminishes. So the millers were compelled to undertake the expensive "Eat More Bread" advertising campaign in order in their turn to persuade the people "to eat what they do not like to eat."

The average value per acre of occupied farm lands in the various provinces of Canada in 1934, including improved, and unimproved land together with dwelling houses, barns, and other farm buildings, is reported as P.E.I., $31; Nova Scotia, $27; New Brunswick, $24; Quebec, $31; Ontario, $41; Manitoba, $17; Saskatchewan, $16; Alberta, $16, and British Columbia, $60.

TRAIN CAPTURE WITH FAKE GUN

Calgary, April 22.—Alleged to have taken control of a Canadian National railways Winnipeg-Calgary train with a toy gun, William Winse, a transient was held here Monday by R.C.M.P.

When Conductor C. Flegg, of Calgary, entered a sealed mail car at Drumheller he found a trespasser. He attempted to evict the man, but the transient, Flegg said, drew what appeared to be a gun.

The conductor told the police that Winse forced him down the train to the tender where he covered the engineer. With both men covered, the train proceeded 20 miles toward Calgary, police said, until near Ardenode, when the gunman jumped off.

Mr. Flegg notified the Superintendent J. P. Johnson, at Calgary, and two R.C.M.P. officers set out by automobile to meet the train.

Two miles north of Ardenode they overtook a man and as they sought to question him, he is alleged to have pulled a gun. The man was arrested.

Police said a nickel-plated cigarette case in the shape of a gun was found near the scene of the struggle.

COST OF LIVING AND REAL WAGES

Very interesting tables are presented by the Co-operative Link (Great Britain) in connection with the cost of living in world countries. From the merchants' point of view the standard of living in a community decides its value as a market, while from the producers' standpoint it is an important factor in the cost of production and therefore in its competitive power on the world market.

The International Labour Office makes periodical computations of the cost in different countries of buying at retail prices of a basket of fixed quantities of 14 foodstuffs in common use. Converted into dollars and expressed as percentages of the United States figure the cost of this basket of foodstuffs in 1932 was—

United States	100
France	90
Italy	80
Germany	76
Great Britain	61

WHEAT SITUATION

The record of devastation caused by drouth, high winds and drifting soil in midwestern United States, spread by newspaper reports, magazine stories and the radio, resulted in a rush to buy wheat and the prospect of the speculating public buying carried away in another wild bullish wave last week. After being comparatively dormant in the face of stronger markets abroad the Winnipeg Exchange sprang to life and prices shot up quickly. As wheat reached the 90 cent mark selling came into the pit credited to John I. McFarland. This steadied the market and prevented a runaway.

There is no doubt about the seriousness of the damage to the winter wheat crop in Eastern Kansas, Nebraska, Oklahoma and Texas. From this area comes the margin of wheat which is usually considered exportable surplus in the United States. The average acreage seeded to winter wheat in these States is approximately 23½ million acres and the average yield 263 million bushels. The acreage seeded in Western Canada last year was approximately the same—about 23½ million acres and by a peculiar co-incidence the yield, 263 million bushels, was the same. One can thus visualize the extent of the disaster in the United States by comparing the yield and acreage with Western Canada. If over half of our acreage was wiped out by dust storms and the rest in poor condition the situation would be comparable.

At the same time other portions of the United States have fair prospects and it remains to be seen what will happen to the spring crop. In the meantime Canada has a big supply of surplus wheat to sell. It would not do for prices to shoot sky-high thus mitigating against overseas buying. Canada's big hope now lies in an active spring and early summer demand.

On the prairies it will be close to May 1st before the farmers are on the land. This would naturally tend to decrease acreage as there is quite a hopeful feeling in Alberta over the prospects of a very fair crop. At the same time sub-soil moisture is deficient in the south while central and northern Alberta will be later than usual.

BOY SCOUT NEWS

King To Light First Scout Jubilee Beacon

The first of a chain of over a thousand Boy Scout beacons which will celebrate the King's Silver Jubilee in England will be lighted by the King himself. From Buckingham Palace he will light a bonfire built by Scouts in Hyde Park, and this will be the signal for the flaring up of fires on a thousand hilltops in England, Scotland and Northern Ir[illegible]

Canadian Scouts Invited To Poland

An official invitation to Canadian Scouts to attend the 25th Birthday Anniversary Jamboree of the Boy Scouts of Poland has been received by His Excellency the Earl of Bessborough, Chief Scout for Canada. The invitation is signed by Dr. Michal Grazynski, President of the Polish Boy Scouts Association. The Jamboree will be held in the forest of Spala on the estate of the President of the Republic, July 11 to 24, and an attendance of 20,000 is expected.

Says Scouting Saves Windsor $10,000 Annually

That the city of Windsor is saved some $10,000 per year by the Boy Scout Movement was a recent declaration of Magistrate Brody,—because of Scouting's effectiveness in preventing a certain number of boys annually being added to the roll of police court cases.

A Distinction For Thursday Island

During their present world tour, Lord and Lady Baden-Powell found the greatest number of Scouts and Guides to population in an unexpected place—small Thursday Island, off Queensland.

From 700 inhabitants—400 whites and 300 Malays and Japanese—200 Scouts and Guides greeted the World Chief Scout and Chief Guide.

100 Old Bowlers, Please!

Old toys, old clothes, old shoes, old furniture are frequently called for by Boy Scouts in their welfare work. It remained for Oxford Scouts to spring a new one. They were asked to be Roman soldiers in a pageant. Having the Scout reputation for resourcefulness, they were requested to provide their own Roman helmets. The answer: 100 old bowler hats, minus rims, plus 1 gal. aluminum.

MOTHER NATURE MAKES MISTAKE, SEEDS BOWLING GREEN WITH SALMON EGGS

Mother Nature is a very wise old lady but she has the Homer weakness and nods once in a while.

As, for instance, a few weeks ago when she tried seeding a British Columbia bowling lawn with salmon eggs!

Truth to tell, however, it wasn't simple carelessness but a case of Nature losing her temper in most unladylike fashion, blowing up bad storms in part of the province flooding the streams, and sweeping salmon eggs from off the spawning grounds to whatever spots the mad whim of the moment might dictate. The bowling green at the town of Courtenay happened to be one of these spots.

The Courtenay River broke through its banks at the town and the swirling waters overlaid the bowlers' nearby green with a thick coating of silt. Passing by the ground a day or so later, when Nature had got over her tantrum and the river had gone back to normal behaviour, the Dominion Fisheries Department's Inspector for the district found to his surprise that the silted green had been generously seeded with salmon eggs.

It wasn't a happy surprise, for the very good reason that the officer knew that it indicated that the spawning beds on the Courtenay and other nearby streams had probably suffered severely, or in other words he feared that much salmon spawn had been destroyed. And salmon spawn is worth a great deal of money, potentially, to British Columbia, which possesses, in its salmon fishery, the most valuable single fishery of the Dominion.

THE ROYAL JUBILEE—

THREATS OF war may hover over Europe; different groups or parties embracing different lines of thought may go on expressing their views; political and economic upsets may occur, but preparations for the celebration of the Royal Jubilee in Great Britain and the Dominions goes steadily on.

On May 6th, 1935, King George the Fifth will celebrate the 25th anniversary of his accession to to the throne. The day will be entirely spent in celebration in London and Great Britain and it is claimed that in various ways London will keep alive the spirit of celebration for three months.

During the past twenty-five years a great change has come over the continent of Europe as regards Kings and Courts. One by one various continental kings abdicated or were dethroned, but it is true to say that all through the turmoil and stress of post war history the prestige of the British Crown among British peoples have increased rather than diminished. King George and Queen Mary are revered in the hearts of the British people to-day as much or even more so than any sovereigns who preceeded them. This may partly be explained by the Britishers love of family. Speaking from Sandringham on Christmas Day, King George said, "I would like to think that you who are listening to me now, in whatever part of the world you may be, and all the peoples of this Realm and Empire are bound to me and to one another by the spirit of one great family." And the Britisher does like to feel so bound.

However there is a difference between the Crown and the Sovereign. One is personal and the other constitutional. All people know that while Britain is a Monarchy and the United States a Republic, it is an open question as to which country is the more democratic. In Great Britain and the Dominion a prosecution is launched under the form of "Rex versus Smith," in the United States a similar document would read "the people versus Smith." The difference is theoretical—almost to the point of there being no difference at all.

The first quarter of the 20th century has brought about in the minds of the peoples of the various British dominions, a change of view point as regards the Crown or rather an accentuated respect paid to the Crown. Prior to the laws being passed which made self sustaining dominions of former Crown Colonies, Great Britain as a country was looked upon as the centre of the Empire. Since the former Crown Colonies have become nations in their own right, it is not so much Great Britain as a country, but rather the Crown that has become the focusing point for peoples of the Empire.

Here in Alberta, celebrations will be held on May 6th. Edmonton we believe, is planning celebrations in which school children will take part.

BOY SCOUTS—

THE ORGANIZATION known as the Boy Scouts, have really earned the enviable reputation which it enjoys. Founded by Baden-Powell, who was himself a true scout, it has grown into an organization of huge dimensions and is represented in almost every country in the world. To be "a good scout" is the ambition of all boys and the organization is so arranged as to make it comparitively easy and pleasant to be one. Jamborees, (a gathering of boy scouts from all over the world) are held in different countries each year, and it is a profound pity that the splendid spirit of comradeship which exists at these jamborees cannot be extended to affairs in after life. If it was, there would be less fear insanity such as exists in Europe today.

This week the Chief Scout, Lord Baden-Powell, accompanied by Lady Baden-Powell, will visit Edmonton, where boy scouts from all over the province will gather to do them honor. Among these there will be the Tofield troop, under the leadership of Rev. Wallis.

The history of the boy scout movement in Tofield goes back several years. Some years ago, an organizer arrived in Tofield and proceeded to organize a troop. There was no adult leader available but a few of the boys, fired with enthusiasm, decided to organize. Realizing that all important movements should start off on a full stomach, they held their first meeting in "Hap" Pruden's hut, at which no small amount of cocoa and pie was consumed. Sad to relate their first meeting was also their last and the boy scout movement lay dormant for several years thereafter. At that time there was a live Tuxis group in town. The Tuxis organization while not possessing the national and international solidarity of the Boy Scout movement, is also a splendid boys' organization, and during its hey-day here was responsible for doing much good among the Tofield boys.

Several years later, Mr. Harrold, a man who quietly and unobstrusively did a great deal for the boys of this town, organized a group, and later Mr. Cary and Mr. Wallis became connected with him. This made an ideal combination of leaders and the boy scout movement flourished. The vicissitudes of railway and banking life removed Mr. Harrold and Mr. Cary to other points, since which time Rev. Wallis assisted by some of the older lads have ably carried on.

To be a good scout is synonomous with being an efficient scout and those boys who earn a goodly number of the numerous scout badges or degrees are among the capable and well informed youth of the nation.

SPECIAL SESSION IS MOOTED TO REDUCE LEGISLATURE SIZE WITH NO ELECTION UNTIL FALL

Naming of a house committee to report at a special session to be called before next September on reduction of membership and extension of the proportional representation system of voting to all rural ridings will be proposed in an amendment to be moved in the legislature by W. H. Shield, U.F.A., MacLeod.

If Mr. Shield's proposal were adopted, the general election would be postponed until after the special session.

During the week-end Mr. Shield stated definitely that it was his intention to put his plan before the house. It would be submitted in the form of an amendment to a resolution to be moved by D. M. Duggan, Conservative leader, proposing that the house membership be reduced from 63 to 34 on the basis of two provincial members for each of the 17 federal ridings.

While it was rumored some days ago that Mr. Shield was considering an amendment, it was not until the week-end that he made a decision to submit it.

This is regarded as possibly the most important question still to come before the house before prorogation which is expected early this week.

After dealing with a mass of legislation at two sittings Saturday, when it was realized that prorogation was out of the question in view of the number of resolutions and bills still in the final stages, the house adjourned until 10.00 a.m. Monday. It is likely that there will be three sittings Monday and a like number on Tuesday.

Mr. Shield's amendment is a "double-edged" proposal to settle the redistribution problem.

A house committee, he suggests, should prepare an electoral map of the province providing for 20 electoral areas while each member would be a member of the executive council.

An alternative plan would be to divide the province into not less than 15 or more than 18 permanent electoral areas. Each area would elect not more than three representatives to the assembly, depending upon the population within the area.

This plan is along the lines of one advocated by Hon. George Hoadley, minister of trade, industry and telephones, who has suggested a house of 18 members or thereabouts.

While there is support for the Shield proposal on the government side, it is not known how far it would extend. Prominent members on the U.F.A. side are known to be opposed.

In Liberal quarters it is stated that such a plan would not meet with support.

LOCUSTS VERSUS SNOWSTORMS

In South Africa, railways have to contend with locusts; in Canada they have snowstorms. A recent visitor to Saint John, N. B., who arrived in that city over Canadian National Railways from Halifax, Nova Scotia and who has represented his company for the past two years in South Africa, states he was once on a train which was held up by locusts which covered the tracks to a depth of three or more feet in places. The wheels of the locomotive could make no headway, slipping on the rails which were covered with locusts. At times, he remarked, the sun is blotted out by the clouds of locusts in flight and they do great damage to agriculture stripping every bit of vegetation for miles. The locusts flights come from the general direction of the Red Sea crossing from Arabia where they were believed to take their origin in deep valleys. Methods adopted to combat the locust included digging great trenches, as in biblical days when the locusts were in the young or jumper stage, millions of the locusts hopping into the huge ditches where they were buried by crews of men. Locusts in the flying stage are sprayed with a strong arsenical preparation from airplanes. The natives however, have no objection to the locust as they are very fond of them as an article of food. For our part, we'd sooner have the snowstorms.

King's English

Discovering yet another mistake in his letters, the employer summoned his new typist.

"You came here with good testimonials, Miss Brown," he barked, "and do you mean to tell me you don't know the King's English?"

"Of course I know it," she replied indignantly. "Otherwise he wouldn't be King, would he?"—Birmingham Express.

Down Hill

Heard in a Glasgo bus:

First passenger: "I see Scott has got to Australia."

Second Passenger (plainly unimpressed)— "Uh."

First Passenger: "Yes, in two days and four hours. It's amazing."

Second Passenger: "Oh, I dunno. It's a' doon hill."—Glasgow Express.

SPECIAL RATES TO EASTERN CANADA

Winnipeg, Man., April 22.—The Canadian railways again have made arrangements to offer the travelling public another travel bargain. For the period from May 17 to May [illegible] inclusive, the Canadian National and Canadian Pacific railways will offer another of their special bargain fares from western Canadian points to various cities in Eastern Canada, according to an announcement made a few days ago by Joe E. Parker, secretary of the Canadian Passenger Association, Western lines. Tickets will have a time limit of 30 days in addition to date of sale and will be good for stopovers at Port Arthur, Armstrong and East.

Three classes of fares will be offered as usual:—approximately one cent a mile in coaches; one cent and a quarter a mile in tourist sleepers; and one cent and a half a mile in standard sleepers, the latter two fares being on payment of existing sleeping car berth rates.

ONLY SIX TRACTORS IN MALTA

In Malta ploughing of the land is complicated by the stone wall boundaries of the fields. The total area of arable cultivated land is only [illegible] acres distributed among 11,[illegible] holdings, according to the Agricultural Department of the Canadian National Railways. The smaller farms are run by the farmer and his family. On the larger farms hired help is utilized and tractors are used to a limited extent. There are only six tractors in Malta. The smaller farmers use a primitive wooden plough which is light in weight and can be readily carried by the farmer to his home afoot or lifted, as frequently is the case, across the stone-wall bound areas. No mechanical threshers are used, they not being favored by the farmer who desires his straw thoroughly bruised so it may be the more readily appreciated by the stock when fed to them.

Second Best Thing

The editor of a poultry journal received a letter from a woman reader. It read: "How long should a hen remain on the eggs?"

The editor replied, "Three weeks for chickens and four weeks for ducks."

Three weeks passed, and the editor again received a letter from the reader. "Thank you very much for your kind advice," it read. "The hen remained on the eggs for three weeks, and there were no chickens hatched, and, as I did not care for ducks, I took her off the nest and sold the eggs."

Miss Mable Lawson of Camrose spent the Easter Sunday at the home of her parents Mr. and Mrs. George Lawson.

Miss Helen Manning spent the holidays at the home of her parents in Edmonton, also attending the teachers' convention.

Mr. and Mrs. Williams and two daughters visited Mr. and Mrs. Geo. Cookson at their home Sunday.

Master [illegible] Ferguson of Lakeshore is spending the Easter holidays at the home of his grandparents, Mr. and Mrs. J. H. Ingram.

Mr. Jack Fair of Kingman is working for Martin Lawson.

Mrs. Wesley Ingram, Miss Viola Lee, Messrs [illegible] Lee, Jack Fair and Roy Williams were Sunday guests of the Sears family.

Mrs. [illegible] Lawson [illegible] son Martin, and Mr. and Mrs. Herman Lawson and family were Sunday guests of Mr. and Mrs. P. Lee.

Miss Mildred Ingram is visiting her sister Mrs. T[illegible] Ferguson of Lakeshore district.

Mrs. [illegible] Ingram and Mr. P. O. Moline received word of the death of their mother, Mrs. Moline, at the home of her daughter at Post Falls, Idaho, at the ripe age of 80, the past [illegible] years [illegible]. Mrs. Moline was a resident of Amisk Creek Tofield for many years, coming from Iowa 35 years ago. Some 12 years ago she went to live with her daughter Mrs. Sara Harrison at Post Falls. Mrs. Moline was a devoted christian with a sweet retiring nature, highly respected by all. She leaves to mourn her loss Mr. P. O. Moline and Mrs. Emma Ingram of Tofield, Mrs. Sara Harrison and Mrs. Annie Carter of Post Falls, and Mr. Jonas Moline of Acme, Alta and ten grandchildren.

AMISK CREEK

The play put on by the Young People was a success in spite of the cold weather and bad roads. There was quite a crowd present all the players doing their parts splendidly. Much credit is due Miss H. Hillerud who directed the play. The play was also put on in the Solberg school the following Saturday before a fairly good crowd.

Messrs. M. Anderson and N. Sand have been putting up a machine shed for Mr. A. Patterson recently. Morley Anderson is now helping to put in the main floor in the R. A. Moen barn.

Mrs. P. Moen sr. celebrated her 83rd birthday on Sunday, April 14th. A few friends and relatives visited her on that occasion, wishing her many happy returns of the day.

The Misses Agnes Annebo, Lilly Berg, Olive and Lilly Haugen who are attending the Camrose Lutheran College spent the Easter holidays at their parental homes here. Unfortunately Glen Olson and Pearl Patterson had to stay at the college due to an attack of the measles which they have recently contracted. We hope for a speedy recovery.

Miss Ruby Berg was home from Edmonton on Easter Sunday. Miss Lilly Erickson from Kingman was her guest while here. They left on the bus again on Monday morning.

Steve Papovich who has been at P. Flaaten's during the winter left last Saturday for his home in Manitoba.

Sigurd Snortheim is now assisting with the work at Flaatens.

The Ladies' Aid will meet at Mrs. J. Berrils home to-morrow, Tuesday.

E. A. Moen was a city visitor one day last week.

Mrs. Wesley Ingram visited a few days with friends and relatives in our district on Wednesday. She departed for her home at Victoria, B.C.

Dear sir:

Re New Tax Schemes

From time to time in the last few months we have heard the advocates of a so called Social Credit scheme. Advocating a plan for Alberta which they claim is based upon the Major Douglas' scheme and allege proof of the claim by dogmatic statements. But this is really a scheme based upon two forms of taxation. One, an intricate form of script the efficacy of which is questioned by all economists today, as a method of relieving want in the midst of plenty, and the second method, no one, not even their own supporters try to defend, as being used in one province alone.

Their chief appeal is to the emotions and not to an intellectual study of economics. One can therefore see why hearing only one side, one might fall for it, in fact I was attracted to it myself for a short time. Some argue that the present system is going to crash anyway and that the sooner we hit the bottom, the sooner we will be coming up; one might as well argue that if we caught some disease that the sooner we were very bad the sooner we would be well; but the greater resistance we have to a disease the sooner we will be over it.

When first the frenzied support to the scheme became apparent and realising that it had practically no chance of success and realising that its failure would undoubtedly put the province into the hands of a receiver similar to New Foundland so graphically described by the schemes own supporters, some began to fear a dictator realising that under a dictator all effort toward a new social order must cease even such as we are at present, able to carry on. But when we consider the characteristics of the English people to "go with the bally show, you know," to see what it is all about but when he comes face to face with reality to about face and to refuse to be drawn into the thing, and we must recognize that owing to our relationship with Great Britain, our literature and our education that their characteristics have an influence far in excess of their numbers. Also that the people of Alberta are trained in Political Democracy and when it comes to voting for the most autocratically selected bunch of candidates that any party ever came before the electors in any province of Canada with since confederation, they will turn thumbs down on autocracy. Even some of their own supporters are beginning to convalesce from their attack of taxitis and getting on their feet are supporting Douglas (genuine) Social Credit. Our need to worry is sure growing less.

If one is interested in an entire New Social Philosophy spend a few cents for some C.C.F. literature or subscribe to the "Labour News," or if you wish to study Social Credit a money mechanism, only get Social Credit for Canada," by W. A. Tuttle or subscribe to the Douglas "Social Credit Advocate" and read genuine Social Credit, we can each think things out for ourselves. These two sources of information do not promise an "Alice in Wonderland," transformation, but in the end Alice in Wonderland was only a pack of cards, but they offer plans that appeal to the reason and intellect, something that will succeed.

These tax advocates portray a wonderful picture of utopia and dogmatically state that (Social Credit) their scheme will give us all of these things but fail to produce any proof and offer us only these two [illegible] of taxation as Social Credit? To be sure they do not forget to tell us that one tax will return to each good citizen $25 per month. The fact is they have no plan, and one speaker was frank enough to state that after election the elected ones would get together and draw up a plan, at least we may presume that they would try to draw up a plan whether it had a ghost of a chance of working or not. Frequently they offer no opportunity for questions though they have announced a question period. And, then occasionally some one is heard to say "there were no questions asked" assuming that none could have been asked.

To overcome this misunderstanding I suggest that if there are any supporters of the Aberhart Social Credit in Tofield, that they debate at some convenient time this form of so called Social Credit with some of the opponents of the scheme and if they wish to bring in an outside speaker to debate the opponents will also get one. Just call me, phone No. 814. It would help some who are trying to find just what it is all about and who have little time to study. Of course if there is something phony about the scheme to take it to pieces one might find what wheels are missing. In that case this type of Social Creditors will not accept debate.

Yours truly,
Geo. G. Abernethy

Mr. and Mrs. Thorsley and family were dinner guests at the R. O. Berg home Easter Sunday.

The Y.P.A. held their Easter programme at the church on Sunday evening. In spite of the bad roads quite a number were present, the program consisted of readings, recitations and singing.

The school kiddies are having a vacation this week on account of the Teachers' Convention.

H. E. ROGERS

FROM A STAFF OF SEVEN TO SIX THOUSAND STRONG

From less than a corporal's guard to the equivalent of six regiments — thus graphically illustrates the growth of the Bank of Montreal's staff in 117 years.

On the 23rd of August, 1817, the first four employees of the Bank of Montreal were appointed. They were the cashier, an accountant, a paying teller and a second teller. Shortly afterward a discount clerk, a second bookkeeper and a porter were added.

These seven constituted the original staff when the modest establishment on St. Paul Street in Montreal opened its doors on Monday, November 3rd — an establishment which was destined to play a conspicuous and beneficial part in the development of Canada's resources.

Throughout the many decades that have followed, the Bank of Montreal has made increasing effort to provide a banking service always adequate to meet the requirements of Canada's development.

The original staff of seven has grown to 6,300, loyally serving the public through 500 branches extending from sea to sea — and overseas.

Wedding Bells

WENGER—STUTZMAN

One of the prettiest Easter Weddings of interest to friends, was the beautiful ceremony uniting in marriage Miss Lillian Abbey Wenger, daughter of Mr. David H. Wenger, to Mr. Clifford Glenn Stutzman, son of Mr. and Mrs. William S. Stutzman of Tofield, Alberta Canada, Sunday evening at 8 o'clock in the home of her parents, with the Rev. Milo Kauffman officiating in the presence of immediate relatives and many friends.

Prenuptial music included a vocal solo of Brandon's "God Make Thee Mine" by Mr. Reuben Cooprider, accompanied at the piano by Mrs. Reuben Cooprider who presented "Bridal Chorus" from Lohengrin as the processional. Following the ceremony Mr. Cooprider sang "I Love You Truly."

The vows were exchanged at one corner of the reception room, which was banked with palms, ferns and cherry blossoms and illuminated with fourteen white tapers held in silver Tiffany Standards, at the point of which hung two small silver bells, tied with a tulle bow. White tapers in black candelabra placed throughout the room presented a beautiful candle light setting.

The couple's bridal party included Miss Josie Mahler Molalla, Oregon, Maid of honor. Mr. Alvin King, Hesston, Kansas, best man. Little Miss Patricia Joan Lewis of Wichita and Miss Hannah [illegible] Gates of Windom, scattered rose petals in the pathway of the bride as they descended the stairs.

The maid of honor wore a dress of salmon pink silk crepe, ankle length, fashioned in fitted lines and touched with rhinestone buckles. White kid slippers completed her costume. She carried an arm bouquet of white honeysuckle, cherry-blossoms and plumosa.

The little flower girls were quaintly dignified in yellow and blue silk crepe dresses with bows to match and white kid slippers.

The bride, who was given in marriage by her father, was charming in a gown of white satin. The cowl neckline was slightly draped in front and clipped with a buckle of white carved bone as was the buckle on the belt in the back. Dolman satin button trimmed sleeves were completed in a point over the wrist. The dress, created with a fitted skirt, slightly flared to floor length while her tulle veil fell in billows to the length of the dress. White moire satin sandals completed her lovely costume. She carried a gorgeous bouquet of Easter lilies.

Following the ceremony a buffet supper was served to about eighty-five guests. The reception table was centred with the bride's tiered wedding cake, topped with a miniature bride and bridegroom while tapered candles, tied with tulle bows illuminated the elaborate wedding table.

For traveling the bride wore a three piece navy blue suit of triple sheer crepe with white accessories. After a short trip of unknown destination, Mr. and Mrs. Stutzman will be home to friends at Peabody.

The two ladies were having a trip on an ocean liner for the first time. The boat remained for an hour or two in a harbor and one of the ladies asked a seaman the reason.

"Oh, they're just doin' something to one of the screws," was the reply.

"Dear me!" exclaimed the lady. "Fancy a little thing like a screw holding up a huge liner like this!"—Montreal Star

KETCHAMOOT

Next Sunday, May 5, the summer schedule of the preaching services will start. Sunday School will be reorganized after the services. Preaching services 2 p.m. All are cordially invited to attend.

Miss Helen Cookson spent the week end visiting her friend Miss Irma Shupe.

Mr. and Mrs. Clarence Rude and daughter Alma Marie of Bardo were Sunday guests of Mr. and Mrs. C. A. Ingram.

Mr. and Mrs. Henry McGinitie and family were Sunday guests of Mrs. McGinities' mother, Mrs. Bruha of Shonts.

Mrs. Wm. Lee and son Lorne motored to Edmonton Thursday of last week, returning the same evening.

Miss Beatrice Daley of Edmonton spent the Easter holiday with her cousin Miss Ethel Coombes.

Miss Minnie McAllister spent her Easter holiday with her sister Mrs. Earl Carlisle.

Mr. Howard Lee returned home one day last week after spending the winter months with the hockey team at Red Deer.

Miss Irma Shupe entertained Misses Helen Cookson, Margaret Mitchell, Maude Wildman and Mr. George Simpson to supper Sunday evening.

Mrs. Elsie Carlisle and daughter Doreen returned to the home of Mrs. Carlisles' parents at Hay Lakes, after spending several months at the Louis Carlisle home.

A pleasant afternoon was spent on Friday of last week when a number of friends and neighbors surprised Mrs. Joe Sutton to a miscellaneous shower at her home. Those present were, Mrs. Nomeland, Mrs. Shupe, Mrs. Oscar and Ralph Barnes, Mrs. Louis and Earl Carlisle, Mrs. Brick, Mrs. H. McGinitie, Mrs. C. Coombes, Mrs. C. A. Ingram, Mrs. John Lee, Mrs. Sears, Mrs. Herman Lawson. The Misses Viola Lee, Hazel Sears, Selma Nomeland, Gertie and Kathleen Ingram, Beatrice Daley, Ethel Coombes, Margaret Mitchell, Maud Wildman, Irma Shupe, Minnie McAllister, Belva Carlisle and other children.

Owing to the snow storm Tuesday evening the meeting of the Junior U.F.A. which was to be held at the Davison home was postponed.

5000 FACTS ABOUT CANADA FOR 1935

The public will again welcome the annual issue of "5,000 Facts About Canada," now in its 32nd year, compiled by the well known Canadian writer and lecturer, Frank Yeigh, which has won a well deserved popularity for the conciseness and value of its information. It is truly a tabloid cyclopedia of the Dominion—Canada in a Nutshell—"or two" as Andy would say. Here within brief compass are all the salient features of the country for the current year, arranged under fifty chapter heads ranging from Agriculture to Yukon. This handy little volume—"as full of meat as a cocoanut"—is a revelation of the progressive story of the Dominion in a single year, and should prove a source of encouragement to all and a revelation as well of the favorable trends of recent months. It "sells Canada" most effectually, and its wide circulation is good national business. Copies at 35 cents each or three for a dollar may be had from 588 Huron Street, Toronto or from leading newsdealers.

LAKE SHORE

Miss Myrtle Bethel and her friend Miss Beckman returned to Sedgewick on Sunday after spending the Easter holidays at the Bethel home.

Lynn Phillips spent the week end at the MacKinnon home at Manville.

Mrs. S. Saville of Kalispel, Montana is visiting at the home of her sister Mrs. Owen Eaton.

Ethel Graham returned to Edmonton on Sunday after spending the holidays at home. She was accompanied by her sister Mildred who spent a couple of days in the city.

Little Hilda Pearson returned to Edmonton where she is attending school, on Sunday after spending the holidays at the Phillips home.

Mr. and Mrs. R. C. Phillips were guests at the Jack Bailey home at Lindbrook on Saturday evening.

Mrs. Bethel entertained a number of ladies on Saturday afternoon. Among those were Mrs. John Wood, Mrs. Majahey, Mrs. W. E. Seale, besides Miss Myrtle Bethel and friend who were house guests.

DR. McGUGAN SPEAKS ON STATE MEDICINE

On Monday evening last at the Town Hall, Dr. McGugan spoke to an interested audience of about 25 on state medicine.

He outlined a new act which had been passed and would shortly become effective whereby state health districts similar to hospital districts would be formed. Residents would have the opportunity of voting upon the scheme a straight majority vote deciding the issue.

The scheme consists of a three corner arrangement between the employer, employee and government. Farmers will also be included in the scheme.

The meeting was held under the joint auspices of the Tofield U.F.W.A. and Tofield Board of Trade.

In the near future the Mercury will procure a copy of the act and print a description of the scheme as it affects residents of this district.

BUYING HEALTH BY THE YEAR

(Saturday Night)

For months a storm of discussion has centred over the proposals of the United States Committee on Medical Costs. The Committee claimed that medical expenses were high, not because doctors charge impossible fees but rather because under the present unorganized system of competitive medicine, one-half of the total costs of illness are carried by one-tenth of the population. They added that doctors' bills can never be budgeted for by one family alone, as illness tends to come unexpectedly and in expensive doses, and they recommended that medical care be placed on a group payment basis.

In the town of Cardston, Alberta, a scheme similar to the one they proposed has been operating successfully ever since the winter of 1931. Under a contract form agreed to by the two local physicians, anyone in the district, for an advanced fee of $25 a year, is guaranteed medical care for every member of the family living under the same roof. This service includes major and minor operations.

By the summer of 1932, 200 names were entered. That meant a fund of $5000, one-twelfth of which was to be paid out each month to the two doctors. At the end of the first year 300 contracts had been signed, which meant that some 1500 people out of a population of 2000 were included. Thus today each doctor finds himself guaranteed a yearly salary of more than $2500, over and above what he obtains from patients not on the contract. And a large percentage of the community need no longer worry about doctors' bills. Worry over operations has ceased and also suspicion, for the question of costly fees have vanished, patients no longer doubt the motives of their physician when he recommends surgery. Prevention of illness is more wide-spread in Cardston than before for people no longer hesitate to call a doctor when trouble first shows itself.

As a result of the condemning of a large section of a recent shipment of Canadian dairy cattle to the Old Country, Ottawa has decreed that in future shipments may only be made under special license and after the most careful inspection.

Local & Personal

Mrs. Edwards returned home on Saturday after spending a couple of weeks in the city.

Mrs. Moan spent the week end in Tofield.

Jean Hull returned on Sunday after spending the Easter holidays in Edmonton.

Miss Muriel Malcolm spent the week end in the city.

The Jolly Eight Bridge Club met at Anne Lindsay's home Tuesday evening.

Doctor Law, Mr. Beirnes and Mr. Letourneau left on Tuesday for Rochester and Chicago. Doctor Law will take post graduate work in Rochester and Chicago.

Mr. Drape of Edmonton spent a week in town on business.

Mr. R. Blair of Edmonton has returned to the Tofield Creamery to work for the summer months.

The Misses Ina and Ella Taylor returned home after spending the holidays in Edmonton.

Doctor McPherson of Edmonton is taking Doctor Law's place while he is away.

Mr. Ralph Neale and two children of Vancouver spent a few days in town this week visiting relatives.

Mr. McLaughlin spent a few days in the city last week.

Doctor and Mrs. McGugan visited the McCauley home on Sunday and Monday. Dr. McGugan giving a lecture on State Health at the Town Hall Monday evening.

The Tofield Boy Scout Troop attended the rally in honor of Lord and Lady Baden-Powell in Edmonton on Friday.

Mrs. Kendall spent a few days in the city last week.

Miss Lois Thompson left on Thursday for Edmonton where she will take a course in beauty work at the Capital Beauty Parlor.

Harland Thompson and Max Rogers who have been attending University returned to their homes last week.

Among the visitors to the city last week were, Mr. and Mrs. Taylor, Mrs. Malcolm, Mr. and Mrs. Pincott, Mrs. Brace, Mrs. Abbott, Mrs. Letourneau and Mrs. Firth.

Mr. and Mrs. Donald Bell and family visited at the Taylor home on Sunday.

WANTED.—A number of weanling pigs.—Apply to J. W. Morton, Tofield.

EXTENSIVE JUBILEE PROGRAM ARRANGED FOR EDMONTON

Plans for the celebrations in Edmonton of the Silver Jubilee of His Majesty the King Monday have been completed by the committee in charge, it was announced Thursday. From the presentation of medals to outstanding Edmonton citizens on the legislative building grounds at 11:00 a.m. to the huge bonfire and torchlight tattoo of massed bands near the buildings at 9:45 p.m., the celebration promises to be one of the largest ever seen in the capital city.

All members of the Edmonton Military Institute have been invited to take part in the medal presentation ceremony.

The pageant in which children will take part will be held in the arena at 2:15 p.m.

The program in front of the exhibits grandstand will start with a flag-raising ceremony at 1:45 p.m. and this will be followed by band selections, massed choir numbers, gymnastic displays, patriotic addresses and other features.

The evening program, near the legislative buildings will start at 8.45 o'clock with band selections and at 9.30 p.m. Hon. W. L. Walsh, lieutenant-governor, will light the huge bonfire in the tennis courts just north of the high level bridge. The torchlight tattoo, in which every band in the city will participate, follows at 9:45 p.m. in front of the parliament buildings. Scouts will act as torchbearers.

THE GAME OF LIFE

Those who consciously brood on their troubles were committed by Dante to the deepest pit of Hell. They are in love with trouble. They like to gaze on shadows. When all comes to all, what we call the game of life is just what makes life worth living. Life's enemies are not cares and worries, deprivations and misfortunes. They are its greatest allies. Its enemies are the damp fogs of the spirit, where there are neither shadows nor light."—Dr. Nansen

LINDBROOK

The cold advent of spring is causing some anxiety here with regard to the lateness of spring work, also the slow growth of grass, but cheer up, there's bound to be a few warm days yet this summer.

Word has been received that Mr. and Mrs. L. Painter and Anne have arrived there O.K.

Mr. A. Whibley left last week on a visit to the Coast.

Mrs. E. Anderson was admitted to the Alexandra Hospital, Edmonton last week. Mrs. Anderson expects to go under an operation this week. We hope it will be entirely successful and a speedy recovery from same.

Mr. and Mrs. Jas Bracegirdle visited Wainwright last week and whilst there took in the Canadian Legion's annual concert and dance. They report it excellent and enjoyed their visit immensley.

Some of our friends from here went to the dance at Ryley last week and were brought home by the police. Now don't jump to the conclusion and think that they were incapable etc., oh no, the Tofield policeman happened to be there and played the role of good Samaritan by bringing them home in his car when the axle of their car broke just as they started to leave Ryley.

Mr. and Mrs. John Pruden are away at present on a visit to relatives at Barrhead.

Mrs. C. W. Swift of Tofield spent Friday as the guest of Mrs. E. W. Hooper, whilst Mr. Swift and the boys attended the great Scout rally to meet the Chief Scout, Lord Baden-Powell.

Miss Edna Gray is looking after the Anderson children whilst Mrs. Anderson is in the hospital.

The Rev. D. K. Allan will conduct services at Lakeshore at 11:00 a.m., Ketchamoot 2:00 p.m. and Tofield at 7:30 p.m. on Sunday May 5th.

On Sunday May 12th Mothers' Day will be observed at Tofield. The Sunday School is having a fitting program prepared by the Education Committee and every mother will be remembered in song and speech.

The First Tofield Boy Scout Troop and Cub pack wish to thank all those kind friends who made it possible for them to see their "Chief" (Lord Baden Powell) on Friday last. Thank you.

Signed on behalf of the boys,
Rev. A. Wallis,
Scoutmaster

TOFIELD RESIDENT ISSUED PAPER "IRON RATIONS" IN BELGIUM, CHRISTMAS 1918

On Saturday last there appeared in The Bulletin a story of the publication in Ypres in July of 1916, when the city had been pulverised by shelling, of a newspaper, "The Star Shell," which Orville Palmer, a Bulletin printer and a member of the 49th Battalion and a Winnipeg printer serving with the 43rd Battalion had the joint distinction of producing.

On Tuesday, J. W. Morton, of Tofield, a one time member of the International Typographical Union forwarded a copy of "Iron Rations," a four-page newspaper published at Christmas, 1918, at Mouscron, Belgium on the occasion of the first post-war Christmas dinner of the 8th Battalion Canadian Railway Troops.

Mr. Morton writes: "I borrowed a Belgian printing plant and issued 2,000 copies and at our Christmas feed, let the troops have as many copies as they wanted."

Among the "ads" in the paper is one of interest to Edmontonians. It reads: "R. J. Reynolds dealer in second hand goods. My specialty is scrap iron. Anything that can be used in railroad work not wanted. Have a special department for supplying ladies with coal."

Mr. Reynolds is now assistant manager of the Edmonton City Dairy.

Another "ad" reads: "Cpl. Cogan is looking after Sgt. Reynolds' coal trade during the attendance of the latter at the Peace Conference in Paris."

Cpl. Cogan is now a butter maker at the Burns Creamery, Edmonton.

The 8th C.R.T. was under command of Lt.-Col. J. K. "Peace River Jim" Cornwall, D.S.O. The paper carries a graceful tribute to him and the esteem in which he was held by the battalion. Many other articles and notes of interest are contained in the paper, which is well set, excellently printed and produced.

GREEN-EYED HORSE DAMAGES CAR

When a horse and car met on 95 st., near 112 ave. shortly after 9:00 a.m. Wednesday, the horse won, and the car was nearly put out of commission.

Norman Newman, Blueridge, Alta., was leading the horse when it broke away, galloped to the other side of the street, and jumped up on a car operated by David Aitch of Northwestern Utilities. The radiator and engine were damaged by flying hoofs.

The horse was captured a short while later in a vacant lot, apparently was unharmed.

CUSTOMERS

have to . . .

BE BOUGHT

❦

Worth-while things cost money. This means that retailers must part with money in order to get customers. Customers require to be bought just as one's merchandise has to be bought.

Customers are not likely to be obtained apart from seeking them. They must be pursued, and they must be asked to do business with the retailer who wants their custom.

You would think that all this is as plain as is the nose on one's face. But stop! Answer this question: What have you, a realier, done in the past month—to go no further back— to seek and get new customers? How many non-customers of your store have received invitations from you to do business with you? How many persons have received communications from you, requesting their custom? How many persons have you informed, in their homes, about your business, your merchandise, your policies? How much money have you spent this past month on the purchase of customers?

Just waiting for customers is the acme of folly. Just relying on the conviction that the public ought to do business with you is folly. Just soothing yourself with the reflections that you are honest, that you give the public a square deal, that your store has a good location, that you price merchandise fairly—these are passive things.

It is action which counts in getting the things which we want. An infant cries. This is its way of making its mother or nurse know it wants something. Is it fair to a business to be doing nothing in a planned way to get new customers for it?

Advertising by all businesses will make and keep our town a good shopping centre.

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

SWOLLEN GLANDS

Flowing through the body, to and from the heart, is the blood stream. This life fluid contains myriads of red blood cells, many white blood cells and the plasma, or fluid part, which holds salts, sugars and materials in solution. The blood is the medium whereby food and oxygen are carried to all the tissues and the waste products of the tissues' activities removed. In order to do its work, the blood must be kept in constant circulation, and this is what is accomplished by the regular beating of the heart.

Leaving the left side of the heart, the blood passes into the aorta, the main artery of the body. From the aorta, branches take off which, in turn, keep on draining into other branches, becoming smaller and smaller until they are like a fine mesh spread throughout the body. These are the capillaries. The walls of the capillaries are so porous that gases, such as oxygen and carbon dioxide, or the substances held in solution by the plasma, can pass in or out. A certain amount of the blood plasma will also filter out and, having done so, it is known as lymph.

Lymph differs from blood chiefly in that it does not contain any red blood cells. The tissues of the body are bathed in lymph, which means that the internal structure of the body is surrounded by fluids just as truly as the outer covering of the body is surrounded by air.

If lymph is formed too quickly or if it is not removed as rapidly as it should be, the part of the body affected will become swollen, waterlogged or oedematous. If this condition is sufficiently established, pressure of a finger on the part will leave a mark that will persist for a time. The presence of lymph in normal tissue is seen when a water-blister forms as the result of injury or irritation.

There is a regular system of tubes, the lymphatics, by which lymph, when not returned direct to the blood vessels, is drained away from the tissues, finally emptying into a large vein near the heart. At intervals along the lymphatics are located nodes or glands. These act somewhat in the manner of a filter, and if the lymph is carrying with it disease germs from the tissues, these are caught and held in the gland at least temporarily. The swollen gland is usually tender because it has filtered out some infection which it is trying to hold in check and, as a result has become infected itself. A neglected infection of the finger may spread up the lymphatics which, if they become inflamed, appear as red streaks under the skin and lumps, or swollen glands, can be felt first at the elbow and later in the armpit. These are nature's barriers to the spread of infection. There is always a reason for swollen glands and this should be looked for in order to remove the source of the trouble.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

SNIPPING RED TAPE

With an eye to the cash revenue from motor tourists, Ottawa has made a few wise adjustments of regulations at the border. The bond of the guarantee company previously required at the frontier by tourists who proposed to stay for a period of ninety days and up to six months, will no longer be necessary. The same relaxation of the rule is extended to those who enter for sixty days and later decide to remain longer. Neither bond nor deposit will be necessary. A change too, has been made in the rule about issuance of permit to temporary visitors. The twenty-four hour period has been extended to forty-eight hours to include week-ends and public holidays.

SUMMER RANGE FOR GROWING CHICKS

(Experimental Farms Note)

Control of diseases and parasites is of the utmost importance in the successful rearing of poultry and one of the simplest and least expensive way of achieving it is the use of clean summer range for the growing stock. In order to be effective in the control of diseases and parasites, summer range must be clean ground, and by clean ground is meant ground on which poultry has not been kept for at least two years. In fact, it is becoming evident that a longer period may be necessary between the times of using land for chickens as some of the soil-borne disorders will apparently survive for a longer period than two years.

At the Dominion Experimental Station at Lethbridge, Alberta, three ranges have been used for young stock, each range being used only once every third year. Through the use of these ranges, in addition to other control measures, disease among the growing stock has been satisfactorily kept in check. Parasites have been controlled to the extent that they are practically unknown on the station.

The ranges at this station are in the dry land area and are seeded down with alfalfa and brome grass. While more green feed could be raised on ranges on the irrigated area, the greater amount of moisture would be conductive to the development of bacteria and parasites. A well drained, dry location is more desirable than one where moisture may accumulate during wet weather. Where a perennial plant has not been established as a source of green feed, annual crops such as wheat or oats will supply satisfactory green feed for a considerable part of the summer.

SAFETY IN BIG FIGURES

Day after day for eighteen years; mile after mile for 800,000 miles—That's a driving record—but it is also a safety record for Charles Whalen, who drives a bus from Owen Sound to Meaford, Ontario, three times daily. He has not had a single accident and believes this is an achievement which will take some beating. Whalen's present vehicle is a converted McLaughlin-Buick passenger car.

FARM—FARMS—FARMING!

Halifax, N.S., April 29.—"Farming" seems to be growing into a variegated industry apart from cultivated fields, lowing herds and bleating sheep. We have fur farms, the Japanese have gone in for pearl farming and now there is the oyster "farm." The latter industry is being successfully extended in Eastern Canada, particularly in the Malpeque Bay, Prince Edward Island, once noted for its oysters but, due to the depletion of the beds, the output fell off. Now these beds are coming back since the inauguration of oyster culture. New Brunswick is also prominent in the oyster industry, the Buctouche oyster coming from that province, as is also Nova Scotia. It takes about 27 months for an oyster to grow from spat to marketable size, according to Natural Resources Department of the Canadian National Railways. After fifteen months, those that have attained a good growth are largely immune from attacks by starfish, one of the oyster's worst enemies.

ORDERING FROM THE CATALOGUE

All the world's on rubber, but in some of the less travelled parts of Canada the automobile as yet has no monopoly on transportation. From one of these backwaters where the horse is still strongly entrenched, a letter last week came to the attention of General Motors of Canada Limited. It was addressed to McLaughlin Carriage Company, forerunner of the present great automobile manufacturing company and superseded by the advent of motor cars a score of years ago. The writer inquired for a "Four-wheel carriage equipped with rubber tires, similar to "Basket Seat Pony Phaeton Number 546 in the catalogue." Reluctantly the order had to be turned down. The catalogue must have been a quarter of a century old. The nearest thing at Oshawa now is "convertible with rumble seat," and there are no shafts attached.

THE FERTILIZERS ACT

There has been a Fertilizers Act in Canada since 1897, and down through the years it has been amended to meet new and changed conditions in the fertilizer trade and the increase in knowledge of commercial fertilizers. The present Act came into effect in 1922 and applies to all Canada. There are no provincial fertilizer laws. The Fertilizers Act is a Dominion enactment administered by the Fertilizer Division of the Seed Branch, Dominion Department of Agriculture.

Investigational work with fertilizers receives special consideration by the Experimental Farms of the Dominion Department of Agriculture. Field experiments to study plant food ratios, rates of application, placement of fertilizers, and other subjects of importance are conducted at the Central Experimental Farm, Ottawa, and at the Branch Farms and Stations throughout the Dominion. In addition, a considerable amount of research work in connection with special problems is undertaken at Ottawa. The chief object of this work is to obtain information which can be used as a basis for advice to farmers in connection with the economic use of fertilizers.

The principle purpose of the Fertilizers Act from the outset has been to protect farmers and other buyers against fraud by regulating and controlling the sale of the product. Any such commodity as commercial fertilizer, possessed of an invisible value based on a chemical content of nitrogen, phosphoric acid, and potash, needs to be properly controlled. Otherwise, fraud in its sale might flourish. Rock salt could be sold as nitrate of soda, ground limestone as superphosphate, or sand as high grade complete fertilizer, and the buyer would not know the difference until disappointed in the failure of the fertilizer to produce results. It is vital, therefore, to farmers especially, that the Act be kept up to date and its enforcement in a high state of efficiency. This is also in the interest of the fertilizer industry which depends on the confidence of the Canadian farmer for continued business and prosperity.

PAGAN NAZIS REJECT CHRISTIANITY

Berlin, April 27.—Leaders of the rapidly growing Germanic pagan faith movement boldly rejected Christianity last night at a Nazi sanctioned rally and said God had "revealed himself to us" through Adolph Hitler.

Jacob Wilhelm Hauer, spiritual leader of the movement, told an overflow audience at the gigantic sports-palast, Christianity is not the true religion of Germans, who united Adolph Hitler because of their longing for the Germanic faith. Dissenters were ejected.

Ban Confessionalism

"Christianity says there is only one way to God, and whoever does not believe in it is lost," Hauer asserted. "Such a claim leads to confessionalism, from which is sprung all evils that afflicted the religious history of the German people in the past.

"God has not revealed himself in the so-called chosen people alone," Hauer declared, "but also to us through our Fuehrer (Hitler), to enable us to accomplish our great mission in the world."

Eject Dissenters

When another speaker, Count Ernst Reventlow, one of the oldest Nazi fighters, said churches year by year are losing ground and their resistance to the Germanic faith must be conquered, shouts of "never" arose from youths in different parts of the hall. They were believed to be theological students.

Ten of them were hustled out of the building. Police then appeared in large groups and stood guard at the doors.

"I'VE CAUGHT MY LAST BEAVER!"—

(By Robert M. Hyatt)—Forest and Outdoors

THAT WAS not my motto when I went to the wilds of British Columbia. I was a trapper. Beaver pelts were my sole ambition. Then one day as I approached the end of my line, I heard a queer moaning sound.

I hurried ahead. There, with a front foot clamped in my trap, was a female beaver. With the other paw the poor creature was trying to hold two tiny kitten beavers to her breast, while they nursed. The sight sickened me.

While I watched, cursing myself for the agony man's foolish desires cause defenseless wild life, the wretched creature jerked free of the trap, leaving part of her paw between the jaws. She hobbled toward the nearby stream, then turned and came back as though to carry off her young ones.

I picked them up and set out for my cabin, resolved never to trap another animal.

I remained in the woods all winter. Those two little beavers became the finest pets I ever saw. All day long they would joyously gnaw the furniture legs, steal firewood from the box and drag it into the middle of the floor, where chips would fly for hours. But at night their real fun would commence.

It was intensely cold up there, and I soon learned that my two little pals knew a thing or two about shutting out the howling blasts. They would pile everything they could find that was loose against the front door where the draught came in. Whenever I left the cabin for any length of time—which necessitated sliding their barricade back—they would hasten to shove it against the opening.

One day this prank caused me a little concern. I came back to the cabin after being absent several hours, to find the door so effectively barred by my pets so that I couldn't budge it. I was compelled to remove a window to get in!

My favorite sport—their's too—that winter, was a queer wrestling act they often put on: They would rise on their hind feet, supported by their powerful tails, with their forepaws locked in neck—and under-arm holds. In this humorous posture they would push and strain and grunt, each striving to overcome the other.

First one, then the other, would give way, walking backwards, still erect, pushed by his adversary. The performance would continue until one would allow his tail to double under him and, protesting loudly, he would be bowled over on his back.

After these battles I'd always give each of them an extra helping of bread and canned milk, which they loved. They would show their appreciation by grasping my clothing in their "hands" rubbing their heads against me and whimpering with glee. Often they would roll on their backs and give vent to little squeals of joy.

While those tiny chaps showed their affection for me in every way, they would not as much as take a choice bit of favorite food from a stranger. Beavers are "one master" pets. They display doglike protective instinct for him.

One day when I had had them about five months an Indian friend stopped in to visit. I was lying on a blanket near the fireplace, watching some antics of my pets.

My visitor squatted down nearby to watch the fun. Immediately one of the beavers stationed himself between us. My friend walked to the other side of me; and again, with a rush across me, the little fellow took up his post between us. Just as a bit of fun, I asked Benou to resume his former position. The beaver returned also, hissing and blowing his disapproval at this horseplay.

While working, as they always are, beavers continually murmur and mutter. If you speak to them, they rarely fail to answer. You soon learn to recognize the different sounds of their "vocabulary", expressive of rage, fear, sorrow, joy.

When not working or playing, they are busy with their toilet. One of the toes of the webbed hind feet is fitted with a kind of claw. With this they comb their entire coat religiously.

It was a sad day when I took leave of my little friends. Their sorrowful wails followed me down the snowy trail. I hope Benou was kind to them.

WAGES TO CAPITAL—

(The Instructor, Gardenvale, Quebec)

The condition that faces the country, and every man, woman and child in it at the present time, can be very well understood by anyone when it is presented in some such picture as this. In the price of everything you buy and in the amount of every bill you pay there are just two items—wages to capital and wages to men and women. When the wages that go to capital are increased the wages that remain for men and women are lessened. In most cases capital must have its wages first, because if the interest is not paid on bonds, debentures, bank loans, etc., the debtor goes into liquidation. Thus men and women who want to preserve their opportunities for employment must accept lower wages. Most people reason that a small wage is better than no wage.

M'GEER VISIONS WEST SECEDING UNLESS HELPED

Declare General Strike Being Planned For May 1

Vancouver, April 29.—Secession of four western provinces is inevitable unless the dominion government adopts some adequate means for financing programs, Mayor McGeer said Saturday, commenting on the statement of Acting Prime Minister Sir George Perley that it would be impossible for the government to employ all Canada's jobless on a work-for-wages program.

The mayor declared that, if the federal government cannot finance a works program, the only alternative is for the four western provinces to unite in setting up their own monetary system. While such a course would not mean secession necessarily, he added, he felt such a step inevitable if the government persists in its present policy.

Mr. McGeer also charged that the dominion government has lost public confidence and that, in view of Sir George's statement and the prime minister's physical condition, the government should resign immediately.

With their depleted funds swelled by some $2,700 from collections at a mass meeting Sunday night and a $1,200 donation voted them by the street railwaymen's union, relief strikers meanwhile awaited the response to their invitation to labor for a one-hour sympathy strike Monday in protest against camp conditions.

So far only seamen and longshoremen have accepted the invitation, though several labor representatives said a 24-hour sympathy strike would be considered this week.

In a police-authorized parade, 2,000 strikers and 500 women sympathizers marched from Cambie st. to the arena where 12,000 people jammed the building and overflowed into the auditorium Sunday night.

While the arena audience whooped enthusiastically, speakers threatened that there would be fighting in the streets, cracked heads and even violent deaths before the strike is settled.

Although there was no official confirmation, the rumor persisted that Attorney General Gordon Sloan, now in the east, has requested the federal government to have the militia ready to take charge in the event of any further outbreak.

Fifty R.C.M.P. officers already are on their way here from Regina.

Spokesmen for the strikers reiterated their previous stand that they would not accept Mayor McGeer's offer of transportation back to the camps pending negotiation of their case, but would remain in Vancouver until their demands were met.

Sunday's mass meeting was under C.C.F. auspices.

He declared the relief camp system must be done away with.

In Victoria Premier Pattullo opposed the relief camp system but urged the strikers return to the camps where they would be fed and sheltered. The government, he said, intended to maintain law and order.

On Saturday women members of the C.C.F. gave away tags, the wearing of which was a pledge that the wearer would help at the arena meeting Sunday night. Selling of tags has been forbidden. The C.C.F. women were also obtaining signatures to a petition asking better treatment for the strikers.

Statement that with the organization of the relief camp strike a deliberate attempt has been made to start a proletariat revolution under the Communistic leadership, was made by Mayor McGeer in a public address Saturday night. He declared an effort was being made to call a general strike in Vancouver.

A. M. MATHESON, M.L.A., ALSO FEARS SECESSION

Fears held by Mayor McGeer of Vancouver as to the danger of western secession are endorsed by A. M. Matheson, U.F.A. member for Vegreville.

"If this should come about, the two provinces of British Columbia and Alberta would make a better unit than the four western provinces," said Mr. Matheson.

The member reiterated statements which he made during the recent session of the legislature to the effect that the west had paid tribute too long to the east.

Under the auspices of the Dominion Department of Agriculture and the National Research Council of Canada, a very successful demonstration of the wax plucking of poultry was given recently at the Chateau Frontenac, Quebec, in the presence of members of the Quebec Provincial Government. Another demonstration was given at Perth, Ontario, when 170 birds were plucked and shipped to Montreal where their superior appearance was compared with other lots prepared in the ordinary manner.

JOHN BULL 97 PER CENT FOR PEACE

London, April 29.—In the first national referendum ever held in Great Britain on any issue an overwhelming vote is piling up in favor of peace measures—adherence to the League of Nations, abolition of military planes and of private manufacture of arms.

Nearly 7,000,000 persons have voted in the referendum being conducted by Viscount Cecil of Chelwood, an internationalist 71 years old who is nearing completion of the biggest task he has undertaken in a long career.

The vote is by canvass and will be finished by June 27. The figures as announced with a total vote of 6,813,537, are as follows:

Adherence to the League of Nations, 6,616,313, or 97.1 per cent.

For general disarmament, 92.5 per cent.

For abolition of military planes, 85 per cent.

For abolition of the private manufacture of arms, 93 per cent.

For collective security by economic action 94 per cent.

For collective security by military measures if necessary, 74.1 per cent.

Lord Cecil has served as president of the League of Nations union since it was formed in 1919.

NAME IS WANTED FOR BABY GIRL

We can't do it!

The Journal's city editor, who spends his spare time looking for unusual assignments for his staff, picked up a gem Monday.

"Go find a name for a baby," he ordered a long suffering reporter. And we can't do it. But perhaps you can help.

It happened this way: At 7:17 a.m., April 21, the stork presented Mrs. Edward Valmor Beauchamp, 9926 101 st., with a baby girl as she was being whizzed to the University hospital. The stork caught up with the taxi on the high level bridge.

Now Mr. Beauchamp suggests to the city editor, that he, the editor, choose a name for the baby girl and that it be something symbolical of the event and that if possible the high level bridge be worked in.

The only name the L. S. reporter could thing of was Bridgette, but the editor ruled that out.

Step up, you Journal readers, and pick a name. Send your suggestions to the Journal.

MOTHER, SON DOOMED TO DIE

Georgetown, Del., April 29.— A mother and her son today were condemned to hang for murder.

Sentence was imposed on Mrs. May H. Cary, 52, and Howard Carey, 27, after their conviction for the slaying of Robert Hitchens, garage mechanic. He was a brother of Mrs. Carey, and was slain, the state proved, for his insurance. A second son, James, was sentenced to life imprisonment.

Mrs. Carey, scheduled to die June 7, will be the second woman in the state to receive the death penalty. The first, Sarah Jane Bradley negress, was executed in [illegible].

ABERHART IS NOW READY TO BECOME PREMIER

Calgary, April 27.—William Aberhart, founder of the Alberta Social Credit League, is prepared to accept the leadership of the province's fourth political party—the Social Credit party—and, if it is successful in the forthcoming election, the premiership.

Returning from a northern constituency convention at Edmonton, which endorsed the platform as adopted at Calgary, and leadership of the league's founder, Mr. Aberhart said: "Since the northern convention has joined with the south in its request, I do not see how I can do otherwise."

Reports were current here today that the Alberta election would be held on June 28, but confirmation could not be obtained.

DREAMS OF DIVINITY: ON WAKING HAS DEEP WOUNDS

Hamstead, N.Y., April 27.—Mrs. Mary Connors, 56, today showed scars on her hands and feet which she said had appeared after she had dreamed she had walked and talked with Christ.

Mrs. Connors, a deeply religious woman, said Christ had touched her hands and feet in her dream, and when she woke up she found wounds half an inch deep and an inch long. The wounds have gradually been healing she said. They first appeared on the morning of February 9.

The Encyclopedia Brittanica lists 90 cases of stigmata. Most of them says the encyclopedia, occurred among residents in religious houses after the austerities of Lent, usually on Good Friday.

The Price and Value of Wheat What Determines Them

(Searle Grain Market Features)

No mortal thing can bear so high a price,
But that with mortal thing it may be bought.
—Sir Walter Raleigh.

For several years, we have in these columns, set out and classified each month various occurrences which have had an influence upon the price, and as well, upon the value of wheat.

Some of our readers have asked us to discuss these factors and influences in greater detail, and to estimate, as well as may be done, the bearing or weight that each has upon price and value.

This article, in response to such requests, is the first of a short series that will deal with this matter which is of so much importance to Western farmers.

Price and Value Defined

Because of the disorganization that has taken place with the currencies of almost every nation, it seems necessary first to define clearly two terms which will be constantly used in the articles, i.e. Price and Value.

PRICE means the amount of money in the national currency (in Canada, the Canadian dollar) that a commodity will exchange for—the price of wheat means the amount of money a bushel of wheat will exchange for. A bushel of wheat at Winnipeg exchanges for 88c this day, April 20, 1935. Eighty-eight cents, therefore, is the price of wheat at Winnipeg this day.

VALUE, on the other hand, means the amount of any other commodity, or of all commodities averaged together, that a bushel of wheat will exchange for. The value of a bushel of wheat at Winnipeg today is equal to one pair of socks (worth 88 cents a pair), or four dozen eggs (at 22c per dozen), or, in comparison to all the things that Western Canadian farmers buy, wheat has a value today 22 per cent less than it had in the pre-War years 1913—14. (See Searle Index.)

It is, therefore most important that we should realise and appreciate the difference between PRICE and VALUE, for it might easily happen that the PRICE of wheat might increase but that its VALUE might decline. Actually, while price, of course, is most important, the Western farmers' welfare depends much more upon the value of the wheat than upon its price alone.

Factors Determining the Price of Wheat

At the outset, it can be stated that almost every daily or even momentary thing occurring in the world, either of a physical, chemical or psychological nature, whether caused by natural forces or by man's actions, and whether influencing in turn mankind, or animal, insect, bacterial, fungous or other kind of life, or even inert matter, has actually to a greater or lesser degree, sooner or later, either a direct or an indirect influence upon the price of wheat at Winnipeg.

Equally true it is to state that no human mind or combination of minds can understand nor appreciate even a fraction of the innumerable world-wide forces at work originating either within or from without our world, that finally result in determining from moment to moment the price of wheat.

While we cannot hope either to identify or to comprehend all the forces involved—for this would presume an understanding of life itself and its purpose; which understanding man has not—we are, however able to see the effect they have upon prices by observing and studying the fluctuations that have occurred in the price of wheat in the past (the Searle Grain Company has published a chart showing the fluctuations that have occurred in wheat price for five hundred years.)

As has been indicated, the price of wheat involves two commodities, Wheat and Money. It is clear, therefore, that factors influencing either wheat or money will have a direct effect upon wheat price.

Now, as is well known, of course there are two groups of forces affecting wheat —the supply and the demand for it. As well, there are two groups of forces affecting money—the supply and demand for it. But since so many countries have abandoned the gold standard another influence arises in money, which has to do neither with supply nor demand. This is the value of money with respect to other monies, or the value of any national currency in terms of other national currencies, and, as well in terms gold or silver.

It will be seen, therefore that there are no less than six groups of variables which determine the price of wheat:

1. The supply of money
2. The demand for money
3. The value of the national money in gold or silver
4. The value of the national money in other national currencies
5. The supply of wheat
6. The demand for wheat

The above six factors determine the price on wheat on what are usually termed "free and open" markets, and probably on all markets whether "free and open" or otherwise in the long run. For short periods, however prices are also influenced by governmental actions, such as: prohibitions against imports, the setting up of quotas and milling restrictions, the setting up of minimum prices and of legally fixed prices. Such governmental actions have occurred, so history tells us, in almost every period of great depression the world has previously experienced. History also reveals, however, that the effects have been but temporary, and, as recovery from the depression occurs, governments in the past have gradually withdrawn from their controlling operations.

Each of the six groups of variables are influenced by inumerable forces. The matter is further complicated by reason of the fact that not only do these variables affect the price of wheat directly, but they also affect each other. In our series of short articles, we hope to examine and discuss in some detail some of these forces and how they function.

CHESS GAME MOVES EACH TAKE 60 DAYS

Blue Earth, Minn., April 29.—The world's slowest chess game is in progress with one player here and the other in South Africa.

They make their play by mail, and it takes 60 days for each move. It's been going on for a year, and if the players don't perish of old age or excitement the winner will be decided in only five more years.

Dan Fitch of Blue Earth is engaged in the chess combat with John Brooks, president of the Johannesburg, South Africa, Chess Club.

VEGREVILLE TORIES CHOOSE M. PONICH

Vegreville, April 29.—Conservatives of Vegreville provincial constituency Saturday selected Michael Ponich, youthful Ukrainian school teacher of Mundare district, to carry the Conservative banner in the election. Mr. Ponich was declared to be the choice of the convention following a secret ballot, defeating Major F. J. W. Fane of Beaver Lake, only other contestant.

D. M. Duggan, Conservative leader, stressed the need for observance of "old fashioned principles" of doing business. The government is not run on an efficient basis, he said, and the Conservative party is making its election plea on the grounds of economy, one that of reducing number of members in the provincial house.

TOO ILL, SO HANGMAN HAS TO DEFER JOB

Rzeszow, Poland, April 29.—This man's nearness to death kept him alive.

When the headman entered the cell of Gabriel Czechura to take him to the gallows for killing a local judge, the condemned man suffered a serious heart attack.

Physicians pronounced him too ill to undergo the business of hanging and the execution was postponed.

HO HUM! ALL BROKEN LET'S GO TO BED!

When one citizen was married, it was occasion for a real celebration, judging from city police reports.

Constable McMurray made a hurried call to a city home a few minutes after midnight Saturday, and returned with a report that "a family had been celebrating" because of a marriage.

The policeman added: "Everything in the house had been smashed before we arrived and most of the family had gone to bed when there was nothing left to smash."

The February movement of bacon from Canada to Great Britain, viz., 14,765,200 pounds was almost double the volume for February 1934. The total value of bacon exported during January and February, 1935 was 28,370,600 pounds, an increase of 9,822,600 pounds over the shipments in January and February 1934.

2,500 SCOUTS AND GUIDES HAIL LORD AND LADY BADEN-POWELL WHILE 3,000 WATCH AT ARENA

Spectacular assembly of 2,500 uniformed Boy Scouts, Girl Guides, Wolf Cubs and Brownies before an audience of 3,000 [illegible] adult spectators colorful [illegible] of 100 flags [illegible] all troops in [illegible], wild thrilling effect of the Wolf Cubs' "grand howl" [illegible] throughout the building, the [illegible] impressiveness of the flag lowering ceremony as the lights gradually [illegible] dimmed

These formed [illegible] picture in the arena Friday [illegible] Lord Baden-Powell chief scout [illegible] world and Lady Baden-Powell [illegible] guide came to see [illegible] and captured the hearts [illegible] adult spectators as well.

Belying his [illegible] the smiling chief scout [illegible] out the sawdust arena [illegible] chatting with the [illegible] cub to the highly trained [illegible] scout With equal [illegible] Baden-Powell strolled [illegible] the youngsters, [illegible] captivated by her [illegible] charm

For [illegible] it was the most [illegible] in their young [illegible] to face with their [illegible] the huge gathering [illegible] witnessed the [illegible] of the most [illegible] the arena [illegible] echoed time after time [illegible] watch the [illegible] formed for the [illegible]

[illegible] assembly [illegible] from the east gate [illegible] of the show [illegible] uniformed in [illegible] and caps [illegible] from the west gate [illegible] scouts came through the [illegible] For a full 25 minutes the [illegible] continued with the [illegible] the last to appear

This was the [illegible] that greeted Lord and Lady Baden-Powell as they reached the arena [illegible] from the east gate and [illegible] a flag-draped platform on that side. They smilingly acknowledged the thunderous greeting Their two daughters, Hon. Heather and Hon. Betty Baden-Powell, occupied the special box immediately behind the platform, along with other guide and scout leaders

Throughout the assembling, the [illegible] band under Bandmaster F. Aldridge had played the rousing march tune 'Bonnie Dundee.'

As the honored guests mounted the platform, however a [illegible] settled over the building as Rover Scout E Catoot pulled the cord to break the flag

Immediately the chief scout won the hearts of all present with his [illegible] order to cubs and scouts to "squat" while he spoke to them

"It is a real pleasure to see so many of you here," he began. "It is a long time since I was here last, and on that occasion there were not very many of you Now there seem to be about a million."

He welcomed the newly organized French-Canadian troop into the movement The troop was formed in Edmonton Friday in time for the rally. He brought greetings from scouts in Australia who had asked him to extend their good wishes to Canadian scouts

"I have for you a message from a very good scout who goes to camp and who is tremendously interested in all work of scouts, I refer to His Royal Highness the Prince of Wales I am going to read his message to you"

The message read "I am very pleased to hear of the good progress that scouts and guides have made in numbers, smartness and efficiency since I was last in Canada I hope you will keep strong your sense of brotherhood and extend that sense to other countries as well as to the British Dominions and that you will be loyal citizens of our great empire"

Lord Baden-Powell told his young listeners that they "belonged to a great place by living in Edmonton" Great sacrifices and hard work had gone into building of this western country by the early pioneers and he urged the youngsters to keep that spirit of courageous pioneering before them.

"There are two things I find that I regret, that old Fort Edmonton has been demolished and that the snow and severe winter weather has damaged the memorial trees planted in memory of your brothers and fathers who gave their lives in the great war. That is an opportunity for you scouts, to provide better name plates for these trees to show your respect for those who sacrificed their lives."

He pointed out that out of 40 awards for bravery given in Canada last year 10 of them came to Alberta

Lady Baden-Powell expressed her delight at seeing so great a gathering of girl guides.

"It is one of the most pleasant tasks I have ever done, this travelling across your great dominion," she enthused "There are 48,000 of you guides to be seen in Canada and in other countries we have seen more than 1,000,000"

"I too, have a message for you. It is from a noted guide and one who has taken the guide pledge just as you have It is from His Majesty's only daughter, the Princess Royal" This message said. "I follow the news of your progress with the deepest interest and wish the movement and its members prosperity and happiness May guiding ever grow and flourish in your Canada, and act as an incentive in your young lives to spread the spirit of service and good fellowship around you." It was signed simply "Mary"

At this point as Mr. Clarke called for three cheers for the chiefs, the building trembled as the boys and girls responded

FOR SALE.—Or will trade for pigs, 12 or 15 black face ewes, four yrs old or younger; lamb the latter part of April These are all good thrifty ewes C R Burchard, ¾ mile north of Creamery. Phone 1410, Tofield 12p

FOR SALE—New and second hand Singer Sewing Machines. Expert repair work done on any make of machine Leave your orders with the Tofield Mercury or write H. Martin 9103—106 St. Edmonton.

BANK CLEARINGS, LAND SALES, BUILDING, CUSTOMS REVENUE CLIMB SHOW TIMES IMPROVE

Business is on the jump on Prosperity Row while depression fears have "hit the skids," judging by monthly statistics on trade activities here during April.

A $2,000,000 gain in Edmonton bank clearings sets the pace, when comparisons are made with April, 1934 The gain is solely due to increased business, carrying the clearings totals for last month to $17,321,539

"What's the explanation? Why, the depression is over," said one banker

Reports also show that customs revenue, land sales, building permits, all participated in increased gains over a year ago.

Building permits for the four-month period ended April 30 amounted to $312,514 compared with $83,555 for the similar period of 1934. Permits for last month only represented an outlay of $290,339, which included the R C.M.P. barracks job. In April 1934 the total was $46,196.

Customs and excise returns for last month amounted to $147,147 or $14,928 more than in April of last year. Revenue last March was $136,219

City land sales for the four months ended April 30 amounted to $12,332, compared with $11,540 for the same period of last year. For April only, sales aggregated $4,625, or an increase of $529

MOTHER OF SLAIN CONVICT RELIEVED THAT HE'S DEAD

Winnipeg, May 1—The white-haired heart-broken mother of George Forsythe, Stony Mountain penitentiary convict shot by a guard during Saturday's riot, Tuesday termed the shooting a "blessing in disguise."

Mrs Mabel Forsythe expressed gladness the prison guard had been freed of blame by a coroner's jury, adding "it was not his fault." She added her appreciation of the kind treatment she had always received on visiting her son at the penitentiary and spoke kindly of Former Warden Meighen and the recently-appointed warden, Lieut.-Col. G. W. MacLeod.

Of her 28-year-old son who allegedly was attacking an unarmed guard with a foot-long knife when he was shot Mrs. Forsythe said:

"There was no hope for George, a hardened degenerate criminal. I have lived in constant dread of the time when George would come out."

(Forsythe was serving a 12 years and 10 lashes sentence for robbery with violence and had previously served a five-year term for robbery.)

"He was not bad at heart," continued Mrs. Forsythe, "but a man without a will who as a child was led astray by bad companions. As a child he had a mania for stealing things and when nine was sent to a juvenile home to be corrected. But when he came out he made bad associations"

Mrs. Forsythe, a qualified nurse, now living on relief and divorced from her husband, felt her son's death had removed a heavy pall from her life.

"He was my greatest cross. It's over now—there isn't any more"

Lo the Poor Indian

She: "If you don't like this country why don't you go back to where you came from?"

He: "I can't"

She: "Why not?"

He: "I'm an Indian."

GROOM BECOMES GREAT UNCLE TO OWN CHILDREN

Woonsocket, R I, May 1,—Rev. Normand Meunier, pastor of St. Louis church, was puzzled today when plans were explained to him for the wedding Saturday of Theodore Garneau, 68, and Mrs. Eloise Bernier, 74.

Garneau is grandfather of the children of Eugene Garneau, and Mrs. Garneau is great-grandmother of the same children.

Mrs. Garneau, mother of the three children, will become by marriage the grand-daughter of her present father-in-law and her husband will become a great-uncle to his own children and an uncle to his wife.

Mrs. Bernier will become grandmother to her own great-grandchildren, while the older Garneau will become great-grandfather to his grandchildren. Many other strange relationships will result.

COMPULSORY BUTTER GRADING

The grading of creamery butter for domestic consumption will become compulsory in the provinces of British Columbia and Alberta on May 1, 1935, and in the provinces of Saskatchewan and Manitoba on June 1, 1935. The terms to describe the grades as required by law must be First Grade, Second Grade, Third Grade and No Grade, and the terms used must give the correct description of the quality of the butter in accordance with the standards provided by law for different grades.

A Cockney merchant had made a lot of money and decided to spend some of it on a castle in the Highlands of Scotland. On the first evening, the butler approached him and said: "Would you care to have the pipers at dinner, sir?"

"No, thanks," was the casual reply, "but you can tike 'em to the other room, and I'll read 'em liter."—Everybody's Weekly (London)

Junior U.F.A. Have Meeting

MR. O. P. THOMAS DELIVERS ADDRESS ON "THE KING"

A regular meeting of the Junior U.F.A. was held in the United Church on Saturday last, Miss Lola Baptist, president, occupying the chair After a short business session the following excellent programme was rendered: "God Save the King," An address by Mr. O. P. Thomas, "The King;" Solo, "Land of Hope and Glory" by Mr Broughton; passage from Beghie's "Toast to the King," Lola Wilson; Chorus, "Land of our Birth;" Historical sketch on Lakeshore district, Miss Graham; Historical sketch on Ketchamoot district, Stanley Sears; Historical sketch on Tofield district, Katie McAllister

Mr Carl Unterschultz from Fort Saskatchewan gave a talk on the organization of the Junior U F A. and Farm Young People's Week at the University in June.

The meeting closed with "Oh, Canada."

Mr Thomas' address was as follows:

Madame Chairman, Ladies and Gentlemen:

I thought that, perhaps, as this evening's meeting is so close to the Jubilee Celebration of His Majesty King George, we would do well to devote some of our programme to a celebration of this event. In opening the meeting I am just going to give you a brief word of introduction, which I hope will help you to realize something of the importance of the Monarch and also a word of recognition of our most estimable ruler, King George V.

We, in this country are too prone to look at mere mechanical usefulness and to forget many of the things which are of an elevating, yet cultural nature. First of all, to every government there must be a head Aristotle, the Great Philosopher of the early times has said that the most perfect form of government is an aristocracy. Now, it is true that we today would disagree with him because we do not like the word, upon that I am merely going to say that there are several different kinds of aristocracy. When you have time, look up the different kinds, then you will understand more of what I mean. However, look upon our government of the present day, it is true that in this country there is a democracy, again it is true that it is not as democratic as the government of England but that is not the fault of the position of the crown. It is due to the fact that in this country there is too much politics and not enough statesmen.

SCHOOL BOARD MEET

A regular meeting of the board of trustees of the Tofield School District No. 1820 was held in the Town Hall Tuesday evening May 7th. All members of the board were present, namely Chairman Mr. A. J. Harrison, A. C. Dodds, J.W. Robinson, A. J. H McCauley, and J. W. Chapman Principal's and teachers' reports covering the month of April were read and considered. A number of small accounts were ordered paid. Some considerable time was taken up discussing the possibility of continuing the instruction in grade twelve in the year 1935—36. A check up of possible students for this grade will be made in the near future.

To every government there must be a head If you look at any government whether it is republican or monarchial you will find one leader. That leader may be put in for a short time, in which case there is a discontinuity in the government no matter what means may be used to overcome this. There may be an overlap in government as in the United States where for a matter of four months after a presidential election nothing of importance can be done, if the party changes. France, has a shorter overlapping, and so with other countries. Now, look at our King He is the head of our government at all times. When one party goes out of government, he is the government until after the next election. When a government comes into power they must appoint a cabinet. These men are mostly newcomers to the position. No matter how much they may talk about what they are going to do when they get into office they have to "pull in their horns." There are laws in the country, they must abide by them. There are certain functions of government, of which they know very little. There are affairs of government which must be attended to at the time they come. They are urgent affairs Who better, can give them advice than a well informed monarch.

When laws are being brought forward, a good king can advise on these matters. There are many things which any monarch of Great Britain can do if he wants to by prerogative. These things are never attempted, however because of public opinion. If anything our sovereigns for the last century have been, I should say, a little too prone not too use any prerogatives. If a really extreme case came up, however, the perogatives are there for him to use.

There is also today a feeling of some greater power lying in the crown This came down to us from the times immediately succeeding King Alfred This power which became exaggerated at the time of the Feudal Ages is still in the backs of the minds of the more intellectual classes as a unifying influence in the Empire. It is not a theory of Divine Right and yet it is the thought with which one of the religions of the Empire call him the head on earth of the church.

Summing up the formal position of the crown, I might say that it is an intelligible headpiece of the government.

Royalty is a government in which the attention of the nation is concentrated in the actions of one person and his doing of interesting act

There is the strength of religion It excludes competition for the headship of the state

It acts as a disguise, it enables our real rulers to change without heedless people knowing it

Makes all the social element emphasized today During the time of George III the crown lost much of its importance from the standpoint of administration During the next reign of the next king it lost its dignity. Under William IV it regained much of its popularity, and under Queen Victoria it regained its full popularity and prestige. Now, of course, we have had the results of such popular and dignified rulership for the last century that we do not realize how much of these things we take for granted

Let me now speak a little with particular reference to His Majesty King George V. In 1910, when he came to the throne there were some ticklish situations involving Germany, France and the Balkans Here he immediately showed his good sense of judgement. Shortly after this, the Great War came along. Now, there are none of us older people here who do not remember the wisdom, and tact of His Majesty. We cannot forget how, when food was scarce and luxuries were curtailed in England, that the King and his family were the first to set the pace for the nation. When there was suffering Their Majesties did everything that could be expected of a human being They worked morning, noon and night to do their part Where there was danger we would hear of them

After the war the King and his Royal wife prosecuted everything in the interests of peace When legislation was brought up the advice of the King was sought, was found of an excellent nature and was used.

When England was practically on the verge of a calamity, in 1930 it was the sage advice of the king which saved England's name, her prestige in the world, and has assisted her in being the first country to overcome the depression.

Let us then remember those things that are expected of our monarch, and who cannot but admire the excellent qualities of His Majesty King George and Her Majesty Queen Mary. I am sure one and all you will join me in wishing them another twenty-five years of ruling over us

KETCHAMOOT

Very little field work has been done so far this spring but the majority will be on the land this week weather permitting.

Miss Edna Manning of Edmonton spent the week end with her sister Miss Helen at the Roy Lee home.

Miss Hilda Nomeland spent Sunday and Monday at the home of her parents Mr. and Mrs. Sam Nomeland.

The Junior U F.A. held their monthly meeting Thursday night of last week at the Davison home with a goodly number present. Miss Ethel Coombes was chosen to represent their club at Edmonton University week.

Mr. and Mrs P. O Moline and daughter Astrid visited Mr. and Mrs. C A. Ingram at their home Sunday. Miss Astrid just returned home recently from Post Fall, Idaho, where she has been with relatives several months after finishing a four year nursing course at Sidney B.C

Mr. and Mrs. Milton Ray are building a house on what was known as Ivan Mitchell quarter just south of Albert Sears' farm.

Mrs Frank Shupe entertained the Ladies' Aid at her home Wednesday afternoon of last week. In spite of almost impossible roads and very bad snow storm, ten members and visitors were present and passed a pleasant afternoon. The June meeting will be held at the home of Mrs. J. H. Ingram.

Miss Kathleen Ingram who is attending high school in town spent the week end and Monday at home.

Mr and Mrs. D. H. Mitchell and grand daughter Miss Helen Salsbury of Edmonton visited over Sunday at the W. A. Mitchell home. Miss Margaret Mitchell accompanied them back to Edmonton.

Mrs. Robert Berreclough and daughter Theone returned to their home in Bardo Sunday after spending a few days visiting Mrs. Berreclough's parents Mr. and Mrs. L. Carlisle.

Several members of Ketchamoot Junior U.F.A. attended the joint meeting of the other two locals in Tofield Saturday night. Stanley Sears gave a paper on "The Early Days and How Ketchamoot Got its Name."

Local & Personal

Miss Marjory Stuart spent the week end at her home in Edmonton

Mrs Ed Wuetherick and baby returned home on Saturday.

Mrs. Marchand is visiting her daughter Mrs. Wuetherick

Mrs G Broughton, Miss Hilda Nomeland and Miss Loret Ross visited the city Thursday.

Miss Jean Sinclair of Edmonton spent the week end at the Taylor home

Mrs Ralph Neale returned to Edmonton last week after spending a short time with relatives here. Mrs. Neale lives in Vancouver and is visiting her parents in Edmonton.

Mr and Mrs. Swift and family attended the Jubilee celebrations in Edmonton Monday.

Rev and Mrs Bateman and son of Wainwright visited the Mercury office for a short time Tuesday

The Jolly Eight Bridge Club met at the home of Hilda Nomeland on Wednesday night. The honors for the month were won by, First Thelma Jobb, second Mrs. Coutts, and consolation Marjory Stuart.

Mr and Mrs. Bruce visited the city on Monday.

Mr and Mrs. McCauley visited the city on Saturday.

Miss Anne Lindsay spent the week end at her home in Innisfree.

Mr Carl Underschultz of Fort Saskatchewan, Junior U.F.A. director for this district, visited at the Thomas home over the week end

A delightful afternoon was spent on Sunday afternoon when Miss Muriel Malcolm entertained a few friends to tea. Miss L. Ross poured tea and the hostess passed the cakes. Mrs Pincott entertained the girls with a few readings, one of which was her famous "Betty at the Ball Game."

Mr. H. McHeffey of Grande Prairie is visiting at his home here.

SCHOOL NOTES

by

I M E. R.

On Friday May 3rd the Tofield School celebrated the King's Silver Anniversary. The Tofield High School Student's Union presented a programme for the remainder of the school.

The following was the program:—

Chorus—"God Save The King"—all.

Exercise—"King George The Fifth" by Edith Stauffer, Thomas Jacobs, Cleo Wilson, Harris Mc Clymont and Dan Dodds.

Reading—"Gentlemen, the King"—Jack Smith.

Recitation—"The Victor True"—Edith Robinson.

Song—"Land of Hope and Glory"—Mr. L. Broughton accompanied by Mr. McCauley

The King's Radio Message—Christmas 1934—Isabel Robinson.

Recitation—"I Vow to Thee My Country"—Gordon Smith.

Song—"My Own Canadian Home"—Betty McCarthy accompanied by Mr Thomas.

Reading—"Their Majesties" Lola Wilson.

Recitation—Clifford Pincott.

Chorus "Land of Our Birth"—All

Reading—"Our King"—John Swift.

Chorus—"The Maple Leaf Forever"—All.

Reading—"Great Britain" Donald Edwards.

Recitation —"The Union Jack"—Dorey Letourneau.

Recitation—"My Land"—Ina Taylor, Allan Harrison, Dorothy Drebert

Chorus—"Oh, Canada" —All

"Goodness, George! This is not our baby! This is the wrong carriage."

"Shut up! This is a better carriage."

Study Club Closes Season With Social And Musical Evening

"One of the best programs heard in Tofield in a long time" was the consensus of opinion regarding the musical evening put on by the Study Club on Friday evening May 3rd. Mrs Malcolm had kindly loaned the dining room of the hotel for the occasion and it had been converted into a very cosy music hall A most enjoyable program was given, the artists responding generously to repeated encores

Mrs. Pincott who has been a faithful and valued member of the club and who is leaving Tofield in the near future was presented with a book of poems We sincerely regret losing such a versatile artist Her place in Study Club and in our community will be hard to fill Our best wishes go with her to her new home.

After singing the National Anthem the Ladies served lunch and a social hour was spent

The Study Club wishes to thank the artists who helped make our program such a success, also Mrs Malcolm for her kind hospitality

The complete program is as follows:

O. Canada.

Piano solo, "[illegible]," Cadman, Mr McCauley

Encore, "Believe me, if all those endearing young charms"

Solo, "Nirvana" Adams-Wetherby, Mr Wallis

Encore "I'll Sing Thee Songs of Araby" Wallis

Reading, "Home," E Guest, Mrs Pincott

Solo, "Hills of Home," Calhoun-Fox, Mr Broughton

Violin Solo, "Melody in F," Rubinstein, Mrs Pincott.

Encore "Serenade."

Vocal Duet, "Smilin' Thro," Mr Broughton and Bill McCauley

Encore Comic Irish Song

Piano Solo, Allegro Moderato Schubert, Mr. Thomas.

Piano Solo, "Symphonie Pathetique Tschaikowsky.

Reading, "The Parson at the Football Game," by request, Mrs Pincott

Encores "The Newsboy," "Is Marriage a Failure?"

[illegible] "A Brown Bird Singing," Haydn Wood, Mrs L. W. Smith

Encore "The Birds Go North Again"

Violin Solo, "Sing Smile Slumber" Gounod, Mrs Pincott.

Encore "Intermezzo"

Solo, "Land of Hope and Glory," [illegible]

Encore "Betty at the Ball Game" Mrs Pincott

"God Save the King"

CUSTOMERS

have to . . .

BE BOUGHT

Worth-while things cost money. This means that retailers must part with money in order to get customers. Customers require to be bought just as one's merchandise has to be bought.

Customers are not likely to be obtained apart from seeking them. They must be pursued, and they must be asked to do business with the retailer who wants their custom.

You would think that all this is as plain as is the nose on one's face. But stop! Answer this question: What have you, a retailer, done in the past month—to go no further back— to seek and get new customers? How many non-customers of your store have received invitations from you to do business with you? How many persons have received communications from you, requesting their custom? How many persons have you informed, in their homes, about your business, your merchandise, your policies? How much money have you spent this past month on the purchase of customers?

Just waiting for customers is the acme of folly. Just relying on the conviction that the public ought to do business with you is folly. Just soothing yourself with the reflections that you are honest, that you give the public a square deal, that your store has a good location, that you price merchandise fairly—these are passive things.

It is action which counts in getting the things which we want. An infant cries. This is its way of making its mother or nurse know it wants something. Is it fair to a business to be doing nothing in a planned way to get new customers for it?

Advertising by all businesses will make and keep our town a good shopping centre.

THE MERCURY

BEWARE OF THE CLOTHES MOTH

The damage caused by clothes moths in Canada every year is extensive and the prevention of that damage requires the exercise of care, forethought, and vigilance, states the Dominion Entomologist, Dominion Department of Agriculture. Articles of clothing and other materials subject to attack should not be left undisturbed for long periods, particularly during the summer months, in such places as cupboards, attics and trunks, unless adequate precautions have been taken to protect them. The articles after being thoroughly brushed, preferably in strong sunlight, should be placed in well-made trunks or chests with tightly fitting lids, or enclosed in cotton or paper bags or in cardboard boxes sealed with paper strips. Wrapping clothing in two thicknesses of strong wrapping paper, taking care to turn the edges in so that no moths can gain entrance, is also recommended as an alternative measure. According to the Dominion Entomologist one pound of fresh naphalene flakes, or in similar quantity of paradichlorobenzine scattered among garments in an ordinary sized trunk assures perfect protection from moth injury. When cotton or paper moth bags are used one half pound of either of the above chemicals may be enclosed in each bag as an additional precaution. When entire buildings are badly infested with moths, superheating the rooms or fumagation with hydrocyanic acid gas, but under expert supervision only is recommended.

PRESERVING EGGS IN THE HOME

As the result of many years of investigational work on the preservation of eggs for household use carried out by the Dominion Department of Agriculture, two preservatives, (1) lime water and (2) "water-glass" have been proven eminently satisfactory and distinctly superior to the large number of preparations tested.

Lime water is prepared by slaking freshly burnt quick lime, in the proportion of one pound to five gallons of water. The mixture should be well stirred. The lime water may be used as soon as made without allowing it to settle or it may be left for an hour or so and the clear, upper liquid poured off from the deposit of undissolved (excess) lime. If quick-lime is not available, slaked lime (hydrated lime), as used in the preparation of Bordeaux mixture may be used. The eggs to be preserved should be placed in a crock, water-tight barrel, or other suitable receptable, and covered with lime-water. They should be stored in a cool place, with the top of the receptable completely covered.

"Water-glass" is a well-known preservative chemically designated silicate of soda, and is readily obtainable at drug and grocery stores in either liquid or solid form. It is readily soluble and no special directions for preparing the preservative solution are necessary. At the same time, the results of the tests showed that lime-water was the superior preservative, the eggs on breaking showing less discoloration of the whites and more globular yolks. Only perfectly fresh eggs should be used for preservation and the eggs should be completely immersed all the time until required for use. In storing, a temperature of 40 to 45 degrees Fahrenheit assists materially in retaining good flavour.

Sweet Remembrances

An explorer was speaking at a dinner given in his behalf before he left on a long journey into the heart of Africa.

In concluding his remarks he said: "I thank you for your kind wishes regarding my welfare on my dangerous journey, and want you to know that when I am far away, surrounded by savages I shall certainly think of you."—Ashore and Afloat.

The tobacco producing areas of British Columbia extend 250 miles northward from the international boundary to the main line of the Canadian Pacific Railway and include the districts of Keremos, Grand Forks, Oliver, Summerland, Kelowna, Winfield, Lavington, Vernon, Kamloops and Ashcroft.

FREE GARDENING INFORMATION

As a result of more than half a century of actual experiment by the Dominion Department of Agriculture, a storehouse of information on every phase of gardening is at the disposal of every member of the Canadian public who wishes to take advantage of this knowledge. How to grow shrubs, trees, flowers, and vegetables how to protect them from disease and insect enemies, how to attend to the soil, and a thousand-and-one things connected therewith are dealt with in plain language. Year by year hundreds of bulletins, pamphlets, and circulars are distributed free to persons who write and ask for them the Publicity and Extension Branch of the Department in Ottawa. In this way Canadian gardeners, professional and amateur, are helped to maintain a high degree of horticulture.

There are circulars or bulletins on spring and fall work in the rose garden, flowers for the prairie home, the growing of peonies, gladioli dahlias, ferns, carnations, the canna (a sub-tropical plant for formal garden beds and borders), growing caragona for field shelters and hedges, tree planting for ornamental purposes, how to make hotbeds and cold frames, grapes for home use, mushroom culture, how to grow tomatoes, asparagus, cucumbers, potatoes, any known vegetable in short and how to make a sketch for a proposed shelter belt, just to mention a few.

The cultivation of the apple in Canada, hedges and their uses, the Prairie farmer's vegetable garden insects and their control, cabbage flea beetle, crown gall in fruit trees and small fruits, the undesirable pest the earwig, onion maggot control, gladiolus thrips diseases of the raspberry, potato and tomato, the strawberry root weevil and many other subjects relating to the garden, and pest control are fully dealt with and may be obtained free by writing to the Publicity and Extension Branch, Dominion Department of Agriculture.

A USEFUL HOUSEHOLD AND FARM SPRAY

A very useful spray for destroying insects in dwellings and farm buildings may be easily and cheaply made from pyrethrum insect powder and kerosene. According to the directions of the Entomological Branch of the Dominion Department of Agriculture the spray is prepared by adding one-half pound of pyrethrum to one gallon of kerosene, allowing the mixture to stand and agitating it at intervals over a period of about two hours, or longer, thus ensuring that practically all the active principle of the pyrethrum is dissolved. The residue of the pyrethrum settles to the bottom of the vessel as a brown sediment, and the clear liquid, which is pale lemon-yellow in colour, may be either syphoned or filtered off.

When the spray is required for use in farm buildings, it may be prepared satisfactorily with ordinary kerosene and it is unnecessary to add any other chemicals. For household use, however, to remove any possibility of staining fabrics or furniture, water-white kerosene should be used, and, in order to impart a pleasant odour, methyl salicylate or oil of sassafras may be added at the rate of two or three fluid ounces to each gallon. The spray should be kept in a tightly corked container to prevent it deteriorating in strength, as the active principle of pyrethrum easily evaporates. For use against bedbugs the addition of about one-half pint of cresol to each gallon of spray increases its effectiveness. The spray should be applied in the form of a fine mist by means of a small hand sprayer.

There are a number of propietary fly sprays on the market similar in composition to the one described above, which may be substituted for it by those who wish to avoid the trouble of preparing their own spray material.

According to the live stock survey as at December 1, 1934, the number of hens and chickens on farms in Canada was 46,487,820.

Milch cows in Canada increased in numbers from 3,650,200 head on December 1, 1933 to 3,847,400 on December 1, 1934, or 5.1 per cent.

LIKED PUNISHMENT

There is at least one poor fish who didn't know when he had enough. An enthusiastic angler out fishing on a lake in Nova Scotia just recently hooked a trout but his line broke leaving the hook in the trout's mouth with three feet of line attached. The next day the angler cast at the opposite end of the lake and the same trout grabbed the bait, according to information reaching the *Fish and Game Department* of the Canadian National Railways. When landed the broken line was still in the mouth of the fish.

A Scottish minister was explaining why he never invited other ministers to preach in his pulpit.

"If anither mon came and preached better than I do," he said, "ma folk would never listen to me again; and if he didna preach better than I do, he wouldna be worth listening to."—Tit-Bits

Here and There

With the warm weather and a fine season almost upon us, dates of opening of the summer hotels and resorts of the Canadian Pacific Railway will be welcome news to tourists. Banff Springs Hotel opens, June 16; Chateau Lake Louise, Emerald Lake Chalet and bungalow camps Wapta, Yoho, Radium Hot Springs and Moraine Lake June 21. French River Bungalow Camp, June 15; Devil's Gap Bungalow Camp, June 21; Algonquin Hotel, St. Andrews, N.B., June 29; The Pines, Digby, June 27 and the Lakeside Inn, Yarmouth, June 28.

Portland, Oregon, famous annual Rose Festival will be held this year, June 6-8. Millions of rose blooms will be on display in the many floats of the grand floral parade and also in the 47th annual show of the Portland Rose Society.

Marking the Silver Jubilee celebrations of the coronation of King George V, to be held this year, the Canadian Pacific Railway has issued a strikingly handsome folder covering the main events of the function from the King's drive to St. Paul's Cathedral on May 6 and ending with the Lord Mayor's Show on November 9.

A beautiful new menu card for the King's Jubilee celebrations has been designed by the Canadian Pacific Railway to be used in all the company's hotels from coast to coast, on ships of the Atlantic and Pacific fleets and on world cruise ships. Its front cover is done in gold with the Canadian Coat of Arms in color at the top and the Canadian Pacific crest at the bottom. The back cover, also done in gold, shows a train in the Rockies, the Chateau Frontenac at Quebec City and the Empress of Britain. A maple leaf below the Coat of Arms and a space on the back for autographs completes the menu card.

The world is invited to attend the annual Rose Festival to be held at Portland Oregon June 6, 7 and 8. This, one of the outstanding fetes of the United States, will this year show many new and beautiful features, among which the 47th annual rose show of the Portland Rose Society will be not the least important. The whole city will be embowered in roses at that time of year.

Over the period May 15-29 inclusive, the Canadian railways are offering special bargain fares figuring approximately at one cent a mile from various eastern cities to western Canada. Return limit is thirty days from the date of issue of ticket with stopovers within the limit of the ticket at Port Arthur, Armstrong and points west thereof.

Adressing an audience of more than a thousand representative business men at Toronto recently, E. W. Beatty, K.C., LL.D., chairman and president of the Canadian Pacific Railway stated that the Canadian National Railway system was no great or honest experiment in public ownership and that it was neither more nor less than a [illegible]. This problem he said [illegible] Canada's most difficult problem and threatens national solvency.

Starting a tour of Canada which will include the principal centres of the Dominion, Lord Baden Powell, Chief Scout, Lady Baden Powell chief of the Girl Guides and their two daughters, arrived at Vancouver [illegible] Charlotte [illegible] given [illegible].

SILVER—

NOT SO very long ago when the newspapers of the world were announcing that this and that nation had left the gold standard, our Lindbrook correspondent humorously remarked, not without some truth, that the farmers had long since gone off the gold standard, also the silver standard and were likely to be pushed off the copper standard. However, now as in ancient times, gold together with its step brother silver, sway the destiny of nations.

The latest metallic furore to excite nations comes from the rapid rise in the price of silver during the past two years. Not so very long ago silver in the United States was quoted at 29 cents per ounce. Within the period covered by the depression it has risen to 81 cents per ounce. The reason was two-fold. At first a persistent agitation from the silver producing states of the Union brought forth the remark from President Roosevelt that something would be done for silver. This resulted in a gradual, almost daily rise in the price of the metal until last June when congress gave definite authority to the president to buy silver from all comers until the price had reached $1.29 per ounce or the dollar equivalent of metallic reserves had reached one-fourth silver to three-fourths gold. At this time speculators began to sit up and take notice and in the intervening months it has been a see-saw between the world price as created by speculators and the price President Roosevelt was paying. Some times the world market would get ahead of the president and at others the president would be a little ahead. The highest it has gone was 81 cents an ounce which is three times the amount of its record low price. It has since receded a few points and is now quoted in the 70's.

One of the stock arguments of the silverites in the early stages of the metal's rise was that it would help China and other Oriental countries who were on a kind of silver standard. However, the reverse seemed to have occurred, the high price paid by the United States is causing a serious drain on the silver reserves of those countries, also forcing up the value of their money, making it harder for them to sell goods on an export market. The more recent rapid rise in the price of the metal did more, it passed what is termed the "melting point" in several countries. That is, the value of the silver coins was greater as melted metal than as money tokens. Within the past week something akin to a crisis occurred in Mexico, where for a day banks were closed and later silver currency called in and paper money issued. In the meantime a Mexican official was wafted to Washington in a plane where he pleaded with the United States authorities to "go slow."

The melting point of the Mexican peso is 72 cents, but there are other national currencies ranging in value from 43½ cents to 77¼ cents. The Indian rupee is $1.06. So it can be seen if President Roosevelt continues to raise the price of the metal to $1.29 there will likely be some drastic changes in more than one national's currency. However there are ways and means whereby President Roosevelt can attain his objective of the dollar equivalent of metallic reserves of one fourth silver to three fourths gold, without boosting the world price any higher. He could announce a **domestic** price of $1.29, and drop out of the world market, which would break the wave upon which world speculators are now riding, or he could devalue the silver dollar to 59.06 of its present content. The latter would automatically give him the ounceage he requires.

But the question, why is he doing it, is equally as interesting as the question, what will he do. In January 1933 Mr. Roosevelt began to pay domestic miners 64½ cents per ounce for silver. Judged by previous prices this was real help to the silver mining states and is understandable, but why the world price of silver should be steadily raised has many people guessing. There are many people who are freely discussing the return of the old silver gold standard of 16 to 1, that is 16 parts of silver are made by law to be equal to one part of gold. But with gold $35.00 an ounce, a 16 to 1 ratio would mean silver at $2.19 an ounce. This could be accompanied by bimetallism or not according to act of congress. If bimetallism was adopted it would mean that the U.S. treasury would pay $2.19 an ounce to anyone who had silver to sell, but if a straight 16 to 1 ratio was set for the States, the treasury would buy from domestic miners only. A bimetallist system was in effect in the United States from 1792 to the Civil War, at first it was 15 to 1, and this proving unsatisfactory the ratio was changed to 16 to 1, but again it proved unsatisfactory. By steps the U.S. then came to the single gold standard and it is a matter of opinion as to how satisfactory this has been.

It has long since been recognized that one of the chief impediments to a resumption of world trade, and the return of a degree of prosperity, is the unsettled state of the various world currencies. An interesting sidelight of this was given this week at the International Cotton Congress held at Rome. At this congress papers were read by representatives of Master Cotton Spinners Federations from many countries. The British submitted a memorandum of 34 pages which insisted on the need for silver and urged the government to restore silver to the place it held in their currency systems before 1920 when a number of countries, notably England—reduced the silver content of its token coinage. The Belgians flatly came out for gold. The Japanese, French, Netherlands, and German delegates also opposed the British thesis. The Master Cotton Spinners Association of Manchester, England, said:

> "We urge upon each and every Government individually to take the necessary action to bring about rise in prices through monetary expansion to the prosperity level inside their own country or empire, and thereafter to stabilize currency."

Perhaps President Roosevelt in boosting the price of silver has this in mind. Anyway it will be interesting to watch developments, because—

Both wheat and cotton are primary products most of which are sold on a world market and consumed thousands of miles from their source of origin. A more stabilized international currency field will or should increase world trade and to some extent bring back the exchange of products which geographic and climatic advantages made possible and desirable in prewar days.

NOT SO BAD EITHER

There is a Japanese schoolboy (or student) who writes letters. One such reached the General Passenger Traffic Manager of the Canadian National Railways the other day. It reads:—

"I write this letter with very glad and respect for you who is General Pass. Traffic manager of my most likely and most famous Canadian National Railways in U.S.A.

"I am a student, studying the electric and mechanical engineering at University in Japan. And I have deep interest about the electric locomotive and steam locomotive; especially about the locomotive of the Canadian National Railway which is Number One of the Railway Co. in U.S.A. in point of service, high speed and mechanical construction.

"So, I think to research about these fine steam locomotive in my university. "Please send me with your kindly mind the photograph of steam locomotive and cars for my expecting hope.

"I wait a happy day which can send the letter to thank you against the photograph which send me by your deep kind. Cf course, I will endeavor to do anything which you are hope in Japan.

"Finally, you excuse me for this letter which was written by poor english—Very truely, H. Katsuna."

However we would like to see a Canadian schoolboy write as good a letter in the Japanese language.

THE SCOUT COMES HOME

Hot and dusty, sunburnt, hungry and incredibly dirty, their Boy Scout came home. Carrying an enormous untidy swag, his hat battered out of shape by rain and wind, but whistling merrily, he strolled through the gate. Hustled protestingly by mother and sister into the waiting bath, he sang lustily the latest addition to his collection of Scout songs. His voice was cracked and husky with the dust and shouting of the Jamboree. They listened to him:—

"Oh, Sinbad was a mariner—
You know what sailors are!
He sailed the seven seas,
But once he sailed a bit too far
He came upon a mermaid.
She was combing out her locks"—

Suddenly he broke off and started a new Indian song which sounded like a sweet lullaby, but with a Scout one never knows! Clean and shining with soap he was asked by his admiring family how he had enjoyed the camp life.

"All right," said he, "but what's for dinner? The best meal I had down there was the day I was cook!"

The parents pondered over the change in their offspring. The red scarf had been swopped for a green, the plaited woggle for a nut; his nose had a different hue. But above all there was a new assurance, a jauntiness as of one who had seen the

Canadian National Railways Magazine

DIVINE POWER CREDITED FOR LUCKY ESCAPE

Most everybody believes in a Divine power that guards the safety of human beings, but there are a few skeptics.

Thursday morning a Bulletin reporter bumped into a railway employee who imparted a miracle story that should strengthen belief in the Father of the Universe.

The man whose name is withheld is a well known telephone and telegraph lineman in the employ of the C.N.R. and he related the following story that he says can be given verification from the company's records.

"About two years ago I [illegible] to work on the mountain division between Boston Bar and Vancouver. I didn't know the ropes on a mountain division," he related.

"I therefore watched the time cards of trains closely but I was always scared, when I had to travel on my gas speeder from [illegible] to [illegible].

"One day, soon after I [illegible] there I was travelling from Boston Bar to Hope and I decided to keep right behind a freight train. The train entered the Yale tunnel, which is just about 2,000 feet long. I stopped my speeder and decided to wait until the gaseous smoke had cleared from the tunnel, when suddenly I had an uneasy feeling about going ahead at all.

I dismissed the fear from my mind, and put the speeder back on the rails and headed into the tunnel. I stopped and backed out again, the fear returning to my mind. I [illegible] lifted the speeder from the rails at the mouth of the tunnel then a fast freight rushed past.

"Yes, I believe in Divine Providence," he concluded.

"Now tell the jury, lady, [illegible]," said the young lawyer, "just where the prisoner was milking the cow."

The young lady, a trifle embarrassed, smiled sweetly and replied "Why, I think it was just a little back of the centre, sir."

The foreman was going from one man to another with a sheet of paper. When he came to Sandy McKie he said, "Sandy this is a subscription to get a wreath for Jock Stuart who died last week. All his mates have given a dollar toward it."

"Och, mon," replied Sandy, "That'll make me and Jock square. He owed me a buck."

[illegible] world. He had now [illegible] with the boys of many lands. He had talked with "J. P."—From the Melbourne Herald

THEY WAVE TO US

Three small boys in West Virginia, brothers under the age of 13, are heroes in the mountain state because they prevented the wreck of a Chesapeake and Ohio freight train by discovering a slide on the tracks of a [illegible] running a mile up the [illegible] bringing the locomotive to a halt by waving a hastily-improvised flag [illegible] stick. Asked by a grateful [illegible] just why they had dashed [illegible] frantically to warn of danger they said, "Railroad men are good fellows, they always [illegible] us as they pass."

One often hears of the difficulties which [illegible] trainmen when they try to rid their cars of juvenile pests who [illegible] climbing all over the rolling [illegible] imminent peril to life and limb. The high regard in which the average small boy, especially in the rural districts, holds the engineer, the fireman, the conductor and the brakeman is often ignored but is [illegible] tion which deserves to be emphasized.

The West Virginia youngsters who raced [illegible] the track to prevent disaster to a freight train whose crew were [illegible] fellows" will not receive [illegible] in the way of material reward. They would not expect it [illegible] perform that signal service for money. They continue [illegible] friendship of the pals who [illegible] and may in time grow up [illegible] the throttle themselves. The management of the Chesapeake and Ohio should see to it that their names are inscribed on a special honor roll which can be referred to at a later date, and when Charles, Herbert and [illegible] Willie decides to take [illegible] as his occupation.

—Buffalo Evening News

"I'm [illegible] ng money for the un[illegible] Would you like to get in [illegible]?"

"Yes, indeed, how much can you let me have?"

"How did you get that smudge on your face?" asked the 'Frisco engineer's wife of her husband.

"How do you expect me to run a [illegible] without getting grease on my face?"

"I don't [illegible] but when did the railroad start using red grease?"—Frisco Employees' Magazine

---

During the fiscal year ended March 31, 1935 [illegible] boxes or about 13-[illegible] pounds of Canadian dressed poultry were inspected for export and [illegible] interprovincial shipment under the supervision of the Live Stock Branch of the Dominion Department of Agriculture. This was an increase in shipments over the 1933-34 fiscal year of [illegible] boxes, or about 5,133-[illegible] pounds.

all 5
EXCLUSIVE
features PROVE
CHEVROLET'S Modern QUALITY
SOLID STEEL TURRET TOP BODIES BY FISHER
BLUE FLAME ENGINE
KNEE-ACTION RIDE
WEATHERPROOF CABLE-CONTROLLED BRAKES
FISHER NO-DRAFT VENTILATION

If you want a truly modern car at the lowest cost, be wise—choose a Master Chevrolet! Here is why: Chevrolet is the only lowest-priced car of 1935 that gives you a full complement of 1935 features! The new TURRET TOP roof construction, for example. Do you realize that no other car in Chevrolet's class offers you this modern, overhead protection of solid, seamless steel?

Then there's KNEE ACTION. Do you know that the Master Chevrolet is the only low-priced automobile that gives you the Knee-Action "gliding ride"—and balanced weight in the bargain!

That is only mentioning two of Chevrolet's five outstanding, and exclusive features. We could go on to talk about Cable-Controlled Brakes—Fisher No-Draft Ventilation—and the Blue Flame Engine.

But if you will simply demand the modern protection of a solid steel roof above you—and the modern riding ease of Knee-Action wheels under you—you can't go wrong in choosing your next new car. You'll choose a Master Chevrolet, for quality that is all the more modern because the cost is so low!

MUSICAL FESTIVAL TO BE HELD HERE SATURDAY

Concert To Be Held in the Evening

Due to the large number of entries which have been received for the Camrose Inspectorate Musical Festival, it has been deemed expedient to divide the Inspectorate up into local districts for the purpose of an elimination contest before the [illegible] festival takes place on May [illegible] in Camrose.

[illegible] events for [illegible] students may enter at Camrose [illegible] be "run off" at three local [illegible]. On this line Tofield [illegible] have the privilege. On Saturday next May [illegible] there will be a local festival. At the time of writing there are already [illegible] entries, so the festival itself will take place during most of the day. The adjudications will take place starting at ten a.m. and continuing until Noon. After lunch the adjudications will continue from 1 or 1 [illegible] p.m. until 6 p.m.

The adjudicators [illegible] Mrs. J. C. Biggs, a very prominent member of the Little Theatre Association in the city of Edmonton. We are fortunate in being able to have the services of such an experienced [illegible] in this line. For the Musical [illegible] the Adjudicator Mr. J. Norman Eaglesham, Mus. Bac. will carry on. Mr. Eaglesham needs no introduction to any who have been in the Edmonton schools. He has been the Supervisor of music in the Edmonton schools for many years. In addition to this he has several settings for vocal music to his credit. Probably the finest setting for two pieces which are very popular at this time of Jubilee celebration are from his pen. "My Own Canadian Home," and "The Dominion Hymn."

The Tofield Board of Trade and particularly, Mr. L. W. Smith have co-operated in supplying hot cocoa for the out-of-town visitors who are taking part and wish to bring their lunch.

The adjudications will take place in the Variety Theatre and in the Curling rink. The cocoa will be served in the basement of the United Church at noon. A number of the High School girls will look after this part of the day. Everything is set now to make this one of the important days in the year's activities, now everybody get behind it and support it by coming out to the Grand Concert in the evening at eight o'clock in which the first prize winners will participate. There will also be several items added by the local school to assist in giving variety so you can be assured of a very entertaining time. The prices are twenty five cents for adults, and fifteen cents for all children and students not taking part in the concert. You just cannot better it!

BROOMHALL COMMENTS ON CANADIAN WHEAT

Broomhall's "Corn Trade News" of April 10, comments as follows on the Canadian wheat situation:

"The Canadian wheat problem is undoubtedly giving cause for some hard thinking in Canada and in our country. A recent article in a Canadian magazine stressed the importance of the wheat problem for the Dominion, because the western prairies rely on wheat for their income, and eastern provinces cannot prosper unless the western farmers are doing well. We are bound to think market movements of the last ten days have strengthened the Canadian government and the manager of the Central Selling Agency (Mr. John I. McFarland) in their determination to keep up prices. Canada has sold more wheat in the past week, but her prices are too high to enable her to get a good share of the international trade and this applies to the buying of British millers and still more to the continental trade, although official returns of exports indicate that Canada's trade with the Continent is not so stagnant as it often appears from market reports. Canadians are bound to recognize that they are not selling sufficient to reduce their stocks to anything like a normal quantity by 31st July next as we said in our review of 26th March we are doubtful if the total shipped during the current season will reach our estimate of 30 [illegible] [illegible] quarters, especially as we hear that some British millers recently made a further reduction in the percentage of Canadian in their grisling mixtures being encouraged to do so by the better gluten content of this season's Plata—we recently published a letter from a Liverpool miller suggesting that Canadian wheat, in view of its high price, ought to be quoted per fine ounce!

"The Canadian wheat problem can be viewed from several different angles. Canadians may well argue that they will not stop selling on 31st July next, and they can reasonably expect a better trade as the supplies of Australian and Argentine decrease; Canada's large supply of fine wheat may also be found a very valuable reserve, in case any big crop of the 1935 harvest should be seriously damaged, or if the European harvest should be greatly delayed by wet weather; the holding of such huge quantity as 240 million bushels is certainly regarded as a gamble by some people, but the action of the government in supporting the market in this way has enabled the western farmer to get a better price for his grain, and we maintain our opinion that pegged prices are not unreasonably high; but finally we may mention the view that by holding back the wheat, or holding it at a price importing millers will not pay (except for minimum quantities), the Canadian farmer is in danger of permanently losing a large part of the export trade. This is certainly a very debatable point, but our opinion is that buyers will always be found for best quality."—Alberta Wheat Pool Budget

UNITED CHURCH NEWS

Sunday May 12th is Mother's Day and a special programme has been prepared by the United Church Sunday School for the occasion.

At 11.00 a.m. the scholars will do this part and a cordial invitation is extended to parents and others to attend. At 7.30 p.m. in the United Church the whole service will be in keeping with the glorious theme "Mother." The choir will render an anthem, Mr. Broughton will sing and Mrs. Pincott will recite "Home." Honor and remember Mother by attending church on 12th of May.

The Jubilee service held in the United Church on May 5th was well attended. From the text "He is worthy" the Rev. D. K. Allan spoke fittingly on His Majesty King George V. The choir rendered a jubilee anthem and Mr. Broughton sang "Land of Hope and Glory."

On Saturday May 4th the pupils of Mrs. Firth held a piano recital at the Firth home. Those who took part in it are: Enid McLaughlin, Diana Davis, Joyce Innis, Muriel Rogers, Patsy Firth, Paul Kallal, Marjorie Murray, Margaret Dodds, Hazel Moore, Ethel Brown, Zelda Dodds, Corinne Haukedal. The parents of the pupils were invited and a delicious lunch was served.

The examiners were checking up on the students' papers.

"Can't let his youth pass," said one, handing his colleague a paper. "He can't spell properly."

"What's he done wrong?" asked the other.

"He spells 'proceed' with only one 'e'," said the first.

"Where's he come from?" his colleague asked.

"Ceylon," came the reply.

"H'm," smiled the second, "that accounts for the spelling. He comes from the land of the Cingalese."—

JEALOUS SWAIN MARS LADY LOVE—BITES HER NOSE OFF

Toronto, May 3.—"I got jealous and bit her nose off," Mike Kravitz explained to Magistrate A. L. Tinker in police court yesterday. He was convicted of attempting to maim Salomine Sebchuk and was remanded to May 4 for sentence.

The complainant, who was brought from the hospital to testify appeared pale and held a handkerchief to her nose.

"He just bit my nose off and threw the piece away," she told the court interpreter in Ukrainian.

"I was going to work and she told me she was going to leave me and go live with another man," Kravitz said.

Constable E. Gillanders told of finding the piece of nose on the floor, wrapping it in a piece of paper and taking it to the hospital. Dr. R. B. Chapple said attempts had been made to get the piece to grow on again but without success. Grafting will be tried.

EVANGELICAL SERVICES NOW BEING HELD

Every night from May 9th to Sunday May 19th, (except Saturdays) special evangelical services are being held in the Women's Institute Rooms. The services are being conducted by the Rev. McKee, who is connected with the regular Baptist Church of Alberta. Rev. McKee plans to make the services bright and cheerful and of real benefit to those who attend. The week night services commence at 7.45 p.m. and the Sunday services at 11.00 a.m. and 7:30 p.m.

Mrs. McKee is assisting Rev. McKee in the work.

ANTI-CANADA ARMS ARE OUT F.D.R. ASSURES

Washington, May 4.—President Roosevelt said Friday that the United States will do nothing to arm herself either defensively or offensively against Canada.

He made this statement in response to enquiries about his rebuke to the house of representatives military committee for publishing the testimony of two army generals outlining plans for seizure of British possessions in the neighborhood of the United States in the event of war.

He said he did not think he could have made his letter to the committee more forceful but was willing to do so if the language was provided. Otherwise, he said he regarded it as a closed incident, and he hoped all the people and government officials in Canada and other places had read it.

The old Scots laird met one of his tenants while making a tour of his estate.

"Angus," he said a little sorrowfully, "I'm going to raise your rent at the end of the quarter."

Angus smiled happily.

"I'm much obliged to ye laird," he replied, "for I canna raise it myself."

CIRCULATION MANAGER'S SONG

How dear to our hearts is the steady subscriber
Who promptly renews at the end of each year;
Who sends in her name and money quite gladly,
Who casts round our sanctum a halo of cheer.
She never says, "Stop it, I cannot afford it,
I'm getting more magazines now than I read.'
But always says, "Send it, our folks seem to like it,
We think it a help, and in fact a great need.'
We inwardly bless her, we outwardly thank her—
That steady subscriber who writes, 'Yes, indeed."
—Credited to "Exchange" by Christian Advocate.

Getting Lost in the Woods

"Forest and Outdoors" published monthly in Montreal is a very interesting magazine to lovers of the great out-doors. The following article by Grey Owl, is taken from their May number. Forest and Outdoors has been published for many years.

By Grey OWL in Forest and Outdoors

Three years ago, on a night in spring, a man went down from his camp fifty yards to the river to get a pail of water, and has never been seen since.

A year before this writing, a deer hunter took an afternoon stroll, and was discovered eleven days later by one of a gang of twenty-five men who scoured the woods for him for twenty miles around.

In the first case, the man strayed off the water trail in the dark, and not arriving at the shack, he attempted to correct his mistake, took a short cut, only to arrive back to the river at another point. He again endeavored to strike the camp, but angling too much to his right, missed it. So much was learned by the finding of the pail at the river bank, and by his tracks.

After that he entered a country of burnt, bare rocks, and small patches of green swamp, and he is there yet.

The second man, having killed a deer, remained where he was, erected a shelter, and kept a fire. Beyond the mental strain incident to his adventure he was in good condition when found.

Wherein lies the secret of the difference between being correctly and incorrectly lost.

The safest course, with night coming on, and still astray, is for one to **stop, make a fire**, and as comfortable a camp as may be, and **wait for daylight**, with the feeling of security that it brings after the uncertainties and exaggerated forebodings of a long night.

Then perhaps bearings can be taken to better advantage, and the sun may be shining, although it may by now, after half a day of extended and aimless ramblings, be impossible for the wanderer to determine in which direction a start should be made.

Even so, he may strike for low, and if his camp is not situated on it, he will have at least an idea where it should lay. The inability of the average man to retain a record of his itinerary to the rear, whilst he selects his route ahead, is responsible for more loss of life in the woods than any other factor, excepting perhaps fire.

This is so well recognized that one of the provinces has passed a law prohibiting the killing of porcupines, except in cases of emergency, they being the only animal that can be killed by a starving man without weapons.

A man may start on a bright, sunshiny day with all confidence, to make his way to some as yet undiscovered lake or river, or to look over a section of country, and find his trip going very satisfactorily. Inviting glades, offering good travelling open up in every direction, gulleys lead on miraculously from one to another, in just the right direction, and an occasional glance at the sun, or the lay of the land, affords all the indication of route necessary. The course is smooth, the wheels are greased, and he slides merrily on his way.

Having lured him in so far with fair promise, the fickle landscape now decides to play one from the bottom of the deck. The going becomes thicker during the next half-hour, and the ground inclined to be swampy, with quite a few mosquitoes present. The interest aroused by these features induces a slight relaxing of concentration, and during such period of pre-occupation the sun guilefully seizes on this as the psychological moment, and disappears. The travelling becomes worse, much worse! Dwarf tamarack, spruce and cedar have now superseded the more generous and tractable hardwoods, and standing close-packed, with interlaced limbs, they form an entanglement from the feet up, through which a man is hard put to force a passage.

Overhead is an impenetrable mass of twisted branches, through which the perspiring man vainly endeavors to get a glimpse of the sun, only to discover that it is gone. From the high ground further back, he has seen a ridge of hardwood across the swamp, perhaps a mile away or more, where the footing will be good, so he presses on for this.

He fights his way through the tangled growth for hours, it seems, and appears to be no nearer the slope of deciduous timber than he ever was. He now, wisely, decides to eat and think it over; so making a fire, and infusing his tea with swamp water, he builds himself a meal.

After this, and a smoke, being now refreshed, he goes forward with renewed energy and zeal. This, in time, wears off; there is no improvement in the going, he seems to arrive nowhere, and would be much cheered by the sight of a familiar landmark.

This, however, is not forthcoming; but presently he smells smoke. Wondering who but one in his own predicament would make a fire in such a jungle, he trails up the smoke, finding the odd footprint to encourage him; he will at least see a man who may know the district.

CONTINUED NEXT WEEK

Musical Festival Great Success

On Saturday last, pupils from rural schools surrounding Tofield held a preliminary musical festival the entries were numerous and interestingly good. Two halls were occupied the Variety Theatre and the curling rink waiting room. Adjudicators were Mrs. J. C. Biggs, elocution and Mr. J. Norman Eaglesham, singing. Mrs. J. C. Biggs is a member of the Edmonton Little Theatre executive and a graduate of Emerson College of Elocution, Boston. Mr. J. Norman Eaglesham, also of Edmonton is well and favorably known among the musical fraternity of that city.

The awards in the different classes were as follows:—

Grade 7, girls' recitation, 1, Betty Hartschen, Farmington; 2, Fern Walker, Lindbrook; 3, Julia Hanson, Ingram.

Grade 8, girls' recitation, 1, Irene Anderson, Lindbrook; 2, Edith Yoder, Anderson, 3, Hazel Moore, Ingram.

Grade 6, boys' recitation, Gordon Ray, Ingram.

Grade 3, girls' recitation, Vera Brenneman, Solberg; 2, Margaret Brady, Lindbrook; 3, Lila Soma Farmington.

Grade 1, boys' recitation, Wayne Reil, Solberg; 2, Stanley Anderson, Lindbrook; 3, Donald Bailey, Lindbrook.

Grade 2, boys' recitation, Joseph Voeghtlin, Anderson; 2, Harvey Stirrett, Farmington.

Grade 5, girls' recitation, 1, Elda Solberg, Solberg; 2, Olga Maksymic, Westlake; 3, Elsie Christenson, Farmington.

Grade 4, boys' recitation, 1, Howard McMullen, Lindbrook; 2, Peter Warkentin, McKenzie; 3, Kenneth Simonson, Farmington.

Grade 1, girls' recitation, Doris Hendrickson, Anderson; 2, Agnes McHeffey, Lindbrook; 3, Evelyn Sutton, Anderson.

Grade 2, girls' recitation, 1, Florence Roth, Anderson; 2, Lila Bailey Mackenzie; 3, Marie Stanley, Farmington.

Grade 5, boys' recitation, 1, Gordon Hendrickson, Anderson; 2, John Lerbekmo, Anderson; 3, Clifford Anderson, Anderson.

Grade 4, girls' recitation, 1, Beulah Hillerud, Solberg; 2, Corrine Haukedaul, Anderson, 3, Wyonne Rude, Solberg.

Grade 8, boys' recitation, Frank Johnsrud, Ingram.

Grade 3, boys' recitation 1, Henry Peters, Mackenzie.

Dramatization, 1, Solberg.

Grade 7, boys' recitation, 1, Clifford McMullen, Lindbrook; 2, Rae Anderson, McKenzie, 3, Harold Curry, Solberg.

Grade 6, girls' recitation, 1, Sarah Stirret, Farmington; 2, Merna McMullen, 2, Marie McMullen, Lindbrook; 3, Justine Goertzen, McKenzie.

Two room chorus, 1, Anderson; 2, McKenzie.

Rural School Chorus, 1, Solberg.

Grade 9 and 10 girls' solo, 1, Muriel Ness, Anderson; 2, Olive Johanson, Anderson.

Grade 7, girls' solo, 1, Elizabeth Peters, McKenzie.

Grade 8, girls' solo, 1, Edith Yoder, Anderson.

Action song, 1, Anderson.

Grade 8, boys' solo, 1, Malcolm Finseth, Anderson.

Rural School duet, 1, Elizabeth Peters and Justine Goertzen, McKenzie.

Grade 2, boys' solo, 1, Arley Anderson, McKenzie.

Grade 2, girls' solo, 1, Lila Bailey McKenzie.

Grade 1, girls' solo, 1, Wilma Heidebrecht, McKenzie; 2, Lorraine Lyslo, Solberg.

Grade 4, girls' solo, 1, Beulah Hillerud, 2, Wyonne Rude, Solberg; 3, Corrine Haukedahl, Anderson.

Grade 1, boys' solo, 1, Wayne Reil 2, Jack Martens, 3, Charles Rude.

Grade 3, boys' solo, Eldon Moen, Anderson.

Grade 5 and 6 boys' solo, 1, Abraham Martens, McKenzie; 2, Alfred Helgeland, 2, Matt Eaglesham, 3, Walter Maksymic.

Grade 5, girls' solo, 1, Muriel Finseth, Anderson; 2, Olga Maksymic, Anderson; 3, Elda Solberg.

Grade 6, girls' solo, 1, Ruth Stanley; Farmington; 2, Gladys Johanson.

High school duet 1, Lorraine Moen and Muriel Ness, Anderson.

Local & Personal

Mr. Stanley Grover of Edmonton, has taken over the McLaughlin Garage and is prepared to attend to the ills of all and sundry automobiles. Mr. Grover is fully experienced having worked at the trade for the past ten years.

Mr. Horace McHeffey is planning a show to be held here on Friday and Saturday, June 7th and 8th. An entirely new programme will be presented.

The Misses L. Ross, P. Burnett, and A. Lindsay attended the basketball game in Edmonton on Saturday.

Among those who visited the city last week are: Mrs. S. Yakabuski, Mrs. Coutts, Miss M. Malcolm, Miss J. Munroe, Mrs. Calvert, Mrs. Norman Scott, Mrs. Emery, Mrs. Chapman, Mrs. Hammond, Mrs. Brace, Jim Brace and Arnold Swift.

Mrs. Cory of Edmonton spent a few days visiting Mrs. Hugh Law.

Miss Frances Looney spent the week end in Holden.

Mr. and Mrs. H. Paulo of Edmonton visited the Bardon home on Sunday.

Mrs. Tofield of Edgerton is visiting relatives and friends in town.

Mrs. Ellis, Miss Cherry and Joan and Raymond Ellis spent Sunday at the Malcolm home.

Mrs. Bob Bradely of High River is visiting at the Bethel home.

Mr. Hutson, is the new agent for the Searle Grain elevator.

Quite a serious accident occurred on the highway last week, when a truck ran into the horse and buggy driven by the Harrison children to school. The horse was quite seriously injured but none of the children were hurt.

C. C. F. Study Group now formed in Tofield. Meeting place at the Municipal Hall on May 27th at 8 p.m. New members invited to attend.

Mr. and Mrs. Provost were visitors at the Manse on Sunday 12th.

Mr. Robert McClaren of St. Stephen's College arrived in Tofield on Thursday to take over the United Church work at Round Hill, Dodds, and Lake De May.

Mother's Day Services at Lakeshore, Ketchamoot and Tofield were well attended. The Tofield Church was filled. The male chorus sang, "All Hail the Power" and Mr. Broughton sang, and Mrs. Pincott recited "Home." The Rev. D. K. Allan spoke on "Mother Love." The service was greatly enjoyed and appreciated by all.

The Rev. D. K. Allan leaves on Monday to attend the Annual Conference of the United Church being held in Calgary next week.

The covered wagon is not altogether obsolete as on Wednesday morning Mr. W. Hill, accompanied by his daughter Mary, and other help, left Tofield for Drayton Valley, with horses and wagons, one of which was covered. Mrs. Hill will remain at Tofield for a short time, later joining her husband at their homestead in Drayton Valley. Mr. and Mrs. Hill have been residents of the Tofield district for quite a few years and their many friends heartily wish them success in their new venture.

On Monday evening last a Mr. Jamieson spoke on the subject of social credit at Tofield. The chair was taken by Mr. Geo. Edwards. There was a fair attendance.

Festival Concert Much Enjoyed

SPLENDID ARRAY OF TALENT PLEASES LARGE AUDIENCE

On Saturday last a concert embodying splendid talent and a well filled programme was held at the Variety Theatre.

The various numbers were chosen from the musical festival held throughout the day, and were thoroughly enjoyed by the very large audience.

The program consisted of solos, duets, recitations and plays and was too long to permit individual mention. A list of the various numbers follows:

Chorus, Anderson, Recitation, Wayne Reil, Solberg, Recitation, Doris Hendrickson, Anderson, Solo, Ruth Stanley, Farmington, Dramatization, "Three Little Kittens," Solberg, Recitation Howard McMullen, Lindbrook; Solo, Wilma Heidebrecht, McKenzie, Recitation Joseph Voeghtlin, Anderson, Recitation, Wayne Reil, Solberg, Recitation Florence Roth, Anderson, Recitation, Henry Peters, McKenzie, Action Song, "Dolly's Washing Day," Anderson; Recitation Elda Solberg Solberg, Recitation Vera Brenneman, Solberg; Solo Arley Anderson, McKenzie; Solo, Eldon Moen, Anderson, Recitation, Beulah Hillerud Solberg, Solo Muriel Finseth Anderson, Solo, Lila Bailey, McKenzie, Rural School Chorus, "Lullaby," Solberg, Solo, Beulah Hillerud Solberg, Recitation, Gordon Hendrickson, Anderson, Recitation, Gordon Ray, Ingram, Solo, Edith Yoder Anderson, High School Duet, Lorraine Moen and Muriel Ness Anderson, Recitation, Irene Anderson, Lindbrook, Recitation, Sarah Stirrett, Farmington, Solo, Abraham Martens, McKenzie, Solo, Elizabeth Peters, McKenzie, Play, "Good Friends," Lindbrook, Recitation, Betty Hartschen, Farmington; Solo, Malcolm Finseth, Anderson, Rural School Duet, Elizabeth Peters and Justine Goertzen, McKenzie, Recitation, Frank Johnsrud, Ingram, Solo, Muriel Ness, Anderson, Recitation, Clifford McMullen, Lindbrook.

Interesting Debate on Social Credit

On Friday evening last at the Variety Theatre, before quite a number of interested people, the Ryley and Tofield High School met in a debate on Social Credit. The question at issue was: Resolved "That the Alberta System of Social Credit should be introduced into Alberta." The Ryley debaters, Miss Brown and Mr. Berdinson presented the affirmative side of the question and the Tofield debaters, the Misses L. Wilson and I. Robinson presented the negative side.

All four speakers made good addresses for their respective sides and showed an extraordinary knowledge of a rather complex problem. Miss Wilson for Tofield was particularly outstanding, as in addition to having much sound argument she injected into her address much dramatic eloquence.

The judges, Mr. Kraus of Ryley, Mr. McLeagh of Lindbrook and Mr. [illegible] (continued on back page)

CUSTOMERS

have to . . .

BE BOUGHT

Worth-while things cost money This means that retailers must part with money in order to get customers. Customers require to be bought just as one's merchandise has to be bought

Customers are not likely to be obtained apart from seeking them. They must be pursued, and they must be asked to do business with the retailer who wants their custom

You would think that all this is as plain as is the nose on one's face. But stop! Answer this question: What have you, a retailer, done in the past month—to go no further back— to seek and get new customers? How many non-customers of your store have received invitations from you to do business with you? How many persons have received communications from you, requesting their custom? How many persons have you informed, in their homes, about your business, your merchandise, your policies? How much money have you spent this past month on the purchase of customers?

Just waiting for customers is the acme of folly. Just relying on the conviction that the public ought to do business with you is folly. Just soothing yourself with the reflections that you are honest, that you give the public a square deal, that your store has a good location, that you price merchandise fairly—these are passive things

It is action which counts in getting the things which we want An infant cries. This is its way of making its mother or nurse know it wants something. Is it fair to a business to be doing nothing in a planned way to get new customers for it?

Advertising by all businesses will make and keep our town a good shopping centre.

THE MERCURY

HEALTH
by
A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

MENTAL HEALTH

There is no more difficult task than that of guiding children along the road which should lead them to healthy, happy adult life. It is an astonishing fact that so few of those who, as parents or teachers, have this grave responsibility attempt to prepare themselves by gaining an understanding of child behaviour.

When the child starts to school, he may have a hard time to adjust himself to what is, for him, a new life He finds a new person, the teacher in authority. His future attitude, as an older child and as an adult, towards authority will be largely influenced by the way in which his teachers exercise authority.

The child who finds himself punished unfairly will naturally come to think of authority as being unfair; he may begin to question the desirability of all authority. Such an attitude may lead him to become defiant when, in his desire to attain the happiness which we all want, he will seek it through misbehaviour, which gives a satisfactory outlet to his dislike of authority

At all ages, we like attention. Every child should receive a certain amount of attention but when he demands the centre of the stage at all times, there is something wrong. The child who is spoiled at home may be a "show-off" in school; this may be true too of the child who receives no attention at home, for he tries to make up, in school, for what he has been deprived of at home.

Just as a certain amount of attention is desirable, so also should each one be allowed to gain satisfaction through the sense of achievement. The child who is repeatedly set tasks which are beyond his mental capacity becomes discouraged. To him, failure becomes a habit. Children vary greatly in their mental capacities, and their capacities should be the guide to what is expected of them, not the ambition of their parents.

The child who fights back with annoying aggressive behaviour has a much better chance to come through successfully than has the pleasant, timid child, who has, in reality, given up the fight and finds it easier to accept defeat than to struggle From this point, he may gradually withdraw into himself until he shuts out the world he has found so difficult and lives in a dream world of his own making; this type of child is a serious mental problem

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

BLUE MOUNTAIN COFFEE EXPENSIVE

A very special variety of coffee, known as "Blue Mountain," is grown on the island of Jamaica, British West Indies. Limited in quantity, it is shipped exclusively to London, England, for blending and growers receive nearly four times the price of the ordinary coffee bean. Coffee beans form part of the cargoes of "Lady" liners and freighters of the Canadian National Steamships in the Canada-British West Indies service, there being a considerable trade in coffee from Jamaica to Canada

Hatching eggs shipped recently from Canada to Honolulu have proven so successful that further orders have been received from British Columbia dealers. According to latest advices, there is every indication that a substantial trade will be developed

Lambs on Vancouver island, British Columbia, owing to the mild climate, are allowed to run out every day during the winter. This year they were gamboling on green grass throughout the month of February.

GREEN DUCKS ARE MONEY MAKERS

Growing green ducks is a sideline of the farm which returns handsome profits for the money invested. Experimental work at the Central Experimental Farm, Ottawa, shows that ducklings of the Pekin breed averaged six pounds each in ten weeks, and were reared to that stage on an average of three and one-half pounds of feed to one pound of duckling. Green ducklings find a ready sale at prices ranging from 20 cents a pound upward, and net a handsome profit for the grower. Ducklings of the Pekin breed made at least one-half a pound heavier gains than those of other breeds.

The Pekin is the most desirable breed when ducklings are wanted to mature early as green ducks. They are good feeders and rapid growers, and respond to special methods of feeding.

Frequent feeding promotes rapid growth. Young ducklings should be fed six times daily from the start until they are about 18 to 20 days old, and five times daily during the remainder of the growing and fattening period until they are ready for market.

The feed used for growing ducklings at the Experimental Farm, Ottawa, is equal parts of bran, shorts and cornmeal with about ten per cent beefmeal added. A little charcoal (about one per cent) is also recommended This mash should be moistened with water, but not made sticky or sloppy. Add only sufficient water to make the meal stick together. Sprinkle coarse sand over the mash before feeding. The sand serves as grit and aids in the process of digestion Feed only what the ducklings will eat up clean at each feeding.

The feeding of green feed after the fourth or fifth day will help to reduce the cost of feed and assist in keeping the ducklings healthy during the forcing period. Freshly cut clover or alfalfa which has been chopped up fine makes an excellent mash at first, and gradually increase the amount until about one week later the green feed will make up twenty per cent of the mash.

When the ducklings are about six weeks old the green feed should be gradually eliminated and at the commencement of the seventh week the mash should be changed to one possessing more fattening properties. The fattening mash used at Ottawa is 60 pounds cornmeal, 25 pounds shorts and 15 pounds beefmeal with a sprinkling of coarse sand.

By the time the ducklings are ten weeks old they should be in excellent flesh, and have developed their first coat of body feathers. This is the right time to market them. If they are kept longer they will change their feathers, and the rate of growth will decrease, thus increasing cost and reducing profit.

TEWARD PAYS $1250 FOR STALLION

One of the highest prices paid for a stallion in a number of years in Alberta was the $1250 that William Teward paid the Dominion department of Agriculture for the 6-year-old grey stallion Maple Leaf Kabin

This Percheron stood second at the Chicago International last fall. He is by Glacis IV and traces to Carnot blood on the mare's side.

He weighs over a ton, is an excellent goer, with lots of middle. The horse stock of the Lacombe district should benefit by the presence of Mr. Teward's purchase of this high priced and high quality sire —Market Examiner.

CAN BEAVERS CLIMB TREES?

Belleville, Ont , May 13—The report of a Canadian National Telegraph dispatcher on a line break near here has started an argument among naturalists. It told how two lads chased a beaver up a tree and had to cut the tree down, snapping the wire in the fall. The dispatcher confirmed his report in spite of contentions beavers cannot climb trees and even if they can, the boys could have climbed after the animal.

TWENTY-FIVE WINTERS IN THE ORCHARD

(Experimental Farms Note)

Fruit has been grown at the Dominion Experimental Farm, Indian Head, since the first plantation of hardy Siberian crabs was set out in 1888. Incidentally many of these trees are still growing and fruiting abundantly. During this time many adversities have been experienced. Trees of tender untried varieties from eastern and southern nurseries killed out readily. The winter of 1917-18 was a particularly trying one when the all time low of 50 degrees below zero was recorded The effect was complete mortality among the supposedly hardy standard apple trees. The seventeen varieties of first generation Saunders hybrid crab apples planted from 1908 onward, however, generally came through in good condition to maintain interest and give encouragement to continue the apparently hazardous venture. The varieties that seemed to withstand best the extremely cold temperatures were Eve, Manitou, Silvia, Alberta, Pioneer, Prince Jewel, Tony and Robin, in order. Many of these trees are still growing and fruiting heavily. The highest producing trees of each variety during the last two years were as follows: Tony 575 pounds, Alberta 420 pounds, Jewel 345 pounds, Prince 330 pounds, Silvia 245 pounds, Eve 241 pounds, Pioneer 227 pounds and Robin 220 pounds These varieties are all of fair to good quality and can be grown, with reasonable protection, almost anywhere on the prairies with some degree of success.

In an effort to obtain a hardy large apple, some four thousand seedlings of hardy Russian varieties were set out during 1912 and 1913 Many of these have been killed out and it would be reasonable to suppose that only the hardiest have survived. During the last year or two the fruits of many of these varieties have been found to be of sufficiently good quality to warrant propagating them for further trial. It is quite within the bounds of reason to believe that within twenty-five years suitable varieties will be growing and doing well on the Great Plains.

KING OF WHEAT KINGS

Seager Wheeler, of Rosthern, Sask. is famous as a champion wheat grower. He has the distinction of having been crowned "world wheat king" five times: 1911, 1914, 1915, 1916 and 1918 In recognition of his agricultural achievements for the Dominion, Dr. Wheeler is being given a trip to England by a number of his friends and the Canadian Pacific Railway.

Dr Wheeler came to Canada when a boy of 16 years, from the Isle of Wight, and although he has suffered disappointments and failures, his patience and pluck have brought him many successes Besides having produced by selection two new varieties of wheat—Red Bobs and Kitchener—he also won awards for oats barley, grasses, fodder crops and potatoes

BEES BY TON-LOT COME TO ALBERTA

C F Morgan passed through Calgary this week with 1230 pounds of bees which he had trucked up from California and was taking on to Brooks, where he is in honey-production in a big way. He said an express car loaded with bees was also being shipped from Davis, California, which was due to arrive in Taber this week.

Mr. Morgan said he believed all his bees were alive and that although the nights were chilly the bees created natural heat sufficient to prevent any of them perishing.

He has been during the past year wintering bees in a cellar and hopes to eventually be able to winter the bees over and when this can be done the bee keepers will save thousands of dollars.

Alberta has been increasing her honey output and the Lethbridge district, Brooks and Irma districts are among the leaders in this activity so far.—Market Examiner.

THE MUSIC FESTIVAL—

PRAISE AND commendation are due to the officials, teachers and pupils for the excellent musical festival held at Tofield on Saturday last. In spite of unfavorable and disagreeable weather, there was more "life" to Tofield main street on Saturday last than on any one day for many weeks past. A very large number of entries were received from the various rural schools surrounding Tofield and all the numbers were of a high order.

The annual musical festival innovation, an innovation of fairly recent origin in Alberta, has grown by leaps and bounds and is now one of the most important as well as the most enjoyable school events of the year. Commenced to create and foster a love of music and song, it has more than fully justified its existence. At first those competing in the annual musical festival in this inspectorate all competed at Camrose, and with few exceptions consisted of entries from village and town schools. It proved to be so popular that more and more entries from rural schools were made each year, the number becoming so great as to more than tax the ability of the Camrose organization to handle so many entries in one day. Consequently a preliminary musical festival is held at different centres, Killam, Tofield, Camrose, those being awarded first, second and third places in the different numbers going on to Camrose. It was a preliminary festival which was held on Saturday last. As a fitting climax to a festival day, a public concert was held in the evening, a crowded house greeting the many youthful artistes.

The event was particularly gratifying, as all too few assemblies of rural residents at Tofield take place. It was pleasing to note that purely on the initiative of Mr. L. W. Smith, president of the Board of Trade, those bringing their lunch were served hot cocoa during the noon recess, a number of the high school girls acting as hostesses.

PEACE POLICY SHOULD CONTROL ARMAMENTS—

There are two main causes of unrest in the world today. One is the problem of finding the right place in Europe and the world for Germany......The other problem of the world is that some solution has to be found for the problem of Japan in the Far East......

We have got to solve these political problems if we can, and make Germany a member of the European community, on the one hand, by respecting her rights and giving her her right position, and, on the other hand, by making effective a collective system against aggression in the League of Nations. If that can be done there would be no serious difficulty about keeping the peace of Europe for another twenty years and making the League of Nations effective. And there is no other way. Similarly, if we can solve the problem in the Far East, which is a political question, we shall get a renewal of the Washington treaties. Then, if Europe is settled and the Far East is settled, I think there is a very good chance of the United States itself coming into the League. The problems which confront us are political problems. Whether we have armaments up or down does not really go to the root of the problem......

I was assured by the leader of Germany that Germany was prepared to abolish all bombers altogether if everybody else did so. That is a very formidable fact......

I think a distinction must be drawn between the defensive aspects of an Air Pact and the more serious and formidable aspect which will arise if bombers are not abolished, and we come to the stage of mutual retaliatory bombing of women and children. If we get to the position that nations feel that they may at any time be collectively bombed, then your last state is going to be worse than the first. I think there must be two stages and a distinction drawn between the use of defensive fighters and collective retaliatory bombing in the event of bombers not being abolished.—Lord Lothian, in the British House of Lords.

DO WE NEED LEADERSHIP?

One of the cleverest sophistries foisted upon society today is charging everything to the lack of "leadership" and declaring that what the world needs is a "leader."

What the world needs is to be rid of "leaders "

The future of civilization depends upon fraternization—the recognition by each unit in society that each and every other human being has an equal right "to life, liberty and the pursuit of happiness," without enquiry as to the character of tools either uses and without the inhibitions of artificial county, state or national lines.

Wipe out the leadership that sets carpenter against accountant and Protestant against Catholic and Californian against Kansan and let the human sympathies freed of cultivated hatreds dictate the activities of each.—Sacramento (Calif.) Union Labor Bulletin.

THE SUPPLY OF MONEY

A few decades ago when money meant either gold or silver coins, or paper currency that was instantly redeemable at any bank in gold or silver, than an increase in the supply of money had an almost immediate effect in increasing the prices of commodities, for new supplies of money then were almost at once placed into circulation.

Their have been periods in the world's history in peace times when the general level of prices rose substantially. These periods usually coincided with times of greatly increased discovery and production of gold throughout the world. The 1840's for instance, brought the gold discoveries in California and Australia, and all commodity prices rose steadily from 1849 to 1873. Then from 1896 again prices rose steadily to 1914, due to the greatly increased production of gold from the mines of South Africa and the Klondike.

The reason why increased gold production induced prices to rise almost immediately during these periods was due to the simple fact that the greater part of the new gold was at once minted into coined money, and so passed quickly into circulation in the form of wages to the miners and to those supplying mines and miners with goods and commodities.

The production of gold today is rapidly increasing. Unfortunately it does not now have the same immediate effect upon commodity prices that it used to have, for the reason that governments no longer permit gold to pass at once freely into circulation in the form of minted money or even in the form of paper money that is redeemable in gold. Much of the new gold won from the earth is now quickly buried again in the earth in deep vaults. From this it would appear that increases in the quantity of gold can only be effective in raising prices when the people are actually permitted freely to make use of it.

Eventually undoubtedly the pressure of supplies in vaults will become burdensome and so increase gold production will, in spite of all hindrances, tend, sooner or later to raise all prices. —(Searle Grain Co., Ltd.)

BRITAIN'S BREAD

For hundreds of years the bread of Britain has been the most important foodstuff of that country. The four pound loaf during all this time has been the standard. Prices of the four pound loaf for some 300 years past have recently become available. They are as follows:

The average price of the four pound loaf from the year 1600 to 1699 was 5.67 pence. During this hundred years, the lowest price registered was 3.20 pence in the year 1687, which date coincided with the depth of the depression occurring after the English, Civil, French and Dutch Wars, and the highest price was 10 5 pence in the year 1648, the latter year being the peak of the Great World War of that time, viz , the Thirty Years' War in Germany.

For the next hundred years, from 1700 to 1799 the average price of the four pound loaf was 5 92 pence, the lowest price being 3 70 pence in the year 1706, and the highest price was 12 pence in 1799 during the first period of the Napoleonic Wars.

For the next hundred years from 1800 to 1899, the average price was 8.73 pence for the four pound loaf, the lowest price being 5.1 pence in 1895, when somewhat of a depression with low prices occurred throughout almost the whole world, and the highest price for the hundred years being registered in 1812, 16 pence for the four pound loaf, coinciding with the peak of the great Napoleonic Wars

From 1900 to 1934 the average price for the four pound loaf has been 7.68 pence, the lowest price being 5 pence, occurring in 1901, a period of unemployment and cheap prices for all goods and commodities and the highest price of 13 2 pence occurring in 1921, which was the peak of the World War boom

To sum up, for the 334 years under review, the lowest price registered for the British four pound loaf was 3 20 pence in the year 1687 and the highest price was 16 pence in the year 1812

The average price for the 334 years has been 7.00 pence for the four pound loaf, and it is interesting to note that the price at this moment in Great Britain is 7 50 pence, or practically the same as the average for three centuries It is quite clear from the records also that great variations in the price of bread have occurred only during the course, and as the result, of great wars —(Searle Grain Co , Ltd)

In Canada, according to the latest computation, the consumption of eggs per person every year is placed at 300; in the United States, 200; and in Great Britain, 150

HOME CANNING EQUIPMENT AND MATERIAL

Safe canning of fruits and vegetables requires care in every step of the process Jars, lids and all utensils must be absolutely clean

It is not necessary to have a special canning outfit for home use, although one may be purchased if it is desired The ordinary wash boiler with a wire or slatted rack may be used, or any kettle with a tight fitting cover The rack or false bottom must be at least three quarters of an inch from the bottom of the sterilizer and should be slatted to allow the water to circulate around the jars For processing, fill the sterilizer with warm water at least two inches above the tops of the jars. The length of time required varies with the food being canned. This type of canner is used for general canning experiments conducted by the Division of Horticulture, Central Experimental Farm, Ottawa.

The steam pressure cooker is especially recommended for canning vegetables and meats as it gives a higher temperature than is possible in a hot water bath.

Oven canning is recommended for fruits and tomatoes A well insulated heat controlled oven is best for this method of canning. The temperature should be kept at 250 degrees F. to 275 degrees F with top heat. The filled jars are placed in a shallow pan of water and the time allowed should be about one-third more than in the hot water bath.

A jar for use in canning should have a smooth rim and good fitting cover to furnish a perfect seal Test each jar before using it Half fill with water, adjust the rubber and cover, seal and invert to test for leak. The spring tops should snap into place Ring tops should not be used if they become cracked or corroded.

Jar rubbers are a very important part of canning equipment. Buy fresh rubbers each season. Never use old ones. Twelve rubber rings are cheaper than a jar of fruit or vegetables.

In choosing foods to can, remember that there is no magic in a jar which will improve the contents stored in it. Food comes out pretty much as it goes in Fine luscious fruit, perfect vegetables, and tender plump fowls retain their quality after canning.

AMPLIFIED SOUND USED TO PREVENT JAILBREAK EFFORT

Oklahoma City, May 13—If Ted Cole saws out of the county jail now, the escape itself will be broadcast.

Young Cole, held on federal charges, has made himself more or less of a nuisance through his attempts to escape distasteful confinement He has been transferred to a new cell, especially done over for his benefit, with an outside cage of tool-proof metal and a loud speaker hooked up so the sound of his heart movement will be amplified throughout the jail.

"If Cole turns over," said the man who installed the loud speaker, "it will make him sound like a steel barrel falling down-stairs."

ENTHUSIASM NEED OF YOUTH IS VIEW

Enthusiasm well tempered by reason and judgement were advocated for university graduates by Dr R. C. Wallace, president of the University of Alberta, in his baccalaureate address given Sunday evening in Convocation hall.

Dr Wallace pointed out that history and even present events illustrate how easily people are carried away by emotions in crises where clear and honest thinking is most needed.

On the other hand, he pointed out, enthusiasms and emotions have a real part to play in human lives, and youth especially must not be without them Adam Smith observed that science was an antidote to enthusiasm and superstition, Dr Wallace said, adding that he agreed with the so far as superstition was concerned but not the enthusiasm part.

"If science kills enthusiasm we are lost," he declared.

Much time is spent in rationalizing towards decisions already made intuitively, but people must often go against emotional prejudices and bias when reason dictates the way, he said, stating that it was the university's job to train young people to cultivate this faculty of balancing impulse and reflection.

Referring to the youth movements in other parts of the world, Dr Wallace said that Anglo-Saxon youth is in need of some of the enthusiasm found abroad, though it need not take the same direction Purpose is needed

Anglo-Saxon youth has been going through an acute period in which the whole atmosphere has been possessed of the economic idea over-emphasized because of dire necessity, he said Many graduate students will see new ways out and become dominated with enthusiasm for them.

"Somehow a better way has to be found in order that the personality of the individual may be protected and revered. We will have apostles of a new order that will perhaps make things better.

MILK OF HUMAN KINDNESS FLOWS

Following a fire which destroyed all their possessions, a young couple homesteading at Newbrook, Alberta, found themselves utterly destitute Kindly neighbors provided them with many necessities but no stove could be found for the couple

An appeal appearing in Wednesday's issue of the Bulletin brought a prompt response from Sam McCoppen, proprietor of the Varsity Tuck Shop who phoned to the Bulletin office to say that he had a stove Through the services of MacNeill's Van and Storage Company the stove was crated and by special arrangement with the Northern Alberta Railway, the stove was shipped to Newbrook Friday morning, arriving a few hours later By Friday evening the stove was in the possession of its new owners.

SEATTLE MEN TO ENTER "PUT-OUT-THE-CAT" DERBY

Seattle, May 13.—A "put-out-the-cat derby" was announced Sunday by Mayor Charles L Smith, racetrack philosopher, who said "a little foolishness is a delightful thing for the citizens

"The terrific popularity of our spavin derby, held at Woodlawn Park under the auspices of the park board, showed conclusively that the citizens of Seattle like their fun," said the mayor. "Thousands came out to see that horse race of broken-down nags."

"The parks belonged to the citizens and might as well be used for their entertainment. Therefore I am whole-heartedly behind the plans of the park board, to wit

" Fifty gentlemen, attired in night shirts, will spring from bed and run 70 yards each carrying a cat. The cat will be heaved out of the park

"The rolling-pin relay will follow Fifty comely housewives, clad in pajamas will race with rolling-pins, and, mind you, "I'll have no throwing rolling-pins at husbands

"Finally, we have the iceman's gallop The icemen will canter along carrying 50 pound blocks of ice, the winner to be rewarded by a kiss from an attractive housewife "

JAILED DUKE BROKE, SAYS HE'S A "MUG"

London, May 13—The portly Duke of Manchester as he gloomily paced a jail cell last night after being sentenced to nine months' imprisonment for fraud in pawning the jewels of his late mother, admitted ruefully "My trouble is I have been a mug—I am not quite sure I am glad I was born a Duke."

Found guilty in Old Baily of obtaining $7,250 under false pretenses, the 59-year-old Duke, ninth holder of the ancient peerage was taken immediately to jail while his attorneys attempted in vain to secure the nobleman's release on bail pending an appeal

"My trouble is I have been a mug," he said "My one regret in life is I was never allowed to go in business when I was a boy People think being a Duke must be great fun Well, it has its advantages but I am not quite sure I am glad I was born a Duke "

"I have been so broke I have only just been able to pay for my valet's meals," he said.

The peer denied any intent to defraud when he pawned the jewels belonging to the estate of his mother

MINISTER'S HAND SLIPS; PENITENT BAPTIZEE DROWNS

Houston, Texas, May 13 —Wesley Carter, 26 negro went to Buffalo Bayou Sunday to be baptized, but the minister's hand slipped and Carter drowned

Police said Carter was washed out of the grip of the Rev. Melvin Griffin of the Negro Spiritualist Temple and drawn into a whirlpool of the stream, which had risen and become swift after recent rains

PUBLIC NOTICE

Public notice is hereby given that there has been introduced in the council of the M.D. of Beaver Lake No. 486, a by-law of which the following is a synopsis.

The council of the Municipal District of Beaver Lake No. 486, may enter [illegible] with the Royal Alexandra Hospital, Edmonton, the University Hospital, Edmonton, the Edmonton General Hospital, the Misericordia Hospital, Edmonton, the Lamont Public Hospital, the General Hospital, Mundare, the General Hospital, Vegreville, the R.M.B. Hospital, Vegreville, and the Viking Municipal Hospital No. 10 whereby the Municipal District will pay each hospital at the rate of seventy-five cents per patient day from the funds of the Municipal District, thus relieving the Municipal District from any further [illegible] hospital [illegible] under the [illegible] Act.

And [illegible] this by-law [illegible] keep [illegible] the bal[illegible] the in[illegible] [illegible]

And further [illegible] of this by-law may be seen [illegible] of the following [illegible] Pos, Dodds, Tofield [illegible] Ryley and Vegreville [illegible] office and in [illegible]

And further that [illegible] thirty days [illegible] of this notice [illegible] of the proprietary [illegible] Municipal District [illegible] to submit [illegible] of the proprietary [illegible] Municipal District [illegible] proceed to pass the same.

(Signed) J. F. GOODWIN

Once a year the [illegible] of a certain district [illegible] are taken for an outing [illegible] a gentleman of the [illegible] where they can [illegible] content.

As one [illegible] in the water a friend [illegible] I say, Bill, ain't you [illegible]

"Yes" replied B[illegible] missed the tram last year."

DEBATE ON SOCIAL CREDIT

(Continued from front page)

Worton of Tofield working independently of each other awarded the decision to the negative by a small margin.

Mr. Broughton rendered two vocal solos and Mr. Thomas two pianoforte solos. Mr. J. W. Chapman was chairman.

Following the debate the Tofield Students' Union served a splendid lunch, Mr. and Mrs. L. W. Smith kindly giving their home for this purpose.

On behalf of the Tofield High School Student's Union I wish to thank through this medium, Mr. Chapman for acting as chairman and Mr. Krause of Ryley, Mr. Worton and Mr. McLeogh for acting as judges. Special thanks are also due Mr. Broughton for his beautifully rendered vocal solos and to Mr. Thomas for his delightful piano solos. Thanks are due the Students' Union Executive for supplying the refreshments, also to Mr. and Mrs. L. W. Smith for their thoughtful kindness in loaning their home for the social period which followed the debate. A cordial vote of thanks is extended to the public for their support.

Isabel M. E. Robinson,
(Sec. Treas.)

QUINTS SENT MAMA NICE BUNCH POSIES

Callander, Ont., May 17.—Mother's Day dawned here for Mrs. Oliva Dionne, bringing her the transient atmosphere of peace offered by this northern town on the Sabbath in spring and bringing her also a bouquet of flowers from the quintuplet daughters, of whom she said Saturday, "They don't know me—their mother."

From all parts of the world telegrams came today congratulating Mrs. Dionne and her husband, but serving little to lighten their dissatisfaction that Annette, Cecile, Emilie, Marie and Yvonne are wards of "His Majesty the King."

OLD WELL UNEARTHED IN NOVA SCOTIA

Halifax, N.S., May 13—An old well has been unearthed in Nova Scotia, at Digby, which was constructed around 1783 to supply water for the Loyalists who went there from New York in that year and also for ships. A line of wooden pipe ran from the well to the waterfront and the pipes have been found to be in an excellent state of preservation. They were made from trees hollowed out, the butts and tips dovetailing into each other.

It is believed the well was dug and the pipes laid under the orders of Admiral Digby after whom the town is named. This is one of the oldest settled portions of North America, Annapolis Royal being founded in 1605. On the opposite shore, known as the South Shore, are other Loyalist towns with many ancients relics of those by-gone days which intrigue many tourists who visit there during the summer season, according to the Tourist Department of the Canadian National Railways.

MEN AND COMPANY WORK TOGETHER

Montreal, Que., May 1.—More than ten thousand suggestions for the improvement of tools and equipment, working and housing conditions were put forward through the Maintenance of Way Co-operative plan of the Canadian National Railways during the five years of that plan's existence on the System, it was stated at the annual meeting of the System Co-operative Committee held here. Of these suggestions more than half of which were adopted, over 3,000 came from representatives of the employees. The greatest value in the co-operative union management plan, the meeting was told, lies in the better understanding between the company and its employees which this plan has brought about.

THIS LITTLE PIG DIDN'T GO TO MART

Here's one little pig that didn't go to market, at least not in the ordinary way.

It sounds like a Believe-It-Or-Not but when Anton Houtestol, Millet farmer, went to his pig pen on Sunday morning he found that one of his Yorkshire sows had presented him with a litter of sixteen piglets. Fifteen of the squealers were all that young porkers should be, but the sixteenth had eight legs, three ears two tails and a Siamese twin body in some respects. The body of the animal is single from the head to the shoulders, but from there to the hindquarters is double.

Mr. Houtestol, who lives about five miles from Millet, is bringing the pig to the University in order to have it preserved in alcohol.

FARMER PAYS $200 DEBT IN SOCIAL CREDIT

Some men are just naturally quick on the trigger, but according to officials who vouch for the story, a farmer who appeared before the debt adjusting commission is the prize sharpshooter of Alberta.

One of his most pressing creditors appeared with a bill of $200 against him. Both men had met the night previously at a social credit meeting and both had joined the new movement. The debtor sized up the situation when the creditor appeared.

"Judge," he said, "I'm willing to pay this debt in full if my creditor who believes in social credit, will take my first social credits for it until it is paid."

The creditor hesitated, but finally agreed to accept that settlement.

It's illegal, but they both appeared satisfied, so we fixed it up that way. But I don't know if it will stick," said the official reporting the occurrence.

Liberals Hold Meeting Here

On Tuesday night at the Variety Theatre, Mr. Chas. Gordon, Liberal nominee for this constituency for the provincial legislature and Mr. Jos. McCallum, liberal nominee for this constituency for the federal parliament, held a meeting at Tofield and delivered interesting addresses.

Mr. Joseph Rogers occupied the chair and after a few words of introduction, introduced the speakers. He said in a fairly long life of political observation, he had seen the rise and fall of different political groups, but the people always came back to the recognized political parties in the end.

Mr. Gordon dealt chiefly with monetary matters fully explaining the Liberals conception of what the central bank should be. He was firmly of the opinion that the bank should be publicly owned and government controlled and by means of a chart he noted the various functions of the bank. The new central bank as at present constituted is privately owned and controlled. He emphasized the importance of keeping the bank out of politics and suggested a board of nine men, four Liberals and four conservatives with a neutral chairman. Mr. Gordon's explanation of the workings of such a central bank was concise and with the aid of the chart which he had had prepared was easily followed. By following out his proposed plan, the control of finance would be invested in the hands of the government working in the interests of the Canadian people and taken out of the hands of financiers working for their own interests and the interests of shareholders.

At the close of his address questions were invited and the speaker satisfactorily answered several that were put to him. He also dealt with matters of a more provincial nature saying that it was vitally necessary that a sound business administration be placed in power at Edmonton.

Mr. McCallum gave a general address dealing with dominion affairs. He strongly attacked the principle of high tariffs, saying that the west had already paid a bonus to Eastern Canada for too long a period. He touched the question of social credit which he said would be very fine if it would work, and then gave his views as to why he believed it would not work.

Due to the very busy time the number present was not as large as it otherwise would have been, both speakers saying they were aware of this but wanted the people to know that they were in the field and promised the audience that at a later date they would be back again after the busy season was over.

This report of the meeting is necessarily brief as the notes made at the meeting have been lost or mislaid.

PICTURE SHOW FOR NEXT TUESDAY

The Purdy Road Shows will present at Tofield on Tuesday next the excellent and well known picture "Mississippi." This picture which has charm, story plot and superb music, stars Bing Crosby, W. C. Fields and Joan Bennett. There are many lovable characters in the picture, notably, Fightin' Cunnel Crosby, Swaggering Commodore Fields and dainty Miss Joan. This picture is of special merit but the usual prices of 15c, 20c and 30c prevail.

SOCIAL HOUR CLUB MEETS

The May meeting of the Social Hour Club was held at the home of Miss Evelyn Glenn of Lindbrook. The business part of the meeting was taken up with the election of officers for the year 1935. The new officers elected were: President, Miss Gertrude Ingram; Secretary, Miss Janet Brown; Vice President, Mrs. H. McGinitie. Retiring officers were, Mrs. E. Wilson, President; Mrs. Johnson, Secretary; and Mrs. P. McMullen, Press reporter. A letter was also read from Sunshine thanking the club for the splendid box of clothing that was sent. The balance of the afternoon was spent with a demonstration of a velvet and wool cushion by Mrs. E. Wilson. These demonstrations have been greatly enjoyed and appreciated.

Twelve members were present and one visitor, Miss Edith Davison, also one new member signed.

A delicious luncheon was served by the hostess closing a most enjoyable afternoon.

AMISK CREEK

Mr. and Mrs. Sorenson and daughter and Alfred Lyall and Hazel Grosland all from Poe, Alice and Robert Berg, Evelyn Hillerud and Hilmar Moen were visitors at the Erickson home last Sunday.

The Ladies' Aid held their last monthly meeting at Mrs. C. Erickson's home. There were eleven members present and many visitors. The next meeting will be at Mrs. H. Hillerud's home.

Mr. and Mrs. I. C. Olson and Gladys, Mr. and Mrs. E. A. Moen and family, Mr. and Mrs. P. O. Flaaten and E. Snortheim attended the Mother's program in the Bardo church on Mother's Day.

Mrs. I. M. Olson is spending a few days with her daughter in Edmonton.

The Young people of the district gave a splendid program in the church in honor of Mothers Day. mother was presented with a carnation.

Mr. and Mrs. E. A. Moen motored to Edmonton last Sunday to visit Mrs. E. Anderson who is a patient in the Royal Alex hospital. Mrs. Anderson has been very ill and we hope for a speedy recovery.

Mr. and Mrs. R. O. Berg motored to the city on Monday returning the same evening.

J. Brenneman is having his house remodelled. Milo Sand of Edmonton is the carpenter.

The warm weather is here at last and the farmers are in a hurry to get working in the fields. Most of the wheat is seeded and some of the oats so it isn't so late after all.

DOUKHOBOURS GOING TO PARAGUAY

Washington, May 20.—Weary of what they term religious persecution in Canada, members of the strange Russian sect of Doukhobours are ready to leave their Canadian homes for greener fields in the wilds of the Paraguayan Chaco.

Preparations for the future mass migration will be started today in New York, where Dr. Enrique Bordenave will go to discuss plans with a delegation of Doukhobours, who soon will sail for Paraguay to select a locality for the new colony.

Heartened by reports of the success of the Mennonite experiment in the Chaco, which has grown in 10 years to a community of 6,000, and guaranteed complete religious freedom in Paraguayan law, the Doukhobours have decided to begin in a strange and the life they started 35 years ago in Canada.

The Doukabours in Canada are a remnant of a sect expelled from Russia. Literally, the name means spirit wrestlers. Some went to western Canada and others to Cyprus. They have no stated places or ceremonies of worship, no holy days and no ordained ministry. They deny the divinity of Christ, and give mystical interpretation to the scriptures.

Frequent clashes with Canadian authorities have kept these people before the public in recent years. Their retaliation has taken the form of nude processions in public places, resulting in the arrest and imprisonment of some of their leaders.

Several months ago a representative of the Saskatchewan colony conferred with Harry A. Dee-English, Paraguan consul in Los Angeles, concerning the prospects for settling in the Chaco.

The matter was referred to the Paraguan government through the legation here and a decision reached to afford the future immigrants the advantages of a large area far from the war zone where Paraguay and Bolivia are struggling for mastery of the untamed wilderness in the west.

Dr. Bordenave said his government would welcome the peaceful invasion of the Doukabours, just as it did the Mennonites, as an aid in opening up the virgin country in the north. The sect always has been agricultural in character, and members are prohibited the use of meat. They see, he said, in the Chaco an opportunity to cultivate the fruits and vegetables which comprise their entire diet.

The land is not free in the Chaco, Dr. Bordenave said, but would be purchased from private interests at prices ranging from $2 to $3 an acre.

The Doukhobors arrived 35 years ago in Canada, owning nothing but the clothes they wore, and now they claim aggregate cash assets of more than $10,000,000. This money it is said would go with them to Paraguay.

LINDBROOK

Well, folks! Guess its summer at last! Now we suppose you'll all start kicking about flies, mosquitoes, and how hot it is and long for nice cool drinks etc, still 'twas always thus.

The grass has shot up wonderfully here since the last rain and looks pretty good to the livestock men here most of whom have been through a harrowing experience of late.

Mrs. F. Anderson was operated on last week and as the hospital says, is "progressing favorably," we hope soon to see her home again as merry as ever.

Messrs J. Brucegirdle, F. Evans, E. W. Hooper and P. Holland motored up to the city last week on business.

A farewell party was given by friends of Mr. and Mrs. T. Nolan of Lindbrook N. on the occasion of their leaving for Cranbrook B.C. Cards and dancing formed the entertainment, Messrs E. Tiedeman and Leon Lepine providing the music for the dancing. At the conclusion of the fun a present from all the neighbors to the family was presented. Best of luck! Mr. and Mrs. Nolan and family from all.

Mr. Robinson has been very ill lately, but is O.K. again now, we are glad to say, and 'er see that you keep so Mr. Robinson, this is a busy time to go and get ill and a late spring at that, but still we guess you can't help it and don't enjoy it either.

Mr. Robertson, the Weslake school teacher took a colony of bees up to his abode at Mr. Hedley Burton's last week. Now you are literally in the land that flows with milk and honey, Hedley, and its got some jolly good hills to flow down too, guess the bees will find their way around said hills O.K. eh?

Mr. and Mrs. Geo. Weslake have been doing some more building to their new home at Poplar Beach, Hastings Lake and have moved there to reside permanently we hear.

Congratulations to the pupils of Lindbrook School who won prizes in the recent festival competition. They made quite a good showing and reflect great credit on their teacher, Mr. Larry McLeogh. The detailed list was given in the last issue of the Mercury so won't repeat it.

We regret to announce the death of Mrs. Donald sr. who passed away at her home last Friday night. The sympathies of the district are extended to the family in their sad bereavement.

We also hear that the Hanson family lost their father lately, who passed away in Edmonton. The people of Lindbrook extend their sympathy to the Hanson family in their sad loss.

Mr. A. Whibley returned home last week from his trip to the Coast, whilst there he saw practically all the former Lindbrook people who have gone there.

And that's 30 for tonight folks.

CONSTITUENCY S.C. CANDIDATES CHOSEN

At the Social Credit convention held at Vegreville on Monday, Mr. Johnstone Ferguson of Tofield, Dr. McPherson of Ryley, Mr. Hay of Ryley and another gentleman of Vegreville were chosen as provisional Social Credit candidates.

BREAD REFORM CAMPAIGN OF UNITED KINGDOM

The Bread Reform aims to establish a fixed standard of nutriment in bread, and with this object in view has forwarded a memorial to the government signed by eminent members of the medical profession and scientific and social organizations. In the memorial it is urged that not only shall a standard be fixed for bread, but that meal flour and bread shall be protected from deterioration and adulteration. The memorial states that bread in the United Kingdom is an anonymous mixture, without any standard upon which public health authorities can take action. As bread is a staple food of the working classes, and almost the sole food of many poor children, it is urged that it is of the utmost importance that a standard be fixed for it, the same as a standard has been established for milk. The signatories to the memorial suggest that all wheaten bread sold in Great Britain, "unless stated to be 'fancy bread' or unless it is branded as an inferior bread, should be made of 'straight run' flour, retaining all the 'patents' which contain gluten of a superior quality, and the 'germ.' This bread should have a definite standard of nutriment and particulars of the amount of moisture it may contain."
—Northwestern Miller.

Local & Personal

On Thursday evening last, Mrs. Calvert entertained a few friends in honor of Mrs. Ralph Neale, who was visiting from the Coast. Bridge was played and Mrs. Hammond won first prize. A dainty lunch was served by the hostess.

Miss Margaret McCauley spent Sunday at her home here.

Mrs. Pinott and Mrs. Malcolm visited the city last week.

The Jolly Eight Bridge Club met at the home of Winnie Worton on Wednesday evening.

Dan Purcell spent the week end in the city.

Mrs. A. E. Calvert spent the week end visiting friends in the city.

Mr. H. Rogers was called to serve on the jury this week.

Max Rogers returned from Edmonton on Thursday after undergoing a slight operation on his throat.

Miss M. Neath of Edmonton is visiting at the Coatta home.

Mr. and Mrs. McLaughlin visited the city one day last week.

Miss Mary Husky of Edmonton is visiting at the Gravelle home here.

Mrs. Bardon left on Friday for Boston where she will spend several weeks visiting with relatives.

Miss Mary Moen spent a few days in town last week.

The semi finals of the bowling league was played on Wednesday night. The teams playing were Hannan and Ray Coatta, Hannan taking two games straight. The personnel of the teams are: Mrs. Calvert, Miss Marjory Stuart, Ed Hill, Mr. Jobb and Ray Coatta; Miss L. Ross, Miss Violet Moore, Graham Allan, Bert Calvert and Bud Hannan. The final games will be played on Monday evening between Hannan and Worton.

Mrs. Wm. Thomson spent a few days last week with her daughter Mrs. Russell Ferguson.

McGEER HUSTLED FROM CHURCH AS HOSTILE MOB HUNTS

Vancouver, May 20.—Mayor G. G. McGeer was both booed and applauded when he delivered the evening address at First United Church last night, and was escorted by detectives through a side door at the close in order to escape a hostile crowd. A delegation from the crowd refusing to believe that the mayor had left, searched the church.

The central committee of the relief camp strikers stated to Rev. Andrew Roddan, minister, that the demonstration was not organized by their men.

First booing took place when Mr. Roddan early in the service mentioned relief camps. When Mayor McGeer got up, about 200 people, mostly women booed him loudly and left the church.

Others waiting outside who, in the words of Mr. Roddan "were anxious to hear the Mayor's message," quickly took the vacant places while other hundreds were unable to get in the crowded building.

During the McGeer address a crowd numbering about 1,000 persons remained outside, some attempting to sing the "Red Flag" and others joining in various forms of demonstration. They were apparently waiting for the mayor to appear and police decided to escort him away. They did so using a side door.

TALKIES

The Purdy Road Shows present
Bing Crosby, W. C. Fields, Joan Bennett

Also Comedy and Cartoon
Admission: 15c., 20c., 30c.

ALBERTA CROP REPORT NO. 2 1935

Following one of the most backward seasons in Alberta's history, seeding of wheat is now general over the province, fully three weeks later than in 1934. In the extreme southern and south-western sections of the Province, wheat seeding is from 25 to 50 per cent completed, while in the east-central and south-central districts the wheat is practically all in. Throughout the north-central districts seeding has just become general and the percentage in the ground is at this date comparatively small. In the northern districts, with the advent of warmer weather, seeding has begun and will be well under way this week. Due to the lateness of the season, much of the seed is going in without the usual careful preparation.

Cold weather, with frequent falls of heavy wet snow, and rain interspersed with periods of high winds, characterized April and the first half of May, and it was not until the present week that seasonable spring weather arrived. Intermittent showers of rain are still interfering somewhat with farm operations.

Surface moisture conditions may fairly be stated to be the most satisfactory for some years, although reserve moisture in most of the province is not any too plentiful. Continuous precipitation during the spring months has, while delaying operations, created an optimistic feeling.

The extreme southern part of the province records precipitation above the average particularly in the Medicine Hat area. In the area to the

SPORTS DAY COMMITTEE TO MEET

On Tuesday evening May 28, at 8 p.m. at the Town Hall a meeting of the Sports Day Committee will be held. There are officers to be elected, committees to be formed date to be chosen and general business to be transacted. All interested are urged to attend.

TOFIELD SCHOOL DISTRICT NO 1939

Re Grade 12

Parents who are interested in having grade 12 taught in the Tofield High School in the term 1935—36 are asked to communicate with the undersigned not later than June 1st. The Secretary would like to have the names of all prospective pupils by that date. This is important, as the teaching of this grade hinges largely on the number of prospective students for the grade.

J. W. CHAPMAN,
Secretary-Treasurer

HORACE F. McHEFFEY'S SPRING DANCE REVIEW

Horace McHeffey, Tofield's stage artiste is back in town and will present on Friday and Saturday June 7th and 8th, at the Variety Theatre an entertainment replete with all the sprightliness of the season. Brand new numbers will be presented including a stair tap dance, roller skating dance, new songs, marionettes and a number of other new numbers. The event is under the auspices of the United Church Ladies' Aid and promises to be a popular one. More details next week.

CUSTOMERS

have to . . .

BE BOUGHT

Worth-while things cost money. This means that retailers must part with money in order to get customers. Customers require to be bought just as one's merchandise has to be bought.

Customers are not likely to be obtained apart from seeking them. They must be pursued, and they must be asked to do business with the retailer who wants their custom.

You would think that all this is as plain as is the nose on one's face. But stop! Answer this question: What have you, a retailer, done in the past month—to go no further back— to seek and get new customers? How many non-customers of your store have received invitations from you to do business with you? How many persons have received communications from you, requesting their custom? How many persons have you informed, in their homes, about your business, your merchandise, your policies? How much money have you spent this past month on the purchase of customers?

Just waiting for customers is the acme of folly. Just relying on the conviction that the public ought to do business with you is folly. Just soothing yourself with the reflections that you are honest, that you give the public a square deal, that your store has a good location, that you price merchandise fairly—these are passive things.

It is action which counts in getting the things which we want. An infant cries. This is its way of making its mother or nurse know it wants something. Is it fair to a business to be doing nothing in a planned way to get new customers for it?

Advertising by all businesses will make and keep our town a good shopping centre.

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

DIABETES

There are diabetics about to-day because they all live so much longer, thanks to the much improved methods of treatment which have been developed during the past few years.

When we eat carbohydrate foods—starches and sugars—they are changed, during the process of digestion, into one simple sugar which can be used by the body as a fuel to keep it warm or to provide the energy required to contract the muscles for future use. Any real excess of sugar is changed into fat. The person who eats a great deal of sweets grows fat.

The use of sugar by the body is controlled by the pancreas, an organ situated in the upper part of the abdomen. Control is exercised through the secretion of a substance named insulin. A lack of insulin leads to the disease called diabetes, in which the sugar, instead of being used, collects in the blood and passes out in the urine.

Heredity is a factor in diabetes. Unsuspected cases are found in the families of known cases. It is unwise for two diabetics to marry and have children, as their offspring are so liable to become diabetic. There is no reason why a diabetic should not marry a non-diabetic, provided there is no history of diabetes in the family of the latter.

Diabetes is most commonly found in those who, after middle life, become overweight. Diabetes is comparatively rare in adults who keep their weight close to or under the average for their sex, age and height.

The discovery of insulin changed the whole outlook for the diabetic. Before insulin, a strict diet, which in many cases had to be so limited as to almost starve the patient, was required. Many cases can be controlled by a modified diet, but for the more severe cases, insulin is one of the wonders of medical science.

In such cases, through the combined use of insulin, diet and exercise, the diabetic may live a comfortable, useful and happy existence. Overfeeding is always harmful to a diabetic, but he can enjoy a satisfying amount of food.

It is now possible for the diabetic, under regular medical supervision to regulate his diet, control the amount of insulin used, and to take sufficient exercise to enable him to live a normal life. For the simple reason that he must take care of himself, the diabetic will escape many of the pitfalls of disease which trap the unwary.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto will be answered personally by letter.

PROPHETIC WORDS

The editor of The Toronto Globe recently recalled these words spoken to him in 1914 by Premier R. B. Bennet, then a private member of the House of Parliament. Their prophetic content is interesting:

"Let me tell you that if ever this young country should run into a period of severe and prolonged depression—such a period of hard times and unemployment as has been known to other countries in world history—those men at the helm will have to pay in costly measure for the prodigality of to-day. They will have to atone for the exploitation of the public at the hands of self-centred and predatoyr interests by bitter doses of taxation, by radical enactments, by revision and reform of the whole capitalistic system—or face something of far sterner significance and more devastating consequences."
—Alberta Wheat Pool Budget

Appropriate

"The Utterly-Utters are just wild about society, aren't they?"

"Why, my dear, they've such climbers that they've even named their youngest daughter Ivy!"—Tit-Bits.

350 RECEIVE DEGREES

A total of 350 degrees, diplomas, etc. were awarded at the annual convocation of Alberta university May 16. The President's address indicated that the total enrolment at the university for the past year had been 1900 in all courses.

FIVE CONVENTIONS FOR ALBERTA

Five Conventions of a more or less national character will be held in Alberta this year. The Canadian Seed Growers Association and the Canadian Society of Technical Agriculturists, which includes within its ranks prominent agriculturists throughout the Dominion, will meet in Edmonton during the weeks of June 19 and June 24. Sir Francis Floud, British minister to Canada, will speak at the latter convention. The Western Canada Dental Association will meet in Calgary the latter part of June, and the Canadian Federation of Business and Professional Women's Clubs will meet in Calgary the first week in July. In the fall the Dominion Amputation Association will meet in Edmonton.

OLD AGE PENSIONS

Old age pensions were paid to a total of 6879 persons in Alberta during 1934.

ALBERTA TAKES LEAD IN HOG MARKETINGS

For the first time in its history, Alberta took the lead among provinces this spring in the matter of total hog marketings. For the first 18 weeks of the year the marketings for Alberta totalled 342,096 head, compared with Ontario's 296,984 head. There was also a further marked improvement in the quality of Alberta hogs, the total percentage of selects and bacons marketed during the above period having been 55.95, passing the 50 percent mark for the first time, as compared with 46.16 percent for the same period in 1934, and 40.50 per cent for 1933.

WILL GROW HIGH QUALITY SEEDS

Contracts for between 600 and 700 acres of seed beans and peas may be signed in the Lethbridge Northern Irrigation area for production this season, following negotiations of a Vancouver firm. This is the area in which international championships have been won during the past few years in field peas and beans, and considerable demand has grown up for the seed.

NEW OFFICIAL ARRIVES

Dr. K. W. Neatby, who is to replace Dr. I. S. Asmodt as head of the field husbandry branch of the University of Alberta, has arrived in the province from his former home at Winnipeg, to assume his duties.

EXTENSION OF DISTRICT AGENT SERVICE

Re-organization and enlargement of the system of district agriculturists in the province has now been completed by Hon. F. S. Grisdale, minister of Agriculture, who announced Wednesday the creation of the additional districts and appointment of officials. This has been brought about largely by a re-organization and decrease of the number of officials in the department offices, and by utilization of officials of the schools of agriculture for the seven-month recess in spring and summer in which the schools do not operate. Appointments and transfers announced by the ministers are as follows: M. L. Freng, Lethbridge, transferred to the new district of Brooks; Ralph Baird, formerly with the C.P.R. Irrigation district at Brooks, appointed to Lethbridge; R. E. Eisenhauer, field man for the Lethbridge Northern Irrigation district, remains in that capacity; F. H. Newcombe, for some years district agent at Vegreville, transferred to Red Deer; Geo. Black, for six years supervisor of junior farm clubs for the province to Wetaskiwin; Wm. Gentleman, former manager of Oliver provincial farm, to Stettler; E. G. Wood, former district agent at Hanna, to Sangudo; C. I. Asplund, formerly of Raymond agricultural school, to Cardston; E. W. Brunsden, at one time with the provincial department, and recently engaged in activities in connection with the new marketing legislation, to Calgary district; B. J. Whitbread, formerly of Vermilion school, and recently with the field crops branch at Calgary, to Claresholm; J. L. Englesham, formerly with the field crops branch at Coronation on relief organization, to Vegreville district; J. M. Fontaine, temporarily to St. Paul district. The following officials of the schools of agriculture will act temporarily in the districts named, returning to the schools for the fall and winter term: C. G. Scarth, of Vermilion school, at Berwyn; D. A. Andrew, of Vermilion school, at Vermilion; E. W. Phillips, of Olds school, at Hanna; Hugh McPhail, of Olds school, at Medicine Hat; F. F. Parkinson, of Olds school, at Olds; A. M. Wilson, of Vermilion school, at Westlock.

Representatives who have already been in the field for some years and will remain in their present locations are Wm. Pidruchney and A. J. Charnetski, in the Ukrainian districts; J. H. Tremblay in the French-Canadian districts, H. W. Scott at Sedgewick, W. S. Morrison, at Grande Prairie.

While S. G. Carlyle, provincial livestock commissioner will act as supervisor of the field representatives, the entire system will be directed by a board of which H. A. Craig will be chairman, and which will include both Mr. Carlyle and J. S. Longman, field crops commissioner, and Prof. J. P. Sackville, of the animal husbandry department, and Dr. K. W. Neatby, of the field husbandry department, of the University. The enlargement of the system and its operation under such a board will, states the minister, form a much closer link between the department and the university, and the people on the land. The results of research work at the university will be carried more directly to the farmer, and upon the field men will be placed the responsibility of carrying into effect the policies of the provincial department with respect to the development of sound agricultural practices.

UNIQUE COAL SHIPMENT

Unique among coal shipments going from Alberta was one of two carloads prepared at Foothills for transport via rail and air to trading posts in the Arctic at a price of $100 a ton, many times the original price. The 70 tons is of egg-size stove coal, hand picked and filled into sewn sacks weighing exactly 100 pounds each.

"A statesman is supposed to be familiar with all public questions."

"Yes," replied Senator Babbler, "but not necessarily with all the answers."—Whitewright (Texas) Sun.

CHAIN LETTERS—

THE ENTERPRISING gent—or perhaps it was a lady—who thought out the idea of the prosperity club chain letters certainly started something. While in this country, chain letters have not actually swamped the post offices, as has been reported in some parts of the United States, there are a sufficient number of them being mailed to cause widespread comment. Members of this immediate family have received four or five chain letters and no doubt the big majority of other families have been similarly favored. We see nothing particularly harmful in chain letters of this type. If people desire to use up paper and envelopes, buy stamps, create work for extra postmen and derive a certain amount of fun doing it, all well and good. But common sense must certainly tell them that as a sure fire prosperity idea it is purely of a will-o'-the-wisp kind. There are several different schemes, one calling for the "investment" of a dime, another a quarter and still another a dollar. Any one person's chances of profiting depends solely upon the length of time the craze will last and this is something no person can accurately determine. Many of those people who sent out chain letters early in the game will most likely receive a fair return on their "investment" of a dime, quarter or dollar, but ultimately there will be a large number who will have nothing but the fun for their money and trouble. The chief thing to be borne in mind is that the chain letter idea has developed into a craze and such being the case will last but a comparitively short time. The more intensified the craze becomes the sooner its demise will occur.

THE SYSTEM—

THE SUGGESTION made at the Liberal meeting on Monday evening that it was not that the general economic system had failed humanity so much as that humanity had failed the economic system, while not new of course, is worthy of considerable thought and study. Man is both an inventive and trading creature. From earliest times different men, possessing a variety of articles have exchanged things among each other, chiefly with the profit motive in view, but not always so. The desire of people to own, possess and display material things has as much to do with trading as the profit motive. Fashions, vanity and covetousness play their part also. Just plain common sense will dictate to most men what constitutes a fair exchange, but the desire to get "the best of the deal" has been so emphasized in modern times that trading has developed into an almost "the devil take the hindmost" code. There are of course plenty of individuals and firms who still insist on conducting their affairs in a manner in which the other fellow's problems are considered as well as their own, but unfortunately, there are also others who think only of themselves. The technical side of modern business and finance is so technically intricate and complicated that it is almost impossible for a single individual to understand it all, but one thing is clear that good trading consists of an exchange of things of approximately equal value by popular acclaim, and this equally applies whether the transaction is simply an exchange of goods or whether the transaction is one in which the goods are purchased by the use of currency.

The earliest trading was done without the use of currency, then currency of one sort or another developed, finally culminating in what is known as the gold standard. Gold was valued in terms of currency by law, and currency represented and could be exchanged for gold of equal value. It is a matter of record that prosperous times coincided with gold mining activities such as took place in the Klondyke, Australian and Californian gold fields. Then followed what can be described as a per centage covering. That is, currency was backed by gold but only to a certain per centage. This made an ounce of gold do the work of several ounces and was based on the assumption that all people at one time would not ask for gold in exchange for their currency. Then came numerous national departures from the gold standard and finally there now appears a school of thought that would break away from gold entirely and have currency issued by the government with the credit of the country as its backing. Obviously, in order to arrive at some understanding of the money question, one has to make up his mind whether money should or should not be a commodity. That is, whether paper money should represent some specific mobile thing of value or whether it can be in escence merely a medium of exchange. Having reached a decision on this point one is either in the social credit school of thought, (though not necessarily adhering to any one particular plan) or is an advocate of so called sound money. Experiments with "printing press" money have not been successful in the past and there are many illustrations. But apparently the failures have not been caused so much by an inherent weakness in the money scheme, as by the people's reaction to it. As people think, so they do. We are still suffering from the depression; even assuming that a liberal issue of fiat money would pull us out, would it keep us out, or would the same forces that enthroned so called sound money on previous occasions, like leaven, work again, to the detriment of the money ticket system.

There are many sides to the money question, all of which have to be studied both separately and as a whole. We find however that we have reached the end of this column and for this week at least must cry quits.

Getting Lost in the Woods

BY GREY OWL IN FOREST AND OUTDOORS

(Continued from last week)

He arrives at the fire, and no one is there but there are tracks leading away which he commences to follow, on the run. All at once he notices something oddly familiar in the shape of a spruce top he is climbing over, and with sudden misgiving he sets his moccasined foot into one of the stranger's footprints to find that they fit perfectly; the tracks are his own. He has been tracking himself to his own fireplace.

Mixed with the feeling of affront at the scurvy trick that is making a laughing stock of him for all the forest is more than a hint of uneasiness, and taking careful observations he starts out anew, this time more slowly and coolly.

An hour finds him back at the long dead fire. With a sudden burst of speed in what he hopes is the [illegible] direction, he puts this now thoroughly distasteful piece of scenery behind him, tearing and ripping his way through this endless maze that seems somehow to cover all Northern Canada. He frequently maps out his line of march with a stick in the mud, and spends much time in abstruse calculations, but it is only a matter of time till he returns, tired, exasperated, scarcely believing his eyes, to this hub of the wheel on which he is being spun so helplessly.

And there dawns on him with sickening certainty the indisputable fact that he is lost. He becomes a little panicky, for this begins to be serious. He appears to be unable to get away from this spot, as though held by a powerful magnet which allows him to wander at will, just so far out, drawing him inexorably back at intervals. He is caught in the grip of the Endless Circle, which from being a mere geometrical figure has now become an engine which may well encompass his destruction.

As these thoughts pass swiftly, fear enters his heart.

If wise, he will now get himself [illegible] of [illegible] and construct a lean-to, gather a pile of wood and [illegible] the night in comfort, hoping for the reappearance of the sun in the morning. Or he may blindly obey the [illegible] uncontrollable impulse of the [illegible] to run madly, tearing through underbrush regardless of clothing and [illegible] so as to get as far from the hateful spot as possible and go [illegible] him—to nowhere.

He will almost inevitably take the wrong direction, at last breaking away from the deadly circle in which [illegible] only serves to plunge him deeper and deeper into a wilderness that stretches to the Arctic Sea.

Darkness finds him exhausted and almost incapable of making camp, and when the sun rises the next morning his calculations, if he has any, are so involved that he knows not whether to travel facing the sun, with his back to it, or across it. He may be later stumbled upon, by the merest accident, by some member of a search party, or by his partner, if the later is a skilful tracker; or again he may find his way to a large body of water and wait to be picked up by some Indian or other passerby. This within a reasonable distance of civilization. If far in the woods he will wander hopelessly on, sometimes in circles, at times within measurable distance of his camp, past spots with which he is familiar, but is no longer in a condition to recognize.

The singing of the birds becomes a mockery in his ears; they, and everything around him, are carrying on as usual, each in its own accustomed manner of living, and yet he, the lord of creation, is the only creature present who is utterly and completely subjugated by his surroundings. Hunger gnaws his vitals and hot waves of blood surge through his brain, leaving him weak and dizzy. Still he must keep on always; he may yet strike some trapper's cabin or Indian encampment; even his deserted fireplace, once so odious, now appears in the light of a haven of refuge.

As the hours pass swiftly on, the setting of another sun finds him no nearer safety, his mind becomes obsessed by strange fancies; the grey whiskey-jacks, trail companions on more fortunate trips, [illegible] ghostly phosphorescence [illegible] the figments of a disordered dream, and a great owl floating [illegible] on muffled wings, has all the semblance of an apparition with yellow gleaming eyes. The little distant red spots, like fire, that every tired man sees at night are to him real enough to cause him to chase them for long distances in the falling dusk, spending his waning strength, and undergoing the added mental torture of disappointment.

The [illegible] world of trees, and shadows and dark labyrinth becomes a place of phantasms and fevered imaginings, and his soul becomes possessed by a shuddering dread that no known danger of ordinary woods travel could account for. The sepulchral [illegible] of the moon transforms the midnight forest into an inferno of ghostly light, pregnant with unnamable supernatural possibilities.

As he grows weaker he becomes the victim of hallucinations, and is beset by a form of insanity, "the madness of the woods," in which the dim arches become peopled with flitting shapes and formless apparitions. Gargoyle faces leer and grimace at him from out of the shadows; Indians appear, stare momentarily beyond him as though he were invisible, [illegible] disappear again, eluding his frantic efforts to attract their attention.

Acquaintances stand beckoning in the distance who, when he approaches, retreats yet further, and beckon again, finally fading to nothingness, or walking callously out of sight. And he shouts frenziedly that they may stop and wait on him, at which the woods suddenly become deserted and his voice echoes hollowly through the endless ramifications which have now suddenly assumed the appearance of a tomb.

For another day, perhaps two, or even three he stumbles on; muttering; at times raving; falling, getting up, only to fall again; crawling at last in that restless urge of the lost to keep on while there is yet life; and always just ahead dangles the will-o'-the-wisp of hope, never fulfilled. And if ever found, his bones will indicate his dying posture as that of a creeping man.

In Northern Quebec, during one of the mining rushes which are yet in progress, a prospector came out to the railroad to report his partner lost. This had happened six weeks before his arrival at the "front." He had spared no effort and had used every means that mortal man could devise to recover his companion, but without avail.

As this had happened in a territory that could only be reached by something over two hundred and fifty miles of a rough and difficult route, which it would take at least two weeks to cover, it was considered useless to make the attempt, as the man had no doubt been long dead.

Being no tenderfoot, the missing man would not likely be one to make further false moves after the initial one of getting lost, and this thought had kept alive a spark of hope. For two weeks the bereft man could not get his friend out of his mind. Often he dreamed of him. After one of these dreams, more vivid than the rest, in which he saw his partner crawling, in the last extremity, along the sandy beach on the shores of a [illegible] lake, he decided to revisit the ground, having [illegible] of an aeroplane. [illegible] hours he was better [illegible] of his mishap.

Nearly every lake in the district was visited for signs of life, but none of them answered the description of the dream lake. Eventually the pilot, fearing to run out of gasoline, advised a return. Influenced by his vision, as indeed he had been in the first place to make the trip, the miner asked the aviator to fly low over a cluster of lakes about twenty miles distant from the original campsite, one of them [illegible] and having beaches down one side.

And as they passed over this sheet of water they saw a creeping thing moving slowly along the beach, [illegible]ing and moving again. At the distance it could have been a bear, or a wolf hunting for food, and they were about to swing off to the south and civilization when they decided to make one last attempt and investigate.

Three minutes later they were confronted by an evidence of human endurance [illegible] belief. Practically naked, [illegible] and face [illegible] with [illegible] he no longer had the strength to fight, his [illegible] with blood and [illegible] emaciated to the last degree [illegible] from dead. But after [illegible] days of suffering such as few men are called on to endure, the man who would not die could no longer [illegible]. He stated dully [illegible] and would have passed [illegible] on hands and knees. And he was headed [illegible] going further and further away from the possibility of rescue with every painful step.

Very gently he was carried, still feebly resisting to the waiting plane, and in two hours was in safety. Later the rescued man told how, confused by the non-appearance of the sun for several days, he had wandered in circles from which he could not break away, until he commenced to [illegible] shores and the banks of [illegible] following them to lead [illegible] when after a certain length of time they find themselves unable to break away from the invisible power that seems to hold them within a certain restricted area, from which they can not get away, or else [illegible] to be [illegible].

CANADA'S PLACE IN SUPPLYING BRITAIN

Statistics of the imports of 1931 in Great Britain, shows Canada in [illegible] relative positions [illegible] the principal [illegible] products.

[illegible]

[illegible] 803,000 cwt. Denmark was first with 1,280,000 cwt. and Netherlands third with [illegible]. [illegible] second with 100,000 cwt. [illegible] was first 170,000 cwt. [illegible] 1,760,000 pound [illegible] first 100,000 pounds. [illegible]

Summer in the Rockies

Indications from representatives of the Canadian Pacific Railway throughout the world are that pleasure travel this year will be on a greater scale than any time in the last two years, bringing more visitors to Canada from the United States, Europe, and the Orient, and pouring millions of dollars into Canadian pocketbooks.

Western Canada is expecting a good share of this traffic and the Canadian Pacific Railway is making extensive preparations there in its hotels and bungalow camps. Dates have been arranged for special entertainments at Banff Springs Hotel, which opens on June 15, and Chateau Lake Louise, which opens on June 21.

With Banff as its sister resort, Lake Louise [illegible] headquarters [illegible] the Valley [illegible] Glaciers, [illegible] Lake [illegible] bungalow camp [illegible] Mount [illegible] and the great mountains near [illegible].

The large Canadian Pacific Railway hotel at Banff is equipped in every way for the comfort of visitors, the hot radio-active sulphur springs have been turned into a swimming pool side by side with a pool filled with fresh water; the rolling floor of the valley has been made into a picturesque golf course; there are fast well kept tennis courts.

Throughout the summer there is fun and [illegible] to do at this beautiful [illegible] with special [illegible] starting with the [illegible] Stampede which [illegible] to 13th. [illegible] world-wide [illegible] their official [illegible] Riders of the [illegible] from July [illegible] the Trail Hikers of the Canadian Rockies from August [illegible]. Indian Days [illegible] Banff from July [illegible] Western Indians [illegible] costumes [illegible] tribal ceremonies. The Banff Golf Week, with the Prince of Wales Trophy as the main prize, is from August 26th to 31st.

ALBERTA MOTOR ASSOCIATION ISSUES 100,000 NEW HIGHWAY MAPS

During this season, the touring bureaus operated at branches on the Alberta Motor Association in Edmonton, Calgary and Lethbridge are expecting heavy demands for service.

At these offices, where courtesy is one of the by-words, every consideration is given to the requests of motorists desiring information. Experts who have made a careful study of routes are able to pick out the most comfortable and convenient ones so that motorists may travel one way and return by another, never once covering the same ground unless there is a desire to see some sections twice during the trip.

Mileage, garages, hotels all forming the official appointments of the A.M.A. are shown on these maps. For those seeking good hunting or fishing spots, the maps contain valuable information.

From time to time, the motor offices receive letters of commendation for their routing services.

FRESH AS SPRING SUNSHINE!
McHeffey's Spring

MARIONETTES—Chalk Talk—STAIR DANCING
Admission: Children 25c., Adults 50c.
DANCE AFTER FRIDAY'S SHOW
Music by Ryley Merrymakers Orchestra

CUTWORM CONTROL

Although the farmer knows much about the matter, the amateur gardener little suspects that long before he sows his highly-prized seeds an enemy has been waiting in preparation for immediate assault. This is the cutworm which attacks all kinds and conditions of plants, and so far as agriculture is concerned, is such a menace that each year the Dominion and Provincial Department of Agriculture publish the latest intelligence on the most effective means of counteracting the ravages of this destructive pest. Bran bait, says the Dominion Department of Agriculture has given most effective control for many years and is made up as follows: bran 20 pounds, Paris green one half pound, molasses 1 quart and water about two and one half gallons. In making the bait, the dry ingredients should be mixed thoroughly first. The molasses is then stirred into the water and this solution added to the bran and Paris green. In mixing the bait only enough water should be added to reduce the material to the consistency of wet sawdust. The mixture should not be made sloppy but should be so that it will crumble in the hands and slip through the fingers easily. Land that was heavily infested last year should be treated before the plants are set out. This is done by broadcasting the bait at the rate of 15-20 pounds per acre a few nights before transplanting. The bait should be spread in the evenings just before dusk, and if possible, on a still warm night.

[illegible]

(Continued from front page)

east of the Calgary-MacLeod line there has been some soil drifting but this has not as yet been serious and further rains have helped to minimize the menace. In the districts where serious drought conditions have prevailed for a number of years, moisture conditions are reported to be fairly satisfactory.

Held back by late spring conditions, hopper hatching is not expected to commence for another two weeks. The extent of this menace depends entirely upon future weather conditions. Sudden warm weather would tend to bring out the hoppers in large numbers very quickly in the heavily infested areas, and farmers in these areas are urged to be prepared to deal with the situation. Generally speaking, the hopper menace is not expected to be as great as in the past three years.

The general tendency this year is to reduce wheat acreage and increase the acreage in coarse grains. In one or two districts, it is reported that the decrease of wheat acreage will be comparitively heavy, but the general decrease over the province is not expected to be great, although it is too early to make a definite estimate.

Have You Renewed?

THE ROOT SYSTEM of WEED PLANTS
Very few realize the great mass of roots that weed plants develop underground in a few short days.
For instance, it is found that in about one month only after seeding the roots of the Wild Oat plant and of the Mustard plant descend about 30 inches into the ground, with a great mass of arms and branches that tend to smother early wheat plants. Such weeds consume a great deal of the valuable moisture and plant food that should be available to the wheat plant. The control of weeds when they are young, therefore, is one of the best means readily available to the farmer of increasing his income and profit.

IMPERIAL
PRODUCTS
THE SIGN OF A FAIR DEAL
The Three-Star Imperial oval sign marks a place where you can buy with confidence; where you can be sure of good value and full measure.
It is the symbol of an organization that has steadily improved the quality and consistently reduced the price of petroleum and petroleum products—for gasoline prices today are lower than ever before.
The Three-Star Imperial oval sign stands for a fair deal to all: to you, the consumer, and to the labor engaged in making and marketing Imperial products. The thousands of Imperial Oil workers are well treated. Five thousand of them are part owners of the Company. They are paid good wages. They have sickness and death benefits and old age pensions which mean that in affliction or old age they and their families do not become dependent on funds which must be raised by taxation.
Because they are fairly treated, Imperial Oil employees work loyally, enthusiastically and enterprisingly. That is why, through the years, it has been possible steadily to improve the quality and consistently to lower the price of Imperial gasoline and oils.

McHeffey's Spring Dance Revue

Many New Novelties to be Presented—Five Distinct Types of Dancing Will Feature Evening's Entertainment

On Friday and Saturday, June 7th and 8th, Tofield and district will again be given an opportunity of seeing Horace McHeffey and his local dancing class in action on the Variety Theatre stage. This program, which is under the auspices of the United Church Ladies' Aid, will, according to Mr. McHeffey, be the best show he has yet staged.

All those who attended Mr. McHeffey's initial Tofield revue last fall will be anxiously looking forward to this coming event. Last year's show, which went down in local history as a complete success, included but one type of dancing, namely tap dancing. This revue will present no less than five distinct types of dancing—Tap, Exhibition ballroom, Routine, Acrobatic and solo-folk dancing, and the elaborate costumes chosen by those taking part will increase the attractiveness of the dances greatly. Last year's show was presented by a cast of fifteen, the coming spring event has a cast of over twenty, ranging from the age of twenty-one years down to a tiny tot of five years.

Included in this completely new spring revue is an entirely different program of Chalk Talk, (freehand charcoal sketching), as well as a new version of the roller-skating act which won such merited applause in Mr McHeffey's last show.

Another feature of the program which always delights and holds the interest of every audience is the Marionette show. This number will take you to the land of Marionettes to be entertained by Charlie Chaplin and Rastus Jones. These two little people, no more than one foot tall, will entertain you on their own stage, which is only two feet high. They will delight you with their dancing, singing and wise-cracking, and one will even play the piano.

Another item of interest is Horace McHeffey's "4 steps of Rhythm" stair dance. Don't fail to see him tap out this original dance novelty by climbing up and down the four steps, forwards, sideways, and backwards and at the same time keep time to the music.

Monologues, songs and other surprize acts will round out an evening of exceptional merit, and everyone is well advised to attend. The popular Silvertone five piece orchestra will also be in attendance to render various selections during the evening.

At the conclusion of the show Friday night the floor will be cleared for dancing, for which the "Silvertone Five" will supply the m[illegible]

All roads lead to the Variety Theatre on the evenings of Friday and Saturday, June 7th and 8th. Tickets are to be obtained from the different members of the cast, members of the Tofield United Church Ladies' Aid (Group three) and they will also be on sale at Jobb's Store.

BOWLING

The final bowling game was played on Monday evening between the teams captained by Bud Hannan and Bill Worton, Hannan coming out on top with two games out of three.

The personnel of the teams are, Loret Ross, Violet Moore, Bud hannan, Bert Calvert and Graham Allan Anne Lindsay, Pat Burnett, Dan Purcell, Bill Worton and Allan Herndon. The individual prizes were won by Ladies' high Violet M[illegible] Ladies' high average Pat Burnett. Gent's high Stan Yakabuski. Gent's high average, Bert Calvert.

This is the Kind of Chain Letter to Send Out--But Beware of Wooden Money

The following chain letter was received by the Mercury Office and is probably the only sure-fire bet in the whole system:

PROSPERITY CLUB
Faith Hope Charity
J Morton, Tofield, Alberta
J W. Morton, Tofield, Alberta.
John W. Morton, Tofield Alberta.
J Wm. Morton, Tofield Alberta.
John William Morton, Tofield, Alberta.

This chain was started in the hope of bringing me prosperity. Make five copies of this letter and send to five easy friends (No Scotch) and wrap a dime so P.M. won't know its there and mail to top name. Not necessary to add any more names, but see that your friends keep the dimes coming until the fifth name is eliminated

Local & Personal

Mr. Bill Fraser is spending a few days visiting [illegible] in town.

Among those who visited the city last week were Miss M. Malcolm, Miss Violet Moore, Mrs. W. Webb, Mrs. [illegible], Mrs. Hammond, Mrs. Law and Mrs. Chapman.

Miss Cherry, Mr. [illegible] Ellis and Ray Ellis were visitors at the Malcolm home Sunday.

Kenneth Myers was rushed to the hospital [illegible] on Monday evening [illegible] an operation for appendicitis.

A number of the Tofielders attended the dance at Lakeview on Friday.

On Tuesday evening at the home of Mr. and Mrs. Hicks the W. A. held a farewell party in honor of Mr. and Mrs. Wallace Smith who are leaving shortly. Mrs. Baptist presented Mr. and Mrs. Smith with a farewell gift from their friends in Tofield. Although only here for a short time, Mr. and Mrs. Smith won the respect of all Tofielders and they all join in wishing them luck in their new home.

Mrs. Alec Drysdale of Renfrew, Ontario is visiting at the Stan Yakabuski home here.

The annual spring painting activity is underway in town. The Club Cafe is being repainted changing its color from green to cream with green trimmings. The telephone office is also receiving a new coat of paint and the front of Bruce's store is being redecorated.

Good Concert

A delightful concert was held in the Variety Theatre on Wednesday evening when the [illegible] the Musical festival [illegible] Camrose on Friday [illegible] The program was exceptional [illegible] great length [illegible] numbers [illegible] In addition to the fine [illegible] the various numbers, the [illegible] of a very high order, being [illegible] elaborate and [illegible]

Much praise was tendered the lady teachers and Mr. [illegible] for keeping the children to such degree of excellence. Mr. [illegible] was also tendered thanks for [illegible] of the number[illegible] The children [illegible] accompanied by teachers [illegible] the people of the [illegible] Mr. A. J. Harrison occupied the chair of the concert.

[illegible]

[illegible]tation, Allen McAllister; Solo, Elaine [illegible] Lorna Swinton; Solo, Ida Jack; [illegible] Jean McGinnis [illegible] ey and Derry [illegible] Doris Coutts; Solo Dorothy [illegible] Action Song, Grades 1 and 2 [illegible]

KETCHAMOOT

The regular monthly meeting of Ladies' Aid will be held next Wednesday, June 5, at the home of Mrs. J. H. Ingram. A cordial invitation is extended to all.

Mr. James Rattigan left one day last week for the North country, Fort McMurray.

Messrs. Stanley Jack and Harland [illegible] are helping with the spring work at the Schultz home.

Mr. Howard Lee left one day last week for Sylvan Lake where he will take over the ball diamond for the summer.

Miss Helen Manning is staying with her friend Miss Hazel Sears until the end of the school term.

Mr. John McGinnis's mother, Mrs. McGinnis, and sister Mrs. Gratz, of Fresno, California came last week to spend the summer with the McGinnis family. Mrs. Gratz is also mother of Mrs. Maurice McGinnis and Mrs. John Brown.

Mrs. [illegible] J. Sarrells of Miquelon is assisting Mrs. Henderson with her spring work.

Miss Ethel Coombes entertained the Junior U. F. A. at the home of her grandmother, Mrs. McMullen Thursday night of last week, a good attendance was present especially considering the busy season. The young people enjoy getting together, and a pleasant time was had. The June meeting will be held at Mrs. Shapes.

Mrs. S. Sterrett and Mrs. Herman Lawson enjoyed a visit with their sister from Vancouver, a few days last week.

LAKESHORE

Miss Myrtle Bethel of Sedgewick spent the week end at home. She returned Saturday evening accompanied by her sister Mrs. Bradley of High River who has been visiting friends and relatives here for the past two weeks.

Miss Grace MacKinnon and Lynn [illegible] spent the week end at the MacKinnon home in Mannville.

An enjoyable dance was held at the Wm. Herbert home on Saturday evening. In spite of the muddy roads a good crowd was in attendance and a splendid time is reported.

Robert Gray of Barrhead is visiting relatives here for a week or two.

Mr. and Mrs. Chris Tiedeman and family of Holden visited at the Henry Tiedeman home here on Sunday of [illegible]

TOWN OF TOFIELD

Weekly Half Holiday

Notice is hereby given that all [illegible] and the places of business where goods are sold by retail are required to close on each and every Wednesday at the hour of [illegible] during the months of June, July and August of each year, pursuant to a by-law of the Town of Tofield and the Early Closing Act of the Province of Alberta. Dated at Tofield, this 27th day of May 1935.

J. W. CHAPMAN,
Secretary-Treasurer.

Ball League Organized

The great summer game is all ready to go with five teams organized into a league: Bruce, Haight, Holden, Ryley and Tofield. Twenty league games will be played exclusive of the playoffs.

Tofield at Ryley Mon. June 3rd
Haight at Holden Mon. June 3rd
Ryley at Haight Fri. June 7th
Bruce at Tofield Fri. June 7th

Haight at Bruce Tues. June 11th
Holden at Ryley Tues. June 11th
Haight at Tofield Fri. June 14th
Holden at Bruce Fri. June 14th

Bruce at Ryley Tues. June 18th
Tofield at Holden Tues. June 18
Ryley at Tofield Fri. June 21st
Holden at Haight Fri. June 21st

Tofield at Bruce Tues. June 25th
Haight at Ryley Tues. June 25th
Bruce at Haight Fri. June 28th
Ryley at Holden Fri. June 28th

Tofield at Haight Wed. July 3rd
Bruce at Holden Wed. July 3rd
Ryley at Bruce Fri. July 5th
Holden at Tofield Fri. July 5th

The Playoffs to be on:
Mon. July 8th
Wed. July 10th
Fri. July 12th

[illegible] Worton of Wainwright spent the week end at his parent's home here.

Sports Meeting Held

A rather sparsely attended sports meeting was held on Wednesday evening when it was decided to hold Tofield's annual sports day on Monday, July 1st. The meeting was called among other things to decide whether a stampede should be run in conjunction with the sports day.

Those present, while recognizing the drawing power of a stampede were of the opinion that it would be better to follow the lines of entertainment similar to previous years and perhaps have a stampede on some future date.

The meeting was originally called for Tuesday evening, but postponed a day in order to not clash with the [illegible] show. On Wednesday evening the festival concert and the [illegible] basketball game [illegible] were greater attractions which perhaps accounted for an attendance of [illegible] Anyway the sports day is a community affair and the sports day committee is not a closed corporation. Additional help and interest is more than welcomed.

Mr. and Mrs. Jim Yakabuski and family left on Friday for Renfrew, Ontario where they will visit Mr. Yakabuski's parents.

Mrs. Stuart of Edmonton is visiting at the McCauley home for a few days.

CENTRAL CO-OP. STORE

"Too Much Wealth in the Hands of a Few People"
In the countryside, in streets of villages, towns and cities; in homes, in market places, from pulpits and public platforms; from men in many walks of life you hear the same pronouncement—"Too much wealth in the hands of too few people."
Who can rectify such an unsatisfactory state of affairs?
In many instances the people themselves have the remedy.
In the grain business the grain growers have the remedy in their co-operative marketing organization. All they need to do is to give their patronage.
Co-operative organization is the most effective means of preventing accumulation of great fortunes in the hands of a few people.
Co-operation never makes millionaires.

Are You In The Mood for

Writing a Letter

or---

Making a Call?

Then why not drop a line to the Tofield Mercury enclosing renewal subscription — or better still call at the office. We cannot and will not promise you prosperity in so many days, but we can and will promise you fifty-two issues of your home town newspaper, entirely produced here at home.

You can keep in touch with reports of meetings, political and otherwise, read the occasional home brew free lance comment on the news of the day, follow the doings of your district through the local correspondence, keep tab on the arrivals and departures, read school board, town council and municipal minutes. You can follow the fortunes of the local sporting organizations, baseball, soft ball, curling and hockey. In fact if you live in the Tofield district and have your interests in the Tofield district, you will find the Mercury worth the small sum it costs. Just two dollars a year. There are bigger and better papers of course, but as a country weekly published in a comparitively small district, your home paper averages up well. For seventeen years it has been published weekly and we are proud to say we still number on our list a number of the original subscribers. In these days of many new movements, why not join a "subscribe to the home paper" club. There is nothing to lose and something to gain.

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

ITCH

Of all the parasites which seem to exist solely for annoyance of mankind, none is more widespread than one known as "itch-mite," which is responsible for that common affliction, called "the itch," or scabies, which is familiar to both sexes and all ages.

The itch-mite can be seen without the aid of the microscope. It is round and whitish, with four pairs of legs. The trouble arises from the fertilized female burrowing into the skin. She cannot turn around in the burrow, so must continue to go ahead, laying an egg or two a day until she dies These eggs are hatched, and the adult is developed in about two weeks, the female being large and the male small

The disease is spread by contact with the infested person or with his clothing and bed-clothing. It is most common where more than one individual uses the same bed-clothing, under conditions of overcrowding and low standards of personal cleanliness.

The burrowing of the female itch-mite sets up the skin irritation which causes the itch. The itch-mite prefers thin, folded moist skin. The disease commonly begins on the front of the wrists and elbows and between the fingers, but it may spread all over the body. The itch is experienced chiefly at night. At this time in the warmth of the bed-clothes, the itch-mite becomes active and does most of her burrowing.

Once the condition is recognized, it can be corrected by the proper use of such an itch-mite poison as sulphur. The first step in the treatment is a hot bath, with the free use of soap and a soft nail brush. This exposes the tunnels or burrows, so that the sulphur which is later applier may reach and destroy the itch parasite.

Sulphur, prepared as an ointment, is applied night and morning for two or more days, being rubbed thoroughly into the parts most affected At the end of that time, but not before, another hot bath is taken, and the underwear is changed. The clothing and bed-clothing must be sterilized; linen is boiled and blankets are baked. The whole household must be cleaned up or the parasites will soon spread to those who have been freed of them from those who were not treated.

Itch is not a dangerous disease, but it is responsible for a great deal of discomfort. As a result of the itching sleep is lost. Scratching very often breaks the skin, with the result that infections, such as boils, sometimes develop.

Itch will seldom, if ever, occur among those who keep their bodies clean by regular bathing, who wear clean under-clothing and keep their own toilet articles for themselves. However, anyone may be exposed to and contract scabies, and so it may be introduced into the family. If this happens, it should be attacked by proper methods, until the whole family has been entirely freed from it.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

SEND THIS IN CHAIN LETTER TO BOB RIPLEY

Manville, May 25.—It would not happen once in a million years, but it did in this town Wednesday.

Two cars stood parked side by side on the main street and both carried the same license number, 48489. One was an Alberta plate, while the other was a long way from home—Florida, U.S.A. What's more, both cars were of the same make and model.

COMMUNICATION

Dear Sir—

It is our considered opinion that if many of the more desirable species of bird life are to be saved for the pleasure and profit of ourselves and posterity, that a more energetic and well organized effort at conservation must be made than has yet been instituted.

Many factors influence the propagation of this bird life, such as drought, and overshooting of game birds; but a vast amount of evidence has accumulated indicating one of the most detrimental factors to be the depredations of the crow, and it is a factor concerning which something can be done.

That our citizens derive great enjoyment from our wild song birds and game birds is recognized by all, but as a valuable natural resource they are not so generally understood. Many people do not realize that they are a necessary aid to successful agriculture. Regarding the dollars spent by sportsmen in the pursuit of game, Mr. W. G. Ross, President of the Regina Fish and Game Club, states in a recent article in "Kennel and Bench":

"Canada at least spends sixty millions, but only a small percentage of the people know about it or are aware that this is a real industry at their own doorsteps, which needs help by conservation and assistance in development."

This is a goodly sum distributed amongst our many citizens who supply the varied wants of this army of sportsmen.

The following are some comments made by outstanding naturalists and nature lovers regarding the destructive proclivities of Mr. Crow:

"The Canadian friend with whom I was shooting is a sportsman-naturalist......He estimates that under the best conditions, crows destroy 40 per cent of the first duck eggs laid......A. E. Bence, K.C., of Sask., reports that out of twenty-four duck nests observed in one locality, the crows got the eggs out of seventeen......Dr. O. L. Austin, a scientist, then in the employ of the Bureau of Biological Survey, made a careful study of the effect of crows on water-fowl in the neighborhood of the Ornithological Research Station on Cape Cod. Dr. Austin located forty-two duck nests. One week after he had located these nests he found that crows had destroyed all but two of them......In Canada, Mr. Kalmbach (an investigator in the employ of the U.S. Bureau of Biological Survey), was successful in finding a restored lake within the dry regions, and along the banks of the lake and of the canal which formerly drained it there were a great many ducks' nests. There were a lot of crows nesting not far away......In the course of these investigations, crows in some places were found circulating around the breeding grounds, and in other places crows were actually seen attacking some ducks' nests....The crow is a bad actor. In the interest of game birds, he must be controlled. Farmers are universal in condemning him as a destroyer of crops. Bird men and sportsmen know him as an eater of eggs and fledglings; and yet, because a few long-haired anti-everything fellows contend that he does a certain amount of good when he occasionally eats a hairy caterpillar, certain individuals in authority hesitate to paint him in his true color, which is jet black."—Ray P. Holland, Editor of Field and Stream.

Our own Jack Miner, of Kingsville, Ont., writing in the "Atlantic Sportsman," makes the following statements regarding the Crow:

"....but, to my surprise, they were not feeding their young on corn. As I held these old birds up by the tail as they gasped their last, they spewed up birds eggs; I have seen as high as seven unhatched robins pour out from the throat of a dying crow, and the little bits of life were sometimes still squirming. Dear reader, the above is only a flash of the cruel, wicked, murderous ways of these black, old nest-robbers ......I don't believe there were ten per cent as many then as there are today......Moreover, I know that if one of these insectivorous or song birds were left to mature, it would do more good in ten minutes than a dirty, old crow would do in a day. Oh, but you sigh and say 'Jack Miner, are you sure that you know what you are writing about?' Yes, I am. I have tested it out......to the sportsmen and bird lovers of the continent let me hand this boiled-down sentence: Don't expect our desirable birds of Canada to increase until the crows are decreased.

In the light of such evidence, and of the observations, which you, yourselves, must have made in this connection, we ask your co-operation in making the public acquainted with the facts of this urgent problem, and that you will use every means within your power to lessen the vandalism of the thuggish crow. Crow-Shoots, traps, and encouraging our rural children to gather crow's eggs and young crows appear to be most effective avenues of effort.

Here's to the conservation of our desirable but vanishing birds.

Yours very truly,
RED DEER BOARD OF TRADE

WHO'LL TAKE BABY? 50 ARE AVAILABLE

Destined to play leading roles in the "Adopt a baby week" program which starts in Edmonton Monday, 50 tiny boys and girls, most of them from two to five months old, are unconcerned over the fact that next week may decide their whole future by finding for them homes and parents.

Started in Ontario as part of the celebrations of the first birthday of the famous Dionne quintuplets, the "adopt a baby week" will be observed here with special efforts to place the 50 babies in suitable homes.

Babies adopted during next week will go to their new homes fully equipped with wardrobes furnished by the child welfare department of the government. Necessary steps for legal adoption will be handled by the government without charge to the new parents.

Capt. K. C. McLeod, head of the department, and C. B Hill, child placing officer, will make special efforts to place as many babies as possible within the week and care will be made available for any person wishing to see the babies, who are in several city hospitals and homes.

INGRID WEDS HEIR TO DANISH THRONE

Stockholm, Sweden, May 25.—Two hundred thousand Cheering Swedes packed Stockholm's streets Friday to bid farewell to Crown Prince Frederik of Denmark and Princess Ingrid of Sweden, Frederik's bride and Denmark's future queen.

Their brilliant wedding in the 13th century church where all kings of Sweden's Bernadotte line have been crowned was attended by such an assembly of crowned heads, royalty and notables as Scandinavia seldom has seen.

Ingrid said goodbye to her father, Crown Prince Gustav Adolf, smiled at the cheering thousands and the Swedish royal sloop crossed the harbor to the Danish royal yacht "Dannebrog," while harbor fortress guns boomed salutes

MANVILLE FOLK KNOW WHAT FRIENDSHIP IS

Manville, May 25.—Some people may suffer hardening of the heart as they scratch around trying to take care of themselves in these times of slim or empty pocketbooks—but not in this section of the country, as W. Osborne, local farmer will testify any time.

Late spring and confinement in the Manville hospital had just about killed every hope Osborne had of getting his crop in this year. A new lease on life and hope was given him Wednesday, when eleven of his neighbors with 45 horses and a tractor invaded his farm and before night had seeded his ninety acres.

General foreman of the neighborly act was Henry Kufelt and aiding him were Jack Bryden, Jack Chrysler, Ralph Sunderland and his brother, E. A. Mercer, Preston Bothwell, George Thompson, Fred Haunch jr., and Harold Nichols, who represented Murray Colborne.

THE COMMERCIAL GRADS—

AS THIS is being written an international basketball series is underway in Edmonton, two games out of five having been played, each team winning one. The Edmonton Commercial Grads, a team of many years standing and a team of sensational ability is defending Canada's hold on the world's basketball championship against the Tulsa Stenos, a team from the United States, basketball champions of that country. Whatever the outcome of the series may be, whether the United States team becomes world champions or whether the Grads retain the coveted title, a few lines written outside the city of Edmonton in praise of the Commercial Grads and their wonderful coach, Mr. Percy Page, is in order.

The one great outstanding feature of the Grads is that they are purely a "home brew" sporting organization. Nowadays the names of teams in all branches of sport, amateur as well as professional, does not mean very much. Star players are gathered together under one pretext or another from many places and banded together under one banner. To their lasting credit, the Edmonton Commercial Grads are all Edmonton girls, following their every-day duties of working or attending school. Despite this fact, for many years they have, with notably few exceptions, been able to turn back the best teams of this dominion and of the neighboring country to the south. One other feature connected with basketball in Alberta, particularly as regards the Grads is the lack of competition from teams of equal or near equal calibre. Athletes generally become as fast and as skillful as the company they are in and for a team of the calibre of the Grads to be assembled and maintained through a period of many years, despite changes of personnel, is nothing short of marvelous. In contrast most of the Canadian and U.S. teams have come from larger centres where league games are more numerous and where basketball is an all winter organized sport.

At this time, when the Grads are perhaps facing the greatest hurdle in the team's long and successful career, it is well to remember that whatever the outcome, the team has already covered their home city Edmonton, and the province of Alberta with basketball glory, and having done so are worthy of all praise, whether in victory or defeat.

Here in northern Alberta we have become so accustomed to the Grads winning their games that the possibility of defeat was considered remote. But there it such a thing as expecting too much of a team. Many girl teams during the past years have come from the south intent upon victory and with the notable exception of the Durant Cardinals, all have gone away as defeated teams. Each year the visiting forces become stronger and stronger, and for a purely local team to successfully defend challenge after challenge is little short of miraculous. Should the Tulsa Stenos, worthy basketball representatives of a great country, do what no other team has been able to do, take the Underwood trophy from the Grads, the Page sextette will be no less great in defeat than in victory.

Mention of the Commercial Grads basketball struggles for the Underwood international trophy would not be complete without some reference to the running accounts of the games by radio. To country people in particular, this is a great boon. Interest is maintained and enthusiasm aroused by these broadcasts.

For the present series of broadcasts the public is indebted to the Campbell Furniture Co., and to the announcer, Bert Cairns who is compelled to describe play with wonderful rapidity.

In company with all Albertans the Grads have our best wishes for a successful termination of the series.

THE RIGHTNESS OF OPTIMISM

Man, in the course of his long history, to say nothing of his experiences in prehistoric ages, has come through many ordeals and testing times. This fact is the complete answer to the pessimist. It is true, of course, that this world does not altogether suit our convenience. We may say that it does not altogether seem to be made for our special benefit. Weeds grow in our gardens. Rats kill and eat the chickens we raise to eat ourselves Disease germs kill some of our best friends to say nothing of what they do to ourselves. There are, indeed, times when it would seem that one's little corner of this world does not altogether conduct itself as one could wish. In a certain mood, especially when we are young, we may share in Omar Khayyam's exclamation of a futile wish to "grasp this sorry scheme of things entire" and, having shattered it to bits, then "re-mold it nearer to the heart's desire" But does any of this justify pessimism? Not at all. There must be a balance of good over evil in the world or we could not continue to exist. No wise person is a pessimist. A wise person sees life with steady, hopeful eyes, rejoicing when there is sunshine and maintaining his courage when gloom prevails. Cheerfulness is wisdom.—National Home Monthly.

RUSSIA'S LAST MILLIONARE IS DEAD IN GORKY

Gorky, U.S.S.R., May 25.—Russia's last millionare! That was Ivan Burtsey, who died at seventy in a tumble-down house near the edge of the city

Burtsey had been a government pensioner, apparently poor and needy But when his hut was searched after his death gold worth 250,000 roubles was found besides jewelry, porcelains, carpets and antiques worth an equal sum.

Looking into Burtsey's past somewhat belatedly, the authorities discovered he had been a hated "capitalist," at one time the manager of a prosperous steamship line on the Volga.

EMPHATIC NOTE GIVEN TO BRITAIN

London, May 25.—Germany has informed Great Britain that her right to hold colonies must be recognized in some tangible form by the former allies before she will return to the League of Nations, well-informed British quarters said today.

The German attitude toward colonial possessions and mandates was clarified in an interview yesterday in Berlin by Sir Eric Phipps, British ambassador, with Baron Konstantin von Neurath, German foreign minister

It was officially disclosed here that Sir Eric was asked to question Von Neurath regarding various points raised in Adolf Hitler's Tuesday Reichstag speech

Von Neurath, it was understood, said Germany's demand for 35 per cent of the strength of the British navy would not be altered if she were granted her former colonies or mandates. He made clear she does not want actual possession of the colonies or mandates at the present time.

Plans for Anglo-American naval talks, which probably will begin within 10 days, also were believed to have been discussed

REDUCTION IN WHEAT ACREAGE

Wheat acreage in the northern part of Alberta will be reduced by at least 20 per cent, was the opinion expressed by C. A. Buchanan, district superintendent for the Canada Colonization Association, who returned from an inspection trip of central and northern sections of the province.

Wet weather preventing the farmers from getting on the land is given as the reason for the decrease by Mr Buchanan

Seeding in the eastern sections of the province is well advanced, he stated, with between 70 and 80 per cent completed, but in the western sections the seeding is badly delayed in many places as low as 25 per cent and not higher than 50 per cent being in crop

Mr. Buchanan stated that in many districts farmers had relinquished the idea of sowing to wheat and were turning to barley and oats. This change was made necessary by the late season.

Along the Wainwright - Provost line, over 90 per cent of the wheat crop is in; in the Ponoka district, [illegible] per cent; in the Camrose - Red Deer districts, 80 per cent, while in Vegreville, Andrew, Chipman and Mundare, from 65 to 70 per cent of the wheat crop is planted Along the Daysland, Killam, Sedgewick line approximately 75 per cent of the crop is seeded

MYSTERY PACKAGE IS THROWN AT THE KING

London, May 27.—Scotland Yard disclosed Monday that a man who hurled a "mystery" package into the royal coach while Their Majesties the King and Queen were on a drive Saturday had been released after [illegible] hours' questioning.

Officials refused to say what was in the package Undaunted by the incident, the King and Queen took another leisurely drive through northwest London Sunday afternoon

In the working suburb of Stepney the King and Queen Saturday received ovation. They were visibly touched by their welcome Seated alone in an open automobile followed by only two other cars they passed slowly through the streets garlanded with gaudy tissue paper while ragged urchins surged around the car offering little homemade gifts

In the Jewish section of Whitechapel banners in Yiddish bade welcome to them They were formally welcomed by the mayor of Stepney

Wagnerian Music

Madge: "Why do you prefer Wagner?"

Marjorie: "Because he composes about the only kind of music one can hear above the conversation "—Troy Times-Record

WIT And WISDOM

Well-Timed

"Jimpson's address was well timed, wasn't it?"

"Yes, two thirds of the audience had their watches out before he finished "

Salad Comfort

Mrs Jones "I don't believe in standing over a hot stove in the summertime "

Mrs Smith: "Yes, there's nothing like salad comfort."

Real Strategy

Officer "Now tell me, what is your idea of strategy?"

Private "It's when you're out of ammunition, but keep right on firing."—Wall Street Journal.

The Style

Two ladies were attending a concert at the town hall. They looked about them.

"New building," said one lady "What style of architecture is it?"

"I'm not quite sure," said the other lady, "but I think it's Reminiscence "—Pearson's

Pay For The Cow

Diner: "Look here, miss, I only had a portion of trout, and here I'm charged with the whole fish "

Waitress: "Sorry sir, but its the custom of the establishment "

Diner "Then it's a good thing I didn't order beefsteak "—Montreal Star

A Worse Thing

"There's only one thing worse than trying to shave with a razor after the wife has sharpened a pencil with it."

"And what's that?"

"Trying to write with the pencil "—Pearson's.

Courtesy

The determined-looking lady was trying to fill out a money order application with the pen furnished by the post office. She made several trials, but in vain, then gave up in disgust; and, turning to the man behind the grilled window, tried to freeze him with a glare as she demanded

"Is this the pen John Hancock used when signing the Declaration of Independence?"

Uncle Sam's pleasant and efficient contact man replied, "Information at the next window, please."—American Legion Monthly.

And So The Old Milk Cow Died

By Lou Wrigglesworth in the Market Examiner

Old Spot was dead! The exact cause of her sudden demise was not apparent in the cold still form lying in the stall Whether the wheat straw with which she had been so abundantly supplied lacked the necessary calories and vitamins to keep body and soul on friendly terms, or the longing for the place where the pastures are always verdant, with the salt-block and water close by and the heel-flies away on vacation had become too acute—has never been fully ascertained.

It might even be possible that the low price of butterfat was in a way responsible—who knows? However, there she lay; her poor bony corpse being the first object to greet the eye of the owner when he came into the barn to do the morning "chores "

Quickly recovering from his first shock of surprise, and after prodding her once or twice with the pitchfork to make sure his eyes were not playing him tricks, the farmer (who, by the way, was a just person and also a firm believer in a hereafter) propped himself in the usual manner shifted his quid, spat and ruminated:

"Well, ol' girl, you're gone! Yep, by Jupiter you've left us; and I don't know's it matters so's ye cud notice Question is, wher be ye right naw? Reckon ef it was put to me to be the judge I wouldn't know [illegible] Toss up a coin like as not

"Never in all my fifty [illegible] years hev I met up with sich a good-sized pa'cel of mixed blessedness an' cussedness; usefulness an' good-for nothingness, as was wrapped up in yore ornery old red-and-white coverin'

"How many times, after bein' side-swiped by yore right hind flipper hev I reached for a young fencepost to treat ye to that long-promised drubbin', only to be 'cowed' into submission by the appealin' look in them big velvety orbs o' yourn!

"More n once has my heart been gladdened at the sight of ye coming home at dusk with a fine lusty calf trailin' in your wake And the very next morning I'd wake up to see ye raisin' hell in the old lady's cabbage patch

"In the summertime, with 'Special' quoted at a dime I've known ye to fill the bucket twicet a day reg'lar; and then in the winter lay down on the job and be as dry as a checker-board in a hermit's shack

"Twas you that furnished the milk that helped my boys grow into big husky men—who left me to look for work in the city rather than stay and pull teats on you and yore kind in order to eke out a meagre existence on the farm So it seems t'me yore morals was pretty eq'ally balanced P'r'aps I should orter haul your old body aout an' give it sort good Christian burial—but, I dunno. I dunno."

[illegible] being a mercenary minded [illegible]—and hard up into the bargain he did nothing of the kind His nature's practical side over-ruled the sentimental, with the result that Old Spot's hide came off, and her carcass went to feed the pigs

CHARGE GOLD SOLD REALLY WAS LEAD

Alleged to have practiced a new method of the "gold brick" fraud, Metro Lotauk and Alvin D. McDonald were arraigned before Magistrate Primrose in police court Saturday on charges of conspiring to defraud They were given adjournment to June 1, and the case will be heard on June 4

The accused are alleged to have sold nearly a pound of "gold nuggets" to a Saskatchewan farmer, whom they met on a train between Winnipeg and Edmonton, for $350. When the farmer went to re-sell them, it is charged , he found them to be bits of lead foil rolled into balls and covered with ordinary radiator gold paint

WANTS GREATER USE OF SILVER IN COINS

Ottawa, May 25.—That Canada, as a silver producing country, should give a lead back to its freer use, is the objective of a bill sponsored by Thomas Reid, (Liberal) New Westminster, of which notice was given Thursday

At present every 1,000 parts in silver coins, 800 have to be pure and the rest alloy. The Reid bill would make the ratio 925 out of 1,000

It is also proposed to remove completely the existing limitation on use of silver in the payment of debts.

HELPING TO BUILD THE BRITISH 'ROUND-THE-WORLD HIGHWAY

In 1880, the Canadian Pacific Railway was organized for the purpose of completing a line to span the continent.

The Bank's directors, confident of the future of the Dominion, placed a generous share of the Bank's resources behind the project, which was completed in 1886 and formed the transcontinental link in the British 'Round-the-World Highway. Subsequent events have shown that this undertaking contributed more than any other to the settlement and development of Western Canada.

The Bank promptly opened branches at Vancouver and Victoria, subsequently at points along the railway which since have become thriving centres.

This is one of many experiences showing how the Bank of Montreal, looking forward with Canada from the beginning, has been a useful factor in the development of the country. In the future, the Bank expects to continue that usefulness—to continue to look forward with Canada, toward the nation's future destiny.

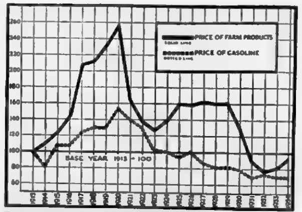
H. E. ROGERS

Have You Renewed?



The depressed price of farm products is a problem with which everyone is familiar, but on the 1913 basis farm product prices have never been so low as gasoline. Between 1913 and 1920 gasoline did not rise in price to nearly the same extent as farm products, yet since 1920 its price has almost continuously declined. The data for the above graph are based on figures published by the Dominion Bureau of Statistics.

A FAIR DEAL POLICY

In the fifty-four years of its existence, Imperial Oil Limited has always welcomed legislation in the interests of labor and the basic industries. It has never had a labor dispute. It has always paid fair wages. To the greatest extent possible it has provided continuous employment and it has given its workers increasing leisure so as to expand employment. It has sickness and death benefits and old age pensions because it believes that the worker and his dependents are entitled to such protection.

Imperial Oil has always tried to deal fairly with collateral industry and with its competitors. Its success in this connection is indicated by the fact that it has never had a major lawsuit. It has always recognized the principle that the only satisfactory business transaction is the one which affords a fair profit to all parties concerned. It has fulfilled all its undertakings. It has enforced no onerous claims on others.

Imperial Oil has always tried to deal fairly with the consumer. It has continuously improved the quality and steadily reduced the prices of its products. It has invested millions to make those products always available wherever they may be needed.

In 1934 Imperial Oil earned $5,025,400.12 from its Canadian manufacturing and marketing operations. This, you may say, is a lot of money, but to earn that amount Imperial Oil had to make and market goods to a value of $82,841,511.15. The storekeeper who in the course of a year sold $8,280 worth of goods and made a profit of $500 would not be regarded as enjoying an undue measure of prosperity. But his ratio of profit to the total volume of his business would be the same as Imperial Oil's.

It has been Imperial Oil's practice to "make wisely, measure truly, trade justly" for this it believes to be the secret of success.

WOODLAWN

On May 10th the Hay Lakes Social Credit Group addressed a number of people in Woodlawn School. There were three speakers, Mr. Oscar Grahn, Mr. Cohen, and Mr. Lysle. After their discussion it was decided to have a Social Credit Study Group in Woodlawn. Officers elected were: Wm Grahn, president; Mrs. John Wilson, vice president; and Mrs. O. I. Cookson, secretary treasurer. There is a total of thirty members to date and it is expected that there will be more. Mr. Wm Grahn went as a delegate to the Convention in Edmonton on May 18th. Owing to bad weather we have as yet only had one meeting. At the last meeting Mr. Grahn discussed the convention and it was thoroughly enjoyed by all. The next meeting will be held on June 7th and it is expected that there will be a radio installed and any speeches will be listened to by the members.

There is to be a basket social and dance at Woodlawn school on Friday, June 14th in aid of the Social Credit Study Group.

Miss Annie Swift has moved back to [illegible].

Mr. and Mrs. Wallace Lee have moved down on their own place now.

Mr. and Mrs. Wm Schroeder entertained Mr. and Mrs. John Wilson and neice Miss Ethel Conklin to dinner on May 30th in honor of Wilfred's birthday.

NEW BASEBALL SCHEDULE

Due to the fact that Haight dropped out of the league, a new baseball schedule had to be drawn up. The following is the new schedule:

Holden at Tofield July 12th
Ryley at Bruce July 12th
Bruce at Ryley July 16th
Tofield at Holden July 16th

Miss Muriel Malcolm left on Tuesday morning for an extended trip to England. She is travelling via C. P. R. and will board the Dutchess of Bedford at Montreal. Bon Voyage! Muriel.

Herbert C. Boyd Spoke Here on S.C.

On Wednesday night of this week, Mr. Herbert C. Boyd of Edgerton addressed an audience in the Variety Theatre on the principles of social credit. Mr. George Edwards occupied the chair, and there were also on the platform, Mr. Johnstone Ferguson and Dr. McPherson, prospective social credit candidate for the Vegreville constituency.

Mr. Edwards, Mr. Ferguson, and Dr. McPherson all gave a few introductory remarks after which Mr. Boyd gave a lengthy and interesting address.

He said that the meeting was being held upon an historic date, the day during which the Douglas report had been released through the press to the public. He had only seen it shortly before the meeting and had not read it completely, but judging by the passages he had read he considered the report very favorable. On Tuesday night at Ryley he had spoken on the constitutional aspect of social credit, but tonight he would expound social credit very lightly. At first when speaking he used to traverse the whole [illegible] but now he felt it unnecessary to deal with the elementary factors. The liberal platform consists of several pages of small type, the C.C.F. platform takes 17 separate headings to cover it, but the social credit platform consists of three legs and he likened it unto a tree.

The financial system was to be based upon the credit of the province, not upon gold. The goods [illegible] and the character, energy and ability of the people constitutes the real wealth and it was this that they intended to monetize.

If [illegible] sounds strange he would say that it had been in use for many years by the banking system. The only difference will be that the people will operate it. The present system of [illegible] is approaching an impossible situation. The government is facing dissolution with a debt of 150 millions, an increase of 90 millions since they secured office. [illegible] growing progressive, and [illegible] [illegible] its reduction. Major Douglas said this situation had [illegible] the [illegible] of the Bank [illegible] [illegible]. Since then [illegible] [illegible] The monetary system has [illegible] [illegible] and [illegible] heading for chaos. Douglas said in 1921 before a committee of the House of Commons at Ottawa that if they continued along the lines they are now following, they were heading for the greatest disaster the world had seen. Now he said unless this change is made he predicts the fabric of civilization will collapse either in war or [illegible] in [illegible] year. If we make the wrong decision at the next election it will be too late. At every time of crisis the national credit had to be invoked.

Local and Personal

The regular meeting of the W.A. will be held at the home of Mrs. J. W. Robinson on Thursday June 13th at 2.30 p.m.

Mr. and Mrs. Wuetherick and baby motored to Chipman on Sunday.

Born—To Mr. and Mrs. Eldred [illegible] Wednesday, June 5th, a son.

Mrs. Bender and daughter of Ponoka are visiting at the Kendall home.

Boys' solo, Robert Torrie, 3rd.

Girls' solo, Elaine Thomas, 3rd.

Room [illegible] Play, 1st place.

Boys' recitation, Donald Tiedeman [illegible] Joseph Sokolan, 3rd.

Girls' recitation, Katie Iwan[illegible]

[illegible]

Grades 7 and 8 [illegible] [illegible] Henry Hicks [illegible]

[illegible]

High school [illegible] W. McCauley [illegible]

McHeffey's Dance Revue This Week

On Friday and Saturday of this week the Variety Theatre doors will swing open to the high light stage event of the season, McHeffey's Dance Revue. For this event special stage settings will be used and captivating costumes will be worn by the entertainers.

New and original numbers have been introduced into this program, several new types of dancing among which will be the exhibition ball room waltz. The four steps of rhythm [illegible] a new and novel number which you will enjoy. In addition to dancing numbers, there are solos, recitations, new charcoal sketches and last but not least the famous Rastus Jones and Charlie Chaplin Marionettes. The appearance of marionettes at Tofield is very rare. In h[illegible] favor many years ago [illegible] [illegible] in the larger centres are [illegible] back. They are a [illegible] amusing and entertaining addition [illegible] any programme. The full program [illegible] follows:

Trio [illegible] "Broken Rhythm Tap [illegible]" by Mayme Craig, Helen Co[illegible] Marguerite Stevenson.

Chalk Talk—"A variety of free hand charcoal sketches including landscapes, caricatures, evolution and sunrise pictures" by Horace McHeffey.

Acrobatic Tap Dance—"Bimbo, the [illegible] [illegible] acrobatic tumbling," by [illegible] Young.

Solo [illegible] "Sailors Dance" by [illegible] Coatta.

[illegible] Mr. Broughton.

[illegible] Skating Tap Dance by Horace McHeffey.

[illegible] Music by "The Silvertone Five Piece Orchestra."

[illegible] "A feature taking you [illegible] of marionettes to be [illegible] with music, dancing and [illegible] by Rastus Jones and Charlie Chaplin, by Horace McHeffey.

Revue Chorus Dance—"Nick Nacks [illegible]" [illegible] Craig, [illegible] McBratney, [illegible] Stevenson, Winnie McAlister, Verna [illegible] [illegible], Betty Fawcett, Pat Firth.

[illegible] "The [illegible]" [illegible] Coatta.

Exhibition Ballroom Waltz by Mayme Craig and Horace McHeffey.

Charlie Chaplin dance [illegible] [illegible] Iverson, (age 5 years old).

[illegible] "The News Hound."

"Four Steps of Rhythm Stair Dance,—by Horace McHeffey.

Are You In The Mood for
Writing a Letter
or---
Making a Call?

* * *

Then why not drop a line to the Tofield Mercury enclosing renewal subscription — or better still call at the office. We cannot and will not promise you prosperity in so many days, but we can and will promise you fifty-two issues of your home town newspaper, entirely produced here at home

You can keep in touch with reports of meetings, political and otherwise, read the occasional home brew free lance comment on the news of the day, follow the doings of your district through the local correspondence, keep tab on the arrivals and departures, read school board, town council and municipal minutes. You can follow the fortunes of the local sporting organizations, baseball, soft ball, curling and hockey. In fact if you live in the Tofield district and have your interests in the Tofield district, you will find the Mercury worth the small sum it costs. Just two dollars a year. There are bigger and better papers of course, but as a country weekly published in a comparitively small district, your home paper averages up well. For seventeen years it has been published weekly and we are proud to say we still number on our list a number of the original subscribers. In these days of many new movements, why not join a "subscribe to the home paper" club. There is nothing to lose and something to gain

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

SCHOOL DAYS

To speak of school days at this time of year is to suggest that we are in the last month of the school year. It is not to that event but to the opening of the new school year next September that attention is now directed.

Children are sent to school so that they may be prepared for adult life. Education is a growth process which begins on the day of birth and continues throughout life. The school plays an important part in the education of the child, which includes not merely an accumulation of factual material, but a social adjustment to other children and to authority as represented by the school; at the same time, he is acquiring a capacity to do things in a constructive, self-[illegible] manner.

There are many factors which play a part in determining whether or not the child shall receive the maximum benefit from the time which he spends in school. Among these factors is the physical condition of the child.

Practically everyone knows, from experience, the discomfort that is associated with a cold in the head. That is how the child who has adenoids feels most of the time. Is it any wonder that children with these conditions are handicapped in their school work?

Those adults who wear glasses for reading will appreciate how difficult, if not impossible, it is for them to read in comfort without glasses. It is unreasonable to expect good results from the child who, not having the glasses he needs, cannot see clearly or read without effort, and who may suffer from headaches as the result of eye-strain.

When you have a pain in any part of the body, your mind is concentrated on the pain rather than on your work. Toothache is one of the most persistent pains which children commonly experience. No child can be expected to do his lessons if he has a toothache.

Then there are defects which are not so obvious but which, in the long run, are likely to be more serious. We refer to such conditions as diseased tonsils which are apt to be the focus from which infection spreads in an insidious way until it undermines the health of the body.

The question which each parent should ask is as to whether or not his child will be free from physical defects when school opens next September. Now is the time to give attention to this matter if defects are to be corrected before then.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

MEMBERS COMMEND SPECIAL SERVICES OF MOTOR ASSOCIATION

The great value of special services given by the Alberta Motor Association is shown in letters received from members at branch offices of the organization in Edmonton, Calgary and Lethbridge.

With the touring season opening, people are realizing all the more that they need an A.M.A. card when they start their trips, no matter where they are going.

One member in sending in his renewal application said that his card gave him all the privileges of the very up-to-date information bureaus scattered over the States, when making a recent trip. The card got him a lot of courtesy and, considering the returns, he thought the cost of the membership in the A.M.A. was money well spent.

Members have also written commending the special accident policy being given this year for the first time to members of the A.MA. For an additional cost of $2.50 the wife, son or daughter of a member is given an associate membership and is entitled to all the free insurance and indemnity benefits.

One striking feature is that the A.M.A. has been able to include the special accident policy in addition to its many other services without imposing additional cost upon members.

Already, the branch offices are busy preparing routings for tourists. No matter what part of the Dominion or the United States or Mexico that one wishes to visit, the dependable information as to the best way there and back can be obtained promptly and courteously from the branches of the organization in your nearest city.

Same Song, New Words

Eloping Bride: "Here's a telegram from father."

Eloping Groom. "What does he say."

Eloping Bride: "Don't come home and all will be forgiven."—El Paso World News.

STAYS TWO YEARS IN ARCTIC

Winnipeg, Man., June 3rd,—Here of a two-year stay in the sub-Arctic, who was a visitor in Winnipeg recently, is T. H. Manning, Northampton, England, 23-year-old Fellow of Great Britain's Royal Geographic Society, who has just come "out" from Southhampton island, on Hudsons Bay.

It was in the summer of 1933 that Mr. Manning left Churchill on the Hudson's Bay Company SS Nascopie for distant Southampton island, 500 miles north. With a background of reading of natural science and surveying at Cambridge, he was commissioned by the British Museum to study birds, and by the Royal Geographic Society map the island. He left Cambridge in 1930. Previous experience in that kind of work had been gained in 1932 in Lapland.

His surveying work was done in the winter and spring months, and his bird studies in the summer months. The long nights and short days of winter did not hang on his hands, he said. After his day's surveying was done, there were his dogs to feed, and his own food to prepare, and 10 hours' sleep was not any too long.

Except for his dogs, and his trips to the Hudson's Bay company post, he was alone all the time. He walked out to Churchill all alone too. There was first a 30-mile trudge over very rough ice to the mainland, and then the long 500-mile tramp to Churchill. But he is in fine condition, brown as a berry, hard as nails, and as healthy and fit as any man could wish to be.

He'll be writing a book when he returns to England he said in answer to a question. "Scientific stuff," he explained.

The accompanying chart shows how the price of gasoline to the retailer has decreased and the gasoline tax has increased since 1924. The data for this graph are based on figures published by the Dominion Bureau of Statistics.

LOWER PRICES—HIGHER QUALITY

EVER since 1920 the price of gasoline has steadily declined. Few people realize this however because during the past ten years as the price dropped the tax increased. In 1923 there was no provincial gasoline tax and the average price of gasoline to retail dealers across Canada was 27¹/₁₀ cents per gallon. Today the average price of gasoline to retailers is 18⁹/₁₀ cents but to this is added a tax of from six to eight cents per gallon which goes directly to the provincial governments. Not only has the price of gasoline fallen steadily since 1920 but the quality has consistently improved. The gasoline consumer today gets more value than ever before.

Sometimes you hear talk of large profits earned by the gasoline refiner. In 1934 Imperial Oil earned $3,023,400.12. This may seem to be a large sum but to earn it Imperial Oil had to make and market gasoline and other products amounting in value to $83,841,311.15. That is to say Imperial Oil's earnings were relatively no greater than those of a merchant who, selling $8,280 worth of goods in the course of a year, made a net profit of $300.

GLARING HEADLIGHTS—

The extremely unfortunate fatal accident which befell a young girl on the Tofield—Edmonton highway this week, once more brings up the question of glaring headlights. In this instance two girls, sisters, who were hitch hiking back to Winnipeg from whence they had come in search of work, had procured a ride with a truck driver and were on their way to a home where they intended passing the night. A fast moving automobile travelling in the opposite direction, with glaring headlights came upon them, the lights so blinding the driver of the truck that the vehicle went into the ditch and turned over. One of the sisters, apparently thrown out of the truck cab window, was crushed beneath the truck and killed, while the other sustained a broken arm. The driver was uninjured. The fast moving car, the driver most likely being unaware of the tragedy, did not stop. Thus another tragedy of the highway goes down into history.

In these days of almost superlative speed (although they tell us more is to come) safety to oneself and to others is only secured by eternal vigilance. Particularly does this apply to the proper dimming of lights and the slackening of speed when passing other vehicles at night. Because so many drivers continuously escape mishap when failing to properly dim lights and slacken speed is no assurance that they will always continue to do so. It is much better and much safer to cultivate the habit of efficient driving, for after all the speedy driver who races past another vehicle at night with headlights glaring, either does not know how to drive a car properly or is extremely negligent. If the same individual was given charge of a machine in a factory and used the same kind of judgment he would most likely be promptly fired as a mechanical idiot.

Night driving at high speed on gravelled or dirt roads is not the safest of occupations at any time. Swirls of dust rising up from speeding cars forming illuminated clouds which obscure the vision of the road, makes it vitally necessary that not only must the driver have all his energies alert but that he must obey to the letter all the rules of the road formulated for safety.

It does not necessarily mean because automobile manufacturers have during the past few years continuously made automobiles faster and more powerful, that these cars should continuously be driven at high rates of speed. "So many miles per hour" is only one of the advantages of improved construction. Ease of operation, flexibility, comfort in riding, are equally as important as "so many miles per hour," general improvement should be accepted as a complete entity not solely as the creation of more speed. Everyday before commencing a trip of fifty or more miles, car drivers will linger around quite a few minutes then drive furiously to their destination, only to again linger around after they get there. Starting a few minutes earlier and arriving a few minutes later would make no material difference and the journey would be much more comfortable and embody a greater degree of safety.

The modern automobile has been made quite safe and dependable, but if the annual toll of highway accidents are to decrease, the average driver must measure up to the standard of the car he drives.

GOOD BYE MR. NEWCOMBE—WELCOME MR. EAGLESHAM—

In a recent issue in our news columns we made reference to the transfer of Mr. Newcombe, District Agricultural Supervisor to Red Deer and the transfer of Mr. Eaglesham from Coronation to the position held by Mr. Newcombe in the Vegreville constituency of which the Tofield district is a part. Quite recently a speaker on a Tofield platform advocating a different group of legislators said, "tell me one thing, one single thing the present government has done for the farmers of Alberta." Well, here is one thing, the appointment of agricultural supervisors. When the present government came into power in 1921 a large number of agricultural societies were in existence throughout the province, most of them depending in a large measure for their financing on the government grant. This grant was very quickly cut off and few papers were more incensed at this action than this one. We held the opinion, and still do, that the agricultural society was capable of being used as a means of improving agricultural quality and increasing agricultural knowledge. It is true that all societies did not live up to the opportunities which presented themselves, but the opportunity was there. But to the place of the agricultural societies and probably just as valuable came the agricultural supervisor.

Mr. Newcombe was appointed to Vegreville constituency and in the course of his duties he made many visits to the Tofield district organizing boys' and girls' live stock and grain clubs [illegible] created energy and enthusiasm among the [illegible] under his guidance the young folks of his territory have been awarded no small share of provincial honors. Pleasant, yet thoroughly efficient, Mr. Newcombe's work will be in evidence long after he has moved to other fields of endeavor. To the older generation too, he was a source of inspiration and practical assistance. He leaves this district with the heartiest wishes for his continued success.

Mr. Eaglesham, his successor, will no doubt ably follow up the work thus began. It is an important work calling for expert knowledge, tact and executive ability. It is made more easy and effective if given the hearty co-operation of the farming community and judging by past history this is fully assured.

Every Alberta government has tackled this problem of agricultural education. Those people who were here in 1911—12—13 will remember the "agricultural schools." A large tent would be erected, a quantity of quality stock brought in and government lecturers would lecture several times a day for a period of four to six days. Out of this grew the permament agricultural schools at Olds, Claresholm and Vermilion.

There are still a few small agricultural societies in existence, kept alive chiefly by the energy and enthusiasm of a few people in their respective districts.

The Gnat

(Contributed)

The gnat is one of the smallest and most insignificant of insects and yet it can deal one a great amount of discomfort. It can spoil the rosiest of dreams. By its buzzing and biting on the balmiest of June days can dampen the ardor of the budding poet. Such are it's powers of causing annoyance that even a full grown man has been known to arise in wrath and try to annihilate the beast. So with this gnat, if he continues, he will try and cause enough discomforts on some subject to someone to cause them to think at least enough to try and swat the beast.

When we leave school whether we just quit, or whether we finish with a grand and glorious commencement we quite generally cease to learn. We invest in a western, true-story or a detective according to our disposition. And from then on, that class of literature becomes the limit of our capacity. We consider that we know it all and in time, and a short time at that, it becomes real pain for us to think at all. We feel society is imposing on us if they try to get us to think of anything deeper than the weather. Of course we would feel very much offended if anyone told us so. Someone has said, "The age of a man may be determined by the pain he suffers in coming in contact with a new idea." Or rather by the pain it causes him to think. So let us keep our thinker supple and active so that thinking is a pleasure instead of pain. Subscribe to some good magazine, preferably one dealing with controversial subjects as they force us to think and keep our brain accustomed to being used, and thereby keep young in mind. They used to tell us that you can't teach an old dog new tricks, but the psychologist tells us now that we can learn easier after we are matured than when we are children if we will only try, but that we will not try.

Every so often we are called upon to exercise our privilege as citizens during a political campaign, and then we take pride in the free country that we live in, and rightly so. But are we worthy of the liberty that we enjoy. Do we really put the effort and study into the issues that they warrent? It seems to the little insect that when and only when a political campaign is in sight do we take any interest in the government. And when an election hoves in sight we as it were grab our old musket, one that some of our ancestors used under conditions altogether different from what they are now sallying forth; loading it with ammunition furnished us by the first windy demagog that comes along telling us that it was made for a gun just like ours. And we begin to shoot at the first object that presents itself on the political horizon and continue to increase our banging until with a final [illegible] and we cast our ballot. Blissfully ignorant that they were probably all blanks. Then we square our shoulders, throw out our chest, draw in our waist line, and strut home feeling that we have done our duty toward democracy until the next election.

Some one has said that man was a social animal and if we as a society, are not a success, it is the fault of the other fellow. We were ready to co-operate to the limit if the other fellow had been willing to do it our way. But society depends on each of us doing our part and each of us giving up to the other. So if things do not work out as we think they should, and we really want to find the remedy, we should not look out of the window but into the looking glass.

We pride ourselves that we live in a Christian civilization but what do we mean by a Christian civilization? Certainly when we look around at the class pride of some of us, the abject poverty in the midst of abundance, our selfishness, our almost utter lack of interest in anything but how much money we can make this year, or made last year; we certainly cannot say that as a nation that we are Christian. But some one will say, "Look at our churches and religious organizations," Yes! We went to church when we were children and we send our children every once and a while, and if the teachers cannot inspire them in the few lessons each year then it is the fault of the teachers or perhaps they are not properly inspired. We ignore our responsibility in assisting in the encouragement and inspiration of both the teacher and the children by our presence and assistance in organization. Are we each willing to do our part and to make a real sacrifice to make this a real Christian Nation or will we be content to lay all the responsibility on The Almighty? For our civilization will be made Christian only by our individual effort and sacrifice.

To often we follow the line of least resistance. The challenge of today is "are we willing to forego some of our immediate pleasure for the joy of service and achievement, which can only be found through sacrifice and service." Let us set an ideal and strive for it; only an egotist would not.

BUZZ

ROBIN "RULE THE ROOST"

Winnipeg, Man., June 3rd.—Since his career with railway life commenced, many long years ago, Osborne Scott, General Passenger Agent of the Canadian National Railways, has been in many tough spots. But none have been tougher than the situation that faced him this morning. For the last two weeks the electric sign in front of the Union Depot has featured "Excursions." A few days after it was installed Mr. and Mrs. Robin built their nest behind the letter "R" and the lady of the house promptly deposited four eggs.

The House of Robin has been the centre of daily attention by the staff since it was built. Now comes the day to change the sign. Mr. Scott carefully worked out the wording for the next sign and issued instructions. His office and that of the electrician quickly assumed the atmosphere of the communistic headquarters and a riot was rapidly taking form. The G.P.A. was waited upon by a delegation and, with dignity tossed to the four winds, was told the sign would not be changed. The robins must not be disturbed, "excursions or no excursions."

After a hectic scene in which the G.P.A. found himself stripped of any authority in this particular matter Mr. Scott retired to a quiet corner and destroyed his original letter. He worked out a new wording which, while not reading so smoothly as the original one, protects Mr. and Mrs. Robin and the expected quadruplets.

LINDBROOK

Well, despite the showers etc., the crops in this district are getting in, and are now getting towards the finish, and given favorable weather conditions a good crop should result.

As usual with the advent of a bit of grass, the price of cream drops, despite the announcement of a prominent official of the dairy industry on tour here from the East, that butter stocks are low. How come? Is this the "just" price, set by the industry or is it always "just" so much per can despite conditions.

It seems that the long cold wet spring has played havoc with the lamb crop here this year.

Mr. Reggie Glenn, formerly of this district, now farming at Bonnyville, Alta., was down here on a visit to his relatives last week.

Mr. R. Glenn brought word of the death at Bonnyville of Mr. Clarence Glenn, son of Mr. Glenn sr. of this district and brother of Mr. W. Glenn also of this district. Interment took place at Bonnyville. The sympathy of the district is extended to the family in their bereavement.

On Tuesday last, Miss Evelyn Glenn of this district and Mr. B. Trainor were married and left for a few days in Edmonton and also Bonnyville to visit the bride's father, Mr. H. Glenn who resides there. Long life, health, wealth and happiness is the wish of all their friends from Lindbrook.

The pupils of this school who were contestants in the festival at Camrose last week, came off pretty well, winning prizes etc. The children were taken to Camrose by Mr. R. Hammerly in his truck.

The chain letter craze is still going strong here, and there's very few who haven't been the recipient of some letters, tho' we haven't heard so far of any amount of shekels being collected as yet, perhaps it is too early. That one in the last Mercury by J. W. Morton was very good. Quite a Q M S. stunt that indent for 5 on ones name. We've seen some of that done.

Mrs. E. Anderson is out of the hospital, but is staying in the city for treatment.

Vol. XVI., No. 20 Thursday, June 13th, 1935 $2.00 Per Year. To U.S.A. $2.50

A Brief History of Ketchamoot

(By Stanley Sears)

The subject of how the Ketchamoot School District received its name on which I have been asked to speak, is one which an old-timer in the country might give you a very interesting talk. However, I have spent several days, and it seems to me nights, in gathering material from the few old timers that remain, and as none of you know any different, you might be interested to know the facts about the subject on which I will endeavor to give to you, in the way I have been able to collect it.

I think it might be more interesting if we go back, say forty or fifty years before it was found necessary to provide a school district to educate the youngsters whose parents moved into this country, of which I am sure we are all proud, even if it does have some funny features. Oh well! you will all have something to tell your children. Just tell them you went sleighing on the second of May and I'll bet they'll say you are crazy. But that's looking into the future and we are interested in the past just now.

Now, to get back to our subject of how the name "Ketchamoot" was originated. For several hundred years this part of the north-west was, as it still is to a certain extent, a hunters paradise. The large lake at our doorstep was known by the Indians as Beaver Hills Lake, long before white man ever saw it. The chain of hills to the west was full of large and small lakes which swarmed with beaver. The large creek which runs into the south end of the lake was called then, as it still is, the Amisk Creek. Amisk being the Cree word for beaver. The hills to the west were covered with a thick growth of forest which swarmed with all sorts of game. During the first part of the nineties this range of hills was swept with a fire, from which it has never regained its former glory. This fire stripped it clean of vegetation and in some parts the soil itself was burnt down to the clay.

Now this rich hunting ground was quite naturally a very bitterly fought over piece of territory. The Crees, who had always inhabited this part of the country and the plains tribes such as the Black Feet, having many battles over this particular part of the country. In telling this I am going to show you how Ketchamoot got its name. In the 1850's the Hudson Bay Company had pushed its Chain of Forts up the river to where Edmonton now stands for the purpose of opening up to country. They at once sent one of their factors or chief traders down to Beaver Lake to trade with the Indians. This was W. Rowland, the father of the Billie Rowland who used to live on the land west of where the creamery now stands, Mr. Rowland senior, having homesteaded that quarter of land.

When Mr. Rowland came into this country he found the usual fighting ground of the Crees and the Black Feet along the Battle River, for about twenty miles on either side. Whether this river received its name in this way I do not know. The Black Feet whose main camp was Sarcee, just outside of where the city of Calgary now is, were proving very troublesome to the Crees at this time and had commenced to make rapid raids around the south west end of the Beaver Hills. So you see in those days they surely went a long way for a good fight. Not wishing to lose this great hunting ground (the Buffalo I think at this time were nearly all killed off in the plains) the Crees in the year of 1860 or 1862 persuaded another Cree Chief to come up from Fort Pitt with 600 braves. This Chief was known as Ketchamoot.

For several days a small army camped on the land where the golf links are now and hunted buffalo for meat.

Now, having been joined by the Indians around Beaver Lake they travelled south-west, passing near where the town of Camrose now stands, and met the Black Feet in a battle south of Wetaskewin. The Crees came out very victorious in this battle, (why shouldn't they, look who their leader was), and captured a large amount of booty including many ponies and twenty squaws. Chief Ketchamoot took one squaw and gave the rest to his councillors. The Chief afterwards, so I have heard, traded this squaw for a horse, which proves he was a very smart man. He liked this country so much he spent the rest of his years here, being buried on the banks of the Creek which bears his name. This is the creek that runs north and west of town.

About the year of 1900, settlement began moving into the district southwest of town. The Owen, Henderson, Coombs, and Black families moving in. With the exception of the Blacks, this land is still in the hands of the children and in two cases the original owner still lives.

In 1906 enough people had moved in to form a school district and a school was built that year. (Old Dad Story, I don't know if any of you remember him, built the school which is still used). Miss Janet Day was the first teacher—I think she is at present in Athabaska. A great-uncle of Margaret Mitchell, Jack Mitchell, was the first secretary, while my father, G. W. Sears, John McGinitie and Doug. Black were the first trustees.

In naming this district the people very wisely decided to have the Old Indians name live on so it was very appropriately named Ketchamoot School district.

In closing I would like to say that we who live and work in this country now, should sometime stop and think of the times when the Red men roamed freely over these fertile plains and hills, of the buffalo killed on the very lands we work and play on and pay tribute to the old timers who helped make the country what it is now.

Local and Personal

Mr. and Mrs. Brady of Edberg visited the Abbott home for the week end.

Mrs. Glover and Mrs. Neath of Edmonton visited at the Coatta home on Wednesday.

The Misses Nellie and Edna Lindsay visited their sister Miss A. Lindsay for Sunday.

Miss Florence Kendall of Leduc spent Sunday at her parents home here.

Mr. and Mrs. McManus of Millett spent Sunday at the Munro home.

The Tofield baseball team played at Bruce on Tuesday night, defeating them 7—4.

On Thursday evening last, Miss Beryl Edwards entertained a number of her friends to bridge. Honors were won by: Ladies' High, Miss A. Lindsay. Consolation, Miss Jean Hull. A delicious lunch was served by the hostess and everyone departed voting a very enjoyable evening.

Mr. B. Baker of Edmonton spent a couple of days visiting at the Worter home this week.

Rev. Harding Priest, Western General Secretary of the General Board of Religious Education, addressed the boys and girls at the Anglican Church at 5 p.m. and the adults at 8 p.m. on Wednesday June 12th. He left Thursday morning for Viking and other points east.

KETCHAMOOT

Ketchamoot annual picnic will be held on Wednesday July 3rd, dinner will be served by the Ladies' Aid. A full line of sports, with something doing all day. Sports committee: Albert Sears, Harold Schultz, Henry McGinitie, Jimmie Ingram. Ground committee: Stanley Sears, Alvin Schutz, Torvel Nomeland, Martin Lawson.

Mrs. J. H. Ingram entertained the Ladies' Aid at her home Wednesday afternoon of last week, most of the members and several visitors were present. The July meeting will be held with Mrs. John McGinitie, the second Wednesday in July.

Mr. and Mrs. Chester Coombes and family and mother, Mrs. McMullen, visited their sister and daughter, Mrs. Mabel Brawn of near Bawlf Sunday.

The many friends of Mrs. W. A. Mitchell regret to hear Mrs. Mitchell is not improving the way she should, under the doctors orders very few visitors are allowed.

Miss Maud Wildman missed school for a few days the first of the week, owing to illness, the first absence for three years.

Mrs. Martin Lawson and mother, Mrs. Lawson motored to Camrose Friday afternoon. They were accompanied by Miss Mabel who visited over Sunday with home folks.

Mrs. M. McConnell, Miss Helen Russell and Harold Schultz motored to the city on Thursday returning home on Friday.

Mr. Johnie Jack and daughter Olive were Sunday guests of the Schultz family.

On June 8, Miss Esther Mae Wiley, only daughter of Mr. and Mrs. Chester Wiley, and Mr. William Henry Ingram, eldest son of Mr. and Mrs. J. H. Ingram, were quietly married in Edmonton by Rev. Hunt of Bonny Doon. After a short honeymoon spent in Edmonton, a reception was held at their home, West Ketchamoot on Monday night to a large crowd of friends. Their many friends wish for them health, wealth and happiness.

Ronning-Matheson Speak Here

A well attended meeting was held at the Variety Theatre on Monday evening when Mr. C. Ronning, M.L.A. for the Camrose constituency and Mr. A. M. Matheson, M.L.A. for the Vegreville constituency addressed an interested audience.

Mr. Harrison was chairman and announced the meeting was a series of two, the next one to be held soon at which Mr. Roper of Edmonton would speak.

Mr. Ronning spoke on the Policies of the C.C.F., and was speaking under the auspices of the local C.C.F. club. He said the people of Alberta had now stepped into a new era where U.F.A., Labor and other groups will be the leaders. The old time political parties, having made their contribution to progress in Canada are now useless and on the discard. The speaker gave much time to social credit saying in effect he was heartily in favor with its aims and objects, but was of the opinion it would not work satisfactorily.

Mr. Matheson spoke briefly but very forcibly, urging the audience not to be stampeded by sensational schemes. Some questions were asked and answered and the meeting closed with the national anthem.

Dance Revue Enjoyed by Those Attending

The Dance Revue, which could just as easily been named a Variety program, staged by Horace McHeffey, was held on Friday and Saturday of last week. The program was a very creditable one and included enough variety to please all who attended. Due perhaps to so many concerts, meetings, etc., held recently and by the season of the year, the number present both nights was not as large as hoped for or expected. Nevertheless those present applauded heartily and every number was encored.

The complete programme was published in our last issue and perhaps it is now sufficient to say that each and every number was ably and creditably given. While not amassing wealth on the venture, Mr. McHeffey is to be congratulated on the general versatility and attractiveness of the program.

LOCAL MEMBERS OF O.E.S. ATTEND GRAND LODGE AT EDMONTON

Seventeen members of Ionic Chapter O.E.S., Tofield, attended sessions of the Grand Chapter at the McDonald Hotel, Edmonton on Wednesday and Thursday June 5—6.

Honors received by the local chapter were the appointments of Mrs. N. M. Beirnes Grand Warden; Miss Thelma Noland, Page; and Mr. O. P. Thomas, acting Grand Organist for installation of Grand Officers.

Floral marches and drills, installation ceremony on evening of June 6th were given by Ionic Chapter, Tofield, under the supervision of Mrs. Bertha Lee, Worthy Matron.

Complimenting Miss Mae Wiley, popular June bride, Mrs. L. Carlisle entertained a large crowd of friends to a shower at her home Friday afternoon of last week. Many beautiful and useful gifts were received by the bride. She was assisted by Miss Hazel Sears and Miss Gertie Ingram in opening her many parcels. Those present were: Miss Mae Wiley, Mrs. Wiley, Mrs. J. H. Ingram, Mrs. Davison, Mrs. Nickerson, Mrs. T. D. Ferguson, Mrs. Appleby, Mrs. Smith, Mrs. Cookson, Mrs. Williams, Mrs. Earl Wilson, Mrs. McCowen, Mrs. Peter Lee, Mrs. Henderson, Mrs. Torrie, Mrs. Harrison, Mrs. Henderson, Mrs. John McGinitie, Mrs. Henry and Leslie McGinitie, Mrs. John Brown, Mrs. Roger Ray, Mrs. Roy Lee, Mrs. Earl Carlisle, Mrs. Brick, Mrs. Barnes, Mrs. Ralph Barnes, Mrs Shupe, Mrs. Nomeland, Mrs. George Lawson, Mrs. H. Lawson, Mrs. Whillans, Mrs. John Lee, Mrs. McMullen, Mrs. Coombes, Mrs. Joe Sutton, Mrs. Berreclough, Mrs. Sears, the Misses Mildren and Gertie Ingram, Selma Nomeland, Hazel Sears, Janet Brown, Helen Manning, Irma Shupe, Margaret Mitchell, Signie Winder, Ingrid Surelle, Maud Wildman, Marie and Evelyn Lawson.

Are You In The Mood for

Writing a Letter

or—

Making a Call?

Then why not drop a line to the Tofield Mercury enclosing renewal subscription — or better still call at the office. We cannot and will not promise you prosperity in so many days, but we can and will promise you fifty-two issues of your home town newspaper, entirely produced here at home.

You can keep in touch with reports of meetings, political and otherwise, read the occasional home brew free lance comment on the news of the day, follow the doings of your district through the local correspondence, keep tab on the arrivals and departures, read school board, town council and municipal minutes. You can follow the fortunes of the local sporting organizations, baseball, soft ball, curling and hockey. In fact if you live in the Tofield district and have your interests in the Tofield district, you will find the Mercury worth the small sum it costs. Just two dollars a year. There are bigger and better papers of course, but as a country weekly published in a comparitively small district, your home paper averages up well. For seventeen years it has been published weekly and we are proud to say we still number on our list a number of the original subscribers. In these days of many new movements, why not join a "subscribe to the home paper" club. There is nothing to lose and something to gain.

THE MERCURY

STATISTICS

[illegible] which are heaped on statistics should be directed at [illegible] who attempt to interpret the [illegible] rather than at the statistics [illegible]. After all, statistics are [illegible] a record of facts expressed [illegible] form of figures. Facts are [illegible] the interpretation of facts [illegible] be faulty.

[illegible] people are interested in blood pressure. For one thing, they want to know what is the normal rate. The truth is that there is no such thing as a normal blood pressure. Statistics give the average pressure of persons who are apparently normal. Individually, we are not average persons, and we may still be normal even if we do not conform to the statistical average.

It is only some fifty years ago that practical apparatus was devised whereby physicians could measure the blood pressure. The use of the sphygmomanometer is now a regular part of the medical examination. It is one of the most useful aids which the physician has at his command.

The blood must be under pressure in order that it may circulate. The pressure depends upon the heart, the blood vessels, the blood itself and the condition of the organs through which the blood passes. Not only may the blood pressure be effected by changes in all or any one of these, but it is also influenced by the emotions.

In certain cases, increased blood pressure, or hypertension, is found to exist without any apparent cause. The person himself is unaware of it, and it is fortunate for him if it is detected at a periodic health examination before any harm has resulted. Such hypertension is known as an essential hypertension. It occurs most commonly among those who live a strenuous or worrying and energetic life taking no time for relaxation. [illegible] show that men who are above the average weight are frequent victims.

Prevention lies not in drugs, but in good health habits. Avoid over-eating and so avoid over-weight. Eat in moderation of a wide variety of foods, making sure to include milk, green vegetables and fresh fruits in the diet. Moderate exercise at something which is enjoyed provides a part of the relaxation—physical and mental—which is required by all. Sufficient sleep is essential. All of this may be summed up by saying—live a reasonable, hygienic life, forget statistics and so control your blood pressure.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

WHEAT POOL DELEGATES NOMINATIONS

Nominations for Alberta Wheat Pool delegates are now being called for and membership lists with nomination forms have been supplied to all Wheat Pool members.

To be nominated a man must be a member of the Wheat Pool, residing in the district for which he is nominated and there must be the signatures of Ten Wheat Pool members on his nomination form. This nominee must also sign his consent on this form.

The form when properly filled in must be returned to the head office of the Alberta Wheat Pool before 5 p.m. on June 30, 1935.

It is suggested that the membership interest themselves in the matter of nominating delegates as it is through this method that the democratic principles which govern the organization operate. Alberta Wheat Pool Budget.

The amount of branded beef sold in Canada during the month of April, 1935, was 2,290,714 pounds. In April 1934, the amount sold was 1,963,022 pounds.

BEE KEEPER'S FIELD DAY at the DOMINION EXPERIMENTAL STATION, LACOMBE ALBERTA

A Bee Keepers' Field Day will be held at the Dominion Experimental Station, Lacombe, on Monday, June 17th, 1935. The program starts at 1:30 p.m. Mr. C. B. Gooderham, Dominion Apiarist, Central Experimental Farm, Ottawa, will be visiting the Station and will discuss the care and management of bees.

The Dominion Experimental Station, Lacombe, has a well kept apiary supplied with modern equipment, thus provides excellent facilities for demonstrating the care and management of bees.

Mr. Gooderham is an authority on all matters pertaining to bees, hence a visit to the Station on this day will make it possible to secure first hand information on bee keeping from an outstanding authority.

If you are interested in bee keeping be sure to visit the Station on this day. Come early and bring a picnic basket for lunch. Coffee, cream and sugar will be provided by the Experimental Station. The program will start at 1:30 p.m., but come early and look over the many other lines of experimental work before lunch.

"TURRET TOPS" WIN SUN SWEEPSTAKES IN OFFICIAL TESTS

Oshawa, Ont., June 7—Motor cars that are cooler in summer and warmer in winter, as compared with previous models, are promised by the findings of official observers of the A.A.A. in which General Motors cars with solid-steel Turret Tops were subjected to temperature tests in comparison with fabric-roofed bodies. The tests, sponsored by Fisher Body, were conducted under the tropical sun at Key West, Fla., southermost city of the United States, and 375 miles farther south than Cairo, Egypt. Serving with the members of the contest board of the American Automobile Association as an assistant was Kaye Don, British sportsman who has set numerous speed records on land and water.

The test consisted of making simultaneous temperature records of interiors of Turret Top cars under a blazing sun. All windows and ventilators were closed tight during the tests.

Results of Tests

According to the findings of the testers, the steel top cars are slower to warm up when standing in the sun with all the windows and ventilators closed, and are quicker to cool off after the ventilators are opened.

Slower heating is credited to three factors: First, the highly polished surface of the steel top deflects the sun's rays; second, heat absorbed by the top is rapidly distributed over a great area by conduction, and dissipated by the cooling effect of areas not receiving the full heat of the sun; third, the special corrugated and checkered quarter-inch felt insulation, and the dead air space between this insulation and the head lining, effectively prevent the transmission of heat from the roof to the interior space.

How Trials Were Staged

All tests were conducted in an open field so that no heat could be reflected from the ground or from surrounding buildings. The test cars were placed in a line and two non-participating cars were placed at either end to equalize conditions for all trial models. After the cars were lined up the windows, ventilators and hoods were opened to reduce the engine and body interiors to the approximate atmospheric temperature. Then the cars were securely closed up and the "heat-resisting" trials started.

The trials were started promptly at 11 a.m., so that the sun's maximum heat could be "turned on" the bodies. At no time during the tests did a wind exceed a 10-m.p.h. velocity.

The effect of the insulation in barring outside heat will apply similarly in cold weather to prevent the loss of heat from inside the car, so that the car that is cooler in the summer will be warmer in the winter.

The total gross agricultural revenue of Canada for 1934 is estimated at $931,247,000, as compared with $802,846,000, the revised estimate for 1933. This represents an increase of $128,401,000 or 16 per cent. There are increases [illegible] from all items, [illegible] being shown in field [illegible] farm animals, and dairy products.

MOSQUITO REPELLENTS [illegible]

[illegible] given by [illegible] Dominion [illegible] annual meeting [illegible] Mosquito Exter[illegible] the notable [illegible] the Entomological Branch of the Dominion Department of Agriculture in mosquito control in Canada. As in years past, the officers of the entomological service have assisted [illegible] in advising and directing [illegible] campaigns in co-operation with municipal, civic, and other authorities throughout Canada. These entomologists have not only evolved practical methods of control and exter[illegible] but also numerous effe[illegible] for use under all cor[illegible]. Ten repellents which ha[illegible] efficiency since th[illegible] a few years ago [illegible] Mr. Gibson as having been again subjected to a series of comparative tests by officers of the Branch. Following the tests, the repellents were classified as follows:—

(1) Those which may be used on tender skin

(a) Dunn's No. 1

Oil of citronella, [illegible]
Spirits of Camphor, [illegible]
Oil of tar, [illegible]

A WORD ABOUT THE BANKING FUNCTION—

Editor's Note:—The following article by H. B. [illegible] in the Christian Science Monitor carries no political [illegible] Many readers have heard a great deal [illegible] money." Here is an exposition of [illegible] economic writer.

ONE FINDS no abatement of the tendency on the part of the laity to think of bankers as rascals! Not for their excessive confidence during the boom decade. Not for any mistakes of which any of their number might have been guilty in performance of their duties. Not for the competitive [illegible] loans which succeeded the competitive [illegible] borrowers. No, the new charge [illegible] bankers "make" money in the physical sense [illegible] an indictment of the function of the b[illegible] their conduct. To those who have lately come to realize the banking function, it is [illegible] nothing short of heinous. The lending of "made" [illegible] at interest, indeed, has come to wear the appearance of forgery!

It is perfectly true that [illegible] money in this physical sense. Some [illegible] to discourse on this function [illegible] seemed so fantastic as to be [illegible] the exposition was lamely written. An[illegible] wasn't printed. The notion still [illegible] money lent by bankers was the money [illegible] deposited by depositors. It is [illegible] know which comes first [illegible] solution of the puzzle [illegible] according to banking authority, Mr. R. [illegible] McKenna is the head of the Midland [illegible] biggest bank, I believe in the world. In [illegible] addresses a few years ago, he said:

> The amount of money in existence [illegible] only with the action of the banks in [illegible] or diminishing deposits. We know [illegible] fected. Every bank loan creates [illegible] every repayment of a bank [illegible]

Time and again the [illegible] The Douglas movement makes [illegible] prised that it has not yet reach[illegible] Mr. McKenna's admission [illegible] strenuously [illegible]

The proof of Mr. McKenna[illegible] the bank statements. Total [illegible] of the Federal Reserve System [illegible] amounted to just short of $[illegible] there was another $10,000[illegible] banks. But total currency [illegible] 000,000. Clearly there could [illegible] ing deposit of [illegible] mount of dep[illegible] How[illegible] ing? Just as Mr. McKenna [illegible] the action of banks in [illegible] "creation" being the legal [illegible]

Such a realization [illegible] to the uninitiated. [illegible] taken them. They say [illegible] ey out of thin air. Or b[illegible] implication is that [illegible] the banker cannot help i[illegible] Let us stop to think. If [illegible] there have been [illegible] there had been? Of course [illegible] banker, with his printing p[illegible] ed on Easy Street. We know [illegible] been as uneasy as any other member [illegible] ically harassed community [illegible] ing" ruined instead of saved h[illegible]

The creation of money i[illegible] is the creator, the bank; there i[illegible] businessman. The two [illegible] businessman comes along [illegible] creating business activity [illegible] in advance to bring [illegible] will produce an addition to t[illegible] out of the employment of [illegible]

The entire process coul[illegible] banker. But, as John Stuart M[illegible] machine for accomplishing the [illegible] commodiously. It is so conv[illegible] sians have swallowed all t[illegible] economy" and have gone [illegible] vious that there should [illegible] by the entire community [illegible] ponsible function of mone[illegible] ed.

Otherwise we would hav[illegible] and all the terrible evils of d[illegible] those specialized institutions kno[illegible] ating banks.

The good banker does n[illegible] he realizes that he is help[illegible] tion. So he gets evidence of [illegible] of a promisory note from [illegible] or without documents sh[illegible] in transit. Thus the debt to [illegible] another debt by the banker. Thi[illegible] promissory note and coll[illegible] when the businessman p[illegible] red is an exchange. And [illegible] er earns his profit for ori[illegible] businessman earns his [illegible] it is used.

Now, when this bank [illegible] it simply disappears. It [illegible] difficulty of comprehending t[illegible] cause, as stored in one's ban[illegible] [illegible] and symbol of our individual wealth. [illegible] whole, however, it is merely a con[illegible] the great wheel of circulation, as, I think Adam Smith calls it. You reckon community wealth by its exchanges and by nothing else, car loadings, business activity, bank clearings, etc. If sand impedes the flow, watch how money stored up in an individual's account either melts away or freezes up!

At present the banks are chockful of money, let [illegible] the money-making function, and yet are so hard pressed they are reducing their dividends. If [illegible] were a racket, why can't the bankers go out in the streets and spend the money? For many [illegible]. The one that will keep our exposition on its [illegible] is because money can be advanced only as [illegible] of a dual function. In this connection some writers contrast money with train tickets. Somebody must dish out the tickets. And that somebody must be responsible enough to dish them out only when people have reason for taking a trip. The title [illegible] of these would-be travelers is mobilizable wealth plus confidence. They are called businessmen or enterprisers. At present travel requests are relatively meager.

The power of money-creating is indubitably the [illegible] power in the community's disposal. Whether it should be held privately or publicly is a problem which will continue to provide much food for argument. In it there are many factors to be considered. But first of all the nature of the function should be understood.

H. B. E.

[illegible] CROP REPORT NO. [illegible] 1935

[illegible] recorded in [illegible] of wheat [illegible] interests of the [illegible] In a few [illegible] northwest a[illegible] where the land [illegible] of thoroughly [illegible] has been pra[illegible] the season and [illegible] replaced by coarse [illegible] grains [illegible] completed. [illegible] the ground [illegible] generally spea[illegible] healthy [illegible] where moisture and [illegible] right as to bring [illegible] grains [illegible] the province [illegible] further reduction th[illegible] estimate will not [illegible]

GAS PRICE DROPS AS TAX INCREASES

The sale of gasoline represents approximately five per cent of the total retail trade of Canada and while the cost of this commodity has declined steadily since 1924, the average tax per gallon collected by the provincial governments has increased twenty-fold in the same period.

Figures recently compiled for 1933, the latest available, show the total retail trade amounted to $1,776,884,000. Of this, it was estimated $86,227,096 was spent on gasoline.

Except in the provinces of Quebec and British Columbia, the production of creamery butter in Canada for the three months ended March 31, 1935, showed a decrease. The amount produced in all Canada was 23,000,171 [illegible], a decrease of 8.8 per cent compared with the corresponding three months of 1934. For the month of March, 1935, for all Canada the decrease from March, 1934 was 10.6 per cent, Quebec alone registering an increase in production.

LIVE STOCK MARKETING BOARD NOT ABANDONED

Emphatic denial of statements to the effect that the Alberta Live Stock Marketing Plan has been abandoned was made by members of the provisional Alberta live stock marketing board during a three day meeting [illegible] Calgary last week.

"We [illegible] engaged [illegible] plan that will [illegible] Marketing [illegible] seen any [illegible] satisfactory [illegible] for their approval [illegible]"

The live stock [illegible] a plan affe[illegible] dustry rated [illegible] f dollars an[illegible] and that due ca[illegible] concerning [illegible]

"When a [illegible]

[illegible] al board [illegible] High River; Fred M. D[illegible] C. McKinnon, Dalemead; [illegible] ray, Tofield; George R. [illegible] H. P. Wright [illegible] ton; H. R. Beatt[illegible] George C. Millar, Taber; [illegible] Wembley.

WIT And WISDOM

One Place Left

The railway carriage [illegible] as the young man ope[illegible] and asked in a sarcast[illegible] this Noah's Ark?"

"Yes," was the rep[illegible] grumpy man in the co[illegible] here except the ass. C[illegible]

A widower describe[illegible] as "The [illegible] Experience."

Already a Veteran

[illegible] your daughter [illegible] Do you [illegible] is ready for the [illegible] "She should be [illegible] engagements already."

The Busy Bee

[illegible] one day [illegible] in the country [illegible] old lady [illegible] tea [illegible] had a [illegible] plate. [illegible] ma'am [illegible] keep a bee."

No Danger

[illegible] you are [illegible] apologized [illegible] as he cashed the [illegible] with soiled currency. "Don't worry," sa[illegible] "A microbe [illegible]"

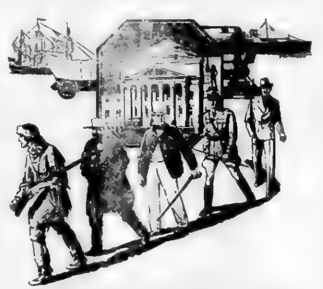
[illegible] true" often are.

Will He Never Learn

[illegible] "I've been [illegible] Bessie!" He: "Yes, but [illegible] and I'm broke."—The [illegible]

Not That Kind of M[illegible]

[illegible] an artist [illegible] so real a ma[illegible] trying to get it down [illegible] "Sorry, but I [illegible] not." [illegible] know [illegible] do such thing [illegible] that you made." M[illegible] "I may be a [illegible] as a clerk [illegible] will depend upon [illegible] will be paid according [illegible] worth. Is that [illegible] "Oh yes, I [illegible] able to afford [illegible]"



BANKING IDEALS THAT LIVE ON

"The value of that enterprise (the Bank of Montreal) ought not to be measured by its success as a joint-stock undertaking [illegible] the amount of its capital or the [illegible] dends, but by the security it has given [illegible] those who have trusted it, the fa[illegible] it has furnished for the exchange and [illegible] use of commodities, and the assis[illegible] it has contributed to the development of the country."

The Bank, now well on in the second century of its life, still wishes to be measured by the considerations mentioned in the foregoing quotation from "The Centenary of the Bank of Montreal," published in 1917.

Security, facilities, assistance—those have been the objectives of the Bank since its foundation in 1817. They are the objectives today and will be in the tomorrows of Canadian life.

THE BEEF MARKET IN GREAT BRITAIN

The beef market in Great Britain is not only of major importance to the home producer but also to rearers of beef-cattle in Canada, Australia and South America. In an article on the development of the beef-market in Great Britain in the April issue of the Empire Journal of Experimental Agriculture Dr. K. Murray and Prof. J. A. Scott Watson present a statistical survey of the subject, emphasize present trends and indicate their causes, and finally attempt to foretell what may happen in the future.

The per capita consumption of meat in Great Britain rose from 25 lb. in 1871 to 141 lb. in 1923-4—1927-8. Of this increase 39 per cent was due to increased population and 61 per cent to increased consumption. Future increase in meat consumption it is held will depend far more upon per capita consumption than upon increase in population.

Whereas the per capita consumption of mutton, lamb and pig-meat has greatly increased during the period 1925-26 —1932-3, that of beef and veal has fallen from 70 to 66 lb. In this period the home output has risen from 602,000 to 607,000 tons, but imports have fallen from 773,000 to 717,000 tons. In the four years 1927-31, about 45 per cent of the average annual supplies was home-produced, 35 per cent was imported chilled beef, 10 per cent imported frozen beef and 7½ per cent imported fat cattle. The character of the home supplies has changed considerably in the last 50 years. For example, cow-beef has increased and beef from steers and maiden heifers has diminished. Since 1929, consumption of imported chilled beef has increased at the expense of frozen and home-produced beef.

Changes in price of the various grades of beef have been determined much more by changing demand than by supplies (except seasonal variations in the home supply), and demand has been mainly governed by purchasing power. The popularity of chilled beef is not only due to its relatively low price but to the uniformity of the product.

In recent years markets which have hitherto absorbed foreign beef have been closed and supplies have been diverted to Britain. After failing to help the beef producers by restricting foreign supplies, the British Government is now paying them a direct subsidy. A principal reason why the demand for home killed beef has fallen is the increasing supply of inferior cow-beef, which results from the expansion in the dairy industry. Another is reduced purchasing power of the people.

Here and There

Two or three times as much rainfall this year between April 1 and May 8 on the Prairies as compared with the same period last year makes the outlook for the 1935 harvest similar to that at the same time of year in 1932 when the largest crop since 1928 was recorded, states T. S. Acheson, general agricultural agent of the Canadian Pacific Railway in the West.

Leonard J. Pohlmann, travelling passenger agent, Canadian Pacific Railway, with headquarters at New York, was recently elected vice-president of the American Association of Travelling Passenger Agents of New York. Mr. Pohlmann has been a member of the association's executive committee for the past year.

Hotel Saskatchewan, Regina, distinguished itself recently by staging a Chinese Mandarin dinner dance, said to be the first of its kind on this continent. As stage decoration there was used a hundred-foot runner and side drapes, hand-made by Chinese many decades ago, and insured while in use at a valuation of $4,000. The orchestra was in Chinese dress and provided music with a decidedly Eastern background.

T. J Jackson, who has just been appointed first assistant manager of the Royal York Hotel, Toronto, in succession to Cyril Chapman, promoted to the post of manager of the Seigniory Club of Quebec, started as cashier at the Chateau Frontenac in 1926, and has had rapid advancement to his present high position.

To Charles Montgomery, one-time switch-tender and at present elevator operator at the Canadian Pacific uptown office building in Winnipeg, go all honors for having constructed what is probably the most perfectly finished model of a locomotive on the continent. It is a five-foot replica of a Canadian Pacific class "2300", finished in brass and copper, and took five years to construct.

Out of active service for some years past, Canadian Pacific liner Melita has been sold to Italian shipbreakers. She was built in Glasgow in 1918.

"Never betray a trust; be honest; do what other men can do; and work your eight hours a day," is the recipe for success enunciated by Caleb R. Smith, international chairman of the Million-Dollar Round Table, speaking to the Life Underwriters in convention at the Royal York Hotel, Toronto, recently.

James G. Millar, Medicine Hat, veteran Canadian Pacific engineer, recently celebrated his 82nd birthday, when railway acquaintances and relatives gathered to congratulate him. He was born in Drummondville, Que., and has been drawing a railroad cheque for more than 64 years.

A couple of score of fine old railroaders who five decades ago helped push the steel around the north shore of Lake Superior for the Canadian Pacific Railway, gathered near Jackfish, Ont., recently, to re-enact the driving of the last spike at Noslo on May 16, 1885. Alex. Anderson, Port Arthur, who held the spike when it was driven fifty years ago, drove home a new gilded spike with a vigor that belied his 81 years.

PUBLIC SALE OF LANDS UNDER THE TAX RECOVERY ACT, 1929

Municipal District of Cornhill, No. 467

Notice is hereby given that, under the provisions of The Tax Recovery Act, 1929, the following lands will be offered for sale, by public auction, on Thursday, the 27th day of June, 1935, at 2 o'clock in the afternoon, at the office of the Municipality, Tofield, Alberta:

A LITTLE COMPANY GROWN BIG

IMPERIAL OIL was a little Company in 1880. There was then only a handful of employees. A dozen or so products were the Company's stock in trade.

Today nearly 18,000 Canadian men and women are engaged in making and selling 714 different Imperial Oil Products. So, counting their families, there are about 90,000 people directly dependent for livelihood on this Company and its operations. 90,000 is a lot of Canadians.

Imperial Oil's growth depended upon more than growth in population and demand. Fair dealing, honest value and the ability to meet new needs with new products and new services all played their part. Of course, a loyal, capable staff was indispensable. Such a staff was built up by fair and considerate treatment. Good wages, sickness and death benefits, retirement pensions, group insurance, industrial councils—these are some of the measures by which the Company has recognized its responsibility to the men and women in its employ.

These men and women have recognized in turn their responsibility to the Company. By loyal, whole-hearted service they have helped it to make better products at lower cost and thus become "a big company."

IMPERIAL DEALER

Tofield Sports Day to be Held Dominion Day, July 1

Full Line of Sports, Baseball, Softball, Athletic Events, Races

Tofield will again hold its annual celebration on Dominion Day, July 1st. At a meeting of the Sports Day Committee held at the Town Hall on Monday night of this week, plans were laid to make this celebration day one of the best held here. The regular line of sports activities will be followed similar to previous years which have been outstanding successes. Baseball as usual will be the major attraction, but will be flanked by other attractions such as soft ball, basketball, races etc. There will be the usual facilities for the thirsty ones to buy all the pop and lemonade and ice cream their pocket books and physiques will stand and for those who like the Juicy Red Hot (the packing industry's fancy name for Hot Dogs) Bellamy and McCarthy will be on hand prepared to feed all and sundry. The United Church Ladies' Aid will operate a booth, serving lunches. Given fine weather, the day promises to be a day of real celebration.

The following officers and committees were appointed:

President, W. Worton, Secretary-Treasurer, A. B. Clutterham.

Baseball Committee, Bert Calvert and Joe Kallal.

Booth Committee, T. McBratney, W. Duckfield, J. G. Jobb, E. W. Rogers, Wm Taylor, S. Yakabuski

Hot Dog Stand, W. Bellamy, D. McCarthy.

Race Committee, John Bailey, W. Bailey, W. Duckfield

Softball Committee, Einar Moen, Cliff Ward, Paul Thomas.

Grounds Committee, W. Kendall, F. Griswold, Mr. Burroughs, T. Walkington.

Advertising Committee, President and Secretary.

Basketball Committee, Frank Dunn and W. McIntyre.

Dance Committee, W. Bellamy, A. B. Clutterham, Geo. McLaughlin.

CORNHILL MUNICIPAL COUNCIL MEET

A regular meeting of Cornhill Municipal Council was held on Friday last.

Mr. A. L. Smith on behalf of the Tofield Board of Trade interviewed the council re gravelling the north road to Ross Creek. He pointed out that over a period of years the Council would actually be money ahead by entering into an agreement with the provincial government whereby the government paid 60 per cent of the cost of constructing the road and took care of all maintenance thereafter. He received a favorable hearing and providing other municipalities are favorably disposed to entering into a similar agreement with the government the indications for the gravelling of the north road are bright. This road will be a continuation of a secondary government highway from the south.

A resume of the minutes of the council meeting will be published next week.

PUBLIC MEETING
under the auspices of the local C.C.F. Group
will be held on
MONDAY JUNE 24th
at 8:00 p.m.

FAREWELL RECITAL

On Wednesday afternoon of this week, Mrs. Pincott held the farewell recital for her violin and elocution pupils at her home, on fourth avenue.

Over thirty were present, both gentlemen and ladies, and all voted it an afternoon well spent. The program consisted of eleven numbers, with encores, and at the close, Mrs. Allen suggested a show of appreciation to Mrs Pincott for the pleasant afternoon provided, which was heartily acceded to. For the closing number Mrs Pincott gave a reading and asked the audience to suggest a favorite, the result being three encores, after which a delicious lunch was served, the Misses Minnie McAllister, Euphemie McBratney and Betty Pincott looking very smart in pink and white organdie dresses with white aprons, laced trimmed and lace headresses to match, served as waitresses. The entire program follows:

Pleyel Duette for Violins, Mr. Wallace and Mrs. Pincott. Encore, Romance.

Violin Solo, Albert David, "Simple Area"—F. Thome. Encore, "Simple Confession, (with mute).

Reading, Kenneth Imler, "Seein' Things at Night." Encore, "Sweepin' Out "

Violin Duette, Kenneth Baptist and Mrs. Pincott, "The Sunset." Encore, "The Woodland Path."

Duette, Marvin Ward and Mrs. Pincott, "The Boy Scouts." Encore, "Oh, Come All Ye Faithful."

Reading, Fern Imler, "Since Will Turned a Boy." Encore, "Aw Gee Whiz."

Duette, Joseph Kallal and Mrs. Pincott, "The Ballad Dancer." Encore, "Flow Gently Sweet Afton."

Violin Solo, Betty Pincott, "The 'Cello Player." Encore, "Vesper Bells."

Reading, Doris Cantin, "Two Little Girls," The City Girl, The Country Girl in costume. Encore, "Scrapin' the Frostin' Dish."

Maze Duette, Thelma Kortman and Mrs. Pincott. Encore, "Romanse."

Reading, Mrs. Pincott, "The Fire at the Nolans." Encore, "Betty at the Ball Game," "Angelina" and "Molly."

SHORTHORN FIELD DAY

The Northern Alberta Shorthorn club is planning to hold a field day last Saturday in June at the farm of Claude Gallinger where there will be Judging contests, demonstrations of Shorthorn type, inspection of his fine herd and short speeches. Mr. Gallinger is president of the club.

Miss Marjorie Carlton of Vermilion visited a few days with her sister Mrs. Joe Sutton, who accompanied her as far as Edmonton, Monday.

Mrs. J. H. Ingram has been under the doctors care for the past week but is now on the mend.

Miss Irma Shupe and Mr. George Simpson motored to Armstrong, B. C., for a two weeks visit with Mr. Simpson's home folks.

Mrs. Younie of Edmonton, came on Monday to help care for her sister-in-law, Mrs. W. A. Mitchell.

The sports committee and representatives of the Ladies' Aid held a meeting at the Sears home Monday evening. The boys have the sports pretty well rounded up for the picnic of July 3rd. Weather permitting, we think it will be the best yet. Chicken dinner and supper will be served by the ladies of the community, "hot dogs" and refreshments at the stand. Everyone welcome. Admittance free.

Born: To Mr. and Mrs. Alvin Lehman, nee Goldie Soma, on Friday June 14th, a daughter. Congratulations.

Miss Irma Shupe entertained the Junior U.F.A. at the home of her parents, Wednesday night of last week, most of the members being present. Miss Ethel Coombes gave her report of the convention University week in Edmonton. James Ingram gave a paper on the new governor-general, John Buchan. The meetings seem to be very entertaining to the young folk. A nice lunch was served and all reported an enjoyable evening.

Messrs Forest Daley and Bob Cameron of Ashmont are visiting at the Coombes home. Mr. Daley is a nephew of Mrs. Coombes.

A goodly crowd gathered at the church on June 6th when Professor Solheim from Camrose conducted a service.

Mr. A. Haugen left recently for Washington where he will visit with friends and relatives. Just before he left he received the sad news that his brother who lived in Washington had passed away.

The concert to be given by the C.C.L. students and choir in the church here last Friday, had to be postponed on account of bad roads.

Mrs. H. Hillerud entertained the Ladies' Aid on Tuesday of last week. About fifty people including members and visitors were present.

Several from here attended the political meeting addressed by Mr. C. Ronning, M.L.A., and A. M. Matheson, M.L.A. held in Tofield last week.

Mr. and Mrs R. O. Berg motored to the city on Monday of last week returning the same evening.

Mr. A Erickson made a business trip to the city recently.

Gladys Olson left for Edmonton last Friday evening to write her music examination. Her mother accompanied her, both returning Monday evening.

Mr. S. Olson, who takes care of the C.N.R. tanks and pump at Shouts has been enjoying a few weeks holiday.

Mr. and Mrs Annelse, Hermie, Arthur and Palmer, and Jennie Berril were callers at the Flaaten home on Sunday evening.

Mr. and Mrs. E. A. Moen motored to Lindbrook Monday evening to visit with Mr. and Mrs E. Anderson. Mrs. Anderson who is Mrs. Moen's sister-in-law is quite ill. We all hope she will improve.

Mrs P. O. Flaaten visited at the Berrill's home last Sunday.

Evelyn Hillerud, Hilmar Moen and Arnold Berg, visited at the N. Solberg's home last Sunday.

Allan Pearson who lives near Bentley motored up to visit his parents here for a few days last week.

YES - - it's true

That "The Mercury" is owned by an individual. It's his property and he must pay the bills and assume all responsibilities. On the other hand, it is also true that somehow or other the public looks upon the community newspaper as being partly their property. The community expects its public institutions to be defended, to be favorably reported, to be kept in good report throughout the district and the province. Churches, societies and organizations look for and expect their activities to be reported in their home paper. And the home paper does all these things—likes to do them. This being so, it is only human that the owner of, and those who are employed at the local newspaper office should expect that all these various interests would return the compliment through giving it printing orders. If all the printing requirements of Tofield were to be printed in Tofield, "The Mercury" would have to nearly double its present staff.

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

CONSTIPATION

Constipation means delay in the passage of the contents of the intestines. A regular evacuation once a day is apparently a desirable health habit for most people. Failure to secure regular bowel action leads to various disturbances of the body. In some cases, these are marked and rather severe; in others, they are but slight.

The most common [illegible] of constipation are headache, foul breath, loss of appetite and a sense of weakness or depression. Continued constipation is apt to lead to an irritation of the bowel and to the occurrence of Haemorrhoids.

Constipation may itself be a symptom of some diseased or abnormal condition of the body. It occurs most commonly when any of the abdominal organs, such as the stomach, appendix or gall-bladder are diseased.

Constipation, as it usually occurs in a chronic form, is the result of neglect. It is a failure to heed the impulse to evacuate the bowel, or, as it is often expressed, to "answer the calls of nature," which leads to a dulling of the sensation.

It follows that the most important point in overcoming constipation is the establishment of a regular toilet habit. The bowel can be trained. The swallowing of food is the beginning of waves of contraction which pass along the intestinal tract. The natural time for evacuation is a half-hour after eating, and a time which is convenient and unhurried should be selected. At that time every day, without fail, the toilet should be visited until the habit is established.

Most cases will be helped by proper diet. Fruits, vegetables, salads and whole-grain cereals provide bulk and roughage. The use of such foods should not be carried to excess as harm may result from overloading the bowel with a large mass of indigestible roughage. Those whose constipation has been associated with colic and distress when the bowel is evacuated should not add bulk and roughage to their diet.

Exercise which is taken daily, such as an hour's walk every day, brings the abdominal muscles into use and is helpful, as is also drinking a glass or two of water upon rising and between meals. The case of constipation which cannot be corrected by persistent attention to regularity of toilet habit, exercise and diet requires medical treatment which must be prescribed for each individual, depending upon the actual needs of the case.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

MOUNT ROBSON GOOD SPOT FOR HOLIDAY

Mount Robson, B.C., June 17—Among the many delightful spots in the Canadian Rockies is Mount Robson, B.C., where log cabin accommodation will be furnished this summer under the management of Hargreaves Bros., located at Mount Robson Station B.C., on the Canadian National Railways, just west of Jaspey National Park, Alberta.

It is announced that the camp at Mount Robson Station will open on June 1st and close September 30, special accomodation being arranged for large parties, including hunters in the late season. The camp at Berg Lake will be open for tourists from June 15 to September 10, but will be open after this date for the benefit of hunters and other visitors by special arrangement. This camp, consisting of comfortable log cabins, suitably furnished, is situated in the centre of a region unsurpassed in opportunities for the alpinist, nature lover and big game hunter.

CARCASS GRADING OF HOGS PROVING POPULAR AMONG FARMERS

As a result of the rapid development of carcass grading of hogs on an voluntary basis, the packers in Eastern Canada have decided in response to the demands from hog producers to have all their plants equipped to handle the new system of grading by July 15, 1935. Any farmer, however, who desires to market his hogs on the basis of live grading, which has been a Dominion Government compulsory regulation since 1922, may do so; rail grading, however, is to be optional. It is anticipated that if carcass grading continues to expand it will soon become effective throughout the Dominion. Last September it was introduced at the packing plants at Peterboro and Stratford, Ont., and has proven so successful that 90 per cent of the hogs offered by farmers to that plant are now being bought under the new system. Plants in other centres in Ontario have followed this example.

The advantages of carcass grading over live grading, according to the Live Stock Branch, Dominion Department of Agriculture are that it permits of more definite determination of the degree and quality of finish; specific [illegible] accurate weight limita[illegible] within grades, and less confusion in regard prices.

It is interesting to [illegible] that Canada is the only country exporting bacon to the British Isles that does not market its hogs on a basis of carcass grading. In the Old Country carcass grading is compulsory.

The new system will indicate more clearly than lie grading, to the farmer, the advantages of producing a better grade of hog. It will enable each farmer's lot of hogs to be identified and make it possible to trace the origin of soft and oily carcasses and to investigate causes; also to determine ownership of diseased and infected carcasses by which steps can be taken to eradicate such factors. Thus the producer and consumer will benefit.

The new system has been carefully checked by the Live Stock Branch of the Dominion Department of Agriculture, and found to be thoroughly practical. The Hog Grading Regulations were amended in January, 1934, permitting rail grading on a voluntary basis; and the grades were established by the Dominion Minister of Agriculture in an order issued May 11, 1934. Briefly these grades divide the carcass into one general classification—Bacon grades suitable for export and pork grades for the domestic trade. Bacon carcasses are divided on the basis of quality into two grades A and B. Grade A has only one class, [illegible] for carcasses suitable for No. 1 Wiltshire sides weighing 55 to 65 pounds for which a premium of $1 per hog is paid to the farmer. B grade is divided into three classes—1, 2, and 3, including carcasses from 125 pounds to 185 pounds hot weight or live hogs weighing approximately from 160 to 245 pounds. These three classes represent Wiltshire sides ranging in weight from about 50 pounds to 70 pounds Wiltshire sides. Pork in domestic carcasses is divided into two quality grades with three classes in each [illegible] according to weight. In addi[illegible] to these there are classes for heavy and light carcasses outside the weight requirements for the standard grades.

Any progressive feature related to the hog trade is of advantage and benefit not only to the farmer, but to practically every one else in Canada. The hog is in the front rank of economic importance to Canada. This animal accounts for practically one quarter of the turnover of the slaughtering and Meat Packing industry, the third largest manufacturing industry in Canada which has an annual gross value of products of nearly $180,000,000.

Carcass grading is linked with other progressive policies and projects of the Dominion Department of Agriculture designed to assist the farmer in the production and marketing of better hogs.

STILL A CHANCE FOR COMPLETE TEA SET

Digby, N.S., June 17—Scallop fisherman off Digby, Nova Scotia, have gotten some strange catches while in pursuit of succulent scallop, or we should say, while dragging for this seafood. Just recently one fisherman brought up part of an earthenware churn, but the prize catch was a china cup to be followed the next day by the saucer. Various articles of crockery ware have been brought to the surface at different times, all, it is believed part of the cargo of a ship called the "Culloden" which was wrecked off these shores many years ago. Scallops are chiefly a Nova Scotia product and unlike the oyster, the scallop is able to move around. They have a very high medicinal value due to their causing a greater flow of gastric juices.

GRAIN BOARD ACT INTRODUCED IN PARLIAMENT

The Canadian grain Board Act of 1935, introduced into the House of Commons on Monday by Premier R. B. Bennett, confers extensive powers on the Wheat Commission which will be set up to handle the marketing of all Canadian grain. The putting into effect of this act will give the wheat commission exclusive right to buy and sell grain in Canada. The Winnipeg Grain Exchange may cease to function. The elevator companies will be the agents of the new body. Elevators have been declared by the Act to be "a work for the general advantage of Canada."

The commission or board which will administer the Act when passed will consist of three members. It is proposed that this commission shall take over all the carryover in Canada and proceed to set up a new organization for the marketing of Western Canada's grain, both domestically and in other countries.

An advisory committee of not more than seven members of whom four must represent producers, will be set up. It will meet at least once a month to consult with the commissioners.

Of course there are many conjectures as to who will constitute the commission. Mr. McFarland who has borne the heat and burden of the stabilization operations, has been prominently mentioned for the chairmanship. The suggestion has been made that E. B. Ramsay, chairman of the Board of Grain Commissioners, will be a member of the new body. Another report suggests D. L. Smith, formerly chief salesman for the Canadian Wheat Pool now in the grain business in London, England.

It is expected that the new Act will meet with much opposition but Premier Bennett is determined that it shall go into effect. The new crop year begins in another month and a half and a start in the setting up of an organization will have to begin shortly in order that plans may be made to handle the new crop.—Alberta Wheat Pool Budget.

FARM-MADE VINEGAR

Home-made vinegar of good quality can be prepared from a variety of raw products, provided they contain fermentable sugar in sufficient quantity. According to the bulletin on vinegar making on the farm just issued by the Department of Agriculture, Ottawa, the juice of apples, grapes berries or other fruit or honey may be used as the raw material with success. Whatever the source may be, however, it is of utmost importance to bear in mind that there are two distinct stages in vinegar making, representing two fermentative processes, each carried on by different types of micro-organisms. The first stage is the alcoholic fermentation of the sweet juice, whereby the sugar is converted into alcohol through the action of yeasts. The second step consists in the conversion of the alcohol into acetic acid. This, the acetic or vinegar fermentation proper, is caused by vinegar bacteria. The two stages in the process are quite distinct, and for their best action require different conditions as intimated in the context of the bulletin. A realization of the twofold nature of the process will do much towards ensuring success in preparing home-made vinegar.

NOTHING LIKE PAYING UP

Vancouver, B.C., June 17—Two dollars is not a large sum to have on one's conscience but it has bothered someone in Vancouver. The treasurer of the Canadian National Railways at Montreal recently received the money from an anonymous remitter, without explanation, and enclosed in an envelope with a Vancouver postmark. Such "conscience money" donations are not at all unusual and often come from out-of-the-way places all over the world. The last "conscience money" received by the C.N.R. here came from a village in remote Northwest India.

AUSTRALIA DECIDES ON TAX ON FLOUR

Advices from Australia suggests that the federal government of that Commonwealth has definitely decided upon the imposition of a flour tax to raise funds with which to bonus wheat producers. During the current season the Australian government paid wheat growers $20,000,000 of which $4,000,000 was raised by a tax on flour consumed in the country. The flour tax could be discontinued on June 30 the end of the fiscal year, but it is generally understood that this will not be done. On the other hand it is believed this method of obtaining money to bonus wheat growers will be continued until such time as world wheat prices rise to a level considered profitable to the majority of Australian wheat farmers.—Alberta Wheat Pool Budget.

A WHEAT BOARD FOR CANADA—

WHILE THE people of Alberta are being regaled with almost every kind of political thought, there is being introduced in parliament at Ottawa, a bill aiming to establish a federal wheat board for Canada. To quote the words of Premier Bennett when introducing the bill:

> "The world has been producing so much more wheat than it had been consuming that there is a large surplus and that surplus must be taken care of by some orderly method or we will have a complete dislocation of the whole wheat industry in Canada. We might as well face it frankly."

The leader of the opposition, Right Hon. W. L. McKenzie King agreed that the question was too serious to be dealt with in a partisan attitude and urged that the bill be sent either to the Agriculture Committee or to a special committee of the House for consideration. No one will dispute the seriousness of the issue at stake, but it is surprising, even a little disconcerting to find in the press of the day such a wide difference of views regarding it. Evidently the welfare of the Canadian farmer is paramount in the minds of both the sponsors of the Grain Board Bill and those who are lustily opposing it. There are one or two outstanding facts concerning the wheat question which the average person may or may not know. The first and most important is that Canada is not selling all the wheat it should, that while exports of Canadian wheat has been declining, exports of wheat from the Argentine has been increasing. The other important fact is that it is admitted by all wheat importers that Canadian wheat, particularly western Canadian wheat stands in a class by itself as regards quality. In short it is the best wheat in the world. Mr. McFarland, for the Canadian Government, seems to have adopted the policy that because Canada has what the wheat importing countries want, they will eventually buy it and pay a premium for the privilege. As regards this, "Milling" a British publication says:

> "It is common knowledge that less Canadian wheat has been used because it has been in the region of 10 shillings a quarter dearer than Plate wheat, when the margin should not have exceeded 5 shillings per quarter. Mr. McFarland thought that importers would be obliged to buy at his price, but he found that so long as supplies from other quarters were available, importers could get along quite all right with a minimum of Canadian wheat. It is admitted that it is the best wheat in the world, but in normal circumstances it is the buyer, and not Mr. McFarland who decides what the premium shall be on that account."

The grain trade of Canada is very much opposed to the bill and the Winnipeg Free Press, an influential paper published at Winnipeg is convinced that a free and open trading market is the best course for Canada to follow, and in addition to being extremely critical of the federal government's previous handling of the wheat situation, suggests that if the Wheat Board Bill became law, Canada will continue to lose markets until "the Canadian wheat trade will sink out of sight."

Mr. C. E. Huff, of Chicago, president of Farmers National Grain Corporation, co-operative, describes the appointment of a Canadian Grain Board as "timely." Among other things he says:

> "In Argentine, where three or four large exporters no doubt are able to influence federal policies toward grain distribution, farmers are actively demanding a change in federal policies. Wheat plays too important a part in the economic life of Argentine and Canada, dependent as they are on the world outlets, to be longer entrusted to private handlers who disregard the interests of producers.
>
> "Private interests cannot influence acreage reduction, or shifts in production, or treat with other governments, or carry on the manifold operations necessary in restoring economic balance. They would not do so if they could, being interested in volume and tonnage from a handling standpoint. Price is unimportant to them, or secondary at best.
>
> "That there are some losses incident to controls and agreements may be admitted. These losses cannot possibly be as great as the loss that comes when primary producers are brought to bankruptcy and want by a policy of drift."

Mr. McFarland says there is a "fight" as between the grain and milling interests in Canada and Great Britain and the government sponsored pool. The grain and milling interests say there is no fight, that Mr. McFarland is simply asking too much for his wheat and buyers turn elsewhere.

The Mercury is not much interested in a war, imaginary or real between two forces. But the Mercury is vitally interested in the welfare of the primary producer—from that source comes our bread and butter, figuratively and literally. As we view it, according to the information we have at hand, it is imperative that Canada sells more wheat. To do so it is vitally necessary that Canada's wheat take its place side by side with the various wheats of the world and be sold according to its merits. At a premium if one can be procured, if not, sold as a matter of the buyers' choice. We realize both the logic and wisdom of asking a higher price for a better article, but overshadowing this is the vital necessity of moving Canada's stock-in-trade—wheat—year by year. With the advantage of preference due to quality on Canada's side, the issue seems to boil down as to whether Canada can compete on a cost of production basis with other countries. If Canada cannot compete on a cost of production basis, the glory of Canada's wheat fields will have commenced to fade. But the Mercury has far too much faith in the Canadian farmer to believe such a thing possible.

Whether the Wheat Board bill becomes law or not, a vigorous selling policy stressing the quality of the Canadian product is required.

ALBERTA NEWS BULLETIN

Junior Farmer Camps

Junior farmer camps at the large exhibitions will be a feature this summer, made possible by the new federal grant in aid of this work. Alberta expects to have seven of these camps in operation, at the two large exhibitions at Calgary and Edmonton, also at Red Deer, Lethbridge, Camrose, Vegreville and Vermilion. The camps will be under direction of officials of the Provincial Department of Agriculture and a large number of farm boys and girls are expected to participate.

Slot Machines Now Illegal

Dominion Day in Alberta this year will definitely bring to an end the long profitable career of the devices commonly known as "Slot Machines." From that day forward these machines will be distinctly taboo by law, and will be liable to confiscation wherever they are found illegally existing. The slot machines are ruled out by the new act passed at the recent session, and which will come into force on July 1st, announces Hon. J. F. Lymburn, Attorney-General. The act prohibits the keeping of these machines, and enables any peace officer to seize, without warrant, any machine he finds on any public premises. It also enables such an officer to search any private premises where he believes such machines may be kept. The definition of "Slot Machine" in the act is wide enough to cover pin ball machines, baseball, golf and whiffle machines and in fact any machine the result of any number of operations of which is a matter of chance and is capable of being used for gambling purposes.

New Homestead Area

Arrangements have been completed by the Government for the throwing open for homestead entry at an early date of a tract comprising four townships in the Grouard district, according to Hon. Hugh W. Allen, Minister of Lands and Mines. The date on which homesteads can be filed has not been set, but it is expected it will be in the near future. This area, pointed out the minister, was cleared and set aside as a likely settlement area for those families moving from the dried out areas of the south. However, the area did not attract many and as the land is considered good for settlement, it will be thrown open in the regular way. The Minister said that all arrangements in connection with the action had been made and that it was expected all land would be snapped up immediately it is available.

First Health Insurance Area

Dr. A. C. McGugan, Provincial Medical Officer of Health, will be appointed to administer the first test area to be set up under the health insurance bill enacted at the last session of the legislature, Hon. George Hoadley, Minister of Health stated. This test area probably will be set up at Camrose, which district has applied for the scheme, declared the minister.

PROSPECTIVE EARNING POWER OF WESTERN CANADIAN FARMS

A survey of the prospective earning power of farms throughout the length and breadth of Saskatchewan has been made by the Department of Farm Management, College of Agriculture, University of Saskatchewan. The conclusions reached are based on crop yields and grades which prevailed from 1918 to 1930; prices for farm products which prevailed from 1910 to 1914; and conservative estimates of costs in farming in areas typical of the province

The statements cover operations for half-section, section, and in two instances two-section farms.

It is shown in the very best type of prairie land in Saskatchewan (Regina plains and Rosetown district) a farmer may earn $816 a year above all expenses on a 320 acre farm, $1588 on a 640 acre farm and $5788 on a two-section farm.

To reach this conclusion the price of 2 northern wheat was estimated at 77c a bushel. The total income was figured at $2289 on half-section farm and from that was deducted total living expenses of $845, farm expenses of $666 and depreciation on buildings and machinery of $262. No allowance was made for interest on investment nor for the labor of the farmer and his family.

On the inferior type of prairie such as around Maple Creek and Hatton, the total income on half-section farm was figured at $830, while the total cash expenses reached $967, showing a deficit of $147 before depreciation and $236 after depreciation.

This study which is contained in Bulletin No. 64, entitled "Probable Net Farm Revenues for the Principal Soil Types of Saskatchewan," and is a most interesting and informative one and a real contribution to agricultural literature in Western Canada. Various conclusions are reached, one being that tractor operation for a section is considered generally less satisfactory than operation with horse power. For two-section farms mechanical operation is preferable. Threshing costs are fixed at; wheat 8c, oats 5c, barley 6c, rye 7c. On full section farms a low price auto is included and standard equipment. Smaller farms are allotted merely a horse and buggy.

Canadian ice cream by law must contain not less than 10 per cent of milk fat and no other kind of fat must be employed in its manufacture.

COST OF PRODUCING WHEAT ON 17 ILLUSTRATION FARMS

Wheat costs 56½c a bushel to produce on 17 Illustration Farms in Manitoba and eastern Saskatchewan.

The average yield was 18½ bushels per acre. Complete records of the cost of producing were kept by the Brandon Experimental Farm. Items charged included land rental, machinery, horse and man labor, seed, twine threshing and other costs.

FOXES GET BUNNIES WITHOUT HAVING TO CATCH THEM

Calgary, Alta., June 17—Prince Edward Island silver foxes got their Easter bunnies all the way from Rimbey, in Alberta. Eleven thousand frozen rabbits were sent from there to fox ranchers in the island province as fox food, those catching rabbits getting two cents for each bunny. There is a considerable trade in rabbit carcasses for fox food, states the Industrial Department of the Canadian National Railways.

Canadian and other Empire wheats are admitted free into the British Isles while wheat of foreign origin is dutiable under the Ottawa Agreements Act at a rate of two shillings (48 cents) per quarter of 480 pounds.

Canadian exports of canned fruit to Great Britain were 20 per cent greater from January 1 to March 14, 1935, then during the corresponding period of 1934. The principal increases were in canned apples, pears and peaches.

Ahem!

Caller: "Can your little dog do any tricks?"

Hostess: "Yes, if you whistle three times he will bring you your hat."

Household Hint

Wife: "Where do you want to spend the holidays?"

Husband: "I haven't thought about it. What have we decided?"—Answers

"Did you enjoy your dinner out?" asked the solicitous restaurant hostess.

"Yes, except the dessert—it was terrible."

"Did you have plum pudding or lemon pie?"

"I don't know, it tasted like glue."

"Ah! it was the plum pudding. The lemon pie tastes like paste."—American Legion Monthly.

A Word a Day

Counsel for the plaintiff had reason to suspect that somebody connected with the defense had been instructing one of the witnesses.

"Look here," he said severely, pointing an accusing finger at the man in the box. "You realize, don't you, that you have taken an oath to tell the truth?"

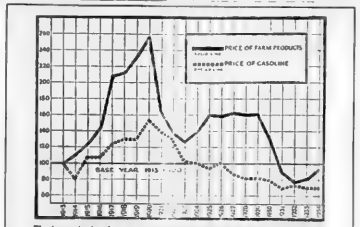
"I do."

"All right, then. Now, I want to know if you know the meaning of the word 'collusion'?"

"Soitingly! I was in one once on the railway."—Tit-Bits.

Male Straphanger: "Madam, you are standing on my foot."

Female Ditto: "I beg your pardon, I thought it belonged to the man sitting down."—Washington Post.



The depressed price of farm products is a problem with which everyone is familiar, but on the 1913 basis farm product prices have never been as low as gasoline. Between 1913 and 1920 gasoline did not rise in price to nearly the same extent as farm products, yet since 1920 its price has almost continuously declined. The data for the above graph are based on figures published by the Dominion Bureau of Statistics.

A DYING WAGE

WHEN we started business in 1880 our first rule was to pay a fair living wage.

In 1919 we decided a living wage was not enough. We should pay a dying wage, too. We knew how hard it is for the worker to make provision for his old age and for his dependents in the event of his death.

So we introduced benefits and pensions plans. Sickness benefits—the incapacitated employee to continue drawing pay according to his term of service; pensions—a fair living allowance for the worker who reaches old age; death benefits—a cheque immediately for the deceased worker's family. These things lifted a burden of care from our employees' shoulders—made them happier, more enterprising and more efficient. They lifted a burden from the shoulders of the Canadian taxpayer, too.

We are proud of these plans which have helped so much to build up a loyal organization of thousands of Canadian workers. Their devotion to their work has made it possible for us to serve Canada with quality products at lower and lower prices.

BEAVER LAKE COUNCIL

(Continued from front page)

the Boroschow Hall for the purpose of collecting taxes.

Instructions were given to have the Provincial Engineer investigate conditions East of Sec. [illegible] 4—51—16—4, with regard to have the bridges replaced.

A motion was passed forbidding the Secretary from giving Mrs. Mary Gryc[illegible] a copy of Frank Grestyshyn's letter of Feb. [illegible]. However Mrs. Mary Gryc[illegible] may read the letter at the office if she so wishes.

Payment was refused W. Nicholls for snow shoveling.

Instructions were given the pound keeper Div. No. [illegible] to refund money collected from Mrs. A. Holyk on behalf of W. Anhill.

Moved by Mr. Kubin that we collect 25c per parcel for statements of taxes asked for by Loan and Mortgage Companies and that such money become the property of the secretary. Carried.

Payment of seed grain account of F. Stokes was authorized.

The secretary was instructed to obtain information for the purpose of cancelling the Pue Townsight property in order to have it revert to Farm land.

The secretary was ordered to interview the Government in connection with having Karel Baron and family moved to their homestead at High Prairie.

J. J. Korpon was appointed weed inspector for Division 5.

A grant of $3.00 was given Mrs. K. Czar for clothing chargeable to the Provincial Government.

The bills and pay sheets were passed for payment.

The secretary was instructed to inform Dr. Griffith that we would not be responsible for any more accounts of A. W. Tchir and family.

Next meeting July 20, 1935 at 2 p.m.

WEED SEEDS ON FARMS

The seeds of most annual weeds when embedded in the soil retain their vitality for several years. The seeds of the mustard family and others, when ploughed down after ripening, seldom germinate the following year and not until they are brought near the surface by further cultivation. Light surface cultivation during the early autumn usually serves to stimulate germination in freshly ripened weed seeds. Thus, a considerable proportion of them may be destroyed, while, on the other hand, by deep ploughing the difficulty is simply deferred to succeeding years.

The germination of weeds, as well as other seeds, is affected by heat. Many kinds of weed seeds, such as some grasses and mustards will germinate in the late autumn or early spring when the soil is cold. Others, such as buckwheat and lamb's quarters, require a warmer soil, and the seeds of foxtail and purslane continue dormant until stimulated by the heat of summer. Late autumn or early spring cultivation is not effective in destroying the seeds of weeds that will not germinate unless the soil is warm.

Some of the worst weeds are so prolific in the production of seeds that relatively clean fields may become badly contaminated in two or three years if the weeds are allowed to go to seed. For instance, a single plant of wild mustard, stinkweed, pigweed, or campion produces from 10,000 to 20,000 seeds; wormseed mustard about 25,000; shepherd's purse about 50,000 and tumbling mustard about 1,500,000. With such productiveness, soils become quickly infested with weed seeds, although, on account of their inconspicuousness their presence is not fully realized. The whole subject is dealt with in an illustrated publication, Weeds and Weed Seeds, issued free by the Dominion Department of Agriculture, Ottawa.

Mr. C. Patterson and J. Larbek[illegible] visited the city last week.

A number of Tofielders attended the dance at Ryley on Wednesday.

VETERAN [illegible] TO CELEBRATE JUBILEE AT CALGARY — JULY 5

(By J. N., Calgary)

It was sixty years ago this year that the first troop of the N.W.M. Police arrived at the banks of the Bow River where the Elbow River discharges into it. The records do not show just how many were in that body but it was under the command of Insp. Brisbois and Sub.-Insp. Cecil Denny. They had started from Macleod with the intention of locating a fort at a suitable spot on the Bow River but through an error they must of crossed that river and got to the Red Deer River before the mistake was discovered. They turned south again until the river was reached from the North Hill. To cross the river it was found necessary to lash tarpaulins around the wagon boxes and float them across. Mr. G. C. King, the retired postmaster at Calgary is credited with being the first policeman to land on the site of Calgary. He jumped ashore with a rope to make fast the floating wagon box. Many buffaloes were to be seen and a lone tent was observed in the distance. This turned out to be Father Doucet, a Roman Catholic Priest who was making his way south and hoping to evade the war-like Blackfeet. One can imagine his joy at meeting the policemen. This was the year 1875. It was not long before a fort was built on the banks of the two rivers. The I. G. Baker Company of Benton, Montana, were employed to haul the supplies to the new site and assist in building the fort. This company decided to open a store of their own and it was not long before some of the policemen took their discharges as their time expired. These in their turn opened businesses of their own. This town progressed so well that by 1885 it was incorporated and an exhibition board was formed and functioned that year.

It is for that purpose of celebrating these two events that the City of Calgary and Stampede Ltd. have invited all ex-members of the famous Force to attend a reunion at Calgary.

Particulars of the veterans' participation can be obtained from J. Nash, Secretary to the Jubilee Committee, 3809 17th Street W. Calgary.

Last Call For Tofield Sports Day Monday, July 1st. A Gala Day For All

Tofield Mine Farm Occupants

First of all I'll name Chessor
He hails from Lacombe
But has now made the mine farm
His home, sweet home

He tends to the cattle
And cleans out the barns
While he listen's to Garden's
Long windy yarns
John Garden has gone
Back to old U S A
He may never come back
But it's hard to say.
He didn't like Canada
Or the climate so cold
It didn't agree with
His health I was told
And now I'll name Ezra
The horse man so bold
He works and he slaves
Through the heat and the cold.
He has a young help-mate
Called Le[illegible]
How [illegible]
It [illegible] I'd say
Next [illegible] young man
A [illegible] to Ross
And [illegible]
Q[illegible] the boss
He'[illegible] the horses
Ta[illegible] work
And whe[illegible] a task
[illegible] to shirk.
And [illegible] George White
Whom we [illegible] know
Helps with the cattle
And the [illegible]
There [illegible] Simpson
He [illegible] sky high
He'[illegible] baby
[illegible]
He is the foreman
The boss of the farm
He [illegible]
And corrects every harm
Now I do believe
There [illegible] I have missed
I forgot to put Emil
Down on the list
He is the gardener
Who pulls all the weeds
Who plants all the good things
That spring up from seeds
Now C[illegible] the herdsman
Comes next into view
His cares are the Shorthorns
And Herefords too
He's [illegible] foster baby
That [illegible] from the south
Where they don't get much rain
And get plenty of drouth
Oh yes [illegible] forget
J[illegible] should be named
For [illegible]
[illegible]
And [illegible]
There [illegible] John Belyk
He liked [illegible] think
He was pretty [illegible]
Now I've named all the workmen
The cooks should come next
I mustn't forget them
Or they would be vexed
First Mr Abbott
[illegible]
Who [illegible] of that staff
He [illegible] the place
And [illegible]
Mrs. Abbott [illegible]
[illegible] hand
[illegible]
I'll [illegible]
She helps [illegible]
By them I mean Abbotts
Don't take me up wrong
Her home is at Delia
It's south east of here
She's worked on the [illegible]
Just [illegible]
And now Mr Gallinger
The owner of all
His men stand by him
And obey his call
[illegible]
[illegible]
Who wouldn't [illegible]
If [illegible] place

—M. A. C.

KETCHAMOOT

Postponed. The Ketchamoot picnic from July 3rd to Friday, July 5th owing to other local attractions. Also hoping the weather will be more favorable. So please take notice and put down that day.

The monthly meeting of the Ladies Aid will be held at the home of Mrs. John McGinnie next Wednesday July 3rd. A cordial invitation is extended to all.

Mrs. Appleby and Mrs. C. A. Ingram were guests of Mrs. Frank Shupe on Friday afternoon of last week.

Mr. P. Lesl[illegible] and son Jackie of Bardo were guests of Mrs. Whillans over the week-end.

Mr. and Mrs. Geo. Lawson and daughter, Mrs. R[illegible] Lee and [illegible] Martin were city callers on Friday of last week.

Miss Fawcett and Miss McCut[illegible] of [illegible] were guests of the Schultz family over the week-end.

Mr. and Mrs. Gallagher and mother of Edmonton visited Mr. Galla[illegible]

Local and Personal

The residents of Tofield decided to organize a Social Credit Study Group and was successful in making the grade with quite a number already signed up to become members. Officers were elected and arrangements were made for meetings every Thursday at 8:30 p.m. in the Womens' Institute rooms. Everybody welcome.

The Anglican W. A. will hold a tea and sale of home cooking and strawberries and ice cream in the Institute rooms on July 6th.

The public meeting which was to be held on Tuesday evening, sponsored by the local C.C.F. group had to be postponed on account of the bad weather. Mr. Roper of Edmonton was to address the meeting.

Miss L. Rose visited St. Albert over the week end.

Mrs. Calvert and Miss Nomeland visited the city last week.

Mr. and Mrs. W. Clarke visited with friends on Wednesday of this week in town.

Mrs. Pincott and Mrs. Morton visited the city one day last week.

[illegible] Edis, Joan and Raymond visited with Mrs. Malcolm on Sunday.

A [illegible] of the local Masons visited the Viking lodge on Tuesday evening.

Mr. and Mrs. Jim Munro and family [illegible] visiting at the Clutterham [illegible]

Mr. Bert Lovell attended the Rebekah Lodge at Vermilion on Monday.

[illegible] entertained their wives [illegible] evening in the lodge hall [illegible] Professor Ottewell gave an illustrated lecture on interesting places [illegible] the Old Country. A very pleasant evening was spent.

Mr. Bob Blair of the creamery staff spent the week end in the city.

Lance Umphrey was a visitor to town last week.

Mrs. Bardon returned home on Tuesday after spending six weeks visiting friends and relatives in the [illegible]

Miss Lois Thompson, who is taking a course in beauty work in Edmonton, is spending a few days with her parents here.

Miss Anna Lindsay spent the week end in the city.

The C. W. I. wish to thank all those who helped in any way to make their recent garden party a success.

Through the courtesy of the municipal office we had the minutes of the last meeting in plenty of time for this week's issue. However late arrivals of advertising and news force us to carry them over to our next issue.

Rev. O. E. Hanson and family and Rev. and Mrs. O. Bredding will conduct gospel services at Kingman for three weeks. Services will be held at 8:00 p.m., except Wednesday's and Saturdays. A cordial welcome to all.

SHORTHORN CLUB PICNIC and FIELD DAY

On Saturday, June 29th, a field day and picnic will be held at the Gallinger farm, just south of town. There will be judging contests and a fine array of Shorthorn stock will be on hand for inspection. Bring your lunch, coffee, sugar and cream will be supplied by Mr. Gallinger.

FOR SALE—Yearling registered Red Poll bull, at $35.00. One ½ ton Chevrolet truck. Apply J. W. Morton, Tofield.

[illegible]sher's aunt, Mrs. E. McMullen over Sunday.

Mrs. J. Younie returned to her home in Edmonton on Friday after a visit with her brother's family Mr. W. A. Mitchell.

The late Mr. and Mrs. Hugh Mitchell's farm has been sold to Mr. Peters, who will take possession next spring, Mr McCauley putting through the deal.

Mrs. Hazel Sears entertained the Social Hour club at her home on Tuesday afternoon of last week. Considering the roads, a goodly attendance was in attendance. Plans for their annual picnic was discussed which will be held the latter part of July at Elk Island park or Lake shore. Visitors present were Mrs Younie, Mrs. C. A. Ingram, the Misses Signie Winder Ingred and Margaret Mitchell and Ethel Coombes. The July meeting will be held at the home of Mrs. William Ingram.

LINDBROOK

"It never rains but it pours" is just about what we're getting now. We used to grouse about the drought now we grouse about the rain, always something to get a kick out of or rather something to kick about.

Road work is started and is delayed by the rain.

Mrs. E. Anderson is home from the hospital and is still very ill, still we believe she is improving gradually in health, and if the return to health is slow we hope it will be sure, when she is well again.

Mr. Jas Bracegirdle has had a new double gasoline stand installed in front of his store with red trimmings, has a rock garden built and flies the flag on all special occasions. Quite a land mark, in fact a thing of beauty and a joy forever. Keep on going, Jimmy!

Mr. [illegible] Evans is building himself a house on the "Bracegirdle estate" and expects to be in residence shortly, that is if this rain will ease up a bit so he can work on it.

The bridge on the C.N.R. near Mr. Setter is being filled in and "Lindbrook Yards" now have a work [illegible]

(Continued on back page)

Communication

(This newspaper is not responsible for facts or opinions in letters from its readers.)

(To the editor)

Would it be possible for you to spare me space to tell the readers about the new variety of birds that appeared in the Woodlawn district one night last week.

They arrived between 8 and 9 o'clock near the school.

A number of people, both men and women gathered there to see them, and listen to the noise they made.

Some had never seen this species before, while others expressed the opinion that some of the same species had been here a few weeks ago, for while not exactly the same in appearance their song [illegible] was practically the same.

After remaining a few hours, they left, and the people went home, no wiser than before they came.

Always liking to have everything properly classified, I searched my Ornithology book and found the following data.

Nothing has been known of this variety, until within the last three years.

At present they are found only in Alberta, however there is some talk just now that they are thinking of crossing over into Saskatchewan and British Columbia. While not identical in size, coloring and habits, yet their general appearance is the same.

They are known as "Aberhart trained parrots" and are flying about in the interests of the S. F. N. (something for nothing) the new political party in Alberta.

Trusting that the result of my research work will be of interest to your readers, and thanking you for your kindness, I remain, Mr. Editor,

ORNITHOLOGIST

A well attended public meeting was held in the Variety Theatre on Thursday night of last week. Mr. J. C. Landeryou spoke on social credit.

The C.W.I. held a very successful garden party and super at the church ground on Saturday last. Games and entertainment of the [illegible] variety were indulged in.

Permit No. 221

ENTITLED TO CONSIDERATION

Of all countries in the world, Canada is the one most vitally concerned over its wheat production. Agriculture is the basis of Canada's national life and wheat growing is by far the most important branch of agriculture.

In Australia the production of sheep and wool ranks in importance with wheat growing and the country's climate and location of its farming areas enable it to be a large producer of dairy products and livestock.

In Argentina the cattle industry is a huge one and large quantities of corn and flax are raised as well as wheat.

In United States the value of the wheat [illegible] scarcely a tithe of the total value of the agricultural wealth produced [illegible].

In Britain wheat production is a [illegible] agricultural activity.

In [illegible] countries [illegible] nearly so important [illegible] as it [illegible].

Yet [illegible] Canada [illegible] the way of [illegible] her wheat [illegible] majority.

[illegible] countries [illegible] wheat pro[illegible] much a[illegible] commodity.

This was [illegible] by means of [illegible] through quo[illegible] bonuses [illegible] regulation pay [illegible].

The following [illegible] Cana[illegible] per bus[illegible] European countries [illegible] March of [illegible]:

France	$1 40
Germany	$2 26
Italy	$2 27
Hungary	$1 44½
Roumania	$1 19

In Great Britain the farmers are guaranteed $1.25 a bushel for all the wheat they deliver.

In Australia the government is providing $4,000,000 to bonus wheat farmers during the year. In the early part of the depression Australia depreciated her money so that Australia wheat growers were getting 70c a bushel while prevailing prices in Canada were from 40c to 45c.

The United States spent approximately $500,000,000 to help her wheat farmers. This past year the AAA distributed close to $100,000,000 to United States' wheat farmers.

In Argentina a somewhat different policy was followed by the government. The peso, nominally around 43c in value, was depreciated to 25c in order that Argentinian wheat could be given a competitive advantage in world markets. A minimum price was established.

A much more extensive list could be prepared showing what the governments of various other countries did for their wheat growers but the above should be sufficient. It shows that afterall Canada has certainly not been overgenerous to her wheat farmers.

If farmers in Western Canada are to stay in the wheat growing business they must have more support from the Canadian government in the face of protection given wheat farmers in so many other countries of the world. Also in the face of protection given other industries in Canada.

The Alberta Wheat Pool believes that a Canadian Grain Board with the backing of the Dominion of Canada can give Canadian wheat producers a measure of protection and aid be tainable in no other way.

"It's remarkable how that singer can hold one of his notes for almost a minute."

"That's nothing—why, I held one of his for years."

ALBERTA NEWS LETTER

Issued by the Publicity Commissioner, Government of Alberta, Edmonton, June 22, 1935

New Deputy of Education

Appointment is announced of G Fred McNally to the position of Deputy Minister of Education for Alberta fill the vacancy caused by the death a few weeks ago of Geo. Gorman. Mr McNally has been Supervisor of Schools for a number of years and has been with the department for a period of 26 years.

Thirty-First Annual Convention

The 31st Anniversary of the Alberta Union of Municipalities will be celebrated on June 27 and 28 when the annual convention will be held in Calgary.

Highway Programme

Paving the way for completion of the all-weather highway to Jasper and for work on the trans-Canada highway section to Banff. Hon. George Hoadley arranged for a $1,500,000 bank credit in addition to the federal loan of $1,250,000 for relief purposes while in the East recently. The road projects named are definite portions of the 1935 program, Mr Hoadley said.

The Calgary-Banff highway, on which repairs were being made, is now capable of travel throughout without detours. Progress is being made on the construction of the small remaining sections of the Edmonton Jasper highway and gravelling of these sections will be done in August, when the road will be completed as an all-weather highway. A further section of the Peace River Highway north of Edmonton, will it is expected, also be gravelled this season, states Hon. J. J. McLellan, Minister of Public Works.

Appoint New Agriculturalist

Archie A. Campbell, formerly of the C.P.R. Irrigation Branch, has been appointed agricultural agent for the Provincial Department of Agriculture at Lethbridge, replacing M. L. Freng, who was transferred to Brooks district some weeks ago.

Gets Harvard Appointment

Dr. George Alan Harcourt, geologist, son of Professor George Harcourt of the University of Alberta, and a brilliant graduate of that institution, has been appointed to the faculty of Harvard University.

Marking All Rivers

As a matter of information for tourists, both resident and non-resident the Public Works Department of the Province is arranging, at the suggestion of Hon. J. J. McLellan, Minister, to place signs on all bridges crossing rivers of any importance, on main highways throughout the Province, conveying information as to the names of the rivers.

Junior Grain Clubs

A total of 139 Junior Grain Clubs have been organized in Alberta this year, with over 2,000 members, compared with 104 clubs in 1934.

57th ANNUAL EDMONTON EXHIBITION JULY 15—20

No effort is being spared by the management of the Edmonton Exhibition to make this year's show outstanding in the standard and variety of its exhibits and in the quality of its entertainment features.

The first Edmonton Exhibition was held in the year 1879, so that the 1935 show will be the 57th annual event staged in Edmonton. This year a memorable event in the history of the West is to be celebrated Fair week, viz: the 50th anniversary of the Riel Rebellion sponsored by the Old Timers' Association in conjunction with the Edmonton Exhibition. This celebration is scheduled for Tuesday July 16th.

With approximately $15,000 available in prize money, an increase of $3,000 over last year, it is confidently expected that entries in all departments will greatly surpass former years. A new feature shown in this year's prize list and one that is found to be popular, is the boys' and girls' camps with schools and judging contests, sponsored by the Edmonton Exhibition with a special grant from the Federal Department of Agriculture. The management particularly call attention to the fact that applications to attend these camps must be made before June 29th, the date when all entries for the Exhibition must reach the Exhibition offices in Edmonton. Board and room will be provided for those selected to attend, and many special courtesies and privileges on the grounds as well.

Among the interesting new features you will see at the Fair are: the "House of Magic" staged by the General Electric Company with many electrical thrills and surprises. You will literally "see sound" and hear light". The Royal American Shows on the midway have many new thrillers, rides and shows to make you young and happy. On Tuesday, July 16th, the business firms and merchants of Edmonton will stage a mammoth prosperity parade, miles long, on a scale surpassing anything ever before presented in Edmonton. On Friday evening there will be a gorgeous Fireworks display as a special added feature of the grandstand attractions. Each afternoon during fair week there will be running horse races with the best field ever started on a Western track, with the leading jockeys of the continent up.

The grandstand attractions for the evening shows are the most spectacular and on a grander scale than ever before attempted. Never has a western fair audience been greeted with such a galaxy of talent. The gorgeous musical extravaganza "Fascinations of 1935" includes many of the outstanding vaudeville successes at Chicago and New York during the past season.

Readers will be pleased to learn that the management of the Edmonton Exhibition is again offering admission tickets in an advance sale at the reduced price of strips of five for one dollar, obtainable at all points in Northern Alberta, or you may mail a dollar direct to the ticket committee Edmonton Exhibition, and your tickets will be mailed to you. To secure this reduced price tickets must be purchased in advance of the opening date of the Exhibition, which is July 15th.

Special reduced rates are being offered by all Railways, from Alberta, Saskatchewan and B.C. mainland points at fare and a quarter for the round trip, with two special excursions at cent-and-a-half a mile each way over the C.N.R. and C.P.R. See your local agent for particulars and selling dates.

THE TAPEWORM

Man may harbour in his intestines certain tapeworms, which take their name from their resemblance to a strip of write tape. The two principal forms are Taenia solium, or pork tapeworm, and Taenia saginata, or beef tapeworm.

Pork tapeworm is rare in this country; it is the beef tapeworm which is commonly found here. Persons of all ages may have tapeworms. The presence of a tapeworm is rarely dangerous, and frequently causes no disturbance.

Once the individual knows of its presence, worry and anxiety usually develop and then follows a train of symptoms which may be due, in part, to the tapeworm itself, but which are just as likely to be due to the state of mind of the patient.

Some patients complain of colic and nausea, with diarrhoea and constipation at intervals. The appetite may be increased, and certain patients become anaemic.

The tapeworm gains entrance to the human body when improperly cooked pork or beef infested with the parasite is eaten. The tapeworm fastens itself to the lining of the intestine. The pork species has tiny hooks and suckers for this purpose, and is known as the armed tapeworm in contrast to the beef species which has suckers only.

From the attached head grow segments of half an inch or more in length, and the total length of the tapeworm may well be over twenty feet. Gradually, the mature segments are shed and, passing from the bowel, together with the eggs, may be recognized.

The tapewormm has no digestive system. It is a real parasite, absorbing the food it needs from the alimentary juices. The life cycle is completed when the eggs, as passed from the human, gain entrance to the bodies of the respective animals. Here they invade the muscles and form little cysts which contain the tapeworm head. When present in large numbers, the cysts give to the meat what is known as a "measly" appearance.

Government inspection in slaughter houses is our first line of defence, and the thorough cooking of meats is the second. The stools from the patient should be burned, thus destroying the eggs.

Treatment, to be effective, must get rid of the head. Following upon a few days of soft food, the patient is given a drug which stuns and kills the tapeworm, causing it to let go its hold, and while it is in this state, it is swept out of the body by a suitable laxative. Such treatment should be taken only under the directions of the family doctor.

Questions concerning health, addressed to the Canadian Medical Association, 184 College St., Toronto, will be answered personally by letter.

YES - - it's true

That "The Mercury" is owned by an individual. It's his property and he must pay the bills and assume all responsibilities. On the other hand, it is also true that somehow or other the public looks upon the community newspaper as being partly their property. The community expects its public institutions to be defended, to be favorably reported, to be kept in good report throughout the district and the province. Churches, societies and organizations look for and expect their activities to be reported in their home paper. And the home paper does all these things—likes to do them. This being so, it is only human that the owner of, and those who are employed at the local newspaper office should expect that all these various interests would return the compliment through giving it printing orders. If all the printing requirements of Tofield were to be printed in Tofield, "The Mercury" would have to nearly double its present staff.

THE MERCURY

Your Family's Health is Worth Protecting

Food spoiling days are here! Are you still gambling with your family's health? It's risky business — and so expensive as well, especially when a new 1935 Electric Refrigerator can be obtained for less than 20 cents per day—is so economical to operate—AND IS ABSOLUTE PROTECTION AGAINST FOOD CONTAMINATION. Your family is certainly worth the small cost of this smart, modern guardian of good health.

MONTHLY INSTALLMENTS

Monthly installments run from only $5.82 for the new top opening model, to $8.82 and $10.08 for the first two standard models in Frigidaire, General Electric and Westinghouse makes. Down payments are 50 cents less in each case.

A NEW EASY PLAN ONLY 1-25th DOWN

You need to make a down payment of only 1/25th of the cost of the refrigerator you desire, and it will be delivered to your home. The balance may be divided into 24 similar installments, payable on your electric light bill, with a carrying charge of only 50 cents per month. THERE ARE NO INTEREST CHARGES.

No other plan offers you such an easy way of securing the health protection of an Electric Refrigerator. You have your choice of General Electric, Westinghouse, or Frigidaire makes.

See our Local Manager for Full Details of this Easy Plan or Write Direct to our Calgary Office.

TOFIELD SPORTS DAY—

On Monday, Tofield Town is host to visitors from the immediate countryside and afar off. There are, of course, other equally important events held during the year, appealing to those interested in the varied activities of life in a Western Canadian rural community, but Monday is a day of holiday celebration for all. The children will enjoy the races, those somewhat older will enjoy the baseball, softball, basketball, while others, perhaps of a more mature age, will obtain pleasure by simply watching the crowds milling around on pleasure bent.

The sports committee are doing all in its power to make the day a success. Primarily the event is not designed to make money, so long as it pays its way and perhaps create a little reserve for unforeseen emergencies, the committee will feel amply repaid for the effort expended. In the matter of baseball, as large a sum as possible is spent to entice the better class of player, so the crowd may see good baseball and closely contested games.

July 1st is Dominion Day, in the Jubilee year of our king's reign. It is also, we believe, the 25th year of the incorporation of the Town of Tofield. So all things considered, given fine weather, the day should be a successful one. To all we extend an invitation to visit Tofield on July 1st.

CANADA AT THE CROSSROADS—

By Lloyd Roberts, Ottawa, in the Christian Science Monitor

CANADA IS continually being called the goodwill "cement" between the United Kingdom and the United States; also the mediator and interpreter. It has become a little bored by such platitudes. Conscious of having cut the last remaining apron string, and having a very real entity of its own, it is less concerned with placating and reconciling two powerful and touchy relatives than with bargaining with them separately on its own account.

Despite plenty of views to the contrary, I believe that Canada has come to a kind of mental cross roads and is seriously wondering as to which direction destiny points. Sentiment, symbolized by a common king and flag, would argue that her heart is, and always must be, English. Business and personal affiliations, a common boundary line, over-lapping communication by land, water and air, would reason that perhaps the head may be stronger than the heart to strengthen the bonds of continent at the expense of Empire.

Both countries are "parents" to the extent that they have contributed freely of heir people and capital to colonization and development; both are zealously interested in the future; neither would stand for its being bullied by an outsider. Canada realizes its double indebtedness for favors received and expected and in the matter of protection admits that the Monroe Doctrine and all that implies affords as much security as does the British Navy—that Washington, as much as London, permits it to escape the onerous tax of armies and armaments. There is perhaps, not another civilized nation in the world so completely freed of the fear of invasion.

When it comes to trade and commerce, however, the United States has a distinct advantage over Britain—one which even the Imperial Economic Conference at Ottawa was unable to remove. The natural flow of trade is north and south, and added to adjacency of markets is the possession in abundance by Canada and the United States respectively of those commodities required by each other. In Canada, it is nickel, asbestos, fish, wood, pulp and paper; in the United States, it is petroleum, oil, machinery, chemicals, cotton, rubber, fruit. Canada buys nearly three times as much from her neighbor as from Great Britain—is indeed her neighbor's most profitable customer.

The effect of all this is to make for increasing co-operation and co-ordination of thought and interests. Tariff blockades have only served to strengthen this partnership by putting American branch factories, insurance companies and chain stores into Canada and in printing Canadian editions of American periodicals here. Business has become so deeply interwoven that the economic problems and attempted solutions of one country are practically those of the other, and the exchange value of the Canadian dollar is more sensitive to fluctuations of the American dollar than to the British sterling.

Today Canada is gazing southward and westward with equal interest. Which way will she walk? In one direction lies the allurement of a self contained continent, insular, unconquerable, containing within itself practically everything that humanity demands. Her choice will probably depend more upon the exigency of world trade and competition than on sentiment and prejudice.

There is always the possibility of a third choice—more alluring than either: that of joining a commonwealth of all the English-speaking nations of the world—a commonwealth independent in each of its component parts but speaking as one exalted voice for international peace and good will.

TOURING FOR PLEASURE

WANTED—An aid to Canadian motor tourists in the form of road maps like those available in Europe. Many of the European road maps make a special point of showing the tourist how to avoid the ordinary main road in favor of other routes which will reward him with superior scenery and interesting landmarks of natural wonders. Picturesque stretches of road are edged with green ink; special symbols mark points where there are particularly interesting views over the country, or indicate the exact location of ancient ruins, battlefields, caverns, and other attractions to tourists. With no such maps as these to guide him, the Canadian tourist must rely on advice collected enroute. For this reason, if he is curious at all, he will do well to call on information bureaus for advice on alternative routes to his next objective. The most interesting route is sometimes more profitable than the shortest.

THE GARDENER'S TEMPER RUFFLED

Jasper Park Lodge, Alta., June 24.—For the first time in Canadian radio broadcasting a musical program was sent out a few nights ago from the Canadian Rockies to the national chain of the Canadian Radio Commission, with an interchange over the National Broadcasting System. The programme featured the opening of Jasper Park Lodge, with Gene Fogarty's Chateau Laurier orchestra in attendance.

Although the broadcast was arranged a couple of days prior to the official opening of the Lodge, a number of visitors arrived during the day, among them Miss Benda Madill, of Muskegon, Michigan. "I've often heard the Jasper orchestra from Canadian stations, but this is my first visit. I'm thrilled with the scenery and will extend my holiday."

Everything is in smooth running order but the chief gardener's temper. He had the early blooms in the flower beds in good shape until last night, when a herd of hungry mule deer arrived and ate a very "colorful" breakfast. These inquisitive fellows are as much at home in the Lodge ground that the gardener's staff is all on the verge of resigning.

HISTORICAL FLAG HOUSED AT HALIFAX

An historic flag which withstood the rigors of the Artic since it was carried into the frozen north by Captain McClintock, afterwards Sir Francis McClintock, in 1857, when in search of the lost Sir Franklin expedition, until recovered by a Canadian expedition, in 1906, has been lodged with the St. George's Society of Halifax, N.S., for safe-keeping. The flag, however, is tattered and shows deterioration from its long stay in the arctic. Halifax, the capital city of the province, has many historical relics and St. Paul's Church, built in 1750, is the mecca of many tourists during the summer, states the Tourist Department of the Canadian National Railways.

SWEDEN EATING MORE WHEAT

A possible trend in the wheat trade of the world is shown in the case of Sweden. Following the war European and other countries set out to make themselves independent of foreign sources of supply as far as they were able, which meant subsidizing the growers and consequently enhancing the cost of the wheat, particularly in view of the high value of land in the more densely populated countries. In Sweden there are definite prospects that there will be a return to the former practice of importing wheat in greater quantities as consumption is rapidly increasing and reclaiming land for agriculture is becoming more expensive, according to the Agricultural Department of the Canadian National Railways. The prosperity arising out of the war greatly stimulated the taste for wheat bread as against rye and the prosperous condition of the country has brought about an increase in the consumption of wheat and a great decline in the consumption of rye.

FUR FARMING INCREASING INDUSTRY

Ten little baby foxes were having their pictures taken on a ranch near Charlottetown, P.E.I., recently. In the good old "boom" days of the industry, back around 1913, the Dionne quintuplets would have had to take second place, for the pups would have represented just $65,000 in cold cash. "Yes," went on the rancher, "that litter in 1913 would have been worth at least $65,000, or an average of $6,500 a piece. As a matter of fact, I sold options around the 15th of May of that year for other ranchers at $14,000 a pair and a few weeks later sold six pairs for $16,000 a pair. The parties buying them had received a dividend of 340 per cent. Stock in the company was nearly all sold in Newport, Vermont." In the early days of the fur trade trappers would keep alive foxes caught in warm weather until the fur was prime and from this practice the modern industry of fur farming arose. According to the agricultural department of the Canadian National Railways, there are today in the vicinity of 6,541 fur farms throughout Canada with some 36,734 silver foxes.

WILL TRY TO DOMESTICATE THE MOOSE

High withered, long-nosed moose that browse off the mountain willow may one day be domesticated with the horses on the Black Cat Ranch at Brule, Alberta, which Fred Brewster of Jasper is opening for guests on July 1st.

"The moose," says Major Brewster, widely known as a Rocky Mountain guide and rancher, "is the natural beast of burden in many parts of Canada. While much of Canada is ideal for the horse in the summer, the winters in the mountain areas are severe for an animal which, after all, originated in a much warmer climate than ours and was first imported into the southern latitudes of the continent.

"The moose is strong and with care should be adaptable both for riding and for driving purposes. The one or two attempts at his domestication of which I know have been definitely successful, but these were individual cases where at most two of these animals were involved."

As compared to the horse, the moose would have the advantage in the wintertime of finding his food on the tips of willows above the snow. He would not have to be fed, nor to paw through to the frozen ground. In addition, continues Major Brewster, the moose can make his way through snow in which a horse is completely helpless.

"My notion is to catch two or three calves and let my men who are used to the handling of horses, work upon them," he says. "The problem should not be too difficult, as moose, along with deer, mountain sheep and goat, use the same range as our horses. Should permission for such an experiment be necessary, I would apply to the Provincial authorities who might well be interested in its success."

No Special Road

"There is no special road to happiness—you may be happy with nothing and unhappy with everything."
—Luigi Pirandello.

BANK OF MONTREAL CROP REPORT

General—With frequent and well distributed rains during the past two weeks, crop prospects are promising in practically all areas of the Prairie Provinces. Early June frosts have not damaged grain crops but market gardens have suffered to some extent. Warmer weather would now be beneficial. Copious rains have also improved crop conditions in all other Provinces in the Dominion. In Quebec growing conditions are satisfactory, although warmer weather is now needed. In Ontario excellent progress is being made by all crops. In the Maritime Provinces a marked improvement in all crops is shown but here again warmer weather is required. In British Columbia, owing to the dry spell in May, below average yields are indicated though recent rain has materially improved conditions. Details follow:—

Prairie Provinces—Alberta: Crops are backward but conditions generally are favorable. Moisture conditions are satisfactory, except in the south-eastern area and wheat shows strong even growth. Pastures and ranges are in good condition. Sugar beets are making good headway.

Saskatchewan—All grains are making good progress. Plants are well rooted and have good colour. Moisture conditions generally are satisfactory although further moisture is required in the southwestern area. Recent rains have improved prospects in the west central area, where soil drifting had occurred. Scattered areas [illegible] damage from cutworms and [illegible]. Hatching of grasshoppers [illegible] been retarded by wet cold [illegible]. Pastures are in good condition.

Manitoba—Wheat growth is uniform and vigorous. Plants are stooling well at an average height of [illegible]. Moisture is ample for the [illegible] and prospects for all crops are promising. Grasshoppers are hatching in some districts but are [illegible]. Pastures are in good condition.

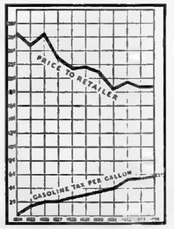
TOFIELD SERVICE STATION
CONRAD PATTERSON, Proprietor



The accompanying chart shows how the price of gasoline to the retailer has decreased and the gasoline tax has increased since 1924. The data for that graph are based on figures published by the Dominion Bureau of Statistics.

FALLING PRICES—RISING TAXES

IN 1924 the average price to the retailer of all gasoline sold in Canada was 26.6 cents per Imperial gallon. Since 1924 the price has fallen almost continuously and for 1933 and 1934 it stood at 18.8 cents—nearly eight cents less than in 1924.

"But", you say, "gasoline does not cost me eight cents less a gallon than ten years ago."

You are right, and this is why:

In 1924 the gasoline tax was new in Canada and the total gasoline tax collected in that year amounted to an average of only a little more than ¼ of one cent for each gallon consumed. But as the price of gasoline fell the tax on gasoline rose to higher and higher levels until in 1933 it amounted to nearly 5½ cents for each gallon consumed in Canada.

When you buy a gallon of Imperial gasoline you also pay other taxes totalling about 8/10 of one cent. The profit which Imperial Oil earned on each gallon of gasoline that it made and sold during 1934 was just over 5/10 of one cent per Imperial gallon.

GRAIN EXCHANGE MAKES OFFER TO AID PROBE INTO OPERATIONS

Reveals Exchange Suggested Months Ago That Appointment of Pool Man as Government Supervisor Would be Welcomed.

In order to clarify its position in view of statements made at Ottawa, the Winnipeg Grain Exchange has issued the following statement:

"On Friday afternoon the Prime Minister in a speech in the House of Commons reiterated the allegation [illegible] made by Mr. John I. McFarland last October that foreign grain firms were engaged in a bear raid in the Winnipeg market. This allegation was investigated by the Council of the Winnipeg Grain Exchange and was fully answered in a statement issued and published in the press November 1, 1934, in the following terms:

'On October 1st Winnipeg newspapers carried an interview with Mr. John I. McFarland who is in charge of the government's wheat operations in which he stated that he would recommend to the government at Ottawa that an investigation be made into the [illegible] of wheat on the Winnipeg market and would ask the government to make representations to the governments of Argentine and the United Kingdom that they take similar action in regard to the futures markets in Buenos Aires and Liverpool. About October 6th [illegible] story of [illegible] on the Winnipeg grain market during the two previous weeks appeared in [illegible] papers [illegible] Canada. This despatch originated [illegible] from some news [illegible] in Winnipeg. It made free use of Mr. McFarland's name and its tendency would lead many people to believe that figures and supposed facts given in it must have originated from Mr. McFarland's organization. The article is inaccurate and misleading. There was no condition existing in the trading on the Winnipeg Grain Exchange that would justify such a story. It reads like fiction and to the best of our knowledge that is just what it is. There is no evidence in the figures showing the market position of grain firms as at September 17th and October 1st, secured by the Council of the Exchange from the Clearing House, and which have been disclosed to Mr. McFarland, that any bear raid was attempted. Mr. McFarland has also been advised by the Council that [illegible] firms whose names have been mentioned in this connection were ready to authorize the Clearing House to make the figures showing their trading available to him.

"The international investigation suggested by Mr. McFarland on October 1st should in our opinion, not be lost sight of. There can be no argument about the fact that our greatest need is to export more Canadian wheat, and if there is any hope that an independent international investigation into the situation in the Canadian, Argentine and English markets will disclose anything in the actions of government agencies or individuals that is making it difficult for us to market our wheat abroad, it should be undertaken at once. It would [illegible] be in the interest of the whole country as well as of our [illegible] producers. It would, we are sure, be welcomed by the grain trade of Canada.

The Council of the Exchange is prepared to afford facilities for investigation of the trading operations of all its members, without exception by competent and impartial persons [illegible] such an investigation [illegible] to be in the public [illegible] has previously [illegible] Mr. McFarland that the [illegible] would, in addition, [illegible] possible assistance to [illegible] supervisor of the [illegible] intended by the Stamp Commission should the government see fit to appoint one.

The action of the Winnipeg Grain Exchange in setting minimum prices for December and [illegible] of 65c and 60c per [illegible] respectively was taken at [illegible] the Dominion [illegible] and in pursuance [illegible] the Exchange has [illegible] cooperated with the Dominion government and government wheat agency.

[illegible] the issuance of this [illegible] the President, [illegible] authority of the [illegible] advised Mr. McFarland that the Winnipeg Grain Exchange would welcome the appointment by the Dominion Government, to the position of Grain Exchange supervisor, of George [illegible], who has been assistant to Mr. McFarland since December 1930 and who previously to that was General Sales Manager of the Canadian Co-operative Wheat Producers Limited (the Pool Central Selling Agency). The offer of the Council that it was prepared to afford facilities for investigation of the trading operations of all its members, without exception, and as to the appointment of a Grain Exchange supervisor, as suggested by the Stamp Commission, has never been withdrawn. Representatives of the Winnipeg Grain Exchange now in Ottawa are prepared and anxious to appear before the special committee of the House of Commons which has just been appointed, to meet the allegations which have been made with reference to the bear raid and the [illegible] present short position, and to supply any information which the committee may require."

MALTING BARLEY SEED TESTS

According to a statement published by A. T. Elders of the Canada Malting Co., Ltd., the Canadian Maltsters have paid on an average of 50 cents per bushel during October and November for No. 3 Extra C.W. Six-Row barley since this grade was amended in 1929. At the same time the best feed grade No. 3 C.W. barley averaged only 40 cents per bushel. Both prices on the basis of cash grain at Fort William.

In an endeavor to improve the quality of barley so that more producers might obtain this premium, and further, so that Canada might extend her market in Europe, the National Barley Committee, through its Associate Committee on "Production" under the Chairmanship of Dr. L. H. Newman, Dominion Cerealist, sponsored a survey of the malting barley areas to determine the varieties that were being grown and arrange for the use of better seed of the approved varieties.

Under the direction of A. T. Elders of the Canada Malting Co., Ltd. and D. S. Kaufman of the Dominion Malting Co., Ltd., the following organizations co-operated to make the project a success. The country elevator interests, including the Manitoba Pool Elevator Co. and the Saskatchewan Pool Elevator Co., the United Grain Growers' Ltd., and the members of the Northwest Grain Dealers' Association, collected representative samples from farmers delivering barley to their elevators. These samples were forwarded to the Dominion Inspection Branch at Winnipeg. They were examined by the Inspectors of the Board of Grain Commissioners and Dominion Seed Branch, representatives of the Manitoba Extension Service.

By these men the samples were segregated into three groups i.e. (a) approved malting varieties and suitable for seed. (b) Of doubtful quality because of admixtures of varieties although fairly suitable for malting, and might be used by the farmer until better seed could be produced. (c) Unsuitable varieties and admixtures and should be discarded and seed secured as soon as possible.

In all some 1500 samples were examined. It was found that only 20 per cent were O.A.C. No. 21, the standard malting variety, and were included in the "A" group; 60 per cent were of doubtful value or of mixed malting varieties and composed the "B" group, while 20 per cent only were useless for malting and were included in the "C" group. All of the "B" group are being given a growing test along with a few from each of the other groups. In all about 1000 samples are being tested. The University of Manitoba is planting 600 and the Experimental Farm at Brandon, 400. When mature field days will be held; the plots will be examined for purity and the growers and operators attending will be shown the impurities and undesirable varieties present. Later a report will be made to the farmer through the elevator operator, showing the standing of the sample and if it is poor assistance will be given including better seed for the grower.

The operator has already advised his customers as to the classification of their seed.

SUMMER PROTECTION

How to deal with Mosquitoes, Black Flies and Punkies

Now that the warm season is here those troublesome biting insects the mosquitoes, the black flies and the tiny midgets known as "punkies" or "no-see-ums" are likely to cause discomfort and annoyance, particularly about summer residences and in the woods. It is therefore timely to consider ways and means of protecting oneself from these small but bloodthirsty assailants.

When camping, avoid selecting a camp site near marshes, swamps and stagnant pools where mosquitoes breed, or in the near vicinity of dense woods and underbrush, where they shelter. A dry, open space in the woods, or on some fairly exposed promontory, is preferable. Moreover, it is advisable not to camp close to the rapids of streams and rivers, for it is from such places that black flies often emerge in great numbers. A good fly-proof tent is invaluable in protecting one from insect pests, particularly at night, when sleep is desirable.

Northern Alberta Shorthorn Assn Picnic

LARGE NUMBER OF VISITORS—LOCAL EASTERN LODGE SERVED LUNCH

On Saturday, June 29th, the Northern Alberta Shorthorn Association held their annual picnic at the farm of Mr. Claude Gallinger just south of town.

There were a large number from a distance present in addition to a large number of local people, must have numbered to close on 500 people.

Due to the forethought of Mr. Gallinger, lunch was served by the ladies of the local Eastern Star lodge to many of the visitors from a distance as well as to a number of Tofield district people. Others brought their own lunches and were served hot coffee, sugar, and cream as often as they desired.

What could be termed the post of Master of Ceremonies was taken by Mr. Durno, of Calgary, a man known in livestock circles throughout the province.

At the conclusion of lunch Mr. Durno introduced Mayor Brace of Tofield who officially welcomed those present to the district. While his message of welcome was brief, it was nevertheless very cordial. He said he was very pleased to see so many from a distance present and on behalf of the Town of Tofield accorded them a hearty welcome. Tofield was becoming proud of the Gallinger farm and the herd of purebred shorthorns. He congratulated the owner on building up such a farm and on assembling such a fine herd.

Professor Sackville, president of the Shorthorn Breeders' Association, gave a short address, saying that as he had just come from a convention he realized that there were more pleasant things than having to listen to lengthy speeches.

The environment in which those present found themselves was much better than listening to lengthy addresses. He thought it quite fitting that the Northern Alberta Shorthorn Association should hold its picnic at the farm of the president, Mr. Claude Gallinger and the first thing Mr. Gallinger knows, he will have this as an annual event. One can easily conceive what it means to have a man like Mr. Gallinger sponsoring the Shorthorn breed. The future of the breed is to some extent dependent upon the man at the head of it. He congratulated the Northern Alberta Club as these district organizations have been a great asset to the provincial organization.

Mr. Durno then called upon Mr. Gallinger to say a few words. Mr. Gallinger saying he was pleased to welcome all there as guests of the N.A.S.C. with an additional welcome from Mrs. Gallinger and himself.

It was then announced that the Hon. Mr. Grisdale, Minister of Agriculture was to be present but car trouble would cause him to be late. However, Mr. L. Carlisle, livestock commissioner was present and would address the gathering.

Mr. Carlisle said he was not taking the minister's place, he was unable to do that, but he would do his best to say a few words. We all appreciate what Mr. Gallinger has done as regards the Shorthorn breed, but he would suggest that when they were inspecting the Shorthorns, that they cast their eyes over the fence and see the nice Herefords, also the purebred stockman, he said, was hit hard by the depression, but did not grumble. As a rule they kept up their herds. He believed the future prices would be better and the American market would create a demand for good stock.

Mr. Douglas spoke a few words regarding the Edmonton Exhibition, which he said would include the biggest parade ever held in the province of Alberta.

Miss Holmes, secretary of the Association was called upon to stand for a moment or so as were also two of the oldest Shorthorn breeders in the province.

The afternoon was spent inspecting and judging the cattle. By vote the audience would place them and then judges would place them and announce their reasons. There were many different lots including young and mature animals, male and female. The herd has been assembled for quality, some being raised at home, others imported from the United States, and others from Scotland.

For the children there were races and games with a splendid array of prizes.

As a wind-up a competition to catch the greased pig was held. The pig was greased alright and only a few junior lads entered the fray. After a

Dominion Day Celebration a Success---Showery Weather

Monday morning early was bright and clear and the hopes of Tofielders regarding their Sports Day registered high. During the morning clouds gathered and intermittent light showers fell and at noon a sharp shower of 10 or 15 minutes duration came down. It did not look very promising for a successful day, but fortunately, after the noon shower, fine weather prevailed and while the crowd was a little later coming than other years, the crowd was equally as large or larger, and quite as good natured and jovial.

Early in the morning Tom Wallington performed his annual task of decorating Main street with trees, giving the town a holiday appearance.

The day opened with a baseball game between Ross Creek and Tofield. Ross Creek were playing good ball but Tofield slipped enough during the early innings to allow five runs pile up against them. Changing pitchers, putting Wood in the place of Joe Kallal, the locals tightened up, scored three times, but were never able to increase their score. Ross Creek winning first honors of the day by a score of 5-3.

The second game played between Ryley and Holden kept an ever increasing crowd interested. Ryley obtained an early lead and though Holden entered the scoring they were unable to score enough to put the teams on an even footing. Ryley won this game by the score of 9-5.

Tofield and Holden then played for third place. Stepping into the game as though they meant business, Tofield went into the lead and annexed six runs before the game was over, at the same time holding Holden scoreless.

The final game played between Ryley and Ross Creek proved to be a walk-away for the boys from the east. Ryley obtained an early lead and consistently added runs throughout the game. The final score was 11-2 in favor of Ryley.

This win gave Ryley first money; Ross Creek second money, and Tofield third money.

Ryley: Catcher, Umphrey; pitcher, Helley.

Ross Creek, Catcher, Strand; pitchers, Wilson and McLaughlin.

Frank Ball umpired all games.

There was plenty of excitement on the softball diamond also, the girls' teams having plenty of supporters who heartily cheered on their respective teams. A team from the north, Silver Lake, near Ross Creek, proved the sensation of the day, winning the tournament. Their manager tells us they have yet to lose a game. In the final game Ryley gave them stiff opposition, both teams playing smart ball.

The first softball game was between Ryley and Tofield. Both teams had been hastily organized, Tofield as late as Saturday night, we understand. Ryley won this game by a score of 10-13.

The second game between Silver Lake and Shonts proved a comparatively easy win for the northern lassies, the score being 15—4 in favor of Silver Lake. The Shonts team had been hastily organized and were not the smooth working organization of last year.

The final game between Silver Lake and Ryley was something in the nature of a softball classic. Players on both teams had to be good to get round the bases in this game. Silver Lake made the grade four times and Ryley three giving Silver Lake the victory by the one extra run.

The batteries for this game were N. Bilan and P. Lapenbach for Silver Lake, and D. Nord and R. McLennan for Ryley.

The result of this game gave Silver Lake first money and Ryley second.

Only one game of basketball was played with Lakeshore supplying the opposition to the local team. The game drew quite a number of spectators and honking of horns and cheers greeted each basket made by either team. Lakeshore proved too good for the locals and won by the score of 21—11.

There was a full line of races and a great deal of enjoyment was got out of this department of the day. Youngsters straining for victory and the older folk standing around their faces wreathed in smiles.

The horseshoe tournament was run of smoothly with quite a few entries. G. Swinton and L. Glover won first award and D. Dodds and N. Glover the second.

All the booths did a good business but the demand for ice cream and soft drinks was not as great as other years due to the cool weather. The committees' hot dog stand was well patronized as was also the church booth. For those who like a game of skill "Bingo" was provided and other attractions interested the sportive ones.

At the showing of "Here comes the Navy" at the Variety Theatre, the house was packed and scarcely had house been cleared following the show then it was filling up again, this time with many dancers to dance to the music of the Silvertone Five.

Taken as a whole the day was a complete success, though at time of writing, financial returns have not been compiled.

NOTE OF APPRECIATION

The Tofield Sports Day organization wishes to thank all those who helped to make the day a success. The thanks of the committee are due Mr. and Mrs. Gravelle, who helped in the refreshment booth, also to all those who while not at the meeting, were appointed on committees without their knowledge, yet carried out their duties with enthusiasm and skill.

Local and Personal

Mr. and Mrs. Gordon Provost, Edmonton and Mr. Dick Poting, Westlock were week end visitors at the manse, Tofield.

Miss Elspeth Allan, Westlock is spending part of her holidays with her parents, Rev. and Mrs. D. K. Allan.

A very enjoyable evening was spent by the choir of the United Church on Thursday evening, June 27th, at the home of Mr. and Geo. Cooksey.

After the usual practice of hymns and anthems the evening was given over to music and games.

A meeting of the Official Board of the United Church i.e. Sessions and Board of Stewards and Representatives of Ketchamoot, Lakeshore, Tofield congregations will be held in the Church Schoolroom on Monday 8th July, at 8 p.m. A full attendance is requested.

Miss Ross and Miss Moore attended the Carnival at Camrose on Saturday.

Miss Ina Taylor who spent the past school year with her father here returned to her home at Owen Sound, on Monday.

Miss Margaret Lindsay of Innisfree is spending a short time with her sister Anne here.

Miss Helen McCauley who has been teaching at Bruce is home for the holidays.

The Misses Kathrine and Alice Moen are spending the holidays here.

Mr. D. Purcell left on Saturday for his holidays. He will spend them in Calgary, Banff and Waterton Lakes.

Miss Thelma Jobb and R. Whyte are holidaying at Sylvan Lake.

Miss Audrey Jobb of Drumheller is home for the holidays.

Mrs. W. Hay and Rita spent a few days here this week.

Bob Blair of the creamery staff spent the week end in the city.

Mr. and Mrs. Albert Kendall spent Monday at the Kendall home.

Mr. and Mrs. McCulla of Neilburg are visiting at the Jobb home.

Miss Jean Hull left for Edmonton this week, were she will in future reside.

Miss Audrey Scott is a patient in an Edmonton hospital having undergone an operation.

Mr. Burroughs of the Crown Lumber visited Stettler for the week-end.

Mr. and Mrs. Geo. Coatta and Doris left on Saturday for a trip to Winnipeg.

Mr. and Mrs. A. Lewis and family visited at the Hesler home on Monday.

Mr. and Mrs. Imler and family are spending their holidays at Pigeon Lake.

Myrtle Bethel of Sedgewick is home for the holidays.

A very pleasant afternoon was spent at the Kendall home when a number of the girls met to bid farewell to the Misses Jean Hull and Ina Taylor, Jean leaving for Edmonton and Ina for Owen Sound. A social afternoon was spent and a lovely lunch was served. Jean and Ina were presented with a small token of friendship after which the party broke up.

The Mercury linotype was called on to do double duty this week. An electric element in the heating unit of the Vegreville machine burned out, and Mr. A. L. Horton, T. Horton and P. Urchak were here and done their typesetting. The machine ran almost continuously from Tuesday evening to Friday morning.

AMISK CREEK

Included among the graduates from the Camrose Lutheran College there were from this district, the Misses Agnes Annebo, Lilly Berg, Pearl Patterson, Olive Haugen and Glenn Olson. Hearty congratulations are extended to these young people.

Among those who attended the silver wedding celebration held in honor of Mr. and Mrs. J. Jacobson held in Bardo last week, were the Moen and Patterson families, Mr. and Mrs. I. C. Olson and Gladys, the Molire and Annebo families, Mr. and Mrs. P. O. Flaaten, Mr. and Mrs. C. Erickson, Evelyn Hillerud, and Sigurd Snortheim.

Mr. A. Erickson left for a visit in the States last week. He will visit in Wisconsin and with his sister and other relatives in Grand Forks. [illegible] He will also [illegible]

Mr. and [illegible] Berg and Mrs. P. O. Flaaten [illegible] the Sons of Norway [illegible] at Crooked Lake last Saturday. They attended the morning service in the Lutheran church [illegible] Sunday and returned by [illegible] There they visited with [illegible] at their home and attended the Camrose Lutheran College choir concert at the Norwegian church and returned home Sunday evening.

Mr. and Mrs. I. C. Olson and Gladys, Mr. A. Haugen, Thora, Alice, Clara and Arthur, Mr. and Mrs. A. Patterson and Lillian, Mr. and Mrs. J. Annebo and family, Mr. and Mrs. R. O. Berg and Alice, Mrs. P. O. Flaaten and [illegible] Moen motored to Camrose and attended the graduation exercises at Camrose Lutheran College.

ALBERTA NEWS LETTER

Issued by the Publicity Commissioner, Government of Alberta, Edmonton, June 28th 1935

OIL PRODUCTION

[illegible] the [illegible] com [illegible] for the [illegible]

JUNIOR FARMER CAMPS

[illegible] made [illegible] artment [illegible] club [illegible] under [illegible] artment [illegible] camps [illegible] Calgary [illegible] Arg [illegible] [illegible]

[illegible]

[illegible] George [illegible] and [illegible] He [illegible] that [illegible] head the [illegible]

[illegible] AREAS

[illegible]

MOSQUITO SEASON AIDS

Around summer cottages and [illegible] dwellings the grass should be kept cut short, and shrubbery and underbrush in which the insects shelter should be kept down to a min[illegible]. Proper screening of doors and windows is essential to comfort where biting flies are prevalent. Screens preferably should not be less than 16 meshes to the inch.

[illegible] kerosene [illegible] of [illegible] at [illegible] permanent [illegible]

[illegible]

[illegible] Dr. [illegible] department of geography [illegible] of Alberta [illegible] Wardens [illegible] will [illegible] party [illegible] Columbia [illegible] the [illegible] George [illegible] between [illegible] Beaver [illegible] known [illegible] with [illegible] area [illegible] Wainwright [illegible] the new [illegible] Landmarks [illegible] of September [illegible] Hume.

NATIONAL PARKS OPEN

[illegible] the [illegible] improvements are being made in all parks [illegible] at Banff, Jasper [illegible] Elk Island.

[illegible] as follows: thoroughly mix one half pound of pyrethrum insect powder in one gallon of kerosene, cover [illegible] and allow the mixture to stand for several hours, siphon or filter off the clear liquid which forms the spray. Keep it in a closed container preferably a can or amber-coloured bottle when not in use. Apply by means of a small hand sprayer or atomizer.

The tiny biting midgets, known as "punkies" or "[illegible]" sometimes prove troublesome and are so small that they pass through ordinary screening without difficulty. The above spray when applied liberally to the screen has a fairly lasting repellent effect which prevents the midges from entering.

Various [illegible] that may be applied to exposed parts of the person to protect against attacks by biting insects have been recommended. A popular one is made by mixing together 1 oz. of oil of citronella, 1 oz. of spirits of camphor and [illegible] of oil of cedar. Another has the following formula, [illegible] camphorated oil [illegible] A third preparation that has been strongly recommended is made as follows: melt together over a gentle fire vaseline 1 oz. [illegible] wax 1 oz., medium hard [illegible] until the mixture [illegible] stir in 1 gram of [illegible] of cassia and 2 grams [illegible] of [illegible] citronella.

When [illegible] has been bitten by insects [illegible] not to scratch the [illegible] cooling or soothing [illegible] the best remedy that can be [illegible]. Borated vaseline, household ammonia, tincture of [illegible] and even ordinary toilet soap when moistened and rubbed gently over the punctures will give relief.

"Nice umbrella you've got."

"It [illegible] belongs to Edith."

"Who's Edith?"

"I don't know, but her name is on the handle."

YES - - it's true

That "The Mercury" is owned by an individual. It's his property and he must pay the bills and assume all responsibilities. On the other hand, it is also true that somehow or other the public looks upon the community newspaper as being partly their property. The community expects its public institutions to be defended, to be favorably reported, to be kept in good report throughout the district and the province. Churches, societies and organizations look for and expect their activities to be reported in their home paper. And the home paper does all these things—likes to do them. This being so, it is only human that the owner of, and those who are employed at, the local newspaper office should expect that all these various interests would return the compliment through giving it printing orders. If all the printing requirements of Tofield were to be printed in Tofield, "The Mercury" would have to nearly double its present staff.

THE MERCURY

HEALTH

by

A HEALTH SERVICE OF THE CANADIAN MEDICAL ASSOCIATION AND LIFE INSURANCE COMPANIES IN CANADA

PACIFIER?

It would be rather ridiculous to call the [illegible] irritating and [illegible] fight person a pacifist. It [illegible] ridiculous to call the thing wh[illegible] so many babies' mouths [illegible] such names as "pacifier", "c[illegible] other".

T[illegible] called pacifier really [illegible] the child cries for [illegible] will cry for other [illegible] things, such as sharp [illegible] blame, but [illegible] No child ever cried for [illegible] pacifier" unless someone had [illegible] the bad habit of wanting something in his mouth [illegible]

I[illegible] that the "pacifier" is [illegible] any man how [illegible] at a dry pipe with [illegible] The use of [illegible] more or less [illegible] as the baby [illegible]

[illegible] for many reasons [illegible] dangerous. Why? [illegible] keep the [illegible] and anything which does not [illegible] that standard of cleanliness [illegible] mouth [illegible] because of the [illegible] soiled, often carry [illegible] into the child's body. [illegible] a filthy article the [illegible] "pacifier" spoils the [illegible] of the mouth by causing a [illegible] of the lower jaw, which [illegible] regular and protruding [illegible] at a "pacifier" produces [illegible] causes a [illegible] of saliva which keeps the [illegible] leading to a disturbance of the digestion.

There is not one thing to be said in favor of this bad habit. Like all other bad habits, the way to deal with it is never to allow it to start. Once bad habits are formed they must be corrected. If your baby is one of the unfortunates who spends his days and nights with a "pacifier" stuck in his mouth, then there is only one thing to do—burn the "pacifier."

Certainly the baby will cry for it, but he will soon forget about it, and he will thus avoid some of the dangers of disease, upsets of his indigestion and the deformity of the mouth and teeth to which the use of the "pacifier" leads in many children. A baby should never go to sleep with anything in its mouth, and when he is awake, his mouth should be used to receive food and drink only.

LOWLY WORM IMPEDES BIG FREIGHT TRAIN

Consider the worm, an apparently insignificant part of creation. He toils for the most part underground, burrowing, and plays a major role in the growth of crops. He contributes also to our pleasure by furnishing bait for fishing. To look at a worm one would hardly think that so insignificant a creature could stop railway trains but when joined by thousands of his kind he gums up the wheels of locomotives and helps to cause grey hair in railway officials. Recently an outbreak of army worms in central New Brunswick swarmed over the Canadian National Railway tracks and seriously interfered with the operation of trains, freight trains having to be cut in two in an endeavor to get through to their terminals with their loads of freight. According to latest reports the army worms are moving eastward at a rate of half a mile a day and are stripping poplars and birch in their path of all foliage. Their motto seems to be "Divided we are bait for fish, but united we gum up the works."

MILLION DOLLAR FUND GIVEN TO STABILIZE DAIRYING IN CANADA

Along [illegible] of resolutions discussed and passed by the Alberta Dairymen['s] association, the Dominion government this week passed an appropriation of $1,000,000 to be devoted to stabilizing the industry.

One of the outlets for Canadian dairy products is through shipments of cheese to the British markets.

But butterfat and whole milk have been getting over the price the cheese factories can pay, and sell on the open market consequently the appropriation is to be devoted to arriving at some sort of a working basis of bonusing the cheese industry so that those who sell milk to the factories will not be at the disadvantage of lower prices compared with shippers who sell cream for butter production or whole milk for domestic consumption.

The [illegible] will be carried on under the National Marketing act.

Canadian butter, of course, cannot compete in the world markets at present home prices.

There has not been any butter marketed from Canada in the old country so far this year, and for the first four months there were imports of 3,235,000 cwts. from other countries.

Cheese imports for the same four months this year were over 1,000,000 cwt. and only 4,917 cwt. of that was from Canada.

The plan of stabilization was laid before western associations during their sessions last winter by Alan C. Fraser, secretary of the National Dairy Council.

IS 40c. A BUSHEL ENOUGH FOR WHEAT

Do Western Canadian farmers think that forty cents a bushel for their wheat at delivery points is sufficient to represent their production costs?

Evidently James Richardson, prominent grain man of Winnipeg, considers 40c. as being a price basis which our Canadian farmers should be prepared to accept for their wheat, if necessary, in forcing the disposal of our surplus on the world's markets, under a continuation of the "open market" system as advocated by him.

He told the federal parliamentary committee at Ottawa, taking evidence on the proposal to establish a federal wheat board, that farmers had told him they could "get by" at forty cents a bushel.

The Wheat Pools and other farm organizations have always contended that any such a price was ridiculously low and would ruin the wheat growing industry in Western Canada.

Can it be that the Pools and the farm organizations were mistaken?

Will the buying power of the west be maintained on 40c. wheat?

Who were the farmers who told Mr. Richardson they could "get by" on 40c. wheat?

The teacher warned her scholars never to kiss animals or birds.

"Can you give me an instance of the danger of this?" she asked.

"Yes, teacher," replied a boy. "My auntie used to kiss her lap-dog."

"What happened?"

"It died."

"DE LUXE-ING" THE SOURDOUGH TRAIL

Photographs show: Above, The Prince Robert. Top left: [illegible] Bottom: One of the [illegible] to Alaska's [illegible]

THE gold rush of '98 sent a picturesque crowd of sourdoughs and chechahcos along the famous gold trail to Alaska and the Yukon. The vacation rush of 1935 will see another picturesque invasion, but it will be on a vastly different scale to that of the sourdough. Steamship traffic to Alaska, the land of gold and glaciers, of sourdoughs and totem poles, has grown to huge proportions during recent seasons. Canadian National Railways and steamship officials found their oil-burning ships booked to capacity during last season, so to care for the increasing traffic four special 11-day cruises will be made by the S.S. Prince Robert, commencing June 28th, in addition to the regular Canadian National Alaska service.

Instead of hardships encountered on the "Trail of '98" by the gold-seekers, the pleasure-seeking vacationists who journey northward on the Prince Robert will find everything arranged for their comfort. These will really be de luxe cruises for the Robert is equipped with every latest device for the comfort and convenience of her passengers.

Sitka, old-time Russian capital of Alaska; Skagway, gateway to the Yukon; Ketchikan, Juneau, will be among the ports visited, while on the journey the ship will traverse Dean Channel and make a stop at the historic Mackenzie's Rock, marking the termination of Alexander Mackenzie's overland journey to the Pacific.

ANOTHER SPORTS DAY PAST HISTORY—

OF MINUTE importance when viewed in the light of world events, even national or provincial events, yet Tofield sports day deserve some mention here. It is good to see the crowds milling around the fair grounds of a country town, on pleasure bent. Everyday affairs of life are serious enough goodness only knows. The problem of replenishing the pantry shelves, to say nothing of clothing and the seeming multitude of other economic affairs are of prime importance on almost every occasion a rural dweller visits his or her home town. [illegible] sports day, even if these matters cannot be forgotten, we like to think that for this day at least, they are pushed into the background.

Annual sports days have been held at Tofield ever since the town was incorporated, perhaps even before then and good sports days they were too, but Monday last was the fourth annual event [illegible] by the group of individuals known as the sports day committee. It is the aim of this committee to have things so arranged that everything works with the maximum smoothness. There are other days [illegible] Vi[illegible] More often than not the sporting fraternity [illegible] towns intermingle on celebration days [illegible] this line, particularly Ryley, Holden [illegible] sport[illegible] [illegible]ization? If such an organization w[illegible] degree of uniformity could be attained [illegible] ey appropriated to the different sports [illegible] ers who [illegible] be given passes, etc., could be made [illegible] form. We throw out this suggestion for what it may be worth, remembering almost [illegible] lies a[illegible] for the suggestion to strike root [illegible] upon fertile ground.

THE SHORTHORN PICNIC—

[illegible] purebred livestock business is a business unto itself. Requiring exacting care, the expenditure of considerable sums of money both in capital expenditure and upkeep, it only appeals to enthusiasts of any particular breed of livestock whose aim is two fold, that of improving the general standard and making a paying proposition of the venture.

Obviously, every farmer cannot concentrate on raising purebred animals, if they did the purebred would become the commonplace, but every farmer can gradually improve the quality of his animals by adding as circumstances permit, better quality stock. In this respect, the purebred enthusiast becomes a valuable asset to any community by making it possible for the average farmer to obtain close at hand live stock of good quality.

In this respect Tofield is fortunate in having the Gallinger farm situated here. There are few, if any, herds containing finer animals in the province as was fully demonstrated on Saturday at the Northern Alberta Livestock Association [illegible] Districts often become known chiefly by th[illegible] important product, and it is quite reasonable to suppose that as the years pass, this district will become known as the home of the better class of Shorthorn.

THE REGINA RIOT—

One can only feel sympathetic towards the majority of the trekkers halted at Regina. As regards the professional agitator, one's feelings are different. To the majority of the men, to whom lucrative employment for the past few years has been denied, the outlook appears black enough to warrant any action, but reason dictate that law and order must be observed at all costs. We have never been kindly disposed towards the camps, certainly not for a protracted period of time. As an emergency perhaps they filled a need, but an attempt to [illegible] the fundamental causes of such a situation [illegible] have been made long ago. Quite frequently [illegible] tory shows that it is only by such happenings as occurred at Regina on Monday are the [illegible] men adjusted. Viewed in that light the [illegible] nate event might have far reaching [illegible] a beneficial nature. Even so, it is a dear price [illegible] for progress.

MILESTONES—

As we journey along the highway of our [illegible] sometimes happens that in looking back over our shoulders we see a shaft of sunlight [illegible] milestone that we have passed earlier on our journey. But we are not to imagine that if we could travel back to that milestone we should be able to lay hands on that illusory gold. Childhood [illegible] happiness. (People who say that they would like to be children again mean that they would like to be children again with their present knowledge [illegible] to guide them in life. They would not be children at all, but abnormal little old men and [illegible] olescence is a glorious time of life, but [illegible] times by its deep agitations and distresses. In middle age, when the mental and spiritual [illegible] [illegible] and knowledge [illegible] wisdom, we begin really to understand that all along our journey the secret of happiness shine[s] [illegible] sunlight on the milestones ahead of us.—National Magazine.

THE USE AND VALUE OF PASTURE FOR MARKET PIGS

(Experimental Farms Note)

In experiments conducted over a number of years at the Dominion Experimental Station, Lacombe, Alberta, pigs fed on a straight grain ration [illegible] barley and oats, and allowed access to a small field or paddock sown [illegible] a pasture crop, made from thirty [illegible] forty per cent more rapid gains, and from twenty to thirty per cent [illegible] economical gains than pigs fed [illegible] dry lot where no green feed was [illegible] and where they were entirely dependent for their nourishment [illegible] the grain mixture supplied [illegible] trough or self-feeder. The pasture [illegible] not only supplies succulence [illegible] to a considerable extent avoids [illegible] possibility of worm infestation [illegible] but it also provides the hog with proteins, minerals and vitamins which are lacking when [illegible] are fed only barley and oats, [illegible] milk or tankage is available. Experimental results at Lacombe [illegible] indicate that pigs confined to [illegible] feeding pens and fed inside [illegible] called the Dan[illegible] ration on a grain ration properly [illegible] with feeds high in proteins, mineral substances and vitamins make faster and more economical gains than pigs fed similar feeds [illegible] outside conditions in a pasture.

In a test conducted during the [illegible] Yorkshire pigs fed [illegible] a grain ration supplemented [illegible] and [illegible] made seven per cent more rapid [illegible] and fifteen per cent more [illegible] than pigs fed outside [illegible] a pasture [illegible] of oats and rye on a ration [illegible] except that cod liver oil was [illegible] The results of this test [illegible] that where sanitary [illegible] pens are available and the [illegible] balancing of rations can be [illegible] there is no serious need [illegible] accommodation for growing and finishing pigs of good bacon [illegible] However, for [illegible] gilts and boars, [illegible] purposes, or for carrying [illegible] boars and sows, [illegible] and exercise are very valuable.

GOVERNMENT UPSET IN NEW BRUNSWICK BY BIG TURN-OVER

[illegible] 43 out of 48 seats, the [illegible] of New Brunswick swept into power on Thursday of last week in the provincial general elections. Premier Tilley and all his cabinet ministers were among those defeated. Nine [illegible] Conservative candidates lost their deposits.

The Liberal leader and incoming premier is A. A. Dysart.

NO VOTE LIKELY BEFORE AUGUST 6th

[illegible] election probably [illegible] held before August [illegible] Tuesday [illegible] candidates [illegible] in the legislative buildings for a two-day meet[ing].

After the [illegible] session had adjourned at 1.15 p.m., Premier Reid [illegible] that any [illegible] as to the date of the [illegible] would be made before the end of the present week. Allowing for the election act provision of 36 [illegible] days' notice, this would make it impossible to hold the election before August 6th.

The question, it appears, will be "before or after harvest" [illegible] a preponderance of opinion for holding the election before harvest. If this view prevails, the election date would fall between August 6th and 9th, it was indicated.

At the conclusion of the morning session it was revealed that discussion of an election date had not been reached, the entire meeting [illegible] the [illegible] situation throughout the province. The [illegible] resumed at 2.30 p.m.

[illegible] a belated lunch, Premier Reid was asked, "Has any decision been made as to the election date?"

"The question was not discussed this morning. We devoted our time to a general discussion of the situation throughout the province. We found a very good spirit prevails among the members and candidates," the premier replied.

"[illegible] we expect an election date announcement when the meeting concludes?"

"I don't think so," the premier [illegible]

"Would you say we would be lucky [illegible] week?"

Premier Reid smiled.

[illegible]

"Would it be safe to quote you as saying there will be no announcement before the end of the week?" a reporter continued.

"Well, I guess you can say it is [un]likely," he said.

CELEBRATE 21st BIRTHDAY

The Provincial School of Agriculture, Vermilion, will celebrate its coming of age, by a two day gathering of students and ex-students, on the 19th and 20th of July. July 19th will mark the trip of hundreds of students as they wend their way back for the big reunion. The plans are to arrive for the noon lunch on Friday, the 19th. Immediately after lunch Premier Reid, Hon. F. S. Grisdale and others will take part in the opening session. This is to be followed by a special Alumni meeting to lay plans for the year's programme. At 5 p.m. there will be a ball game, present students vs. the World and after this the Alumni supper will be held on the lawn. Dean Howes of the University, and former principal of the school will address the gathering and will officiate in the cutting of the big birthday cake. After this very important function the students will enjoy a dance in the school gymnasium. The sessions will continue over Saturday morning and will include a livestock parade of the farm animals. Provision is made at very moderate rate for the students to enjoy board and room in the school dormitory.

FARM WOMEN'S WEEK

A short holiday and rest feature that is growing in popularity is Farm Women's Week, which is held at the School of Agriculture, Vermilion. The [illegible] of this rest period originated among the women's organizations, and the main purpose is a rest and holiday for a few days in the [illegible] ery and on the beautiful school grounds. There will be lectures and discussions on various subjects of interest to women which will include the garden and the flowers.

A full programme of four days is arranged, and while the sessions open on Tuesday, August 6th [illegible] may attend the af[illegible] The course closes early [illegible]

A BIGGER AND BETTER EDMONTON EXHIBITION

JULY 15—20

With dates that fit in nicely with the holiday season, July 15 to 20, low fares and special excursion [illegible] railways and bus lines, and the finest array of attractions ever secured, the 57th Annual Edmonton Exhibition promises to eclipse all previous events in the Capital city. Edmonton invites you to come for Northern Alberta's Big Annual Holiday. Citizens, merchants and the management [illegible] are [illegible] ating in their preparations to entertain a record crowd of visitors Fair Week.

One of the very best ways to enjoy the exhibition [illegible]

[illegible] the agricultural [illegible] the Art Loan exhibit, the Women's [illegible] manufacturers' building, [illegible] and of course the Old Timers' and Forestry cabins.

For the [illegible] horse races—seven races daily [illegible] p.m. daily. [illegible] grandstand show for there is a real [illegible]

[illegible] the evening of August 9th [illegible] arrangements may be made to stay until the next [illegible]

[illegible] Board and [illegible] $1.50 per day [illegible]

[illegible] A rate book and [illegible] will be found useful. Arrangements are made to look after babies and small [illegible]

[illegible] under five. For children from 5 to 10 years the charge will be 75c per day [illegible] $1.[illegible]

[illegible] Fascinations of [illegible] a gorgeous musical extravaganza, interspersed with the most clever vaudeville acts in America and from the continent. After the grand stand show join the happy throngs [illegible] and if you don't climb about ten years off your age we miss our guess.

A new feature which is attracting much attention this year is the "House of Magic", staged by the [illegible] Company and shows the wonders of electricity [illegible] outside of the Century of Progress [illegible]

The depressed price of farm products is a problem with which everyone is familiar, but on the 1913 base farm product prices have never been as low as gasoline. Between 1913 and 1920 gasoline did not rise in price to [illegible] the same extent as farm products, yet since 1920 its price has almost continuously de[clined]. The data for the above graph are based on figures published by the Dominion Bureau of Statistics.

FAIR LABOR POLICIES BENEFIT THE CONSUMER

WORRY and unhappiness are enemies of efficiency. We have always tried to be efficient and years ago we said, "to the greatest extent possible let us get worry and unhappiness out of this organization — out of the minds of every man and woman in our employ."

So Imperial Oil has always paid high wages. It set up sickness and death benefits, a pensions plan and group insurance for its workers. It made it easy for them to share ownership in the Company. It gave them a voice in the discussion of Company policies that directly affect them. It introduced the forty-hour week, thus increasing the number of those who work for the Company.

Efficiency and loyalty are repaying the Company for all these measures. Imperial Oil employees give generously of their hands and minds because they are well treated. They feel secure and this feeling is reflected in their work and in the high quality and lower cost of the products they make. The consumer benefits, the employees benefit and the Company benefits by these policies.

LINDBROOK

* * *

An overflow meeting was held in the school here last Wednesday night. The subject of the address was "Social Credit." The chairman was Mr. Geo. Edwards of Tofield. The speakers were Dr. McPherson of Ryley, and Mr. Johnstone Ferguson of Tofield, both prospective candidates for the Alta Legislature in the coming provincial election. The guest speaker was Mr. J. [illegible] of Calgary. The place was packed and the people were listening in at the windows despite the unwelcome attention of the hungry mosquitoes. Mr. Edwards opened the meeting with a few pithy remarks and then introduced the speakers to do their stuff. Dr. McPherson in the first and some of his excerpts from the speeches of prominent banking officials and financiers were quite eye-openers but the excerpt from the manual of instruction issued by the head offices to their branches was quite a revelation. Mr. Johnstone Ferguson then spoke and chiefly urged his listeners to study the question for themselves honestly and that he had no doubt as to the result of their findings. Mr. J. C. Landerson then spoke and by means of drawings etc., illustrated the workings of the Social Credit plan with regard to the money system. The regretted lack of time prevented him describing the rest of the platform but urged that study groups be formed with the object of a thorough study of the whole thing. Only two questions were asked and answered. Then a study group was formed with Mr. E. Heicher as president, Mr. W. C. Lancaster vice president, and Mr. P. McMuller secretary. Judging from the lists it seems as if nearly all present signed on for group study, which shows how strong the interest is in Social Credit here. We hear that a meeting is to be held next Friday 5th July.

The school children had their annual picnic at the Bonnie beach, Hastings lake last Thursday. The weather was good and the usual games, races and bathing and boating were in vogue, also not forgetting the ice cream, nuts, etc.

A heifer was killed on the highway near here last week being struck by an unknown auto. Another auto plunged into the ditch by the store after he had safely passed some horses on the road, is this what they call "reaction" or what?

SHORTHORN PICNIC

(Continued from front page.)

few preliminary skirmishes, Ross Craig entered and in no time at all had Mr. Pig in a strangle hold.

During the afternoon Hon. Mr. Grisdale arrived and gave a short address.

Among those present from a distance were:

Honorable and Mrs. F. S. Grisdale Minister of Agriculture, Mr. S. G. Carlyle Live Stock Commissioner for Alberta, Mr. J. W. Durno, Professor and Mrs. Sackville, Dr. and Mrs. R. Sinclair, Mr. J. H. Johnston, farm manager, U. of A.; Mr. Josh Biglands, herdsman, U. of A.; Miss E. L. Holmes, Mr. and Mrs. P. W. Abbott, Mgr. Edmonton Exhibition; Mr. J. M. Douglas, President Edmonton Exhibition, Mr. and Mrs. G. R. Hall, Edmonton, Mr. and Mrs. Henry Trame Lacombe, Mr. and Mrs. W. L. Robinson Vermilion, Mr. and Mrs. Chas. Hall, Sedgewick, Mr. and Mrs. Angus McDonnell, St. Albert; Mr. Jas. Walters, Clive; one of the oldest Shorthorn Breeders in Alberta, had bulls to the first bull sale held in Calgary; Mr. Wm. Sharpe, Lacombe, one of the oldest Shorthorn Breeders in Alberta; Mr. and Mrs. H. W. Scott, Sedgewick, District Agriculturist; Mr. and Mrs. J. C. McTavish, of the McTavish Business College, Edmonton; Dr. and Mrs. C.H. [illegible], Veterinary, Fort Saskatchewan.

Large Social Credit Meeting at Vegreville

On Wednesday a large gathering of between 2000 and 3000 people assembled at Vegreville to hear Mr. Aberhart, Social Credit leader expound his views and rally supporters to his cause. The meeting was held in the arena the body of which was well filled with a keenly interested audience.

As Mr. Aberhart and his party entered the band accorded them musical honors, the audience standing.

The meeting was opened with the singing of the Social Credit's "theme song" "O God Our Help in Ages Past," after which the chairman, Mr. Hayhurst, expressed pleasure at such a large gathering and introduced Mayor Holden of Vegreville who suitably welcomed the speakers and audience to Vegreville. Loud speakers were installed and a microphone at the speakers stand and a little touch of comedy was shown when the Mayor exclaimed: "Oh Lord, I never spoke through one of these things before." However he ably welcomed the gathering and wished Mr. Aberhart "the best of luck."

The four prospective candidates were on the platform and were accorded two minutes each to briefly address the meeting. Their remarks were necessarily brief and consisted mainly in expressing gratification at the large gathering and in having Mr. Aberhart present. The prospective candidates speaking were Mr. Tomyn of Vegreville, Mr. Johnstone Ferguson of Tofield, and Dr. McPherson of Ryley.

Local and Personal

Allan Lee is in the city, where we understand he has a position.

Donald McLaughlin is in Edmonton where we understand he is taking practical study in the undertaking profession at McBride's funeral home.

Mr. and Mrs. F. McHeffey visited Edmonton over the week end, and saw their new grand-daughter for the first time. And, oh boy, isn't Fred proud on becoming a grandfather.

Mr. and Mrs. Strachan of Oklahoma is visiting at the R. B. Wilson home. Mrs. Strachan is a former school girl here, being the former Miss H. Mallory.

Mr. Frank Beirnes, brother of A. A. Beirnes, and former postmaster here visited with his brother and father this week. Frank's home is in California.

Visitors to the Noland home on July 1st were Dr. and Mrs. Hoover of Long Beach, California; Mr. C. Nelson and Helen of Edmonton; Mr. R. Nelson and family of Edmonton; Miss Helen Nelson remained and will visit at the Noland home.

Mrs. J. W. Morton is visiting friends in Calgary.

Mr. and Mrs. R. Phillips, Lynn and Don returned home after holidaying at the coast.

Born.—To Mr. and Mrs. M. McHeffey, on Thursday, July 4th, a daughter.

Born.—To Mr. and Mrs. Joe Wiltzen, on Thursday, July 4th, a daughter.

Mr. and Mrs. Coyauch of Olds visited at the Noland home a short time ago. Tofielders will remember Mrs. Coyauch, nee Marion Wiggins, who resided in Tofield some years ago.

Mrs. Hammond, Mrs. Taylor, Mrs. Beirnes, and Mrs. Law spent Monday in Edmonton.

Miss V. Moore visited the city on Monday.

On Tuesday afternoon of this week, the primary department of the United Sunday School held a picnic at the home of Mr. and Mrs. J. W. Cookson. There were about forty children and twenty mothers there. Due to the kindness of Mr. Cookson who erected a merry-go-round and teeter totter, the children were never at a loss for something to do. Games were played and races were run, into which all the children entered. Lunch was served outside on tables which were built for that purpose, also by Mr. Cookson. A very enjoyable afternoon was spent by the kiddies and mothers and many [illegible] son for the use of their lawn.

FAREWELL PARTY

A number of Clifford Pincott's friends gathered together at the Institute Rooms on Monday evening July 8th to bid farewell to him prior to his departure for the coast. Games and dancing were the order of the evening. It had previously been arranged to present Clifford with a farewell gift from the Students' Union on the day of the hike, but this did not materialize. However, Jack Smith, the vice-president of the T. H.S. Student's Union took the opportunity of presenting the gift—a book, "The Last of the Barons" by E. B. Lytton, at this party. Afterwards lunch was served. Before departing for home we all sang "For He's a Jolly Good Fellow" and "Auld Lang Syne."

Town Council

A regular meeting of the town council was held on Monday evening July 8th at 8 o'clock. Present were Mayor Brace, Councillors Lovell, Taylor, Hammond, Swift and Bellamy.

The business transacted was principally of a routine nature. Minutes were read, some communications and a number of accounts approved for payment. A survey of a further number of plots in the local cemetery was authorized, the work to be done by Mr. R. H. Cautley, Dominion Land Surveyor. It was decided to call for offers for 67 acres of land lying to the immediate south of the station yard. Statement of the receipts and expenditures for the month of June were read and considered and ordered to be incorporated in the minutes of the meeting.

The Secretary is proceeding with the cancellation of certain portions of subdivisions and the proceedings which should be completed in the late fall will make available for sale several well located parcels of acreage ranging from ten to twenty acres in area.

FAREWELL PARTY FOR MRS PINCOTT

On Monday evening of this week the many friends of Mrs. R. W. Pincott met at the hotel to bid her farewell, prior to her departure to the coast. There were close to fifty guests present, evidence of the high esteem in which Mrs. Pincott is held by her many friends. Cards, contests and a social time were indulged in, after which a delicious lunch was served. Mrs. Pincott was presented with a lovely dinner wagon by her friends, Mrs. Brace and Mrs. McLaughlin making the presentation and saying how much the ladies of Tofield would miss her and how sorry they were to see her leave.

Mrs. Pincott responded very nicely saying that she was sorry that she was leaving so many friends, but if anyone should go to the coast she wanted them to be sure and visit her. Mrs. Pincott then gave three of her famous readings, after which those present all sang "For She's a Jolly Good Fellow," and left for their homes.

MR. BEIRNES SR. EXCHANGE LETTERS OF CONGRATULATION WITH SIR ROBERT BORDEN

Mr. Beirnes Senr., of Tofield has reached the ripe age of 81 years and is still going strong. Incidently, Sir Robert Borden, Canada's wartime premier, has reached the same age both having been born on the same day. Mr. Beirnes wrote and congratulated the eminent statesman on attaining his 81st birthday, and received the following courteous reply:

Dear Mr. Beirnes:

My best thanks for your interesting letter which has just reached me. It is most curious that you and I were born on the same day of the same year. Within my knowledge there is no other case, but of course in the wide range of the world's population there must have been thousands of such cases, although it is doubtful whether very many have passed the eighty-first milestone.

I trust you are in good health. I am most thankful for the reasonable measure of health and strength which has been vouchsafed to me at this advanced age.

My best congratulations to you, and all good wishes for many happy anniversaries.

With very kind regards,

I remain, Yours faithfully,

R. L. BORDEN

First Radio Motorcycle Cops in Canada

THE first permanently installed radio-equipped motorcycles in Canada are the two shown above with officers Geo. McIver and P. Gatineau, of the Verdun Police Motorcycle Squad, photographed as they drove away immediately after their machines were equipped by a Northern Electric radio engineer on June 21st. The radio sets are located on the handle bars. The "V" shaped rods in front serve both as supports and antenna.

U.F.W.A. Conference TO BE HELD AT PARTRIDGE HILLS

The eighth Annual Summer Conference of the United Farm Women of Alberta [illegible] the Vegreville Federal Constituency will be held in the Church, Partridge Hills, on July 23, 1935 starting at 10:00 a.m.

Special speakers at both morning and afternoon sessions are: Mrs. Price, President U.F.W.A.; Miss Alexander, Director of Alberta Women's Bureau; Miss Romanchych, Alberta Bureau, Vegreville; Mr. D. Roberts, Fort Saskatchewan; Mr. Metcalf, M.L.A.

Miss [illegible] will judge the handicraft exhibit.

Lunch will be served by the Partridge Hills ladies, 25c per plate.

All ladies interested are cordially invited to attend a real farm women's conference.

Will those willing to take cars and the women who would like to go please telephone Mrs. Booth, 'phone 1102. The price for gasoline will be equally shared.

Mrs. I. C. Olson, Secretary

LIBERAL MEETINGS
will be held at the
KETCHAMOOT SCHOOL
—on—
TUESDAY EVENING, JULY 16th
—at 8:30 p.m.

"The Case for Socialism"

AN ADDRESS BY ELMER E. ROPER, EDITOR OF THE ALBERTA LABOR NEWS, DELIVERED BEFORE THE PHILOSOPHICAL SOCIETY OF THE UNIVERSITY OF ALBERTA
REPRINTED FROM THE EDMONTON JOURNAL

At the outset I want to make the [illegible] statement that the present economic system, the system [illegible] capitalism, [illegible] broken down, and should be [illegible] an [illegible] for the people of Canada and the world what [illegible] called after [illegible].

[illegible] we live in a sick world? [illegible] hear the [illegible] corners, [illegible] feet car of [illegible] gather, we have [illegible] lies of lectures, sermons and articles in the [illegible] read the [illegible] and dis[illegible] newspapers [illegible] of our [illegible] us that [illegible].

[illegible] I think of the words of a [illegible] prophet of old who, looking out [illegible] the social conditions that prevailed [illegible] "From the sole of the foot even unto the [illegible] in it, but [illegible] and putrefying [illegible] closed, neither mollified with [illegible]." I think that is a perfect description of the condition of our [illegible] task of the [illegible] make a pro[illegible] of our sick [illegible] unless that is done the cures we may propose will be temporary or superficial.

And so I start on my investigation and I go to [illegible] "My friend, what do you think is the cause of [illegible]?" The answer [illegible] back very quickly and decidedly. "Unemployment," he says, "is the cause of all our trouble." [illegible] tion of his argument he points to the fact that more than 30,000,000 would-be wage-earners in the industrial countries of the world are denied the opportunity to earn [illegible] the sweat of their brow.

He paints a tragic picture of 200,000 of our own young people in Canada who come out of our schools and colleges every year and are denied the chance to enter [illegible] the nature [illegible] of the chance to [illegible]

He directs [illegible] startling [illegible] eight [illegible] relief, living [illegible] is well named, the dole, he waxes eloquent and indignant about the poverty and distress, the suffering and degradation that people must endure in a great rich nation because of unemployment. "Stop unemployment," he cries, "and we'll have prosperity and happiness in our country again."

I go to another friend and say: "What do you think is the cause of our economic troubles?" With every confidence that he [illegible] replies "The low price of primary products." He proceeds to quote yards of statistics to show how such prices have declined, and how purchasing power has been destroyed and the farmer crushed under the burden of raising cereals and livestock at a loss. One who is interested in this phase of the subject can, and they frequently do, make long and informative speeches on the matter. But we haven't time to listen to one just now.

I hurry along to another and put to him the same question. He, too, [illegible] emphatic. [illegible] the war and war debts. He quotes astronomical figures dealing with the colossal burden of the nation's debts until one becomes bewildered with the financial [illegible] which the war has led us. I could go on putting my query to different people and getting different answers.

But my submission is that these things are not the cause of our trouble, they are the effects. They are the wounds and bruises and sores that are the outward manifestation of a deep-rooted maladjustment which is at the very heart of the present economic system.

I dont think there are many who would care to dispute the claim that the heart and core of the present economic system is private profit. We do not produce to satisfy human needs, because if we did we would continue to produce as long as human needs remained unsatisfied. The present situation is proof enough in itself that we do nothing of the kind. We produce for profit, for sale, and unless we can make a profitable sale of all that we produce, unemployment, stagnation, and failure of the system to continue to function is the inevitable result.

Profit System Creates Surpluses of Products

Now in a system that operates for private profit there must be a creation of surpluses. Profit is made and can only be made, by returning to the producer something less than the value of what he has produced. The difference between the full value of the product and that part of it which producers receive in the form of wages and salaries constitutes a surplus.

I am going to try to illustrate in a very elementary way just how that principal works when it is applied to the productive activities of the whole nation. But before I do so there is one request I have to make of my audience. I know that when one has to deal in one hour with a subject upon which a mountain of books has been written, that it is necessary to use general terms and general applications and general tendencies. When that is done there must of course be a great many details omitted and a great many apparent objections unanswered and a great many exceptions or objections unexplained. My request is that when these occur to you in connection with my analysis of the present system, you will examine them in relation to the general [illegible] make sure that what you have thought of as an objection or exception to my thesis may not be local in its application and thus not a real objection to the main line of my argument.

Let me illustrate what I mean by that. I happen to be talking to a man who lives out west here on a farm in the Saskatchewan river. We get into a discussion of some of the geographical features of western Canada and in the course of the conversation I say something about the Saskatchewan river flowing eastward. Right away he stops me. "What did you say?" he asks. "Did you say the Saskatchewan river flows east?" Well, let me tell you sir, that it does nothing of the kind. I live on the very bank of that river. It flows right past my door and I tell you that it flows north or maybe a bit north and west."

[illegible] there isn't any argument there. The man is right, and I cannot dispute his intimate knowledge of the direction of the river's flow as it goes past his home. But the trouble with that man is that he is building his case on a local incident. And although his much more intimate knowledge of the river appears to dispute my general and perfectly correct statement that the river flows east, I would be a very foolish person to permit that local exception to affect my general contention about the direction of the river's flow. I think we should apply the same kind of reasoning to any worthwhile examination of the economic system.

With that in mind therefore, I would ask you to imagine a great pool and from every direction there is flowing into this pool the produced wealth of the nation. Now let us see what happens to it. First there must be taken from the pool the costs of production, a large part of which are wages and salaries. And so you come with your pails and out of a tap you draw that part of what you and others have produced. Then the tax collector comes along and gets his share so that teachers and university professors and others who render service to the nation may be sustained.

I am not going to try and describe all the people who come up to the tap or the reasons why they get a chance to get a share of the produced wealth. The point I am trying to make is that when we all have been there, there is still a surplus left in the pool. A complete distribution has not been made. And it is that surplus which is causing all our trouble. It is not so much a question of the pool overflowing as of course it must do if the streams of production are kept flowing, but even if the pool doesn't overflow; even if the surplus is not large, as long as there is one pair of shoes that cannot be sold, why should more shoes be made?

The problem, therefore, is to dispose of these surpluses which are the inevitable result of the operation of the profit system. But right here there come up in your mind the historical fact that the profit system has been operating for a long time. We've been able to dispose of our surpluses before. Why can't we do it again? That brings us then, to an examination of how we have kept the pool clear in the past and I think the explanation is not a difficult one to make or grasp.

Two Methods Available For Removing Surpluses

There are two normal ways of disposing of the surpluses under the present system. One is the development of our own country. The building up of new capital plant, the erection of public buildings, the building of railroads and the making of road. All that kind of thing is done out of the surpluses which remain in the pool after all the costs of production have been taken out.

For example, when we want to build a road, we go to the pool and get what is needed to build a road. And we must not forget that it is not only gravel and asphalt and graders and trucks that are used to build a road. To build a road we need food and clothing and houses as well as theatre tickets and bobbie pins. All these things go into the building of a road. All right, if we can use the surpluses that remain in the pool after the costs of production are met, why don't we go on doing it, keeping the pool clear and the streams of production flowing into it? The answer is very simple. Somebody owns the pool and we can only use surplus food, clothing, shelter and bobbie pins from the pool by borrowing them from the people who own the pool.

That brings me to the statement that the profit system of economics is a debt creating system. We don't use any of our surpluses without going into debt for them. That explains, of course, why we don't continue to use surpluses to build more roads. The debt burden becomes intolerable. The national debt of Canada in the year of confederation was a mere 83,000,000 dollars. Now it is more than 3,000 million, while the combined provincial, municipal and national debt is about 10 billion and the total, including private debts and investment, about 20 billion. All this represents the use of the surplus which has remained in the pool after all the costs of production have been taken out.

Now nearly everybody admits that we must quit piling up the debt. Our politicians make this the chief burden of their speeches, especially if they are out and want to get in. They blame whatever government happens to be in power for the terrible burden of debt. Well, we can't, under the present economic system, build a mile of railway, a foot of road, put a brick on a public building or increase our capital plant in any way without going into debt for it. And when the time comes that the people of the nation are frightened by the mountain of debt, we stop using our surpluses in that way and turn off the tap.

The other main way of disposing of our surpluses is to send them to other countries. Now I don't want to be misunderstood here. I am not talking about what most people think of when they speak of foreign trade. The disposition of surpluses does not take place by the trading of goods for goods. You see, it doesn't help our situation any if we take some of the goods out of our pool here and put goods from another country of equivalent value in their place. Our problem is to take goods out in such a manner that we can keep our own productive plant operating. An exchange of goods for goods won't do that for us.

The only way in which we can dispose of our real surplus to other countries is when we have that much-to-be-desired condition called a favorable balance of trade. Did it ever occur to you that the more goods we send abroad and the fewer goods we get in return for them, the more favorable is our balance of trade? It sounds a bit foolish, I know. Common sense tells us that it should be the other way around. But there are a great many things about our world that don't make sense, and so we must accept the facts as they are.

And the fact in this case is that to make a profitable disposition of our surpluses abroad we must have foreign investments. We must use our surpluses in developing other countries. Great Britain was known not so many years ago as the workshop of the world. That means that Britain was supplying other countries with her surplus products. She didn't do that by exchanging goods for goods. She did it by investments abroad. She did it by building railways and power plants and factories and other capital plant in India, Africa, South America and other countries. If you desire any proof of that, let me remind you that in 1850 Britain's investments abroad amounted to just over a quarter of a billion pounds, or over a billion dollars. But by 1914 these investments had grown to four billion pounds or 20 billion dollars. All these investments represent a flow of surpluses out of the pool into which the British streams of production flowed.

Buyers Once, Now Stand as Keenest Competitors

But the tap has been turned off. The very capital plant into which British surpluses had been turned in Japan and China and India have enabled those countries not only to supply their own needs but have made them competitors with Great Britain in the few markets that are left. It amuses me when I hear people talking of getting rid of our surpluses in other countries. I want to ask what countries and what products are we going to send there? I say that the present economic system has failed, has broken down, because the two taps by which its inevitable surpluses were normally disposed of have been turned off. And the very nature of the debt building system prevents them from being turned on again.

I scarcely think it necessary to carry my argument any further to prove that the turning off of these two taps, the development of our own country and the development of other countries, causes stagnation of our productive processes, with unemployment and accompanying evils. Our present situation is all the proof we need. But I want to remind you now of a historical event that is fresh in the minds of most of us which proves that when surpluses are being used up as rapidly as they are created we have a condition opposite to that which now prevails.

War opens up a tap that drains the pool of wealth and makes it necessary to keep the streams of production flowing.

During the war we were comparatively prosperous in Canada. Every able bodied man had a job. Indeed we saw to it that there were no slackers on the industrial field. Everybody who could do useful work had to have a job. There was no unemployment relief available for people who could work then. Wages were comparatively good, farmers received a big price for their products and we had a general standard of living, an enjoyment of plenty, that was higher than it had been before and higher than it has been since. This was in spite of the fact that a half million of our strongest and best men were called out of production and were in fact busy destroying much of what the rest of the nation was producing.

The explanation is very simple. There was no piling up of surpluses. Everything that we produced was used as rapidly as it came into being. The nation needed all the surpluses that could be produced for the purpose of prosecuting the war. The very life of the nation demanded that there be no restrictions on production, and that everything that could be produced would be used.

You see, we as taxpayers can raise enough row about increasing debt to stop a road or a public building being built, but when a war is on we must have the goods to carry it on, and we get them at any cost. What is the cost? It is increased debt. The surpluses we needed to carry on the war were secured by the nation in exactly the same way as the surpluses we need to build a road. They were borrowed from the people who owned them.

In the early stages of man's existence when he went to war the old men and women and the children stayed at home and worked a little harder than usual to provide not only for themselves but also for the warriors in the field. Then when the warriors came home they resumed their tribal life as if nothing had happened. We did something the same thing. Our people who remained at home during the war worked harder, produced more and a larger share of it was used to prosecute the war. But when the war was over, we being much more civilized than our early ancestors—we owed somebody for every shell that was fired, every pair of paper boots and every tin of bully beef that was used during the war.

Now let me remind you that what we used to prosecute the war was a surplus that existed after the people who lived in Canada had used up enough of what they produced to enjoy a higher standard of living than they had ever enjoyed before. I am going to suggest here that we could have used this surplus to carry on the war without the necessity of owing anybody a copper for it.

Young Men Were Taken But Wealth Was Left

When we wanted men we went into the homes of the people and said "The nation needs this man, the nation must have this boy. We are sorry that this emergency exists, and we hate to do this, but the needs of the nation come first," and so we conscripted the manhood of the nation for the nation's good. We could have done the same with the surplus wealth which we used to prosecute the war. We could have conscripted it for the nation's use just as we conscripted the men and the boys. Then we wouldn't have had to carry a crushing war debt.

Every time I have heard a statement like that made in a public meeting I have found that it has been met with general approval. Well, if the principal set out there is correct as applied to saving the nation's life in war, why isn't it sound when applied to the preservation of the nation's life in peace?

We come then to the question, why didn't the nation use the surpluses which the people of the nation produced to carry on the war, and why doesn't it do it in peace? The answer is very simple. The nation doesn't own them. The nation can't use them because they belong to somebody else.

Concluded Next Week

YES - - it's true

That "The Mercury" is owned by an individual. It's his property and he must pay the bills and assume all responsibilities. On the other hand, it is also true that somehow or other the public looks upon the community newspaper as being partly their property. The community expects its public institutions to be defended, to be favorably reported, to be kept in good report throughout the district and the province. Churches, societies and organizations look for and expect their activities to be reported in their home paper. And the home paper does all these things—likes to do them. This being so, it is only human that the owner of, and those who are employed at the local newspaper office should expect that all these various interests would return the compliment through giving it printing orders. If all the printing requirements of Tofield were to be printed in Tofield, "The Mercury" would have to nearly double its present staff.

THE MERCURY

THE TOFIELD MERCURY
A Weekly Newspaper Published At
Tofield, Alberta
W. Worton, Publisher

MR. ABERHART—

ON WEDNESDAY of this week the editor of this paper "took time out" from active work to journey to Vegreville to see, hear and observe the Alberta "man of the hour", Mr. William Aberhart. In so doing he had the opportunity of witnessing a spectacle different to any which he had seen before. Seated in the Vegreville arena were some three thousand people, intensely interested, vitally concerned and in the main, for the moment, plainly adulatory. The entry of Mr. Aberhart was well staged. The band struck up, everyone arose from their seats and the ovation was worthy of a regal prince. As the meeting progressed, the chairman, Mayor of Vegreville, prospective candidates and Mr. Manning having spoken, Mr. Aberhart, suitably introduced by the chairman arose and amid applause, commenced to speak. Of dignified appearance, blessed with generous proportions, to quote his own words "weighing an eighth of a ton," he spoke for about an hour to an audience that was, to an interested observer, equally as interesting as the speaker. If one had not known Mr. Aberhart was a preacher as well as a professional teacher, the style and manner of his address would have led a person to guess as much. A certain dogmatism of expressed view, brooking little interference or criticism, an attitude of "I must be right" and "you must be wrong," was evident throughout his whole address and particularly during the question period. It was a good address, but it was not a brilliant or particularly clever address. He undoubtedly scored a genuine hit, when he challenged those who do not believe in his plan to produce something better and something capable of relieving distress in this province. The problem is there awaiting the hand of statesmen, as to its solution, time alone will tell the story.

Is Mr. Aberhart a "great" man? As an observer at Wednesday's meeting, the editor of this paper does not believe so. Worthy of course, possessing educational advantages above the average; yet from him emanates a certain cloistral atmosphere and a dictatorial attitude that indicate storm signals ahead upon his particular sea of political activity. After observing both speaker and audience on Wednesday, the editor of this paper is of the opinion that Mr. Aberhart is not a "great" man, but also believes he may easily become one.

Of late years there has risen up unexpectedly throughout the world many men whose names are now household words, and who wield great power. After observing the audience on Wednesday, we feel that we understand more of this phase of comparitively recent events than we have ever done before. In our opinion the secret lies more with the tempo of the people than with the particular man involved. Given sufficient public support and his comings and goings adroitly dramatized, there is no predicting Mr. Aberhart's future in this province. If he is borne upon the wave of public popularity and swept into political power, it is quite likely the experience will develop a technique foreign to the classroom and pulpit. There he is the sole arbiter of his teaching and preaching, but as a member of a democratic government he will of necessity be continually rubbing against opposing forces and it will be then that the real calibre of Mr. Aberhart will make itself manifest.

We made the trip to Vegreville due to the courtesy of Mr. Edwards of Tofield and while there took the opportunity of calling on Mr. A. L. Horton of the Vegreville Observer. Mr. Horton took time to take us to his home and among other pleasant courtesies, showed us his garden. We have often wondered where Mr. Horton obtained the inspiration for "punch" in his editorials, but here found a clue. He had just taken delivery of a specially made hoe, made to his own specifications, with which he intended to demolish weeds by the hundred or acre or something. Anyway it was a murderous implement for weeds and we can imagine him clearing the weeds with a gusto that create inspiration when wading into political opposition. Of course this is just by the way and must not be taken too seriously. Mrs. Horton's flower garden was at its best, all kinds of flowers including a generous proportion of roses, backed by trees and shrubbery in which were included some excellent blue spruce, which contrasted splendidly with the surrounding green.

Just as we were wondering what we would fill out this column with, setting type as we went along, in walked two gailly attired gypsies. Unfortunately time did not permit of having our fortune told, the message of good cheer being interrupted by our assertion that we had to go to work. A summer in a Western Canadian town would not be quite the same without these colorful yearly visitors and it is strange what hold fortune telling has upon the human race. We surmise it is not exactly all nonsense. However, we imagine the promises of "good luck" for Tofield residents will be as prolific as in former years and in this respect, here's hoping the gypsies are right.

STEVENS TO HEAD NEW FEDERAL PARTY

Claims 20,000 Letters Have Approved Ideas Set Forth

Ottawa, July 8th—A new political party in Canada had its birth over the week-end, to be led by Hon. H. H. Stevens, former minister of trade and commerce in the Bennett government.

A name has not yet been chosen, but will be shortly, and at the same time a manifesto setting forth its aims and ambitions will be issued.

The announcement was made by Mr. Stevens to parliamentary correspondents Sunday afternoon. He said the objective is to have a candidate in every constituency, running under the colors of this new political orientation.

The movement has long been mooted but it came to a head only on Friday in Hamilton. That was the place of a meeting of a "provisional executive" consisting of Warren Cook of Toronto, Thomas Lawson of Hamilton, and Thomas V. Bell of Montreal. Mr. Cook is head of the Garment Manufacturers' association, Mr. Lawson is a public printer, and Mr. Bell a printer and stationer.

Mr. Stevens said he waited to see what the government would do in the implementation of the report of the price spreads committee. Being dissatisfied with what has been done, he proposes to launch forth, accepting leadership of the new party which he has been urged to head. He says that in his files there are "fully 20,000 letters" approving of the ideas he has set forth.

He makes it clear that the platform will not be confined to those subjects mentioned in the price spreads report. Rather, there will be a general program, soon to be enumerated. But, basically, expression will be given to the views so often expressed. The great target of attack will be the moneyed interests," the "concentration of capital.

Mr. Stevens is not heading an insurgent movement within the Conservative party. Rather, while welcoming Conservative support, he will welcome supporting ranks of all parties and of the great mass of new and unattached voters, he said.

"Reconstruction Reform"

The objective of the new movement as outlined by the former minister is a "reconstruction and reform program." This Mr. Stevens has been advocating for the past 18 months.

In the petition upon which he has accepted the leadership and which was drawn up Friday at Hamilton, Mr. Stevens was told that the provisional executive acted on behalf of "many thousands of citizens in every walk of life." High tribute was paid him.

"Providence," said the pronouncement in part, "has loaned you to Canada for this time and task and we know of no other man in Canada who now enjoys and can hold the confidence of the majority of Canadian citizens as you do and shall."

Mr. Stevens was humbly besought to take the leadership if for no other reason than "the future welfare of our sons and daughters." Divine blessing was invoked "upon his health and vision and power" to carry through fearlessly the arduous task of re-establishing Canada's industrial economic and social life to the benefit of the great majority.

In his note of acceptance of the leadership of the new party, Mr. Stevens shared the views of the petitioners, "realizing that both the old parties are indissolubly involved in the present system of concentration of control of wealth."

He agreed that it is contrary to the spirit of true Canadian democracy that our country's economic life should pass under the control of a privileged class which, unfortunately, is exactly what has occurred. It is contended also that it is the duty of the dominion government to protect our people from unfair exploitation and to ensure to them equitable treatment and to the youth of Canada a free opportunity for a normal Canadian livelihood."

Mr. Stevens told the newspaper correspondents of an analysis he had made of the thousands of letters approving his ideas. A [illegible] of them he said included approval by boards of trade, 11; Conservative associations, 23; clergymen of all denominations, including Roman Catholic priests, 47; engineers 10; farmers and fishermen, 45; financial men, brokers and real estate agents, 25; lawyers, 35; Liberal political organizations, one; lodges and clubs, six; manufacturers' agents, 28, [illegible] cities, 12; medical profession, [illegible]; members of parliament, [illegible]; newspapermen, 31, retail merchants' associations, 17; merchants, 30, salesmen and commercial travellers, 10; labor unions, 15; farmers' associations, 20; university professors, 11; youth movements, five, unclassified but falling within the great body of the citizenship "whose interests the old parties overlooked," 500.

By districts, 802 letters came from Ontario, 164 from Quebec, 73 from the maritime provinces, 229 from the prairie provinces and 226 from British Columbia.

"The overwhelming preponderance of the wish expressed," Mr. Stevens asserted, "is that I should come out as a leader in a reform movement. These people want an opportunity to express their views."

Mr. Stevens related that up to two weeks ago he had not been interested in the formation of a new party. He had waited to see if the government legislation arising out of the price spreads inquiry would be adequate. It was not.

WHEAT BREEDING ACTIVITIES of the DOMINION DEPARTMENT of AGRICULTURE

(Experimental Farms Note)

The wheat breeding activities of the Dominion Department of Agriculture have been under way since 1886, when the Experimental Farms Branch was inaugurated. In the early days, Dr. Wm. Saunders, first Director of the Dominion Farms, conducted the work under his own supervision and such varieties as Preston, Huron, Percy and Stanley were made available to the public through his efforts. Increased activity in other lines made it necessary for Dr. Saunders to have assistance and his son, the present Sir Charles Saunders took over the wheat breeding work in 1903 and became the first Dominion Cerealist.

On account of the high quality of its "Manitoba" wheats, Canada had built up and enviable reputation but more often than not, early frosts proved disastrous and the demand was made to the Federal Department of Agriculture for early maturing varieties. Red Fife, the popular wheat at the time, was too late maturing and earlier sorts had to be developed.

Dr. William Saunders had been a great believer in the possibilities of crossing wheats of suitable types in order to produce strains likely to possess the specially desired characters. From some of these crosses made under his guidance his son, Sir Charles, was able to develop the world-famous Marquis wheat, which is perhaps the greatest single contribution to Canadian agriculture resulting from agricultural research.

This variety possessed an earliness which, at the time of its introduction in 1907, was quite remarkable. It was a week to ten days earlier than Red Fife and had quality and yield in addition.

The advent of Marquis and the remarkable expansion of agriculture to new lands made during the decade 1910-1920 created a demand for even earlier wheats, and Ruby was introduced during the critical period of 1916 to 1918. This variety had the advantage of being three to five days earlier than Marquis, but in threshing it had the fault of shelling too easily and never became really popular. In 1926 a variety called Garnet was distributed [illegible] and farmers and was [illegible] years time by another new Cereal division wheat called Reward, which [illegible] of the best wheats yet developed from the standpoint of quality, weight per bushel and appearance for [illegible] purposes. This variety has never been beaten for [illegible] the [illegible] shows [illegible] that Garnet and Reward are from five to eight days earlier than Marquis.

Work is being carried on at the present time [illegible] Experimental Farm [illegible] der, in an effort to overcome the terrible losses suffered in years when wheat stem rust is prevalent. Con[illegible] will be available shortly.

Further work is being done by the Dominion Experimental Farms Branch to produce wheats as early as Garnet or Reward [illegible] are more desirable than either. Some very promising material is under test at the present time which is expected may make further contributions to the number of good wheats already produced by the Dominion Department of Agriculture.

TOURISTS SPENT $3,000,000 HERE DURING PAST YEAR

Motor tourists spent approximately $3,000,000 in this province last year, based upon the number of car registrations at the national parks in Alberta. That is the amount which visitors, lured by the scenic beauties of this province, hunting, fishing, or other drawing cards, put into circulation here.

Obviously business benefitted, producers had the demand for their products strengthened to that extent and recovery was helped through the improved purchasing power this created.

Of the sum spent by motor tourists, a large proportion would go to the farmer, as it would [illegible] at the farm where much of the buying would take place. And that would be cash business.

All of which goes to prove what has been urged by officers of the Alberta Motor Association [illegible] hard surfaced highways [illegible] Alberta each year [illegible] primary products.

TALK NEW PLAN TO GIVE JOBLESS WORK WITH PAY

Some Form of Government Assistance May Replace Camp System

Ottawa, July 8th.—[illegible] report before them showing the average length of time a man stays in relief camps has been 2 1-2 months [illegible]

[illegible] stood, to formulate a plan by which the single unemployed may be placed on an independent wage earning [illegible]

[illegible] time a recent call for 500 agricultural workers, circulated among the relief camp strikers congregated in Winnipeg, went unheeded.

For All Purposes

Mrs. F[illegible]'s husband had committed suicide by hanging himself in their large attic. Mrs. McManus, who lived next door, decided that she would call and express her sympathy.

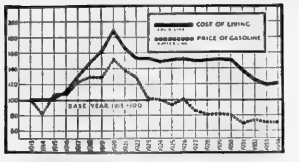
"You'd better not go," Mr. McManus advised her. "You're always saying the wrong thing."

"Oh, I'll talk about nothing but the weather," Mrs. McManus said. And so she went.

"It's a fine day isn't it, Mrs. Finnegan," she said.

"Yes, and I'm glad for I can hang my clothes out," said Mrs. Finnegan.

"You should be worrying about the weather," replied Mrs. McManus, "you, with such a nice big attic to hang things in!"



The cost of living, which reached its peak in 1920, has declined; but on the 1913 basis it is still much higher than the price of gasoline. In 1934 the cost of living was 20.7 per cent. higher but the price of gasoline was 28.4 per cent lower than in 1913. The data for this graph are based on figures published by the Dominion Bureau of Statistics.

LIVING COSTS MORE BUT GASOLINE COSTS LESS

THE cost of living in Canada in 1934 was approximately 21 per cent. higher and the price of gasoline 28 per cent. lower than in 1913. The price of gasoline never rose to as high a peak as did the cost of living. Since 1920 gasoline prices have declined almost continuously to the present low level.

Imperial Oil has always sought for economical ways of doing business and has always passed on to the consumer the benefits of such economies. Imperial Oil operates on a very small profit and in 1934 earned an average of slightly more than one-half of one cent per gallon on gasoline.

Not only is gasoline cheaper than ever—it is better than ever. Imperial Oil research laboratories played a leading part in developing fuels for modern motors. Imperial gasoline of 1935 is a far better gasoline than that of 1913 yet it sells at a price considerably lower.

ADDITIONAL LOCALS

A wedding of local interest occurred on Wednesday when Miss Verba Stutzman became the bride of Mr. Boyd Stauffer. A more complete report will appear next week.

Bill McCauley left for the city last week where he has procured a position in a service station.

Miss Pat B[illegible] spent the week end in the city.

Miss [illegible] of Edmonton is visiting at the McLaughlin home.

Messrs. A. Beirnes and Ray [illegible] spent the week end in the city.

The Misses [illegible] Allan are enjoying a week's holiday in Calgary.

Mr. and Mrs. [illegible] have left for a [illegible] where they [illegible] Mr. [illegible] senior.

On [illegible] friends of Betty [illegible] by the older [illegible] a farewell party for Betty [illegible]. Cards and games were [illegible] the evening after which [illegible] lunch was served. [illegible] On behalf of those present [illegible] presented Betty with a small gift, and Betty thanked the group very nicely. The party then broke up everyone wishing Betty good luck in her new home.

MRS. PORTER PASSES ON

We regret to have to report the death of Mrs. Porter of the Lindbrook [illegible] who died this week. Further details will appear in our next issue.

CORNHILL MUNICIPAL MINUTE

The [illegible] meeting of the Council of the Municipal District of [illegible] was held in the Municipal hall on Friday, June 14th, 1935. All [illegible] were present.

Secretary presented monthly statement and the minutes and accounts of [illegible] meeting were read.

Mr. Ritchie representing the department of Public Works, Edmonton was present and advised the Council that the 1935 Capital Grant for this district made by the Provincial Government had been set at $1500.

Upon motion of Councillor Holmberg the grant was accepted and distributed as follows:

Div. 1 $200; Div. 2 $400; Div. 3 $300; Div. 4 $200; Div. 5 $200; Div. 6 $200 and to be worked at locations as outlined in Provincial Government Agreement signed by the reeve.

Mr. [illegible] W. Smith, representing the Tofield Board of Trade interviewed Council with a view to having Council agree to having market road from Kingman to Tofield and [illegible] 12 miles north gravelled.

[illegible] Councillor Holmberg [illegible] proceed to obtain all information and data necessary re [illegible] up to a point when [illegible] said proposition [illegible] required. At this stage council [illegible] this business and [illegible] programme. Carried.

Mr. D. W. Richie at this time [illegible] made for bridges on [illegible] east [illegible] W4M, Div. 5 and [illegible] W4M, Div. 5.

Council adjourned for lunch.

A by-law designated by M.D. Of [illegible] No. 40, pursuant to the Local Tax Arrears Consolidation Act, 1935, was [illegible] and given a first, second, and third reading.

On the motion of Reeve Glenn, a by-law restraining domestic animals running at large was given a third [illegible].

On the motion of Councillor Holmberg and Mr. Wm. Swan of Hay Lake, located on the 20—49—21—W 4M, be appointed poundkeeper for division 2.

On the motion of Councillor Walker, Councillor McSporan was empowered to make temporary appointment of a pound keeper for other part of division three.

On the motion of Councillor McSporan, the reeve and secretary were authorized to settle for a No. 11—[illegible] Adams Leaning Wheel grader and to make arrangements for the purchase of a second.

Upon the motion of Councillor Holmberg the district will continue to be a member of the Alberta Association of Municipal Districts.

Moved by Councillor Holmberg that weed inspectors be engaged for 1935 in the same manner as in 1934, viz., Messrs. Pearson, Swaley and Hill to be ordered out by councillors concerned or by the secretary upon complaint re weeds being received at office or with councillor.

On the motion of Councillor Walker, permission be given to Messrs. M. [illegible] Wood and Joe Weltzer to fence road allowance on West and South side of section 15—52—16 W4M, providing the above is satisfactory and approved by the Provincial Department of Public Works.

A resolution was passed pertaining to part of subdivision, plan M 4343, A.F., being cancelled subject to certain routine restrictions.

LINDBROOK

"Oh, It Aint gonna rain no more," maybe! At least it doesn't look that way here.

Master Stanley Anderson and Miss Doris Anderson are spending part of their holidays with friends in Ryley.

Another Social Credit meeting was held in the School [illegible] last Friday and was very well attended. Mr. Geo. Edwards of Tofield was in the chair and the speakers gave some very interesting speeches and also answered quite a few questions.

One was if the Aberhart farmers are part of what are termed [illegible] and the answer was either crows, cuckoos or magpies, either having much sense but very noisy. Parrots are reckoned as wise old birds.

The elevator will be closed from the 12th of July till approximately August 1st [illegible] accordingly [illegible] read for your guidance and information.

SCHOOL NOTES
(By I M E R)

The last two weeks [illegible] were spent in the writing of Departmental Examinations. This was a most strenuous time and the holidays were most welcome.

The Tofield High School Students Union closed the school year with a very jolly hike to "second bridge" on Friday, June 28th. An enjoyable time was spent in roasting weiners and marshmallows. Games were played and much fun was had in spite of the multitudes of hungry mosquitoes. Afterwards all then started for home, voting a good time.

SOCIAL CREDIT MEETING
(Continued from front page)

Mr. Manning, co-worker with Mr. Aberhart then addressed the meeting. They had, he said, just completed a tour of the south and at no meeting was there less than 1000 people. Mr. Aberhart was not waging a contest for political honors or gain, this was an educational campaign. They were not here to shove something down their throats. To those who don't like social credit he would say, be sure you have something else better.

Every movement that has been launched to help the common people has met with three difficulties.

First, the indifference of men and women themselves.

Second, the prejudicial mind.

Third the willingness of people to allow themselves to become divided on policy. He made an urgent plea for social crediters to remain solidly united in the cause. The people now have a choice between the old financial system and the new system of Social Credit. They know what to do.

Mr. Aberhart, greeted with rousing applause, said this was a grand meeting, one of the finest this year. He said one man had remarked he came to the meeting to see "this man Aberhart" and he assured them it was a pleasure for him to go about and let people see him. He weighed one eighth of a ton", but [illegible] blame him, he was raised in [illegible] and fed on rolls.

He had a curious idea about democracy. Democracy can never make headway until they move along the line of their best welfare. When he started this campaign a petition was sent to the government but it was shelved. Then later he was sent for and also Major Douglas. The outcome of these conferences was also shelved. When the government did nothing he believed the best thing to do was to get the people to elect their best men of responsibility to be their representatives. He did not want to bother with politics he had other things to do.

The speaker dealt with some of the distressing conditions within the province and said he had heard of people in some northern districts having to eat gophers for sustenance. He urged the people to do away with the inferior complex and to feel that they are entitled to something. He also mentioned those people with a superior complex, saying he would consider himself a fool if he raised his head and felt he was above the common people.

Speaking of dividends being given without work, he said all dividends are given without work. No dividend was ever worked for.

Give the young men a chance and they wont trek to Ottawa with the consequences of the last few days. If we stick together we shall accomplish something.

Mr. Aberhart, assisted by Mr. Manning also dealt at some length with the technical side of social credit illustrating the entry of credit and [illegible] of social credit.

Upon the conclusion of Mr. Aberhart's address questions were asked and answered. The chief difficulty seemed to be of a constitutional nature, but Mr. Aberhart was quite certain these difficulties could be overcome.

OFFERS WANTED
TOWN OF TOFIELD

For Sale, 67 acres of land situated in N.E. qr. of 38-50-19 w4, and lying immediately south of the grain elevators in Tofield. Offers, stating purchase price, and terms of payment by prospective purchasers, will be received by the town council. Information regarding this land may be secured from

Wedding Bells

A wedding of local interest took place at the Salem Mennonite Church on Wednesday, July 10th, at 6:00 p.m., when Miss Verba Stutzman, second daughter of Mr. and Mrs. M. D. Stutzman of Kingman, became the bride of Mr. Boyd Stauffer, only son of Mr. and Mrs. Sam Stauffer of Tofield. The ceremony was solemnized in the presence of many relatives and friends of the contracting parties, Bishop N. E. Roth, officiating.

Following the ceremony, a wedding supper was held at the home of the bride's parents at which some 150 guests were present. The happy couple left for Banff the same evening where they will spend their honeymoon.

Upon their return, Mr. and Mrs. Stauffer will reside in Tofield where Boyd is associated with his father in the implement and oil business.

Mrs. W. Forman was successful in winning the Blue Willow biscuit competition at the Edmonton exhibition. This award carries a handsome prize from the Blue Willow people as well as that from the exhibition board. Mrs. Forman also won second award in the special class for rugs.

Miss Law, representing Standard Brands, Limited, and demonstrating Magic Baking Powder, was at Brace's store all of last week. Miss Law, among other practical demonstrations, made a handsome cake which was drawn for on Saturday night, the lucky lady being Mrs. Malcolm.

Mrs. J. O. Letourneau and Mrs. L. Abbott returned home this week from an Edmonton hospital, where they had been undergoing treatment.

Miss Sarilda McCartney is visiting at the home of Mr. and Mrs. H. Hicks.

As usual a large number of Tofield and district residents attended the Edmonton exhibition this week.

We understand Constable Davies has been on the sick list for a short time, but is now recovering.

Instead of reporting the C.C.F. meeting held at Tofield on Monday of last week in the usual manner, we have published Mr. Roper's address, "The Case for Socialism" in full. Miss Crawford of Edmonton, also spoke at the Tofield meeting, dealing with many of the objections advanced by critics of socialism. A. Harrison was chairman of the meeting.

After more than ten years residence here, Mrs. Coombes left on Tuesday morning for Edmonton, where she will visit for a week or so and then with her husband leave for Victoria, B.C. While here, Mrs. Coombes, who was of a very kindly and hospitable nature, made many friends who will be sorry to see her go, but who are unanimous in wishing her many years of happiness in her new home at the coast. Mr. Coombes was accompanied by her little grand-daughter. Mr. Coombes will not be leaving Tofield until early August.

OBITUARY
Ellen Jane Porter

We regret to have to report the death of Mrs. Ellen Jane Porter, wife of Mr. Thos. Porter, who resides west of town.

Ellen Jane Porter was born at North Pofland, Hampshire, England, in September, 1869. She came to Canada with her husband and one son, Harold, in 1911. In 1912, Harold passed away.

The funeral service was held at the Anglican Church on Thursday, July 11th, Rev. A. Wallis, officiating. Interment was made in the family plot at Tofield cemetery.

CARD OF THANKS

To those many friends, who in so many ways expressed their kindness and sympathy in my recent bereavement in the loss of my dear wife, I take this opportunity of extending my sincere gratitude and appreciation for every kind thought and action.

THOS. PORTER.

KETCHAMOOT

It would have taken a full fledged reporter to keep track of the social activities the past two weeks. Not being that and incidently entertaining intestinal "flu", hence no Ketchamoot news.

Wanted.—A correspondent for the Ketchamoot News. It does not take many brains, only an observing eye and a hearing ear. Come on now, who will be the first?

Miss Helen Manning closed a successful term of school the last of June, with a picnic near the school. Treats of all kinds were furnished by the district. Besides the scholars, many younger children and a few mothers were present.

On Wednesday, July 3rd, Mrs. John McGintie entertained the Ladies Aid. A large crowd was present and a most pleasant afternoon was spent. The August meeting will be held at the home of Mrs. Henderson.

On Friday the 5th, Ketchamoot's annual picnic was held under the auspices of the Ladies' Aid. The forepart of the day was showery, but by noon the sky was clear and the picnic turned out very successful. We are unable to give much account of the programme, being busy at the tables. Baseball teams were Dodds, Bardo, Ketchamoot. Hastings Lake team came, but there was not enough time for them to play. Softball teams were Kingman, Tofield, Lindbrook and Ketchamoot. There were also many kinds of races. The Ladies Aid cleared around $70.00. We wish to thank all who kindly helped to make it a success, especially the young men who looked after the sports, erecting the stands, etc., the day before.

Sunday, July 7th, the Junior U.F.A. held their monthly meeting at the Sears home. Hymns were sung and a programme presented. Included among those entertaining with numbers were little Barbara and Donald Bjorge of Edmonton who gave an exhibition of physical culture exercises; Miss Jean Torrie, solo and recitation. A short business session was then held, after which lunch was served. There were 25 present.

Wednesday afternoon, July 10th, Mrs. John McGintie entertained several ladies to afternoon tea in honor of Mr. MacGintie's mother and sister who were leaving on Thursday for their home at Fresno, Cal. Mrs. MacGintie Sr., a lady of 81, was very poorly while here, and it was thought best to take her back to her own home.

The school board, Messrs. James Sutton, John Brown and Roy Lee, met at the Sears home on Wednesday evening, July 10th for a school board meeting. After the regular routine of business, Miss Margaret Lindsay of Innisfree was engaged as teacher for the coming year.

Mrs. William Ingram, West Ketchamoot, entertained the Social Hour Club at her home Thursday afternoon of last week. A large crowd was present and all reported a pleasant afternoon. The August meeting will be held with Miss Viola Lee.

Last Saturday several families attended the picnic at Kingman.

The Social Hour Club held their annual picnic at Lakeview on Sunday, July 14th with all the members and their families being present. Basket dinner and supper was served and all reported a good time.

The United Church congregation and Sunday School of Ketchamoot will hold their annual picnic on Wednesday, July 31st, at Lakeview, Cooking Lake.

Mrs. Hubert who lives on the Mitchell farm was taken to an Edmonton hospital a week ago, to undergo an operation.

Mrs. Gertie Bjorge and two children, Barbara and Donald of Edmonton visited two weeks at the J. H. Ingram and T. D. Ferguson homes, they were accompanied home by Miss Mildred Ingram.

Editors Note:—Perhaps our Ketchamoot is not "a full fledged reporter". Even so, it would be hard to find a better rural correspondent. Mrs. Sears has been writing for the Mercury for over fifteen years, by far the greater portion of the time without remuneration and never was the remuneration worth mentioning. To say that this paper appreciates her services, hardly fills the bill, but we do appreciate her services

(Continued in preceding column)

and would be very sorry to lose her. As a matter of fact, all our correspondents have been with us for many years, as with the exception of Mrs. Hills of Bardo, who left to reside in Washington several years ago, we have the same group of correspondents as when we started business. As it is purely and simply public service of the least spectacular kind, we are very proud to be able to retain them for so many years.

SPECIALS For CASH

Friday, July 19th to Saturday, July 27

HONEY— Pint Gem Jars	29c

"The Case for Socialism"

AN ADDRESS BY ELMER E. ROPER, EDITOR OF THE ALBERTA LABOR NEWS. DELIVERED BEFORE THE PHILOSOPHICAL SOCIETY OF THE UNIVERSITY OF ALBERTA
REPRINTED FROM THE EDMONTON JOURNAL

(Continued from last week.)

That brings us to the extremely important question of the nature of wealth, the kinds of wealth and the distribution of wealth.

We often hear the statement that [illegible] his money, that he [illegible] or inherited sufficient wealth to enable him to live on it for the rest of his life. But the fact is that he does nothing of the kind. He, like everybody else, whether rich or poor, lives on the wealth that [illegible] duced day by day. The [illegible] which the world [illegible] produced and [illegible] wealth that [illegible] the product [illegible] of the na- [illegible] I hope we can keep that fact [illegible] forefront of our thinking when we consider the ownership of wealth. Here is a man who has in- [illegible] has acquired in some way [illegible] $100,000 and we say he [illegible] But he does [illegible] that money. He lives be- [illegible] wealth gives [illegible] the tap and [illegible] current pr- [illegible] he needs to [illegible]

Now do we want to know who owns all that the nation produces? All we have to do is find out who owns the accumulated wealth of the country and we'll know who owns the currently produced wealth. So [illegible] that two per cent [illegible] own 60 per [illegible] that two [illegible] out of what [illegible] after all the costs of production are paid.

And that is exactly the situation. Two per cent of the people own 60 per cent of the wealth, 33 per cent [illegible] and the remaining 65 per cent of the people [illegible] five per cent of the wealth [illegible] mass of the latter, of course, [illegible] nothing at all. That is the [illegible] tion of wealth. That is the [illegible] tion of the ownership of the pool of current production and everything in it.

So, you see, the right to the use of what has been produced and what is being produced is a right of ownership. Everything that is produced comes into being as the property of the owners of the means of production. That makes it clear, does it not, that if the people as a whole, the nation, want to use for war, or any other purpose, the surpluses which their productive effort has brought into being, the nation must [illegible] exercised by the owners? If the nation had owned the means of production by which [illegible] used to [illegible] the war [illegible] duced, the nation would [illegible] sur- [illegible] go into debt for them.

And so, I diagnose our present [illegible] structive growth called [illegible] it, which must be [illegible] have a permanent [illegible] the body. Social ownership [illegible] erative proprietorship by the people of the nation of all the natural resources and means of production, will make the pool of constantly produced wealth the property of the nation. The taps may then be kept open and a constant and abundant stream of goods and services flowing into the possession and lives of the people of the nation. That is the only logical cure for what ails us, because it is the only cure that is based on the physical facts of the situation.

Answers Argument on "Human Nature"

Now it has been my experience that a great many people who listen to an argument in favor of the co-operative commonwealth will say something like this: "Oh yes, what you are talking about is a fine ideal, but there are practical difficulties in the way. In the first place the instinct for personal and private ownership is inherent in human nature and people will never agree to the abolition of personal or private property." Now in all my study of socialistic philosophy, in all the reading I have done along this line and in all the [illegible] I have heard, I have yet to find the basis for this imaginary objection.

Let me say [illegible] here without any reservation whatsoever that I accept without [illegible] the statement that the desire to possess personal and private property is an inherent instinct, that we cannot hope to eradicate from the human breast and as one who enjoys the good things of life as well as anyone, let me say further that I don't want to see it eradicated. But one of the chief indictments against the present economic system is that it thwarts and leaves unfulfilled the instinct for personal and private ownership on the part of the great mass of the people.

The kind of a system I am advocating is a system that will open the taps and permit an ever increasing flow of personal and private property to pass into the lives of all the people. I am so insistent on the recognition of the desire for personal and private property that I want to do away with the present restrictions which effectively prevent the great masses of the people of the nation from enjoying any personal and private property at all. I will enjoy my good home, my car, my radio, decent clothes and other personal and private possessions a great deal more I am sure if I can know that those who do not now possess such things may have the same opportunity as I to acquire them.

But right here we come up against a point that bothers people, simply because they don't think things through. They say, well if you are not going to interfere with private ownership, what is to prevent people saving part of what they receive of the abundance available, and then we'll get a repetition of what we have now. But you see that is the very possibility that we do away with by changing the system. If a man wants to live on bread and water under a system of universal plenty, he should be entitled to exercise his miserly instincts. But under a system of social ownership of the means of life, no man would at any time be permitted to assume the ownership of the means whereby other men live and work.

So nobody need care how much a man saved if he insisted on going without the good things just to satisfy a miserly instinct. But I don't think there would be much of that, because it is only a lack of security that makes men anxious to save now. There wouldn't be any need of individuals to save under the new system, except to store up future luxuries or provide for a journey or something of the kind. But let me repeat that the whole purpose of a new social order would be to make for a much wider, a universal, opportunity to own and enjoy private property.

There is another phrase that is held up as an objection to socialism. I think we should be very careful about the acceptance of phrases. They may become part of one's thinking, and therefore part of one's conduct, and yet be the veriest nonsense when examined carefully. For example there is the phrase, "Ownership is the only sphere in which initiative or freedom can be exercised." It is the most extraordinary thing to me how many people are so tremendously concerned about having something that they never did and never can under the present system, possess.

Let us examine that statement again: "Ownership is the only sphere in which initiative or freedom can be exercised." Now if that is the case let me see what is happening to the initiative and freedom of the great mass of Canadians. We have a population of approximately 10 million. Of that number in 1932, 133,621 paid income tax. This represents 1.3 per cent of our population. Therefore 98.7 per cent of our people have so little return from the productive enterprise of the country that they are not even interesting to the eagle-eyed tax collector. And of the 133,621 who pay $25,000,000 in income taxes, 600 pay 42 per cent of the whole, 5,000 contribute 33 per cent, and the balance of 25 percent is paid by 128,000 odd.

If ownership is the only sphere in which initiative and freedom can be exercised, and by ownership we only mean ownership of the means of production (my argument has nothing to do with any other kind of ownership) then the great mass of the people have no opportunity to exercise freedom and initiative. No employee of the railways, the government services, the great corporations of all kinds, has any such opportunity and if that can be said about such people, what, I ask you, can we say about the abject mental and physical servitude of the president and professors of a state owned university.

You see, the statement when examined in the light of the facts has no depth or reason to it. How many of my audience, I wonder, are unaware of the fact that inventions and discoveries of various kinds came not from the urge of profit but arose out of the creative instinct which is inherent in men?

Ambition Not Stultified By Public Ownership

I know a number of professional people who are servants of society. It would be insulting and libelous to charge them with being less earnest about their work, less interested in it, than those engaged in private practice. Indeed, it is no reflection on those in private practice to say that the very fact that there is comparitive security of income in being a servant of the state frees a man's mind from constant financial worry and makes his work everything. You can't be in the presence of some of those fellows for five minutes without being tremendously impressed with the fact that they are bubbling over with enthusiasm about their work. Oh, but you say, that may apply to a man of that type but it won't apply to all. And in reply I tell you that the man who delivers the mail to my office and home is just as earnest about his work, just as careful, just as interested, as the man who delivers the bread or milk.

It has been suggested that research would suffer under a co-operative state. Well, there is only one example that can be used in that respect and if you read the papers that come from the U.S.S.R. you'll see that they are carrying that kind of thing to an almost absurb extreme. They seem almost to have gone crazy on the research idea. I submit that when the state has control of the output of the productive activities of the nation there will not be the hesitancy about research that there is now, because the profit question will not be there to cause doubt and timidity. Furthermore, the results of research will be more readily available to society. It is a well known fact that beneficial inventions have been suppressed by private capitalism to shut out competition. There will be no object in a co-operative commonwealth doing anything of the kind.

Then there is the question of liberty or freedom. My friends, it is just beyond my poor feeble intelligence to grasp the argument that if one man owns the means by which 999 other men work, and they are dependent entirely upon his pleasure for their chance to live, that should insure freedom, liberty, power of initative, free play of intelligence, and so on. But if the thousand men jointly co-operatively through their citizenship, own the means by which they all work that is despotism. It doesn't make sense to me.

What is liberty, anyway? It is not absence from restraint alone. That is only the negative side of liberty. There is a positive side, and the positive side is that men should not only be saved from undue restraint or interference with their own way of living, but that they should also be given the opportunity to exercise their initiative and intelligence. And one of the worst indictments against the present system is that it robs the great mass of the people of the chance to do anything of the kind. In what way does the positive aspect of liberty get a chance for exercise in the lives of the world's 30 or 40 million unemployed?

But let us come back to our phrase: "Ownership is the only sphere in which initative or freedom can be exercised." As a matter of fact I agree with the basic truth in that phrase. And since the present system makes it impossible for the great mass of the people to enter that sphere, I propose a new system in which by their very right of citizenship they will be joint owners of the means by which they live. And only in such a way can they hope to enter the sphere of ownership.

I must spend a minute on the human nature argument. We never fail to meet that. Did it ever occur to you that this idea of a predatory human nature has its roots in the age of scarcity from which our powers of production should permit us to

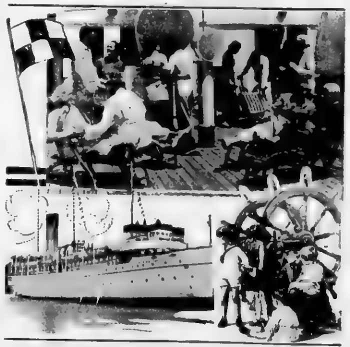
(Continued on page three)

YES - - it's true

That "The Mercury" is owned by an individual. It's his property and he must pay the bills and assume all responsibilities. On the other hand, it is also true that somehow or other the public looks upon the community newspaper as being partly their property. The community expects its public institutions to be defended, to be favorably reported, to be kept in good report throughout the district and the province. Churches, societies and organizations look for and expect their activities to be reported in their home paper. And the home paper does all these things—likes to do them. This being so, it is only human that the owner of, and those who are employed at the local newspaper office should expect that all these various interests would return the compliment through giving it printing orders. If all the printing requirements of Tofield were to be printed in Tofield, "The Mercury" would have to nearly double its present staff

THE MERCURY

A Great Lakes Holiday



With the increasing popularity of vacation trips on the Great Lakes, the Canadian Pacific has expanded its Great Lakes Steamship service to include calls at Port Arthur on westbound voyages as well as eastbound.

The Great Lakes make this continent almost unique for an inland sea voyage, part of which is entirely out of sight of land. Attractions that have been drawing an increasing number of passengers include a change of air, refreshing coolness, magnificent scenery, complete rest, and all the joys of shipboard. The Canadian Pacific Great Lakes steamers this year have been outfitted with deck sports, including quoits, shuffleboard, and deck golf. Dancing and music bring pleasure to the evening hours.

The schedule makes it possible to take an enjoyable week's trip, going either way, with overnight stops at both ends. Sailing Saturday, the round trip is completed the following Friday; Sailing Wednesday, the round trip is completed on Monday. The steamers leave Port McNicoll at 3.00 p.m. on Wednesdays and Saturdays, arriving at Port Arthur at 6.45 a.m. and Port William at 7.50 a.m. on Mondays and Fridays, in time to connect with train leaving dock at 8.00 a.m., eastern standard time, making connections with train No. 1 leaving Fort William station for the West at 7.25 a.m., central standard time. On the eastbound trip departure time is 12.00 noon from Fort William on Saturdays and Wednesdays, 1.00 p.m. from Port Arthur, arriving in Port McNicoll at 8.00 a.m., eastern standard time, on Mondays and Fridays. Port Arthur was in the schedule for an eastbound call but the call on the westbound trip has not been in effect for several years.

Attractive all-expense tours at very low cost have been arranged to provide happy combinations of rail trips overland and steamship cruises across the Lakes, with leisurely stop-over at famous vacation resorts. There is a nine-day westbound tour between Toronto and Winnipeg and a ten-day eastbound tour from Winnipeg to Niagara Falls, with return trip in both cases.

THE TOFIELD MERCURY
A Weekly Newspaper Published At
Tofield, Alberta
W. Worton, Publisher

THE ELECTION DATE ANNOUNCED—

THE GOVERNMENT has officially announced the date of the provincial election, naming Thursday, August 22nd as election day. Never has an Alberta electorate had so large a choice of candidates to choose from, and never has the individual Alberta voter been called upon to exercise such careful judgment as will be necessary before he or she cast a vote in the coming contest.

The Conservatives, Liberals, Social Credit-ers, U.F.A., to put them in their alphabetical order, will have candidates in almost every rural riding, and for good measure, in the cities, the voter will have a further choice of Communist, Labor and Socialist.

At no time has this paper presumed to advise electors which way to cast their vote. But at this time, with election day over a month hence, we suggest electors study the political situation as carefully as possible so that when the day comes for them to cast their vote, they may do so deliberately, knowing and realizing why they are making that particular choice.

Each party of course will put forth reasons why they should be returned to power, and no doubt all groups contain some good points in their manifestos. The problem for the voter to decide, is which party is likely to administer the affairs of this province for the greatest good of all. Here in Alberta we are a democracy, enjoying a democratic form of government. Democracy literally means, "power of the people." May this power be wisely used on August 22nd, and may the result prove benefical to the province as a whole.

KILLING THE GOOSE—

Most of us, of course, remember the fable regarding the man who was so foolish as to kill the goose that laid him golden eggs. By one fell swoop he hoped, to obtain all the golden eggs the goose was capable of laying and so killed her, the result being that all he received for his effort of greed, was one dead goose, absolutely incapable of laying more golden eggs. The story, age old and in some form or other, universally known, is supposed to be a vivid example of hasty greed.

When the Grain Marketing Bill was first introduced into parliament, it provided for a compulsory pool, which of course was vigorously opposed by the Grain Trade as a whole. Later, the Bill, having been considered by a special committee, was amended to the extent of having the compulsory features withdrawn. The grain trade's opposition to the Wheat Board Bill in its original form was such as to cause some people to jump at conclusions and assume the grain trade was antagonistic to the interests of the producer.

Of course, this paper holds no particular brief for the grain trade, we surmise, that in common with all mankind, it has some sins to answer for, but we do not believe that it is of the same calibre as the man "who killed the goose." If they "hollered" lustily because someone else, with axe in hand stood ready to kill their particular goose, who can blame them? There are few individuals or organizations who would not complain if they saw their business being taken from them.

The truth is that the grain trade likes to see a prosperous and contented agricultural population. The more prosperous and contented the agricultural population is, the more prosperous and contented the grain trade becomes.

In another column an advertisement appears dealing with this subject, we refer our readers to it so that they may form their own opinions.

MERRY ENGLAND—

ONE INCIDENT out of many that show the national temper at this time should not, in my opinion, go unrecorded, and since I have not seen it reported, I venture to send it to you in the hope that you may consider it worthy of your columns.

On the night of May 6 a private dance was taking place in one of the stateliest houses of Mayfair. The windows were open to the warm spring weather, and the crowd in the street below took advantage of the music which floated down to them. Very soon communication was established between the windows and the street. The dancers below called up for the tunes that they preferred. Their orders were communicated to the band and promptly executed. But presently it seemed to many in the ballroom that it would be more agreeable to dance in the open air. The two crowds united, and finally joining hands, danced in one large ring round the island site on which the house was situated. I saw a private soldier with a debutante in satin on either side of him. The Senior Service was also represented.

Is there any other country in the world where such a sight could be witnessed? . . . .—Letter to The Times (London).

THE CASE FOR SOCIALISM

(Continued from page two)

emerge? Here is an illustration that is not my own: Did you ever see two horses trying to drink out of the same pail. The horse which had his nose in the pail was determined to keep it there. The horse which wanted to get his nose in was just as determined to get the other horse's nose out. And so they bit at each other and fought about the water in the pail, and maybe upset it in their struggle. But I have been visiting on the farm where there was a great round tank into which an engine pumped an unlimited amount of water. I have seen 12 horses come in from the field, tired and hot and thirsty, and all get around the tank and drink to their heart's content. Not one of those horses cared a rap about what the other was doing. They all had plenty. Of course the nature of the horses was not changed. But their behaviour was changed with changed circumstances.

Can Change Attitude by Means of Laws

We cannot change human nature. I am glad we can't. It is the desire of human beings to have a better life that has resulted in all progress. But we can change human behaviour by changing the circumstances under which men live. We can regulate men's actions by law. Was it a change in the nature of the mine owners and mill proprietors of the days following the industrial revolution that made them clean up the terrible conditions that existed in their mines and factories. We know it was nothing of the kind. It was all done by the fact that the conscience of the nation was aroused against the evils of the time. It was changed by law. We can prevent the predatory instincts of mankind from having free rein if we decide we want to do it.

But that is not the important point in the argument, it seems to me. The real fact is that with the ever-increasing elimination of labor power, unless the means of life are socially organized there is no hope for the great mass of the people exercising their desire to live a better life. The selfish interests of the great mass of the people and the humanitarian instincts of others should impel the people of a nation like this to move toward a system that will permit the orderly and universal use of the great wealth which we are capable of producing and consuming.

I wonder if you have ever heard a statement like this: "Oh, yes, a fine theory, but after all we have to deal with practical problems. Theories are all right for philosophical speculation, but they don't butter any bread," or words to that effect. Well, I have the studied conviction that people who talk like that about economic problems are exactly like the bricklayer or hod carrier who thinks of the artichect as a theorist who is not a "practical" man. Those defenders of the present crazy system must be entirely lacking in a sense of humor, or else they have an extraordinary subtle sense of humor when they talk about any other system but this not being practical. Can anybody imagine anything less practical than poverty and distress in the midst of actual and potential wealth beyond computation? Surely the scientific thing to do is to take the facts into consideration and determine our economic policies in relation to those facts.

And what are the facts? I heard Sir Arthur Salter make this statement, and I don't think anybody would care to dispute it, that with our present known resources and with the means of production already at our disposal, there could be provided for every man, woman and child on earth a higher standard of living than ever man has known. That surely is the central fact in the economic situation, and any theory or action that falls short of taking that fact into consideration is not practical. To get back to our simile about our sick world, I suggest to you my friends, that the least practical thing in the world is to go on treating little individual skin eruptions when what the economic body needs is a major operation.

My one plea to my audience is that you may remove as far from your minds as possible the knowledge that the speaker of the evening has any connection with any political organization, or that what I have been talking about has any relation to the program of any political movement. What I have tried to do is to examine the facts relating to our economic situation. I ask you to accept or reject what I have said entirely on its merits and without any political prejudice, kindly or otherwise.

When She Sits Down

A bumblebee can pull 300 times its own weight, we are told. What impresses us most, however, is the malicious vigor of its push.—Cleveland Plain Dealer.

THE
Winnipeg Grain Exchange
. . . . and the Farmers.

Measures to Promote Adequate Payments to Grain Producers Consistently Supported and Advocated by the Grain Trade

The opposition of the Winnipeg Grain Exchange and of prominent grain traders to the Canadian Grain Board Bill, **in the form in which it was originally introduced in parliament** and sent to a Special Committee, has been made the pretext for representing the Grain Trade as being antagonistic to the interests of the producers.

The provisions in the original Bill for compulsory marketing of grain by a Canadian Grain board, combined with the system of initial payments and participation certificates (that is, for a compulsory grain pool) and for the virtual confiscation of the property and machinery of the grain trade to the use of the Board, were opposed by the representatives of the Winnipeg Grain Exchange and the trade. **But the President of the Exchange and all other members of the Grain Trade who gave evidence before the Special Committee specifically advocated measures to secure reasonable payments to producers, whatever might be the level of international grain prices. It should be emphasized that the Grain Trade representatives were the first witnesses to appear before the Committee.**

In his evidence before the Committee on June 20th, Roy W. Milner, president of the Winnipeg Grain Exchange, in an official statement, said:

"As the agents of the producers in the storage, transportation and merchandising of their grain the interests of grain traders, indeed their very existence, depend upon the maintenance of the farmers in as sound and prosperous a condition as can be attained.

"The members of the Exchange are [illegible] concerned to secure for grain growers the largest possible return for their crops, to develop and maintain the widest and [illegible] markets for their grain and grain products, to keep the costs of handling and merchandising within the most reasonable [illegible] to assist by the provision of the most efficient and economical machinery for these purposes in meeting the competition offered by other grain producing countries."

"The Winnipeg Grain Exchange realizes the gravity of the present situation but feels that the sooner a policy is adopted of selling our grain crop in the open market at prices that will find purchasers in the markets of the world in competition with the grain of other countries the sooner will the present difficulties disappear. In the meantime it may be necessary to subsidize the producers either by some system of price support or by other means, and in that case the Winnipeg Grain Exchange will continue to co-operate with the Government."

In the course of examination by the Chairman and members of the Committee, Mr. Milner expressed himself as being in favor of subsidizing the producers if world wheat prices declined and of establishing a minimum price to be paid to growers.

James A. Richardson, president of James Richardson & Sons, Limited, said in his evidence:

"If our Government wants to give the farmers financial assistance under existing conditions (and I would certainly like to see them do it), then there are several ways that this can be done. I consider it is possible to assure our producer a guaranteed fixed price, but still to permit an open market, so that if our market declined below the fixed price the farmer would get a certificate from the elevator company entitling him to collect the difference between the fixed price and what his wheat actually realized. The farmer might, on the other hand, if thought advisable be paid a direct subsidy. It is a government problem as to how this matter may best be met, but it must be accepted as a fact that the foreign buyer will continue to buy wherever he can buy the most with his money, and that he will take full advantage of depreciated currencies in certain parts of the world and it is quite futile to try and induce him to subsidize citizens of other countries.

"I would rather like to see the farmer assured of a fixed minimum price that would give him some protection against depreciated currencies of the southern hemisphere, and a board with authority to use stabilizing influences in the market if they thought it were necessary, and to feed out our surplus wheat as and when the market would take it, and to try to allow the trade the largest possible freedom, and to act as a stabilizing factor, as an insurance and safety factor to operate largely in that way would depend, of course, a good deal on good judgment being employed.

The evidence of Sidney T. Smith, president, Reliance Grain Co., Limited, was as follows:

"It would, in my opinion, be a good idea to establish a fixed minimum price and if wheat reached that figure and there were no other buyers the government agency should take the wheat offered, but would continue to sell wheat at international prices and if the international price were higher than the minimum price the Board would, of course, not require to make purchases. I do not suggest that this Board attempt to dispose of the accumulation of the past five or six years by dumping it on the market and thereby risk a change [illegible] prices. I suggest that there be a stabilization [illegible] through the open market and that this surplus wheat be fed into the market from time to time as conditions may permit."

Robert McKee, General Manager, Canada Grain Export Company, Limited, representing the Vancouver Grain Exchange, said:

"We recognize further that until private traders shall have been encouraged to resume active trading in wheat in forward positions as was done prior to the government's participation in the market some market support from time to time may be necessary to handle smoothly the large crop without unreasonable price declines."

Every representative of the Grain Trade urged the giving of assistance to wheat producers if the international price level were disadvantageous to them. They were unanimous in expressing approval, if the Special Committee and Parliament saw fit to adopt them, of the proposals ultimately embodied in the Canadian Grain Board Act for the payment of a minimum price to farmers, the continuance in operation of the existing grain marketing machinery and the gradual liquidation of the Canadian wheat surplus. These proposals were accepted by Parliament largely on recommendation of the Grain Trade, the compulsory features originally proposed being withheld from operation until made effective by proclamation.

No attempt to represent the Winnipeg Grain Exchange and its members as antagonistic to the producers interest can be successful in face of the adoption by Parliament of these measures and of the evidence given by the representatives of the Exchange and the Grain Trade, as quoted above from the official record.

The Winnipeg Grain Exchange

LINDBROOK

The sympathy of the people of Lindbrook and district are extended to Mr Thos Porter on the death of his wife, last week. The late Mrs Porter was a well known and well-liked old timer of the district and will be sadly missed by her many friends.

Some of the [illegible] of the village are taking a motor trip to Vancouver. They are supposed to start this week. The company being Messrs Clark Lindgren, J. B[illegible] and Harry Logan. Pleasant trip and a good time, fe[illegible] take any wooden money.

We hear that Mr and Mrs L. Pointer who left to settle at the Coast are now residing at Cloverdale, B.C. where they will have a fruit farm, etc.

The heat of the last few days has started a grouch all of it alright. Last week it was the "infernal" rain now its heat. If it keeps up we'll be real "pukka sahibs" as grouchy as a retired Indian army colonel (acting without pay).

This week is Edmonton Fair week, "where city and country meet", maybe [illegible] these times, the country meaning the farmers haven't the means to [illegible] if it is really Edmonton's Fair. Another point to note is that with the late season and wet weather the average farmer is too busy trying to catch up with his delayed work before the next deluge.

ALBERTA SWEEPS BUTTER LISTS AT EDMONTON

Following up the fine showing made at the Calgary exhibition, Alberta creameries, in the largest display of creamery butter exhibits in many years scored further victories at the Edmonton exhibition in the judging completed Saturday evening prior to the opening of the exhibition.

The victories at Calgary and Edmonton of the various Alberta creameries place Alberta once more at the top of the list among all comers from various parts of the dominion, a position held only once previously in the past ten years, but one which Alberta frequently occupied in the years previous to the last decade.

At the Edmonton show, exhibits were so numerous in the dairy department that extra accommodation had to be found. A total of 168 entries in the two classes were made from five provinces.

These creameries won a total of 65 prizes compared with 55 from Manitoba creameries, their keenest competitors. Alberta's percentage of firsts was 51.6 with a total of 16 prizes, against Manitoba's 41.9. Of second prizes Alberta creameries took 17 or 44 per cent against Manitoba's 31 or 36.9 per cent. Of thirds Alberta took 12 or 40.2 per cent.

In the May butter group there were 79 exhibits judged according to stated requirements as to composition and analyzed for moulds and yeast in the dairy branch laboratory. In this group Alberta won eight firsts, 18 seconds and seven thirds, a total of 31 prizes out of 62 awarded. Manitoba with 30 exhibits won a total of 18 prizes. Saskatchewan took eight prizes and B.C. two prizes.

For butter made during June and judged according to the standard score card, without being required to meet the composition requirements, there were 80 exhibits. Alberta won eight firsts, 12 seconds and five thirds, a total of 25 prizes out of 7[illegible] awards.

In the May group the Alberta creameries which won first prizes were the Chipman creamery, Calmar Creamery, Tofield Creamery, New Sarepta Creamery, Woodland Dairy Edmonton, Innisfail Creamery, Central Creameries, Eckville and the City Dairy, Lethbridge.

In the June group the Alberta first place winners were Crystal Creamery, Didsbury; Burns & Co., Leduc, Tofield Creamery, Fertile Valley Creamery, Ponoka, Calmar Creamery, Stettler Creamery, Edberg Creamery and Burns & Co., May Lakes.

Commenting on the results, J. R. Sweeney, provincial dairy commissioner said "The creamery butter display at Edmonton this year is one of the largest on record and represents the finest quality of butter made in the five provinces showing. The exhibition board is to be congratulated on restoring the June class, and the fact that 80 creameries responded is encouraging. We have endeavored to encourage the plants to make exhibits at these exhibitions and the buttermakers have responded splendidly. The dairy producers of the province deserve a share of the credit for the showing at Calgary and Edmonton since much of the success is due to the fine quality of cream delivered."

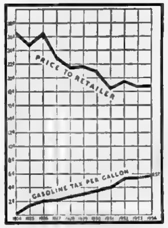
H. E. ROGERS

YOU BUY ROADS, TOO!



The accompanying chart shows how the price of gasoline to the retailer has decreased and the gasoline tax has increased since 1924. In 1924 the average price to the retailer of all gasoline sold in Canada was 26.6 cents per gallon. Since 1924, the price has fallen almost continuously until in 1933 and 1934 it stood at the unprecedented low of 18.8 cents—a decrease of 29 per cent. But as the price of gasoline fell, the tax on gasoline rose. The data for this graph are based on figures published by the Dominion Bureau of Statistics.

WHEN you buy gasoline, you also buy roads over which to drive your car.

Approximately one-fifth to one-third of the price you pay goes directly to your Provincial Government in road tax.

Twelve years ago there was no gasoline tax. Today the tax ranges from six to eight cents per gallon. And yet the cost of gasoline to you is no more because during those twelve years the price of gasoline has been steadily reduced.

Imperial Oil played a leading part in the developments that made lower prices possible. But lower prices were not achieved at the expense of labor. Imperial Oil employees have always been well paid. They work under ideal conditions. They have sickness and death benefits and pensions plans to protect them and their dependents. Five thousand of them are part owners of the Company. They are given every incentive to work efficiently and happily. The result has been better gasoline at lower and lower prices.

BIG SOCIAL CREDIT PICNIC TO BE HELD AT RYLEY

One of the largest gatherings to be held in Ryley in years is slated to take place on Wednesday, July 31st, when the Social Credit Groups of Tofield, Kingman, Ryley, Holden, Dodds, Haight, Marconi School, Adams School, Lindbrook and Logan will unite in staging a monster picnic.

Among the many attractions will be a big parade at 11:00 a.m., all children taking part in this parade being given free ice cream. The parade will be headed by the Killam Brass band of 40 pieces and the band will also render selections all day.

Baseball, Junior baseball, Girls' softball and a general line of sports will be run off. Teams from Holden, Ryley, Tofield, Adams School, Vermilion Valley, Shonts and Dodds, will be represented in the baseball and softball games.

At a time to be announced Mr. J. H. Unwin will give an address.

DR. McPHERSON SOCIAL CREDIT CANDIDATE

In the list of Social Credit Candidates published, for this constituency, the name of Dr. McPherson, of Ryley appears. He was chosen by a central board from four prospective candidates selected at a convention held at Vegreville.

Dr. McPherson is a fine type of man and very popular where he is known. He has resided and practiced at Ryley for many years.

There will be refreshment booths on the grounds and the day promises to be one big day of enjoyment.

In the evening at the Ryley Community Hall, a three act play "The New Day" will be presented. This play depicts life before and after social credit.

Following the play a grand dance will be held, the Ryley orchestra furnishing the music.

MR. CHAS. GORDON, Liberal Candidate for this Constituency will address the meetings on the subject of
MONETARY REFORM
Other Speakers will address the meetings on the topics of the Day.

Your Shopping Made Easier

We are always concerned about making shopping easier for our customers. Buying popular brands and selling them at the very lowest price is only one of the very many things we do to make it easy for our customers both as regards effort and price. Watching the fruit market so as to have a supply when prices are at their lowest is another little item. None of them big perhaps, but in the agregate, they mark a store which appreciates your partronage.

E. W. ROGERS

MR. AND MRS. PINCOTT AND FAMILY LEAVE TOFIELD TO RESIDE AT COAST

On Thursday of this week, Mr. and Mrs. Pincott and family left Tofield enroute to Nanaimo, Vancouver Island, where they will take up residence.

Mr. and Mrs. Pincott have been residents of Tofield for many years, Mr Pincott arriving in the district in 1912 and Mrs. Pincott a year or two later. Mrs. Pincott was a member of the Palmatier sisters, a talented group of artistes, and while visiting here, met Mr. Pincott.

From working at "anything that was going" Mr. Pincott rapidly rose to importance in town affairs and a few years later we find him mayor of the town. Enterprising and energetic, preferring the unusual to the orthodox way of creating business, he had a wide circle of business clients in many lines, including insurance, brokerage, grain buying and perhaps the most original "straightening out entangled affairs."

Mrs. Pincott from the start added much to the social life of the town, and was always ready to give of her excellent talents to town events. A reader and elocutionist of rare ability and a pleasing violinist, she was in great demand and never failed to delight her audiences. Her repertoire was varied, and different people have favorite numbers, but her rendering of "The Parson at the Football Game," ranks among the classics of humorous readings. Mrs. Pincott was also an energetic worker in the Women's Institute and did a great deal of work in the formation and operation of the Tofield Library, an institution which has given untold pleasure throughout many years of service to the public.

Together with their son and daughter Clifford and Betty, Mr. and Mrs. Pincott carry away with them to their new home the best wishes for a long and happy sojourn there.

MR. COOMBES LEAVES TO RESIDE AT VICTORIA

On Wednesday of this week Mr. C. M. Coombes left Tofield enroute for Edmonton where after a visit with his son, he will leave with Mrs. Coombes for Victoria, where they will take up residence.

Mr. and Mrs. Coombes have resided here for quite a number of years and were well known and were well liked. Mr. Coombes operated the feed mill and tin shop here for many years and was quite a worker of the creative type, fixing up things to make work easier. Both were very hospitable and entertained frequently at their home. This community wish them health and happiness in their new home at the coast.

AMAZED AT GRASS GROWTH

Mr. and Mrs. Charlie Doran and daughter of Sioux Pass, Montana, have been spending a few days with Mrs. E. V. Gray of Tofield. Mr Doran is Mrs. Gray's brother and this was the first meeting of brother and sister for eighteen years.

Mr. Doran was amazed at the growth of natural grass and crops being accustomed to the relatively dry prairie country of Montana, the heavy growth here was a revelation to him.

LIBERAL MEETINGS to be HELD

The following Liberal meetings are being announced. At each of them, the Liberal candidate for the Vegreville constituency will give an interesting and instructive address on the important affairs of the day as they effect this province. The main topic will be monetary reform and Mr. Gordon carries with him charts to help out his description of monetary matters.

Meetings will be held: at McKenzie School on Monday, July 29th

Ketchamoot School, Tuesday, July 30th.

Kingman Hall, Kingman, Wednesday, July 31st.

MRS. WIGGS OF THE CABBAGE PATCH COMING to the VARIETY THEATRE

There are few people who have not read or at least have not heard of "Mrs. Wiggs of the Cabbage Patch", and it will be with much pleasure that they will read that this popular picture taken from the ever popular book is coming to the Variety Theatre, Tofield next Tuesday. Mrs. Wiggs and all the little Wiggses will be there with a great many of their quaint sayings. A splendid wholesome picture, don't fail to see it.

Local and Personal

Mrs. Wilmore of Edson is visiting at the Kendall home for a few weeks.

Miss Lena Smouse of Stettler is visiting at the Joe Wiltsen home.

Mr. and Mrs. Lovell and family left for the Pacific coast on Saturday on holidays.

Mr. Schmaltz is relieving at the local C.N.R. depot. Mr. Ed. Wuetherick being on holidays.

Mr. and Mrs. Ed. Wuetherick are away on their annual vacation.

Mr. and Mrs. McLaughlin and family left on a trip to Mexico on Saturday.

Mrs. (Dr.) Law and family are holidaying at Pigeon Lake.

Mr. and Mrs. Saper and family from Winnipeg visited at the Mean home this week.

Miss Lois Thompson and Ruth Pauls visited Tofield for a couple of days.

The Misses Edna Lindsay and Melba Campbell visited Miss Annie Lindsay on Wednesday.

Mrs. N. Scott and Norma returned home from the coast this week.

Mrs. Pollard from Nanaimo, Alta., is visiting relatives in town. Mrs. Pollard was the former Mrs. Herndon.

Miss Lorett Ross and Miss Myrtle Bethel have left for Jasper this week.

Mr. John Lee sr., has during the past week been very ill with a form of heart trouble. We are pleased to report that he is showing some improvement. He will, however, be confined to his bed for some considerable time.

Mrs. J. W. Robinson has been unwell for the past week, but we understand is improving.

A tonsil clinic was held at the hotel on Wednesday, quite a number of patients receiving attention. Dr. Law was in charge.

The Tofield W.A. Lawn Social which was to have been held on July 31st, has been postponed to Wednesday, August 7th.

Mrs. Kendall visited the city this week.

Mr. and Mrs. J. W. Chapman are leaving for Calgary on annual holidays. The Town office will therefore be closed until Thursday, August 8th.

Mr. R. H. Cautley, civil engineer of Edmonton spent four or five days in the Tofield district last week doing some surveying for the town, which includes a newly surveyed section of plots in the local cemetery.

Mrs. W. C. Swift and Miss Annie Swift are leaving by car for the coast on Wednesday, where they will spend a vacation.

J. W. Chapman appeared before the Utilities Board on Monday morning last for the purpose of presenting applications for the cancellation of various portions of subdivisions. The applications were accepted and proceedings are being continued.

The Gospel Tent Meetings continue in Kingman Friday evening this week and next Sunday at 11:00 a.m. and 8:00 p.m. Welcome to all.

Mr. and Mrs. Pincott and family wish to thank their many friends in the country and town who extended to them invitations to visit. Lack of time, however, has made this impossible. We express our regret, but sincere thanks nevertheless — Mr. and Mrs. Pincott and family.

In the needle craft classes at the recent Edmonton exhibition, Mrs. J. W. Morton was successful in winning three first prizes and three second prizes.

The renowned Madame Fontaine of Edmonton, palmist and fortune teller will be in Tofield at Royal Alexandra Hotel, on August 1st.

We understand Tom Wallington left with R. W. Pincott's railway car of effects. This will be Tom's first trip through the rockies, and we shall be sure to hear of the impression the rockies and coastal points make upon him when he returns.

The Edwards family might or might not have had mushrooms and steak for supper the other night. Anyway they had the mushroom, note the singular, for Donald and Dennis found a mammoth mushroom near the house apparently in prime condition. It weighed one and a half pounds and measured 10 inches in diameter.

WEEDER DEMONSTRATION QUITE SUCCESSFUL

The demonstration of the Mills Wire Weeder, held at the John Warner farm on Saturday, July 13th, was quite a success. There was a good turn out and the machine operated by M. C. Hammond, agent, and Julius Lerbekmo, did efficient work. The machine is designed to efficiently clear summer fallow of weeds and provides a speedy and efficient way of doing this work. It literally pulls the weeds up by the roots and it is claimed is the equal of hand pulling.

PUBLIC INVITED TO SOCIAL CREDIT MEETINGS

The Tofield Social Credit Group held their weekly meeting on Thursday evening, the speakers being Dr. and Mrs. McPherson of Ryley.

At a former meeting Mr. Denny gave an interesting address. All of these addresses have been enjoyed and the meetings are open to all. Thursday evening of each week at 8.30. Come and bring a friend.

SOLID "GAS" and TERRESTRIAL MOTOR ADVANCE POWER FIELD

New York, July 11—Two announcements vital to the electrical and aviation and automotive fields were made here today, the one in the form of a seventy-ninth birthday gift to the world by Nikola Tesla, the scientist inventor who has 700 basic patents to his credit, and the other by the Daniel Guggenheim school of aeronautics at New York University.

The Guggenheim experiment was 16 years in the making and is declared to be a non-explosive solid gasoline which will reduce the fire hazard in air travel to a minimum and is expected to have wide uses in the domestic as well as the automotive field.

Named [illegible] by Dr. Adolph Prussin, research chemist in charge of the Guggenheim [illegible] the new [illegible] was said [illegible] a gallon [illegible] weight [illegible] less [illegible]

Vaporized by Heat

It is reduced to a vapor by heat from the exhaust and through suction of the engine and will, it was declared, eventually bring about the elimination of carburetors in gasoline [illegible]

[illegible] the gasolene [illegible] and its efficiency [illegible] greater than fluid gasoline according to Dr. Alexander Klemin, [illegible] of the [illegible] it was [illegible] ready for [illegible] production, its first use probably would be in air, [illegible] chief fuel [illegible] hazards.

[illegible] even the [illegible] when [illegible] burns slowly like wood.

The [illegible] of the new substance were discovered in 1919 by Dr. Prussin [illegible] years old.

Secret Sought by Many

When, in experiments to remove paraffin from gasoline, he [illegible] the latter could be solidified by altering the molecular structure through catalysm, then removing the catalytic agent which could be used over and over. Since then he has tried out more than 9000 types of hydrocarbon to achieve an efficient performance in a field in which more than 200 patents already have been granted.

The present owners of solene are Dr. Prussin, William Loeb Jr., Clyde Pangborn, round-the-world flier, and Charles Lucian Gleason, of the law firm of Cabell, Ignatius & Le[illegible]

Tesla Vague on Facts

Dr. Tesla said he had found means of transmitting energy to the earth [illegible] terrestrial was machine [illegible] [illegible] [illegible] the [illegible]

[illegible] pulses the machine would give [illegible] were mechanical rather than [illegible] and he likened them to earthquake waves [illegible] able, seeing little [illegible] power [illegible] of interference by weather [illegible]

Unwilling to demonstrate his invention either with a model or mathematical proofs, the only description he would give was of a floating cylinder [illegible] operated by application of an old principle of energy amplified by a new secret principle and a stationary part.

"I have found means of impressing upon the floating part powerful impulses which react on the stationary part and through it transmit energy to the earth," was his only [illegible] on this score.

Other Possible Uses

It might be used, he continued, however, as an unfailing means of communication anywhere on the globe, as a guide for ships at sea and as an indicator of where the mineral wealth of the world lies stored.

Dr. Tesla said his motor meant the "perfect communication," and envisioned this as the first practical use to which it would be put. Messages from any part of the world would be available to a person equipped with even a small pocket receiving set, he declared.

Ready for Market He Says

The second utility of the impulses, he continued, was the guiding ships of the seven seas with absolute precision, the mechanical waves of the machine traveling outward like a stone's ripple in a pond.

The ship's angle of reception would be 90 degrees always, he declared, opening to solution all problems of navigation and reducing the radio beacon to "child's play" by comparison.

Thirdly, the machine, he said would lay bare the physical properties of the earth, its tiered system permitting qualitative differentiation between the various ores and elements under the ground and a locating whatever is of value beneath the surface.

But, he smiled, "no competent engineer" would believe possible the properties of this discovery, which, he declared, will be a marketable reality within a year.

SMALL PROFIT ON GASOLINE

In the last annual report of the biggest Canadian oil company, the net profit on the gasoline it made and sold was only slightly more than one-half of one cent per gallon. Provincial government gas taxes, ranging from six to eight cents now in effect represent ten to more than thirteen times the profit of that company.

HOME CURING OF PORK

In the home curing of pork either the "dry salt" or the "brine" method may be employed, but whichever process is adopted, common salt is the curing agent. Such other ingredients as sugar, salt-petre, and baking soda are also used. As a rule, the old-fashioned brown sugar is preferred to the white granulated kind as it is believed to give a slightly better flavor to the meat. A small quantity of salt-petre has a preservative effect and gives a reddish color to the meat. Baking soda is used principally with the brine cure.

Pork for curing should be cut up into convenient sizes, and it is important, on the one hand, that all animal heat has been cooled out of the meat, and on the other hand, that the meat is not frozen when the curing is commenced.

A cool, well ventilated cellar is a desirable place for both brine and dry curing. The curing is more easily controlled in cold, or at least cool weather, so that thick pieces may not have a chance to spoil before the salt has penetrated. For beginners the brine cure is preferred because there is less likelihood of failure, but full information as to the home curing of pork, the storing of meat, and how to make sausages and head cheese is contained in the booklet "The Home Curing of Pork" just issued by the Dominion Department of Agriculture.

COMFORT ON LONG TRIPS

Fatigue, says a Chevrolet service man, is the chief cause of discomfort on a long tour, summer or winter; in the summer, heat and glare are added burdens. The experienced driver will vary his position as frequently and as widely as possible, by moving the easily adjustable front seat back and forth, and by shifting his posture on the seat. Muscular effort in driving is chiefly in the operation of the pedals. The experienced driver will save a lot of energy in their use. It does not take much effort to depress the clutch and brake pedals, but to hold them down for extended periods is extremely fatiguing. Therefore, you won't find a knowing driver waiting in gear at a signal, with the clutch pedal held down; he'll be in neutral, resting his foot and leg. Similarly, at a halt on a grade, he will hold the car with the hand brake, not with his foot. On long stretches of clear road, or on long climbs requiring full throttle, the driver may set the hand throttle and rest his accelerator foot by a change of position. On a steep down grade, he will save his braking muscles by shifting into second gear. Combating hot weather also has its tricks. No-draft ventilating systems offer a wide variety of effects, but many drivers fail to reach their full advantage. The rear windows of a sedan should be open, for instance, even if only the front seat is occupied—because it induces circulation of air throughout the car, from front to rear. Incidentally, if your car has a heater, don't forget that it will act as a radiator inside the car, even though the switch is turned off, unless the heater is disconnected from the engine. Eye strain has much to do with the fatigue of driving. Use the adjustable visors of your car whenever possible, and wear tinted glasses to kill the glare of the road.

CROSSING COLLISION 100 YEARS AGO!

One hundred years ago the first steam whistle was applied to a locomotive, recounts F. J. Gemmell Smith in an article in the July issue of Canadian National Railways Magazine. It displaced the steam trumpet which was in use on the Leicester-Swannington Railway. Earlier still the locomotive driver had to use a post horn like the old-time coachman. In 1832 a farmer driving his cart loaded with eggs to market, crossed the tracks of the Leicester-Swannington railway, disregarding the warning toots of the post horn, and the engine turned his cartload of eggs into a giant omelet. The incident caused a demand for a more audible warning signal. First came the steam trumpet and then the steam whistle as used today.

NEW SYSTEM OF IDENTIFICATION IMPORTANT TO SWINE BREEDERS

From information received by the Live Stock Branch, Dominion Department of Agriculture, the importance to swine breeders of the new regulations recently enacted under the Pedigree Act, whereby all pigs born in Canada since January 1, 1935, must be identified either by tattoo marking or by ear tags before the pigs are eight weeks old, and before weaning, are not being fully appreciated.

The new system requires that if a breeder decides to tattoo his pigs, the identifying letters shall be allotted by the Canadian Live Stock Records, Ottawa, and if he favors the use of tags then these must also be ordered through the same organization. Not until the proper identification of the pigs has been made will the official registration be recorded. Moreover, the export of purebred pigs to the United States cannot be made without this identification. This system, if properly followed, provides a distinct and positive identification for every registered pig in Canada. The advantage to the purchaser is that a definite link is established with the pedigree certificates of the pigs.

With the keen demand at present for pure bred pigs, compliance with this new method of identification makes it possible to sell pure bred swine as registered stock without difficulty.

FEAR RELIEFERS LOSE RIGHT TO VOTE

Voting rights of men in relief camps are to be inquired into by the Edmonton Trades and Labor council, which decided at its regular meeting Tuesday to send a delegation of one to interview the provincial government in the matter. It was feared by some of the members present that such men would lose their votes, and the general feeling was that their franchise privileges should be safeguarded and that steps should be taken to make provision accordingly.

CHINESE FIND 30,000 DEAD AFTER FLOODS

Shanghai, July 24—The Hankow Red Cross society announced Wednesday it had picked up 30,000 bodies of persons drowned in the present floods along the Han and Yangtze rivers near Hankow alone and reports from other points indicated a far greater loss of life.

The northern provinces continued to battle floods of the Yellow river.

The latter, crashing barrier after barrier to swallow immense new areas of fertile farm lands, has already blanketed more than 10,000 square miles of the Shantung countryside. Governor Han Fu Chu of Shantung sent an urgent telegram to Nanking reporting nearly 5,000,000 of his people homeless.

The neighboring provinces of Hopei, Honan and Shensi also are seriously hit.

Extra Time

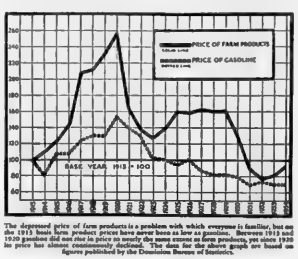
Employer: "Whatever for?"

Office-Boy: "I dreamt about my work all last night, sir."—Pearson's.

YES - - its true

That "The Mercury" is owned by an individual. It's his property and he must pay the bills and assume all responsibilities. On the other hand, it is also true that somehow or other the public looks upon the community newspaper as being partly their property. The community expects its public institutions to be defended, to be favorably reported, to be kept in good report throughout the district and the province. Churches, societies and organizations look for and expect their activities to be reported in their home paper. And the home paper does all these things—likes to do them. This being so, it is only human that the owner of, and those who are employed at the local newspaper office should expect that all these various interests would return the compliment through giving it printing orders. If all the printing requirements of Tofield were to be printed in Tofield, "The Mercury" would have to nearly double its present staff.

THE MERCURY



The depressed price of farm products is a problem with which everyone is familiar, but on the 1913 basis farm product prices have never been as low as gasoline. Between 1913 and 1920 gasoline did not rise in price to nearly the same extent as farm products, yet since 1920 its price has almost continuously declined. The data for the above graph are based on figures published by the Dominion Bureau of Statistics.

FAIR LABOR POLICIES BENEFIT THE CONSUMER

WORRY and unhappiness are enemies of efficiency. We have always tried to be efficient and years ago we said, "to the greatest extent possible let us get worry and unhappiness out of this organization — out of the minds of every man and woman in our employ."

So Imperial Oil has always paid high wages. It set up sickness and death benefits, a pensions plan and group insurance for its workers. It made it easy for them to share ownership in the Company. It gave them a voice in the discussion of Company policies that directly affect them. It introduced the forty-hour week, thus increasing the number of those who work for the Company.

Efficiency and loyalty are repaying the Company for all these measures. Imperial Oil employees give generously of their hands and minds because they are well treated. They feel secure and this feeling is reflected in their work and in the high quality and lower cost of the products they make. The consumer benefits, the employees benefit and the Company benefits by these policies.

THE STATE AND ECONOMIC LIFE: GREAT BRITAIN—

By H. B. Elliston, in the Christian Science Monitor, June 20th, 1934

IN A recent contribution on this page I referred in passing to the rapid development in government control over British economic organization. Nothing interested my readers more than this passing reference. I am asked to elaborate upon it. Most Americans are under the impression, it would seem, that Britain is still wedded to private initiative—that is, capitalism or individualism. Many Britons also think so. The fact is that in the British system a species of Socialism is pushing into the realm once occupied by capitalism.

How far the revolution has gone was revealed in a recent debate in the House of Lords. Lord Allen estimated that **practically two-thirds** of the large scale economic organization in Great Britain had already passed out of the sphere of unregulated private profit-making. A multitude of different types of controls are involved. Such things as the telegraph service are frankly governmental departments. In agriculture there is regulation more or less of the type of AAA. But a new type of control is in evidence which is not exactly government and certainly not private control. The best description would probably be public trust. An example is the British Broadcasting Corporation. There is here no sense at all of any private stockholder having any share in the profits or control. The concern was set up by the government. As soon as the directorate was appointed, however, the body felt itself as independent of government pressure as a private firm. Somebody once told me: "The wrong way to go about getting something out of the B.B.C. is to invoke the aid of a government official."

The device is thus situated in the twilight zone between individualism and Socialism. In the Lord's debate it was described in these words:

> What we have discovered by process of time is this, that there are various methods by which you can introduce the principles of Socialism whereby the interests of the state and the interest of the body politic shall be put above the interest of any of the private individuals who compose that body. Through a public utility corporation you can get all the advantage of collective organization and promote efficiency without the disadvantage which comes from political manipulation which may easily arise if you proceed to nationalize all industries and run them from Whitehall.

There are several such public corporations in this category. The device has spread to Canada in the case of the new central bank. Here you have an organization located in Ottawa in which government representatives sit on the board but have no voting power.

Economic organization may be divided broadly into three categories: money, industry and agriculture. Banks in Britain are privately owned. It is true that the Labor Party would nationalize them, but I doubt whether there is any considerable body of opinion in Britain which upholds such nationalization. The reason is, I think, that the public have little to complain about. During the depression the banks, yhich are practically limited to the "Big Five" and their branches, seem to have kept their credit lines open. A year or two ago, readers will recall, I gave the story of the American concern which, turned down by New York in its request for a loan, was offered accommodation from London.

There are more upholders of nationalization as applied to the Bank of England. This institution is the opposite number of the Federal Reserve System. It is the ultimate money controller, having the power to inflate and deflate. Like the Federal Reserve Banks, the Bank of England is privately owned. That is, unlike the B.B.C., it pays dividends to private owners of its shares. But its policy is directed as if it were a public trust. The extent to which the Government itself has a voice in the determination of policy is difficult to gauge. Dr. Herbert Feis some time ago made an exploration of the link. I havn't his book with me at the moment. But I believe he concluded that, if there was a tie-up, it would probably be found in the country clubs! The relation, in other words, is of the informal kind characteristic of British affairs.

In industry the Government's hand is felt in many lines. Wherever there is a "sick" industry, the government has stepped in. Let us see what has been done with coal. In the British industry there is now a Coal Comptroller, a well-known civil servant. Sir Josiah Stamp says he is supposed to act as a kind of precipitant or catalyst, as the chemist would say, to induce rationalization and economy among the independent operators. As in the Guffey Bill, quotas are provided. But—and this is the important difference—there is no compulsion of anything other than a kind of negative regulation. Certainly there is no such elaborate setup as is provided in the Guffey Bill.

The Coal Comptroller has not so far been responsible for any very striking amalgamations or economies, but a good deal of foundational work has been done. Whether it will ever amount to very much depends upon the coal operators. As in Belgium, they are almost feudal in their outlook, in that they have developed a paternalism in their behavior toward their workers and an indifference to what is going on elsewhere. An illustration will show what I mean. Less than ten years ago I was in the North of England offices of a colliery which did a thriving export business with the Baltic State. The manager, seeking to impress me with its up-to-dateness, told me that the management had actually installed typewriters in the administration offices.

It will be noted that, as regards coal, the type of control is again sui generis. Here is what might be called the umpire type. A list of all the ways that the British Government has adopted to intervene in industrial life would take-up this entire page.

Agriculture has been the object of more government attention than industry. In the main, the use of bounties is as marked as in the United States. But benefit paymens are paid to farmers to produce, not to plow under.

Britain wants to grow more. Its agriculture for a century past has been sacrificed to the necessity of having to take farm imports in payment of manufactured exports. When other countries began to show independence of imported manufactures, Britain began to display the same search for self-sufficiency in agriculture. In wheat, for instance the extension of acreage is unequalled. From 1,197,000 acres three years ago, wheat is now grown on 1,759,000 acres! Marketing schemes are also in vogue. Potatoes, milk, pigs and bacon, eggs and poultry, sugar—they are all taken care of. Britain has indeed traveled very far along the road of state action in economic life.

A Brief Sketch of Provincial Liberal Leader's Career

Farm boy, teacher, banker, university student, soldier in the Great War, having served as a private in the ranks and as sergeant, barrister, member of the legislature, and, at heart, still a farmer, owning and taking an active interest in the operation of a farm in the Edmonton district, W. R. Howson, Alberta Liberal leader, whose energy and action have resulted in putting a candidate in every constituency in the province for the Liberal party in the coming election has had a career which falls to few men at the half century mark.

His story was told a year ago in Toronto Saturday Night by Walter Thomson.

Springing from English and Irish stock, the youngster destined to become leader of the Alberta Grit forces first lifted his voice in vigorous protest against prevailing conditions during the sixth day of March 1883, on a farm near Norwood, Ont. His Yorkshire grandfather had cleared the first Howson farm in the New World and it was in that challenging environment that the future politician absorbed his first lessons in thrift, industry and dogged determination. Today the Alberta Liberal chieftain reflects upon some of the influences of his Ontario childhood and reveals a long-cherished ambition to operate a farm of his own.

"I can drive as straight a furrow as the next man," Mr. Howson declares, "and I can do a good many things that the farmers of to-day have forgotten. I can harvest peas with a scythe—I can swing a cradle—we used to cut the outside swath by hand back in Ontario to save the grain from being trampled. People don't do that any more.

"I couldn't run a combine, but with a small mixed farm I'm positive I could make it succeed even in hard times. With an Alberta farm and an application of old Ontario thrift, a man would never, perhaps, be rich but certainly he would never be poor."

Youngest Bank Manager

Commencing with those days when he trudged barefooted along the two miles of dusty road to school at Norwood, the story of Howson's career is a varied and colorful one. In a sense his experiences over the succeeding fifty years symbolize the struggle and victory of true Canadianism in meeting the challenge of typically Canadian conditions both east and west.

He began teaching at the age of eighteen in the ungraded school at Mather's Corners, ten miles from Peterborough. Teaching soon palled, and after several years of clerking in the Sovereign Bank of Canada he was appointed manager in 1906 of its branch at Stirling, Ontario. At that time he was the youngest bank official in the Dominion. He was retained in that capacity by the Bank of Montreal when it took over the interests of the Sovereign in 1908. As a result of several visits to the prairie provinces young Howson finally yielded to the lure of the far west and, impatient over a delay in granting of his application for transfer to a Western branch, he resigned his position in the fall of 1910 resolving to shape his own destiny under Alberta skies.

Gold Medal in Law

Reaching the Foothill province he accepted the first work that offered. During the first few months in his new surroundings he acted as implement company collector, and for a while, like everyone else in the booming west, he acted as real estate agent. In the 1911 Reciprocity election, Sheriff Van Wart, Liberal candidate in Calgary opposing R. B. Bennett, present prime minister of Canada, received welcome aid in his campaigning efforts from a newcomer to the district. It was "Bill" Howson, whose voice was now a far western echo of the deep Liberal notes struck by his father and elder brother, back in Peterborough county.

The election over and having apparently observed from its local outcome how useful legal training could be in the political field, Howson devoted his tireless energies during the following three years to the study of arts and law at the University of Alberta. During his spare time he served his articles in the law office of the late Hon. A. G. Mackay, long a power both in Ontario and Alberta political affairs. By 1915 Howson had graduated in both courses and his outstanding ability was recognized by the bestowal of the gold medal award for the highest general proficiency record over the three-year period of his scholarship.

Alert and Militant

In 1916 he married Jane Elizabeth, daughter of John and Lydia Carmichael, pioneer westerners, and their union has since been blessed by three fine children—Margaret, Isabel Ann, and William, Jr. Shortly after his marriage Mr. Howson enlisted for overseas service and saw action in France, joining the First Canadian Tank Corps composed of detachments from every university in Canada, as a private, he was transferred to the Royal Tank Corps and sent to Chelsea barracks for a course, afterwards being promoted to sergeant and g[illegible] ing overseas. Upon returning to Edmonton following the Armistice, he was made a partner in the new legal firm of Parlee, Freeman and Howson. From 1920 until 1930 when he was first elected to the provincial House as a Liberal member for Edmonton, Mr. Howson took an active and prominent part in the interests of the Grit cause, but found time in 1926 to take a special course in law at the University of Chicago where he again won high honors. In 1931 he left his former partnership to organize Howson, Duncan, McLachlan and Cross continuing the practice of Short and Cross—Edmonton's oldest legal firm.

A hard hitter in public address and a forceful personality in debate, Howson was early marked for leadership of what he himself now describes as "the party of the helping hand." And so, in the Foothills province at least, Laurier's dream of an alert and militant type of Canadian Liberalism is commencing to assume form and some measure of substance. In Howson the new Grit revival finds both its personification and inspiration.

Keen in house debate and on the public platform, always ready to "call a spade a spade," and disdaining diplomacy of the "pussyfooting" type which might possibly make his task as leader easier, Howson has long been noted for his two-fisted aggressiveness. Never afraid to speak his mind, his absolute fearlessness in matters political and personal have made him some extremely bitter enemies, but the result have been noteworthy. For the first time since 1921 the Liberal party in Alberta discloses clear evidence of vitality, genuine enthusiasm and a growing confidence in the worth of the acknowledged mission—the banishment of class government at Edmonton, and in its place the creation of a balanced administration, a government representing a true cross-section of the whole community.

The manner in which Howson went about his task to bring this about is typical. Calling economic conferences in every part of the province he invited men and women in every walk of life and of every political persuasion to meet him and to discuss these problems. His idea was that the problems of Alberta were the problems of the people, and they could best be met by discussing them with the people most affected, the people who had to meet them in their every day lives.

"Get to Grips" His Dictum

"Get to grips with the problems of Alberta and we can solve them," he told his followers, and into this idea he put all the fighting qualities which were mainly responsible for his selection as a leader. The result was a knowledge at first hand of conditions in Alberta and the problems troubling every line of industry and activity and the drawing up of a platform, with the aid of practical men and women, which is destined to meet these problems.

The serious plight of the youth of Alberta was not forgotten. Howson is a great believer in youth. He [illegible] growing family [illegible] He [illegible] make Alberta a better place for the youth of [illegible] [illegible] said. Direct, dynamic, decisive, he has inspired confidence in the minds of the young men and women of Alberta [illegible] less than [illegible] their elders and in the Liberal party he has acquired a loyal regard, while among his political opponents there is a great deal of respect for this fighter by nature [illegible] to get Alberta on its feet and its people once more happy and prosperous.

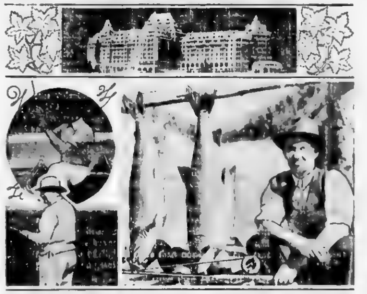
BACK TO LAND MOVEMENT SUCCESSFUL IN QUEBEC

Winnipeg, Man., July 22—The Back-to-the-Land movement under the new plan of the Quebec government [illegible] turned out quite successfully and [illegible] there is no doubt that it will be enlarged," stated J. E. Laforce, general agent of the Colonization Department of the Canadian National Railways, Montreal, who was in Winnipeg recently. During his visit here Mr. Laforce accepted several speaking engagements and attended the celebrations of the St. Jean Baptiste Society in St. Boniface.

"The Quebec government set aside $10,000,000 to re-establish settlers on the land last year. Already more than nine thousand applications have been received and of this number six thousand have been accepted. In the first month more than 400 families were settled.

"Some of the families have no capital in which case they are given financial assistance and paid so much [illegible] the land. Other [illegible] have some capital are assisted in purchasing vacant farms or improved properties. The whole plan has proven satisfactory so far and will no doubt be enlarged so that settlers may be placed on the fertile areas of the Province." Mr. Laforce said.

Where Dreams Come True



NOT much has been said about the fishing near Banff Springs Hotel in the Rocky Mountains, probably because when visitors had finished "writing home" about the scenery, facilities for golf, tennis, and swimming, mountains to be climbed on foot or horse, the health-giving qualities of the air, and the fun to be found there the year round, there were no suitable descriptive words left for the fish.

But many types of fighting fish abound in the nearby lakes and streams. Minnewanka, the lake of Indian legends, frozen over for a week after the opening of the fishing season, made a glorious start on the new season by producing more than 545 pounds of trout in two days.

Bill Hall, of Banff, led the parade with two trout, the larger one a fisherman's dream tipping the scales at 4½ pounds, and the other registering a more usual 20½ pounds. He was out for only an hour and a quarter in the early afternoon from the time of the first cast until the second fish was landed, despite the fact that the pair put up 20 and 40-minute fights.

Visitors have also made good catches this year. On the same day sportsmen got eight fish averaging about 18 pounds each, and in two days another party of visitors caught 360 pounds of lake trout, running from five to 25 pounds, with the average about 15 pounds.

While catches like these are not at all uncommon in the West, it has been discovered fairly recently that fishing is not at all necessary to get the big ones. Visitors at the Canadian Pacific [illegible] at Banff Springs and at Lake [illegible] as well as at the many bungalow camps throughout the Rockies learn soon after their arrival that there are fine fishing grounds in the near vicinity.

CEREAL CROPS FIELD DAY LACOMBE, AUGUST 14

The annual Cereal Crops Field Day will be held at the Dominion Experimental Station, Lacombe, on Wednesday, August 14th. This is always one of the largest and most important Field days of the summer and this year there are several new varieties, and many marked differences of yield, earliness, strength of straw and general suitability which distinguish varieties as adapted or not adapted to Alberta's [illegible] of soil and climate.

The [illegible] of the Dominion Crop Testing [illegible] will make a [illegible] interesting [illegible] for comparison and lecture [illegible]

[illegible] of 6427 plots under test at the Experimental Station. Many of the grain growing experts [illegible] the Station [illegible] and answer [illegible]. Addresses will be given by Mr. Newman, the Dominion Cerealist, [illegible] other prominent seed growing [illegible]. Forage crops are rapidly increasing in importance [illegible] grain [illegible] the main cash crop of Central Alberta. Come to the Cereal Crops Field Day on August 14 and learn [illegible] valuable lessons concerning better varieties, improved methods and the fine art of grain growing.

The Experimental Station will provide coffee, cups, cream and sugar. Visitors will please bring their lunches. The programme will commence at 1 p.m., or immediately after lunch.

RUST IN WESTERN CANADA

The officials of the Dominion Rust Research Laboratory, Winnipeg, state that the spores of black stem rust have been discovered on the wheat plants in parts of Manitoba South of Russell, and in Saskatchewan East of Regina, South of Yorkton. They state the infection appears to be still spreading West and North of points mentioned.

Our research department has calculated that the area now affected contains approximately 3,500,000 acres seeded to Red Spring Wheat—[illegible] in Manitoba and 2,100,000 in Saskatchewan.

An average crop on this particular acreage would be between 55 and 60 million bushels of wheat. The amount of this bushelage that will be lost to rust infection will apparently depend upon the weather occurring between the present time and harvest.

LIBERALS MAKE CLEAN SWEEP IN PRINCE EDWARD ISLAND

Charlottetown, P.E.I., July 24.—In a sweep unprecedented in Canadian history, Liberals Tuesday captured every one of the 30 seats in Prince Edward Island's legislature, wiping out Premier W. J. MacMillan's Conservative government and the whole [illegible] representation in the [illegible]

[illegible] Canadian history to have [illegible] without an opposition [illegible] province [illegible] the [illegible] years [illegible] Liberal government [illegible] started the [illegible] British Columbia [illegible] months later [illegible] Saskatchewan elected Liberal [illegible] and New Brunswick [illegible] month ago. [illegible] the province now [illegible] government [illegible] Manitoba and Quebec.

W. M. Lea Premier

[illegible] of Prince Edward Island [illegible] M. Lea, a farmer [illegible] the Liberal's campaign [illegible] saw [illegible] legislature rise from 12 [illegible] the Conservatives [illegible] 1930—31 [illegible] Premier MacMillan [illegible] Tuesday [illegible] was [illegible]

Best showing made by any Conservative [illegible] was that of Mr. McLean, Souris merchant, who lost by [illegible] five votes. He had been victorious [illegible] provincial election in [illegible] of King's county since 1917, when he replaced his father, Hon. John McLean, who was summoned [illegible] Senate.

CALGARY MAN IS ORGANIZER FOR STEVENS

Toronto, July 20—W. L. McQuarrie, Saskatoon, and A. C. MacKay, Calgary, have been named provincial chairmen in Saskatchewan and Alberta, respectively, for the new Reconstruction Party of Hon. H. H. Stevens, it was announced here last night.

Mr. McQuarrie has been prominent for many years in the Retail Merchants' Association. Mr. MacKay has been Alberta secretary of the association for many years.

TESTIFIES SERGEANT HELPED BURGLARIES

Vancouver, July 24.—With the evidence disclosing a plan between a police sergeant and a witness to induce people to commit crimes, Judge [illegible] in county court Tuesday expressed the opinion it was not a case [illegible] and refused [illegible] counsel's request to suppress a name.

[illegible] Brown, David H. R[illegible] and Roland Swan were being tried [illegible] charge of retaining in their possession on May 14 a quantity of tobacco, cigarettes and merchandise stolen from the store of R. J. Rome.

J. [illegible] Welsh, [illegible] admitted [illegible] worked under Detective Sergeant J. J. [illegible] and the officer gave him $1[illegible] [illegible] used [illegible]

When [illegible] by Frank [illegible] R[illegible] witness [illegible] argued [illegible]

The three accused, [illegible] and Swan and himself entered and [illegible] Swan [illegible] carry [illegible] worth [illegible] $100 to $125. Nicholson watched the quartet from another car parked near by, he said.

FIRE ALARM SYSTEM TESTED

On Tuesday night shortly after 12, the new fire alarm system was given a test. The new alarm recently purchased by the council was said by some not to be loud enough. Consequently a bonfire was ignited and the alarm sounded. On short order quite a number rushed to the scene and it was with mixed feelings that they found it was not a genuine fire. Not being an expert on acoustics, sound waves, etc., we cannot say much about the siren, except perhaps, while it seems to have plenty of carrying power it is not as shrill as fire alarms usually are. The night of the test was quite warm and still.

SIX FAMILIES LEAVE ENGLAND; TRAGEDIES CLAIM ONE IN EACH

Murder of Girl Is Blow to Last Family at Kitchener, Ont.

Kitchener, Ont., July 23—Six families left their homes in Northampton, England, a few years ago to establish new homes in Canada, to them a "land of promise." They came to Kitchener.

Since then, tragedy has visited every one of the families. One member of each has met sudden death.

Seven years ago Ethel, the daughter of Mr. and Mrs. Horace Barnes was drowned.

Mr. and Mrs. Alfred Pollard had a son, Jack, killed by an automobile five years ago.

Edward Berwick obtained employment with the street railway. A cable broke and struck him fatally.

Alfred Edmunds became a lineman. His safety belt broke and he died of a broken neck.

Six weeks ago Alex Travell reported for work one morning at the plant of a felt company and fell dead.

A week ago Alice, 19-year-old daughter of Mr. and Mrs. William Britton, sixth family of settlers, was murdered.

All the families lived within two miles of each other.

WREN BUILDS NEST of 336 NAILS

A wren that has novel ideas about modern home building has been discovered in Edmonton.

The little feathered resident must have taken a correspondence course in home construction or watched a carpenter in action because it knew enough to look for nails when plans for a new nest were complete. And while it was no stickler for quality, [illegible] wren had big ideas when it came to quantity.

When Mervin Bruce, 15, 11243 [illegible] Street, took a birdhouse down in his father's yard Wednesday he found within it a nest built of 336 nails and pieces of wire. It was in perfect "nest shape" when taken from the tree but in order to count the nails young Bruce took it apart. The birdhouse was put up only about six weeks ago and since that time Mervin has watched the bird at work and knew that the nest was being made. Nails up to two inches long were used.

CLOUDBURST TAKES WILDWOOD BRIDGE

Former Tofield Residents Farm Home Struck by Lightning But Not Fired

Wildwood, July 9.—A cloudburst here at the week end swept out a bridge on the road, three miles west and one mile north, also a culvert half a mile from town. Chip Lake waters have passed their shore line and residents claim a 25-year high.

In the electrical storm of Saturday night, lightning entered the home of H. A. Martin and passed out along the clothes line wire to the post without setting fire.

It will be remembered Mr. and Mrs. Martin lived at Tofield for many years before taking up residence at Chip Lake.

LINDBROOK

Mr. Geo. Westlake Senr., had the misfortune to be badly kicked by a horse last week. Mr. L. Carlisle took him up to the city the same night and it was then thought that he was seriously injured. Later it transpired that he has some ribs broken and luckily they have not affected any other part of the body, so we are glad to announce that its not so bad as first thought, still plenty bad enough at that. Latest bulletin is that the patient is doing O.K. and expects to be home shortly.

A surprise dance was sprung on Mr. and Mrs. Joe Lepine one evening last week. Needless to state that it was a jolly affair and enjoyed by all.

Mr. and Mrs. W. Fontaine and Mr. J. Lepine visited the city last week and returned bringing back with them Alphonse Fontaine, son of Mr. and Mrs. W. Fontaine. Alphonse is in the hospital up there as a result of an early attack in his life of infantile paralysis, he is getting better of it bit by bit tho' and is able to get around with the help of the appliances for that purpose.

Mrs. J. Lepine is visiting in Edmonton for a few days.

Mrs. E. Anderson was taken by her husband Mr. Elmer Anderson to the city last week. Mrs. Anderson is still very ill, but expects to take some form of treatment whilst in the city. Meanwhile the Anderson home is locked up, Mr. Anderson being required to remain on the C.N.R. at Bruce, and the children spending their holidays with relatives in the vicinity.

We hear that some perch and pickerel fry (small fish) have been put in Hastings Lake, but same will not be good to catch until next year.

Church service was held last Sunday afternoon in the school here. Rev. McKee of Tofield was the preacher. The attendance was rather meagre, doubtless owing to the fact that many knew nothing about it until it was over. We don't know how often these services are to be held, but anyone interested could phone Tofield and find out.

And last, but not least, the heat! Everyone here revelling in it, the boys on the road work, those haying and the ladies in their kitchens. The horses, too, are having a whale of a time with the flies these days. Say, how about a dash of good old 20 degrees below stuff?

LAKESHORE

Miss Ethel Baines and Joe Majahey who are attending Summer School in Edmonton, spent the week-end visiting friends in the district.

Among those who attended the Exhibition last week were Mr. and Mrs. John Wood and family, the Graham family, Myrtle and Melvin Bethel, R. C. Phillips, Mrs. Majahey and Mel Wood. The Lakeshore basketball team under George Abernethy's management also spent two days at the Fair.

Mr. and Mrs. T. E. Seale and Miriam are holidaying at Banff.

Mr. and Mrs. J. H. Johnston and daughter, Lila, returned Monday after a three weeks motor trip to coastal points.

Mrs. A. Rapp returned to her home at Priest River, Idaho last week after spending a week with the Plante and Phillips families. Mrs. Rapp is a sister of Mr. Plante and had not seen her brother for more than thirty years. It was her first visit to Canada and she was very favorably impressed with our district as well as our beautiful little cities of Edmonton and Calgary.

Among those who attended the U.F.W.A. Conference at Partridge Hills on Tuesday were Mesdames Booth, McAllister, Olson, Torrie, Ingram, Erickson, Baptist, Phillips, Sears, Moline and last but not least, Mr. Olson and Mr. Torrie.

Mildred Graham and Billie Kossuth were among "those present" at the dental clinic in Tofield on Wednesday. You have our sympathy, kids.

The T. A. Jones family also visited Edmonton during Exhibition week.

Chas. Kallal jr. of Tofield was awarded second place at the seed grain judging contest held for junior farm club members at the recent Edmonton Exhibition.

TOFIELD SOFTBALL TEAM WINS SECOND MONEY AT ROSS CREEK PICNIC

On Friday of last week the Tofield Girls' Softball Team, under the guidance of Mrs. Paul Thomas, who was pinch hitting for Mr. McIntyre, the regular manager, attended the Ross Creek annual sports and entered the softball tournament there. They won their first game from Brookville but fell prey to the prowess of Silver Lake, the snappy team which took first money at Tofield sports. The Tofield team is scheduled to enter other tournaments in the near future and even if they don't win every game, will be right in there, playing the game.

On the Ross Creek trip, the journey was made through the courtesy of Mr. W. Bailey who took a number of the team in his truck.

BIG DISTILLERY FIRE—LOSS IS $2,500,000

Peoria, Ill., July 23—Two men were believed dead, a dozen were injured and damage estimated at $2,500,000 was caused by a terrific explosion and fire of unknown origin which swept the huge Hiram Walker distillery here Monday night.

Frank Dornberger, an employee, said John Barton and William Holsobus, workmen, were in a rack-house where the explosion occurred, setting fire to 5,000,000 gallons of whiskey stored in the building. It collapsed as greenish-yellow flames shot high into the sky.

Dornberger himself was blown 20 feet from the doorway of the rack-house into an excavation.

Midsummer Sale

THE TOFIELD MERCURY

Vol. XVI., No. 27 Thursday, [illegible], 1935 $2.00 Per Year. To U.S.A. $2.50

A BOOST FOR EVERYBODY

In the spring of 1934, the Mercury purchased 100 White Wyandottes from Mrs. Crawford Baptist. We "farmed" them out with Mr. and Mrs. Ransome Bruce of Lindbrook, on a 50—50 basis. There were about 45 pullets in the lot and while they hatched late, they commenced laying early in November and kept it up. These birds in addition to the Bruce flock, making a total of 90, in six months laid 11,240 eggs. Not only that, Mr. Bruce enjoys the distinction of grading highest with his eggs at the local egg buying station located at the Central Meat Market, Tofield.

TOFIELD WINS BALL GAME FROM HOLDEN FRIDAY—HOLDEN WINS MONDAY

Due in part to irregular games and in part to poor reporting, baseball has not been featured very heavily in this paper this season. On Friday last Tofield met Holden on the Tofield diamond and were successful in winning their game by a score of 5—3. After the game an enjoyable barn dance was held in the barn on the A. Dodds farm.

On Monday, Tofield again met Holden, this time at Holden, and were defeated by a good margin.

Mr. and Mrs. "Bud" Hannan have moved into the Pinnott house.

Charles Gordon

—TO THE ELECTORS—

Provincial Electoral Division of Vegreville

Ladies and Gentlemen —

The date of the Provincial Elections has finally been fixed for August 22nd, when Alberta's future will be in your hands.

The problems confronting the electorate of this Province are of the gravest importance, and without parallel in the history of Canada.

To understand the needs of the electors and to cope with these problems, the leader of the Liberal Party in the past two years has held Economic Conferences in all parts of the Province in the course of which he interviewed people in every different walk of life, occupation and vocation.

On the conclusions reached at those conferences, the Provincial Liberal Platform was inaugurated, recognizing the essential grievances of the people and formulating a policy by which these would be rectified. The platform, a copy of which has been mailed to you, or may be had on request, will indicate that the Liberal Party appreciates the changes and reforms necessary in this Province if we are to eliminate the grim spectre of poverty.

I wish to refer you to a few of the outstanding features as set out in the platform referred to above, that should be given your first attention and consideration.

1. MONETARY REFORM. We insist on a properly constituted, publicly owned and controlled National Bank working in the interest of the masses rather than in the interest of a few, for the purpose of providing a drastic reduction in interest rates.

2. MARKETS FOR CANADIAN WHEAT. To find a market for our wheat by a vigorous advertising campaign in foreign countries. (See resolution No. 1).

3. EQUITABLE FREIGHT RATES. Excessive freight rates on grain shipments to the Pacific Coast debars this Province from a market for millions of bushels of Alberta wheat. A substantial reduction in freight rates to British Columbia is essential in the interests of the primary producer. (See resolution No. 2.)

See also resolution No. 5 wherein the Liberal Party insists on a more strict supervision to eliminate very unjust price spreads on Eastern grain shipments.

4. A BUSINESS ADMINISTRATION. The Public Debt has increased during the regime of the present Government by approximately ninety million dollars, and the interest charges alone amount to over seven million dollars a year. If we are to survive, our Government must economize. Economy is the promise of the Liberal Party.

5. RELIEF FOR THE OVERBURDENED TAXPAYER. I subscribe to a redistribution of the burden of taxation, to relieve the home owner of an excessive share of taxes, and divide the burden equitably, on the basis of the ability of the people to pay.

Reduction of tariffs, thereby decreasing the cost of living, the development of industry, reform of labour conditions, to provide employment for all, improvements in educational facilities, and other planks and resolutions of our platform demand your serious attention.

I pledge myself to the people of this constituency if elected, to support a more economic business administration, and to do my utmost to insure that the Liberal Platform and resolutions are fully implemented at the earliest possible date.

In conclusion, I solicit your support and influence. VOTE LIBERAL.

Yours sincerely,
CHARLES GORDON

LOCAL AND PERSONAL

Mrs. Cliff Toll, Stella and Verna Melville of Forest Grove, Oregon, are visiting at the Clutterham home.

Mr. and Mrs. Lindsay of Innisfree motored to Tofield on Wednesday to visit their daughter, Annie.

Miss Annie Lindsay spent the week end at her home at Innisfree, her sister Nellie returning with her for a while.

Miss L. Ross returned on Wednesday after spending a short time at Jasper.

Mrs. J. E. Stinson and family arrived in town recently and have taken up residence in the house vacated by Mr. and Mrs. Hugh Law.

Mr. and Mrs. Hugh Law are leaving shortly for Saskatchewan where Mr. Law has a position being in charge of a grain elevator.

Mrs. Pollard of Namao, Alberta, visited friends and relatives here last week.

Mr. and Mrs. Allan Herndon have moved into town and are residing in the Bruce Block.

Mrs. H. Kendall was awarded 2nd prize in the hooked rug class at the recent Edmonton Exhibition.

Rev. and Mrs. D. K. Allan left on the "Flier" to spend a short holiday at the coast. Mr. Allan will be away from the pulpit for two Sundays, August 4th and 11th.

A Mennonite picnic was held at Elk Island on Wednesday. There were quite a number present and a pleasant time was spent.

Mrs. A. Ross and two daughters of Edmonton are visiting at the Eldred home. Mrs. Ross was a former resident here, Mr. Ross having charge of the creamery for a number of years.

"Joe" the genial manager of the Club Cafe visited Bruce on the occasion of the stampede there.

Mrs. John Lee and Mrs. Cap Lee received the sad news that their brother, James MacKinnon died at Calgary this week.

Constable Davies, after being out for a short time, suffered a relapse, and it was thought advisable to take him to an Edmonton hospital. Last reports were that he was still quite ill. Constable Carlson is relieving during Constable Davies' illness.

The Holy Trinity W. A. will hold a garden party, home-cooking sale and chicken supper at the home of Mrs. J. W. Robinson on Wednesday August 7th. Games and picnic fun during afternoon. Chicken supper at 5.30, 35c. Evening programme of music, songs and recitations included.

Mrs. Firth, Owen and Pat returned home from Gull Lake last week.

Alberta Savings Certificates

A SOUND FORM OF INVESTMENT

By issuance of Savings Certificates, the Province of Alberta has for many years afforded opportunity to the public for investment of their savings at attractive interest rates, at the same time assisting the Province in maintaining public services vital to the welfare of the people.

In addition to the usual "Demand" Certificates, available in denominations of $5 and upwards, the Government in 1932 inaugurated Term Certificates, bearing a fixed rate of interest for stated periods of one, two or three years. Purchasers of these certificates are afforded the same security as on Provincial Bonds. The term certificates are available in various denominations from $25 up and are not subject to the varying market prices for debentures.

4½% Per Annum Paid on Two and Three Year Term Certificates.

3½% Paid on One-Year Term Certificates.

3% Paid on Certificates Redeemable on Demand.

Crop Testing Plan

A FIELD DAY of interest to all farmers and others will be held at

CAMROSE, AUGUST 17th

—at 2:00 p.m.—

Many interesting and valuable demonstrations of the different varieties of grains, etc., will be made.

As well will be shown and explained the "Crop Testing Plan" under which crop improvement scheme, plots representing 300 farmers' fields of wheat now being produced in the surrounding district will be examined and analyzed by competent plant breeders.

The collections of the samples have been made by the British America, Searle, Northern, National and Midland & Pacific Elevator Companies, which samples in turn have been grown, and will be analyzed, by representatives of the Dominion and Provincial Departments of Agriculture and our Western Universities.

Farmers and others are cordially invited to attend—an interesting and instructive day is assured to all.

Look at it This Way

A retail store regards itself as being a public servant. Therefore, it is wholly fitting that it should try to be the best and most eager servant possible. A retail store which hides itself from those whom it wants to employ it become under-employed, and so its sales decline.

The public inclines in largest numbers toward those stores which seek its attention and custom. It takes the advertising store at its own valuation. It likes to do business with those who manifest eagerness to serve it. It likes to buy at those stores which have to renew their stocks frequently.

Advertising is just communicating news and information about one's store and service. It is just a form of talking. It is those who talk who are listened to. Silent stores lose out to stores which carry on conversation—in the form of newspaper advertisements—with those whose custom they want.

Any retailer who wants to get more customers—for the replacement of customers who become lost to him and for the expansion of his business—can surely get them by making his store important in their eyes, and by putting in his advertisements the kind of information which will help buyers come to decisions.

The Tofield Mercury advertising columns are the cheapest and most effective manner in which to get your

THE MERCURY

GENTLEMAN of the SIDEWALKS

By F. E. D. McDowell in the Canadian National Railways Magazine

Our experience with horses has not been extensive and what there was had been somewhat disquieting, but that was before we met Old Dick.

Old Dick, an eleven-year-old dappled gray who pulls a Canadian National Express wagon in Toronto, has as distinct a personality as a high pressure salesman. He has "sold" himself to about half of the down-town city. Until about a month ago we had seen Dick frequently, had noted his sleek coat and appealing eyes, but to us he was merely another horse. Then he stepped out of the ordinary run of equines as a steed of discernment and tact.

That morning Old Dick stood outside the City Ticket Office, in the heart of Toronto's business district, front hooves firmly planted on the sidewalk and jaws working rhythmically. A crowd of admirers was gathered about him as we stopped. Old Dick eyed us mildly. He thrust his nose toward us in a friendly gesture. Somewhat apprehensively we patted it, ready to sidestep a proffered nibble. But the nibble never came. But instead the mouth opened and suspended between the upper [illegible] lower teeth stretched an elongated ribbon of chewing gum.

The truth was out! Here was a horse who knew the charm of chewing gum.

Our admiration was at high tide when Dick's driver arrived. He gave a glance at his steed, mumbled something which might be interpreted as "darned old panhandler"? reached an exploratory hand and removed the gum. Old Dick snorted violent disapproval, removed his feet from the walk and trotted away—disappointed but not subdued.

Our interest was quickened. We knew that he would stop within a block. We followed and soon overtook him, again parked half-way across the sidewalk and surrounded by a new circle of friends. As we approached an elderly business man, wearing a pleased smile, stepped forward. "Well, old panhandler!" Old Dick perked up his ears. His nose explored, straight into his friend's coat pocket. When it reappeared an apple was held in Dick's teeth. The man promptly extended a hand, palm upward. Old Dick laid the apple upon it and then proceeded to eat with gusto.

We turned to see what the rest of the crowd had to offer. During the brief interlude while his master collected his load, Old Dick consumed one apple, three chocolates, two raisin bars, a peeled orange and had just got under a wire with a stick of toffee when the deadline was reached. He moved away briskly enjoying the toffee chew.

We sought out his driver, Harry Perry, who has piloted express horses about the streets for some seventeen years, and who has known Old Dick intimately, and possibly too well, for about three years. Mr. Perry intimated that Old Dick was something of an octopus when it came to food. Not only has he never been known to refuse an edible gift, but he is also one of the best feeders in the Canadian National Express stables. Moreover he, the driver, had won a dollar by backing Old Dick to chew gum with evident enjoyment.

We learned a lot about Old Dick from Mr. Perry. Dick was not so very old at that, unless in the art of successful panhandling. Just a mere eleven years. Once he was a farm horse but after he had run away and wrecked a binder, a mowing machine and other agricultural implements, the farmer sold him to the express company. So Old Dick came to the city and its pedestrians. His propensity to run away left him. Not even when a big truck hit him in the side did he show signs of running.

"There was a man who came daily to him and said, "Well, old panhandler", and gave him apples," commented Mr. Perry. "Old Dick found out that by occupying half the sidewalk he could get attention and good things to eat. Even the police feed him. Once he sampled a cop's button. I had to pry his mouth open to get it back."

"Don't the police complain?" we asked.

"A couple did once, but they soon gave it up. I was in the back of the wagon straightening up my load. The cop came up and backed Old Dick into the street. Told me it was against the law for him to stand on the walk, but Dick went right back again. Another time a cop had me drive Dick beside a post but when I left the wagon he backed up and planted his feet on the sidewalk again.

"There was another time," Mr. Perry chuckled, "when a bad tempered individual came along and hit Old Dick when he nosed him. One of Dick's friends knocked the man down. A constable came but when he found what had happened he turned on the man who was glad to get away from the angry crowd. I was in an office at the time and it was all over when I came out, except that the cop was then feeding Dick a chocolate bar."

Our admiration for Old Dick increased. Any horse who could enlist the aid of a bystander and a constable and then snatch a titbit out of the fracas has real possibilities. But one thought spoiled our satisfaction. Old Dick is getting along in age. He has been thumping the pavements for [illegible] years. We wondered—

"Oh, he's good for five or six years more, at least," the driver said easily. "He's chunky and short-legged and so easy on the mouth that you could drive him with a piece of string. Also, he thinks that every one is his friend and doesn't frighten. That helps a lot. Yes," he concluded, reminiscently, "We've had horses that were good up till 20 years and Old Dick is only eleven."

We see great possibilities in Old Dick. If at some future date we should meet him with a mouthful of loose eating tobacco then we will know that he has graduated into a true masculine appreciation of life. When that happens and it comes to Old Dick's retirement from city pavements, we will form a league of his friends and so arrange it that he may potter about the streets at will, in charge, of course, of a sympathetic guardian. Thus he may spend his days in real enjoyment, by hypnotizing pedestrians with his "brother can you spare a dime" look. For he is by nature a panhandler, but he is also a gentleman of the sidewalks.

CURIOUS THINGS DONE BY INSTINCT

By Professor John Harvey Furbay, Ph. D., in "Forest and Outdoors"

Instinct is the dominating force that controls nearly all animal life. It is born with an animal and takes possession of the animal's activities at once. It is thus that our animal friends perform such complicated acts—themselves in total ignorance of how they are done. These instincts are inherited, and are independent of experience.

The most complicated instinctive behavior occurs in the insects. But all other animals exhibit interesting instincts, too. Some of these instincts seem very strange to us, and often do not appear to have any relation to the animal's welfare. However, in their usual setting, there is probably a purpose in every instinct. We shall consider some of the most interesting ones.

First, we note the perfection and wisdom of instinct. Why do butterflies seek for a certain kind of plant on which to lay their eggs? Are they aware that the caterpillars which will hatch from those eggs must have that particular plant for food? Or are they led blindly to that plant, unaware of why they go? They never live to see their own eggs hatch, and they have no way of knowing what food is used, so we must conclude that they are led by blind instinct to these plants.

Many wasps kill their prey, such as crickets or caterpillars, and then bury them in the ground along with some eggs. When the eggs hatch, the buried caterpillar serves as food for the young. Does the mother wasp know this when she buries them? Certainly not. She does not know why she does it.

The precision of instinct is also shown in these same wasps. They always sting their prey exactly in the vital nerve spot. Where did they learn that? They did not learn it. They did it perfectly the first time they stung a victim.

Why do honey bees make hexagonal cells? Do they choose this shape? Do they know that it is the most economical shape for such structures? Have they ever considered a change? Probably not. This is another example of the perfection of instinct.

When pups are born, how does the mother dog know that she must bite off the umbilical cord (navel)? She doesn't know. It is a wise instinct of which she herself is not aware. Why does she take the puppy's nose in her mouth and start the first breathing? For the same reason.

Some Brazilian ants (atta sexdens), described by Dr. Jacob Huber, have a curious habit of carrying bits of leaves into their underground nests where small gardens of white fungus are grown on the leaves. These ants care for the gardens carefully and manure them from their own body secretions. The fungus serves for their food. When the queen leaves to start a new colony, she carries a little of this fungus under her tongue, so that after the wedding ceremony she can start a garden in her new nest. Such apparently intelligent procedure makes us wonder if they do not really understand what they are doing. However a study of their activities convinces one that none of this was learned or thought out, but resulted only from instinctive motivation.

Birds, fishes, and all other animals obey similar urges from within and do not know why. Man himself performs many of his activities from the same inner promptings.

SPEEDY COMMUNICATION

A race against time is staged practically every business day in the world's stock exchanges. Differences in time as between one country and another are largely responsible for this and cable services are constantly being improved with the speed angle constantly in view, coupled with accuracy.

As a case in point, between Vancouver, B.C. and London, England, some lines of business have only one hour out of the twenty-four in which to conduct negotiations, due to the time difference, states the Canadian National Telegraphs, and here speed is paramount. The time in transmission has been cut down to three minutes in the case of urgent cablegrams between the two cities, from the time a message is filed by the sender until receipt by the addressee.

A new metal for cable conductors, "permalloy", has had much to do with the increase in the speed of transmission, making it possible to transmit cable messages nine times as fast as the older types of cable conductor. On the Atlantic coast there are 20 cables and of these 10 are operated by exclusive connections of the Canadian National Telegraphs.

GLADIOLUS SOCIETY VISIT THE COAST

Vancouver, B.C., July 29—The Canadian National Railways depot recently was the scene of bustling activity as one of the longest trains from the east this year pulled into Vancouver with seventeen cars full of holiday makers. The visitors were all from prairie points as far east as Winnipeg, making an excursion to Vancouver under the auspices of the Gladiolus Society. They are staying here for a week and a half before returning home. Many visited Victoria, which is sharing the holiday-makers with Vancouver and New Westminster.

WITH PAPER FLAGS, TINPAN BAND, LABRADOR CHILDREN HONOR KING

Montreal—From an outpost of civilization in the village of St. Paul, in the eastern part of Canadian Labrador, comes a report to the Quebec Junior Red Cross headquarters here, that jubilee celebrations were staged by the 28 children in that village.

One morning recently, a bell was rung in the mission house and the parade assembled. Each child carried a small Union Jack which had been made from scraps of red, white and blue paper, no flags being available.

The school's Union Jack was carried in front and the Red Cross flag awarded to the Northern Comrades for the excellency of its work during the past school year.

The band consisted of a violin, a mouth organ, and drum which had been evolved from a dishpan decorated with tissue paper. Patriotic songs were sung as the children marched from one end of the village to the other. On returning to the mission, a volley was fired by hunters in honor of the King.

All then proceeded to the home of the school inspector to listen to the accounts of the Jubilee and the King's message which reached them by radio.

RUST STRENGTH INCREASING

Scientist Says Extinction of Barberry Is Only Real Cure

Fargo, N.D., July 31.—While man works to develop rust-resistant wheat, nature is at work developing new, stronger strains of rust to keep pace.

Dr. H. L. Walster, director of the North Dakota experiment station, offers this explanation to rust attacks on Ceres wheat, developed by science to resist the plague, that has taken a heavy toll this year.

"Rust is a plant," said Dr. Walster. "Just as we take wheat plants or corn plants and by cross breeding produce new strains, so nature by cross breeding is constantly producing new strains of rust.

"Plant disease specialists have found and classified more than 100 different strains of stem rust and have proved that new types of rust are constantly being developed.

"The leaf of the barberry bush is the place provided by nature for this mating of rust spores, and I am beginning to believe we will have to eradicate the barberry from the entire continent of North America before we can have any control over this constant development of new strains of rust."

Rust damage to wheat has been estimated at more than 50 per cent in some areas of the United States and serious damage is reported in the Canadian West.

BLACK RUST—

NATURE HAS a peculiar and a rather uncanny way of balancing things up. Mankind with its reasoning powers and marvelous accomplishments is often brought face to face with a situation which makes the best of reasoning appear useless and the greatest accomplishments of little value. It is only a short time ago since papers and periodicals were containing numerous articles regarding the wheat carryover, the newly formed Wheat Board and articles in general pertaining to the superabundance of wheat. Such things as reduced acreage, growing coarse grains on wheat lands, changing wheat lands into pasture lands were all considered as being the thing to do. And no doubt, for that matter, a great many people still hold to those beliefs. But almost overnight a different note was sounded. The fear of large carryovers changed to a fear of black rust assuming epidemic size and ruining thousands and thousands of acres of wheat and wiping out millions of bushels of grain that was almost counted as being in the bag. Last year it was prolonged drought. In other years grasshoppers, army worms, and great weed infestation, have all played their part. It is true in spite of all these things production has kept ahead of consumption, but there is good reason for believing that as a general rule, mankind cannot play fast and loose with the growing of a staple such as wheat, because one never knows when some fine morning the world is going to read in its morning papers that some disease is sweeping the grain fields of the world.

Fortunately black rust is not world wide in its appearance; nor is it dominion wide, but where it does appear it creates havoc with wheat. Quite a few years ago, among a party of men who knew a great deal more about black rust than the writer does, I was in a Southern Saskatchewan wheat field slightly contaminated with this scourge. It was comparitively easy to pick the infested wheat stalks, the spots upon the stem showing quite plainly. The heads of the contaminated stalk looked alright, but when a person shelled them, one found only shrunken kernels or no kernels at all. Very fortunately in the Tofield district, as far as we know, rust has never made its appearance—though we stand to be corrected on this point if we are wrong.

In these days of worry and stress, of poverty amidst plenty, of isms by the dozen, days when agriculturalists are laboring under difficulties in disposing of their products due to lack of purchasing power on the part of their customers, deep and serious thinking on the part of every man and woman is required. And while engrossed in thought one might contemplate comparitive riches amid scarcity. To mix the sublime with the ridiculous, and tragic, the story of those seven lean and seven fat years of which we were taught in our youth, is not all a dream.

CHARLIE'S AUNT—

On Tuesday night of last week at the Variety Theatre at Tofield "Charlie's Aunt" was shown as an all talking picture feature. It was a warm evening and the doors of the Theatre being open, the roars of laughter created by the humor of the play could be heard for several blocks. And it was almost continuous. We cannot say offhand who was the author of this really funny comedy, but whoever it was, he did something, that temporarily at least, has lightened the cares of millions and millions of people. We do not even know the year this play was first produced, but we do know that "Charlie's Aunt" in stage and picture form has been "running" for approximately fifty years.

One of the very best antidotes for a fit of the blues—economic or otherwise, is a real good laugh. In fact a real good laugh created by clean wholesome fun is of inestimable value in restoring a balanced vision which the buffettings of everyday life may have unbalanced or dimmed. The heavy mental food of economic discussion would be all the more easy of digestion were our minds as free from stress, as, say during the period preceding the war.

Unfortunately we did not know of this play coming until it was actually here. Had we known we would have endeavored to have the Tofield District Board of Trade sponsor it, advertise it heavily and have at least two showings. We are not foolish enough to believe people can laugh their way through everything they are confronted with in life, or that life is a big joke, but rather that an abnormal concentration on the serious affairs of life, demand, rather imperatively at times, a relaxation in the form of good wholesome mirth. There appears to be a good chance for the showman.

The little boy had attended Sunday School for the first time. Arriving home his aunt asked him what he had learned.

"Oh" he said "I learned all about the heathens in Africa, they are very hungry and when they beat upon their tum-tums they can be heard for miles."

ALBERTA JUNIOR WHEAT CLUBS

Five years ago the Junior Wheat Club movement was started in Alberta after a conference between officials of the Field Crops Branch of the Alberta Department of Agriculture and Directors of Alberta Wheat Pool. The original idea was to organize clubs among the farm boys of Alberta for the purpose of improving the standard of wheat in the province. The Federal Department of Agriculture joined in the movement, the Dominion Seed Branch in Calgary lending invaluable aid in many phases of the work.

This movement has developed rapidly, largely due to the enthusiasm of the farm boys, the effective co-operation of departmental officials and the excellent results obtained in the way of better seed production. In fact the Alberta junior seed clubs are leading the way in the most strikingly successful project ever inaugurated in Western Canada for the purpose of improving the quality of seed grain.

It is a matter of general knowledge throughout the West that the big hope of the future insofar as overseas markets are concerned, lies in the maintenance of the quality of the product grown in the western provinces. Alberta Junior Wheat Clubs are giving much invaluable assistance in the maintance of this quality because they are providing a source of supply of excellent seed wheat throughout the length and breadth of the province. Ninety-five per cent of the seed wheat produced by these clubs is disposed of in the immediate vicinity of the clubs. In addition to this, the club members are taught the value of growing better seed and given instruction in the proper methods to employ and the proper varieties to grow while they are still at an impressionable age. What they learn now will stay with them all their lives.

The objectives of the junior wheat clubs are laid down as follows:

(1) To improve the quality of crops on club members' farms and in the district.

(2) To demonstrate the value of good seed and the value of good tillage practices.

(3) To educate Alberta junior farmers in the production and sale of improved seed.

(4) To bring together for discussion and demonstrations those interested in production problems and to foster the co-operative spirit through club organization.

(5) To develop leadership in community projects.

Club membership is open to youth between the ages of 15 and 22 inclusive, who actually reside on the farm where the seed plots are grown. The club must have at least 10 members living within a radius of 20 miles of the club centre. The maximum membership should not exceed 25. Not more than two members of the same family are accepted for membership.

This year approximately 1000 young Alberta farmers are engaged in the production of good quality wheat seed through this movement. There are some 67 junior clubs spread all over the wheat growing section of the province. Over the five years the clubs have been in operation millions of bushels of excellent seed wheat have been produced.

Alberta Wheat Pool has maintained its interest in these junior wheat clubs and sought to aid and encourage boys in every possible way. This is primarily due to the fact that the Pool is vitally interested in the improvement of the wheat produced in the province and also to the fact that the organization has a deep interest in the boys who will be the next generation of Alberta farmers. Fundamentally a farmers' organization itself, the Wheat Pool believes the aiding of young farmers to be a part of its responsibility.—Wheat Pool Budget.

BANK OF MONTREAL CROP REPORT

General—While crops generally in the Prairie Provinces are making growth, the outlook is less favorable than it was a week ago owing to the possibility of extensive damage from rust in Manitoba and some sections of Saskatchewan. Rains would be welcome over large areas of Saskatchewan and Southern Alberta, but otherwise moisture conditions are satisfactory. In Ontario the warm weather of the past week has been beneficial and crops generally have been making good progress. In the Maritime Provinces all crops are doing well. In British Columbia the prevailing hot weather has helped the crops and in most districts moisture conditions are satisfactory.

PRAIRIE PROVINCES

Alberta—Crops generally have been improved by recent warm weather and conditions as a whole continue favourable, although backward. In central and northern areas practically all wheat is in head as are also some coarse grains. In southern areas non-irrigated crops are poor and ranges are drying up. Sugar beets are making good progress.

Saskatchewan—Wheat is heading rapidly and except in western sections where drought has caused irreparable damage, a fair to heavy stand is indicated. Coarse grains show satisfactory progress. Rust is prevalent in southern and eastern areas and crops have suffered from hail and grasshoppers in some sections.

Manitoba—Rust infection has spread extensively in central and and southern areas and serious damage to the wheat crop is feared. Coarse grains continue promising, although barley and oat crops show signs of rust in some sections. Moisture is ample.

MOTORISTS CONTRIBUTE HEAVILY TOWARD TAXATION

Thirteen years ago, Alberta collected $695,191 from registration fees on motor vehicles. Last year, the amount had increased to $1,488,144, but the peak of collections was reached in 1930, when $1,889,790 was collected from this source alone.

In addition to registration fees, gasoline taxation came into effect in the same year (1922), with a tax of two cents per gallon, when $185,118 was collected. The tax was raised to five cents per gallon in 1929 when collections swelled to $2,148,412. A further increase occurred in 1933 and the province obtained six cents per gallon while the present rate, introduced in April of this year, is seven cents per gallon.

Last year with a tax of six cents per gallon $2,654,049 was poured into the provincial treasury by motorists on their purchases of gasoline and, in the space of thirteen years, $17,302,049 has been collected from this form of taxation. Aggregate collections for registration fees ($16,726,523) and gas tax ($17,302,049) have amounted to $34,028,572 since 1922.

MYSTERIOUS DUCK MALADY BREAKS OUT

Calgary, July 30.—Simultaneous with the arrival in Alberta of Arthur M. Bartley of New York, vice-president of the More Game Birds in America Foundation Inc., word reached here Monday the mysterious disease which caused deaths of numerous wild fowl in Stobart Lake area two years ago had again broken out in that district.

Mr. Bartley visited the lake last week with George Pickering, caretaker of the Inglewood bird sanctuary, and discovered evidence of the disease. Several dead birds and several sick ducks were picked up, leeches being found in the nostrils and throats of the victims.

At present, Mr. Bartley is in northern Alberta to start a duck census in the province with a view to determining the exact duck population of Canada and the United States and to what extent plagues and shooting had depleted the ranks of wild fowl.

ELEVATOR FIRE TAKES TOLL EDMONTON GRAIN ELEVATOR

Lashed into a raging inferno by a stiff northeast wind, fire ruined 10,000 bushels of wheat and destroyed the Edmonton Grain and Hay Company elevator on the Fort Trail at 66 street, Monday afternoon. Every available fireman in the city, called out on general alarm, fought without success for four hours to stem the march of the flames.

Valued at $42,000, the elevator was completely destroyed. Insurance of $25,250 was carried on the building, on the machinery, and the grain was fully protected, according to C. P. Wilson, manager.

Immediately on arrival, fire engine pumps were connected to hydrants to supply sufficient pressure but flow of water from the hose was cut down by trucks and cars running over the lines. Three motorists will receive summonses for running their cars over the hose, city police stated.

Tom Wilson, elevator superintendent, first noticed something wrong when he smelled smoke shortly before 2:30 p.m. Going to the top of the cupola he spotted still small flames and shouted to Manager C. P. Wilson to send up men with extinguishers. As Tom Wilson used the three extinguishers already available in the cupola, C. P. Wilson rang in the alarm to headquarters and sent Gilbert McDonald and Dick Evanson up into the cupola with more extinguishers.

"It was too smoky and we could not do a thing," said Evanson, when telling of his experiences. The men emptied their extinguishers into the flames and retreated down into the lower reaches of the building.

At the time the fire broke out, the elevator staff was loading wheat, and it is believed that a piece of metal, which must have been in the grain, caused friction and threw off sparks.

REID SEEKS MONEY HELP FROM OTTAWA TO RELIEVE FLOOD SITUATION

Urgent request that the dominion government allocate $225,000 toward the work of surveying and otherwise relieving the serious flood situation of the Peace River country, is contained in a letter forwarded by Premier R. G. Reid to Premier R. B. Bennett at Ottawa.

Premier Reid's request for financial assistance is made under Bill No. 63 passed in the House of Commons on May 27th last, which provides for expenditures in connection with harbors and rivers generally to the extent of $2,500,000.

It is set forth in Premier Reid's letter that undoubtedly the work in the Peace River area would come within provisions of the bill.

Premier Reid informs Premier Bennett that at the moment the height of the lake is such that the drainage from it is unimpeded and I think there is little that can be done to assist nature in this direction. The lake was high last year and by the time the winter set in the normal drainage of the lake through the Slave river had not lowered it to any appreciable extent."

Various already known facts in connection with the situation are contained in Premier Reid's letter.

He also states that "it is quite likely that it would not be possible to commence work there at once as it might be necessary to wait for the water to recede to some extent at least. In the meantime, it might be possible to proceed with a great deal of the necessary preliminary work by way of surveys and so forth and getting the work organized so as to commence as early as possible. If it were possible to begin work so as to effect a lowering of the lake this fall, the situation would be greatly relieved."

SMELLY SKUNK RE-SCENTS RAP FOR STEALING Eggs

Provost, Alberta, July 30.—A local farmer one evening recently, while gathering the eggs from the nests in his poultry house, received a smart nip when his exploring hand dived into one nest, and he resented it. He wasn't going to be pecked by any broody "biddy", so he picked up a stick lying handy, and handed the pecker a smart rap in turn.

Then there was more resentment aroused. The occupant of the nest was not a broody hen; it was a foraging skunk. And His Skunkiness kept on resenting and re-scenting that rap and the rapper, until the latter finally escaped half-smothered and wholly vanquished from the hen-house.

"Lucky I had a clean shirt and a spare pair of overalls inspite of the depression," he congratulated himself after the smoke of battle had cleared away.

---

they want to know if you will lend them the loan of your lawnmower."

"Lend them the lawn mower to cut the grass on the Sabbath!" exclaimed the shocked mistress. "Certainly not, Bridget. Tell them that we haven't one."

$500,000 SETTLES $17,250,000 SUIT AGAINST VANCOUVERITES

Seattle, July 30.—Coming as a surprise on the eve of the trial, an [illegible] ment was made Tuesday that the government's civil action to collect $17,250,000 from the Reifel liquor interests of Vancouver, had been settled out of court for $500,000.

[illegible] government took court action [illegible] attempt to collect the large sum from Henry Reifel and George C. Reifel his son, for customs duties, [illegible] penalties and internal revenue taxes alleged due on approximately $10,000,000 worth of liquor the defendants were accused of smuggling into the United States.

[illegible] criminal indictments charging the [illegible] with smuggling huge quantities of liquor into the United States [illegible] days are still [illegible] would [illegible] whether these charges would be dr[illegible]

POOLS PAY BEST PRICE FOR WHEAT IN FIVE YEARS

77.71 Cents Total

Prairie farmers who pooled their wheat Tuesday were receiving the highest prices for pooled wheat in the last five years, it was disclosed in press announcements from Calgary and Winnipeg.

[illegible] Purdy, manager of the Alberta wheat pool, announced a final [illegible] on the 1934-35 pool wheat [illegible] ended July 15th of 12.71 cents [illegible] the total payment 77.71 [illegible] No. 1 northern [illegible] Vancouver price basis. Last year the payment was 65.063 cents a bushel.

The Manitoba pool announced a final payment of 15.66 cents to make the total payment for No. 1 northern on a Fort William basis [illegible] cents a bushel. The payment for the previous pool ending July 15th 1934, was 60.011 cents a bushel.

Final payment by the Saskatchewan wheat pool has not yet been announced. For the pool terminating July 15, 1934, the Saskatchewan growers who pooled their wheat received 64.75 cents a bushel Fort William basis.

Amount of wheat sold on a pool basis was not available but it was not expected to be large. Farmers who are members of the pool have the opportunity of selling their wheat through pool facilities on pool price basis or accepting the market price when the wheat is delivered in the elevators.

This year the initial Alberta payment was [illegible] cents, interim 15 cents, and the final approximately 12 3-4 cents a bushel on the basis of No. 1 Northern.

Last year the initial payment was 35 cents, interim 15 cents and the final 15 [illegible] cents.

The final payment schedule showed sales and operating expense deductions from 1934-35 Alberta pool amounted to 1.004 cents a bushel from the gross price.

Net final Alberta payments on some grades are shown to be: No. 2 Northern, 8.34 cents; No. 3 Northern, 11.17; No. [illegible] Northern, 14.70, feed, 26.70.

The regular monthly meeting of the Ladies' Aid will be held next Wednesday, August 7th at the home of Mrs Oscar Barnes. A cordial invitation is extended to all. There will be no preaching services the first two Sundays in August owing to Rev. [illegible] vacation. [illegible] will be held next Sunday, August [illegible] at 10:30 a.m. [illegible]

Mrs. W[illegible] Margaret [illegible] Neale, and Mrs. [illegible] Irma are [illegible] at South Cooking Lake.

The [illegible] Sunday School [illegible] Saturday. Owing to the uncertainty of the weather [illegible] out. Those that [illegible] enjoyed [illegible]

Miss Sylvia Olson of Maquolon Lake district and Mr. George Williams son of Mr. and Mrs. A. J. Williams of North Ketchamoot were quietly married in Edmonton on July 10th. We are glad to welcome the bride to our district and join in wishing [illegible] of luck and [illegible]

Misses Hazel Sears and Kathleen Ingram [illegible] Alice Harrison, Sinnary and Cherry Sears of the Junior U. F. A. motored to Elk Island Park on Wednesday of last week [illegible] the different locals of the [illegible] constituency. In spite of [illegible] weather, they enjoyed meeting the other members and a programme was held.

Mrs. John Wilson Sen., entertained a number of friends and neighbours to afternoon tea at her home Wednesday afternoon of last week in honor of Mrs. Gladstone of Vancouver who is here on a visit at the home of her son-in-law Mr. Paul McMullen. A very pleasant afternoon was spent by all.

Mrs. W. A. Mitchell has been at the home of her mother, Mrs. Henders[illegible] the past few weeks. We are glad to hear her health is encouraging and is now able to be up in a wheel chair some of the time.

Mrs. Hubert returned home one day last week from an Edmonton hospital. We regret to hear her improvement was not as great as had been hoped for.

Miss Helen Schultz has taken a position in Edmonton.

Mr. and Mrs. Oliver Thompson of Kingman, Miss Selma Nomeland and Julius Lerfekmo, motored over near [illegible] to visit Mrs. Thompson [illegible] and Julius' brother Peter Lerfekmo, who has charge of a [illegible] over the week-end.

Mr. Sammie Mitchell joined the [illegible] American show at the Edmonton Exhibition going on to Sask[illegible]

Ketchamoot was well represented [illegible] Edmonton exhibition the latter part of the week, some twenty five [illegible]ending.

Thanks to the kindness of Mrs. Phillips, Mr. Torrie and Mr. Olson supplying cars, several members and visitors of the U. F. W. A. enjoyed a days outing Tuesday of last week and attended the U. F. W. A. conference held at Partridge Hill.

Mrs. Keitha Oliver and Mr. [illegible] were quietly married [illegible] Rev. A. B. [illegible] On Monday evening a [illegible] and neighbours [illegible] A pleasant evening was [illegible] serving refreshments [illegible]

Mr. and Mrs. J. Gallagar and [illegible] Edmonton, while on their way home from Wainwright spent Monday evening with Mr. Gallagar's aunt, Mrs. E. McMullen.

Mrs. Viola Graves and sons of Calgary visited at the different McMullen homes over the holidays.

WOULD HAVE UNION RAISE FARM PRICES

[illegible] July 29.—An empire [illegible] for foodstuff [illegible] in the United Kingdom as suggested by G. M. Huggins, southern Rhodesia premier at London, was not practical, Norman F. Priestly, vice-president of the United Farmers of Alberta, commented Thursday. Empire countries produce more than they [illegible] be added and such a [illegible] affect price levels.

The whole problem of social reconstruction is concerned, Henry Wise Wood, chairman of the Alberta Wheat Pool commented. "It is a great scheme" he stated, "but how are you going to implement it? The supreme problem is regulation of production."

AMISK CREEK

Field Day and Picnic to be held at the E. A. Moen farm on Tuesday, August 6th, commencing at 1:30 p.m. There will be judging and inspection of standing grain and grasses, also speakers from the Department of Agriculture, [illegible] ball. Please bring cups [illegible] coffee [illegible]

Mr. I. [illegible] and Mr. [illegible] to Camrose to attend the Alberta Social Credit meeting recently.

E. A. Moen has completed painting his new barn. P. O. Flaaten has given his house and barn a coat of paint.

Mrs. C. Erickson, Mr. and Mrs. I. C. Olson attended the U. F. W. A. rally at Partridge Hill.

Misses [illegible] and [illegible] and Mr. Arnold Berg and Mrs. Flaaten motored to Elk Point, Heinsburg and Lea Park to visit friends and relatives. Lloyd Berg returned with them after spending two weeks at Elk Point and Heinsburg.

The Grain Club held a meeting at Moen's recently.

Two boys arrived from Saskatchewan last week. We will work for C. Erickson during harvest and threshing.

Marvin and Ralph Ward are holidaying at Pigeon Lake.

Stanley and Lawrance Anderson of Lindbrook are visiting with their aunt, Mrs. E. A. Moen.

Those attending the Edmonton Exhibition were Mr. and Mrs. E. A. Moen and family, Mr. and Mrs. I. C. Olson and family, Misses Hennie and Magda Annebo.

Two new bridges are being built between Erickson's and the Highway.

The neighbors gathered and did some weeding and cleaning at the cemetery last Friday evening.

Misses Hennie and Magda Annebo are away on a camping trip.

Mr. C. Ward of Shonts is building a two room addition to their house, Morley Anderson and Leonard Johnson are doing the work.

Miss Laura Tomlinson and Mr. Albert Hohnholt were married recently and are residing on the Asmo farm.

Ingmar Olson was unfortunate in losing a Shetland pony, the animal being struck by lightning.

Beulah Hellerud is much improved after a two weeks attack of the flu.

Miss Thora Haugen is visiting friends at Flat Lake for two weeks.

Miss Myrtle Anderson, Mr. Harry Cove and a friend from Edmonton visited at the E. A. Moen home on Sunday.

Mr. J. H. Blackburn, Betty and Robert are visiting at the home of Mrs. I. C. Olson.

Mr. and Mrs. Carl Erickson visited the H. Sorenson home at Poe on Sunday.

Miss Doris Watt of Edmonton is visiting Miss Gladys Olson.

Mr. and Mrs. Berge Helgeland and family visited the R. O. Berg home on Sunday.

Mr. Tony Leferud of Viking spent the week end at the R. O. Berg home.

Misses Evelyn and Hazel Hellerud, Mr. Conrad Patterson and Mr. H[illegible] Moen left on Sunday for a week's motor trip to Banff.

Rev. A. Solheim of Camrose held services at the Amisk Creek Church on Sunday. He will conduct services again on Sunday, August 25th.

Mr. and Mrs. A. Patterson and Mr. and Mrs. A. Findlay have returned from a two weeks motor trip in the United States.

Miss Olive Haugen and Miss Beret Berg visited with Mrs. Pearl Patterson on Sunday afternoon.

Mrs. A. Haugen, Mrs. P. Moen, Miss Ruby Berg and Mr. Tony Leferud were callers at the home of Mr. and Mrs. P. O. Flaaten on Monday afternoon.

UNITED GRAIN GROWERS DECLARE DIVIDEND

A dividend at the rate of four per cent, or one dollar per share, has been declared by the Directors of United Grain Growers, Ltd., for the financial year ending July 31st, 1935. Cheques will be mailed on September 1st, 1935, to shareholders of record at the close of business, July 31st.

SCHOOL FAIR WINNERS ENJOY SHORT COURSE AT VERMILION

During the week July 22nd—27th, some forty School Fair winners, drawn from districts served by the Vermilion School of Agriculture, enjoyed a pleasant and instructive week at the School.

Practical work and lectures in Domestic Science and Agriculture were keenly followed by the young people who also found time to enter into a full programme of sports and entertainment to which they themselves contributed in large measure.

At the conclusion of the course a [illegible] scholarship was awarded the boy and the girl who, in the opinion of the staff, showed the greatest aptitude to the work.

The Boy Scholarship Winner was Lester May, Alliance and alternates: Norman Stanley, Clandonald; Alex Weber, Sedgewick, while the girl's award went to Elizabeth Findlay, Ryley with Jean Whidden, Jarrow, and Mary Wholey, Sedgewick as alternates.

LONE MOUNTIE BESTS HOSTILE GROUP

[illegible], Sask., July 31.—Traditions of the R. C. M. P. were upheld here Sunday when a lone officer, Constable Gordon Stronach of Vonda detachment was attacked by a dance hall crowd and stood his ground until the mob had been dispersed.

In the process he bested two men who allegedly attacked him at the door of the community hall where a dance was in progress as the culmination of a district sports day.

Trouble originated when Stronach, with the aid of his flashlight, scrutinized arrivals at the dance. One man struck at the policeman, who retaliated by hitting his assailant over the head with the flashlight. The man was felled. A second then attacked the policeman. Stronach seized him Tarzan fashion, shook the man until his teeth rattled, and then threw him down. The man sustained a broken collar bone as he hit a board sidewalk.

Immediately the crowd came out of the dance hall, the majority hostile to the officer. In a burst of rage many picked up any missile handy, and backed against a wall, Stronach faced a barrage. As the officer drew his revolver, the howling mob stopped short. It was ordered to disperse.

There was a few moments of hesitation, then the crowd slowly melted away.

Royal Canadian Mounted Police are investigating the incident.

FIELD DAY TO BE HELD AT CAMROSE ON AUGUST 17th

Following the collection of grain samples by the British America, Searle, Northern, National and Midland & Pacific Elevator Companies which have been grown in the field [illegible] Camrose. A field day for the purpose of inspecting these plots will be held on Saturday, August 17. [illegible] expert plant breeders and expert grain men will be present to analyze many of the samples, and interesting discourses will be given.

The public is cordially invited to attend and an instructive afternoon is assured. Proceedings commence at 2:00 p.m.

DEMOCRACY AND PRESS PROVE INSEPARABLE

Toronto.—"Democracy and the [illegible] are inseparably bound together," B. K. Sandwell, editor of Toronto Saturday Night, told delegates to the Canadian Weekly Newspapers' [illegible] convention here Friday.

"The press could not exist without democracy, democracy could not exist without the press," he said.

Circulation of newspapers in Italy and Germany had dwindled to half [illegible] former figure since the application of the "muzzle" by dictators, he said as proof the public of those countries had ceased to look upon the press as a vehicle of thought and source of information.

UNITED GRAIN GROWERS LIMITED

A dividend at the rate of [illegible] per cent has been declared on the paid up capital stock of United Grain Growers Limited for the financial year ending July 31st, 1935.

Cheques will be mailed on September 1st, 1935 to shareholders of record at the close of business July 31st.

By order of the Board of Directors

R. S. LAW,
President

Winnipeg, Manitoba,

NINE YEAR OLD ALFRED SENECHALE DROWNED AT ST. ALBERT

Before the horrified eyes of his father, Alfred Joseph Senechale, nine year-old son of Octave Senechale, watchman at the St Albert convent, was drowned in the Sturgeon river about 200 feet above the bridge at St. Albert late Wednesday afternoon when the homemade canoe in which he was riding with his 14-year-old sister tipped. The girl clung to the overturned boat and was saved.

Despite efforts of Royal Canadian Mounted Police and a detail of city firemen under Capt. Jake Smith, the body has not yet been recovered.

According to reports received here the boy and girl were playing in a boat, a flat-bottom canoe, when it suddenly tipped. The river is abnormally high, about 10 feet of water being the depth atthe point of the accident, and the boy was unable to clutch the boat. He was swept down the current.

The father and several other persons were standing on the bank and Mr. Senechale, although unable to swim, attempted to jump into the water in an effort to save his son. Leo Hogan, 10, son of M. Hogan, St Albert real estate and insurance man, wanted to jump into the swollen river in a rescue attempt but was prevented by other spectators, who saw that it would be impossible for the small boy to save his companion.

City firemen and police, assisted by St Albert residents, dragged the river for more than three hours without success Wednesday night. There are heavy weeds along the river bottom handicapping dragging operations.

Boy Tells Story

Leo Hogan, 10, eye-witness to the fatality, told his story Thursday.

"I was going home when I saw the boy and he asked me if he could borrow the boat," he said. "I did not say anything, but he went ahead and went away with the girl. I walked away from shore a way and then when I looked backed back I saw the boat tip over.

I ran to the shore. I didn't know what to do, but I watched. He held on to the boat, and so did the girl. Then he let go and tried to swim, but he only went three or four feet before he went down. He went down three times and did not come up any more. He didn't shout; he didn't say anything. Then another boy came along in a boat and got the girl, who was still hanging on."

TWO INCHES OF RAIN THIS WEEK

Heavy rain fell in this district on Wednesday night and Thursday continuing into Thursday night. According to the Searle Grain Company representative, Mr. Hudson, the rain gauge at the elevator registered two inches even.

TOFIELD JUNIOR WHEAT AND OAT CLUBS TO HOLD FIELD DAY

The Annual Field Day of the Tofield Junior Wheat Clubs will be held on the farm of Mr. Swinton, one mile north of town, Monday, August 5th, at 1:30 p.m.

Mr. Engleshaw, District Agriculturalist will be present and will give an illustrated address on field crop production. All club members are requested to be present. All farmers of the district who desire to spend an interesting and profitable afternoon on that day are invited to attend.

GOOD CROWD ATTENDS SOCIAL CREDIT PICNIC

A good crowd attended the S.C. Picnic held at Ryley on Wednesday, included among which were quite a number from this district.

The usual ball games, etc., were held, and an address on S.C. was given by Mr. Unwin. In the evening a play "The New Day" was presented, the day being topped off with a dance.

LIBERAL MEETINGS WELL ATTENDED

Reports from Liberal meetings at McKenzie school and Ketchamoot school on Monday and Tuesday of this week, are that good sized and interested audiences greeted the Liberal candidate, Mr. Charles Gordon, and other speakers. We have no report on the meeting at Kingman on Wednesday, but as it rained heavily during the meeting hours, it is likely the attendance would suffer thereby. At McKenzie school and Ketchamoot school the audiences were keenly interested in the Liberal viewpoint of the election issues.

WESTERN WEEKLY PLACED THIRD in ALL CANADA CONTEST

In an all Canada contest for the best weekly paper with a circulation up to 1000, conducted by the Canadian Weekly Newspaper Association, the Wainwright Star was awarded third place. The Grand Forks Gazette came first and the Coldwater News of Coldwater, Ontario, was placed second.

HORACE McHEFFEY LEAVES FOR THE EAST

When No.——— (whatever number it is) freight train steamed out of Tofield going east very early Friday morning it carried with it Horace McHeffey enroute to Winnipeg, Montreal, and perhaps England, France and Germany. For the immediate present, Horace is in charge of a car of bovines, and after he has bestowed the necessary care upon these, he will search around and see what is on the horizon for an ambitious and talented young entertainer. May the best of good fortune keep pace with you, Horace.

An enjoyable barn dance was held in the barn on the Ag. Dodd's farm on Monday. Despite unfavorable road conditions, there was a good crowd and a jolly time was had by all. The Tofield Ranger Orchestra supplied the music.

"WALKING IN THE RAIN"

On Wednesday evening of last week a liberal meeting was held at Kingman. During the hours of the meeting heavy rain fell and continued during the night. The two cars carrying the speakers and their supporters had a terrible time getting back to Tofield, at one time Mr. Chas. Gordon and Mr. Joseph Rogers being compelled to abandon their car and walk, arm in arm for support, through mud and water and inky blackness. They finally arrived home about 3:00 a.m.

Mr. and Mrs. Brace and Jim and Miss Gladys Dennie left for Radium Hot Springs on Sunday. Mr. Brace will return the end of the week, and the rest of the party later.

NOTICE

The Beauty Parlor will be closed from August 14th, to August 26th.
MISS A. LINDSAY

B. W. ROGERS

LOCAL AND PERSONAL

Miss Florence Kendall of Leduc is spending her holidays at her parents home here.

Mrs. A. Rose and daughter returned to their home in Edmonton, after visiting at the Eldred home here.

Miss L. Ross sprained her ankle on Monday and for a few days was confined to her room.

The Misses Goldie Jacobs, Jessie Munroe, Edythe Barden, Beryl Edwards, and Mary Burnett left on Wednesday for ten days at Elk Island.

The Misses Esther Jacobs, Florence Kendall, Pat Burnett and Mrs. Wilmore visited the city on Tuesday.

Constable Davies returned from an Edmonton hospital this week. He is convalescing steadily.

Miss Ella Taylor returned home this week after spending part of her holidays at Edmonton and Seba beach.

Miss Aileen Allan is visiting her sister, Mrs. Provost, in the city.

Mr. and Mrs. Wuetherick and baby returned from their holidays on Wednesday.

Miss Germaine Marchand is visiting her sister Mrs. Wuetherick for a few weeks.

Miss Alberta Janet was taken to Edmonton Hospital on Monday with an attack of appendicitis.

Mrs. A. Hosler returned home last week from Rimbey where she had been visiting her daughter, Mrs. Lewis for a month.

Mrs. E. R. Kallal, sons Edward and Joe and daughter Mary, returned this week from a two weeks stay at Sylvan Lake. While there Joe played six games of ball with Sylvan Lake All Stars, a team managed by Howard Lee, of Tofield.

The Conservative meeting billed here for Saturday afternoon last, failed to materialize. Mr. Popovich was on hand but Mr. Dunning was unable to be present.

HON. DUNCAN MARSHALL TO SPEAK HERE MONDAY, AUG. 19

Hon. Duncan Marshall, prominent liberal in this province for many years and later prominent in Ontario liberal circles, now being Minister of Agriculture for Ontario, is billed to speak at Tofield on Monday, Aug. 19th. He will speak in support of the candidature of Mr. Chas. Gordon, who will also be present and speak. There will also be other speakers, the meeting being the big Liberal meeting at Tofield on the campaign.

HEAVY STORM ON SUNDAY—SOME HAIL

On Sunday evening last between six and seven o'clock a heavy rain and wind storm swept over this district. Included in the deluge was a quantity of hail, but in town at least the hail was not heavy and what there was of it, was fairly soft. The heavy wind and heavy fall of water tore through the vegetation but did not do a great deal of damage. North and north-east reports of hail came in ranging all the way from a large to a small percentage.

SUCCESSFUL GARDEN PARTY

The annual W.A. Garden party was held at the home of Mr. and Mrs. J. W. Robinson on Wednesday afternoon of this week. Outside games, contests etc., were indulged in and afternoon tea was served. Supper was served around six, following which a concert was enjoyed.

LINDBROOK

We regret to announce the death at the residence of her daughter, Mrs. J. Leahy, New Westminster, B.C. of Mrs. M. Swain, who for years was a well known, liked and respected resident of this district. Mrs. W. Glenn and Mrs. A. Whibley of Lindbrook are daughters as also Mrs. J. Leahy. Interment was at New Westminster. Her old friends in Lindbrook extend their sympathy to the family in this their sad loss.

Constable J. Harkness of Wetaskiwin, paid a visit to his old friend J. Bracegirdle and family last week, and recalled many reminiscences of "ye goode olde days."

Mr. and Mrs. Victor Bradley and daughter, Rose, accompanied by Mr. Howell Williams motored from Edmonton last week to visit old friends at the Hooper—Holland place here.

We said we'd be "pukka sahibs" a week or so ago, our guess was out, we meant ducks. It rains, and rains and rains! Haying is a ——— job these days. Still its election time and in keeping with the flow of verbiage from all the aspirants to political honors, flow of credit, etc. The weather is trying to be in the fashion, but doesn't it know that the political flow of talk is largely "hot air" and right now is when it is needed.

LAKESHORE

Mr. and Mrs. Chris Tiedeman of Holden were Sunday visitors at the Henry Tiedeman home.

Mr. and Mrs. George Francis and family spent a couple of days visiting at the Jas. Francis home the first part of the week.

Mrs. Esther Majnkey and Miss Kathy McLeod returned on Friday evening from Elk Island Park where they have been camping for the past two weeks. Rainy weather somewhat detracted from the enjoyment of the holiday.

Miss Ethel Baines came from Edmonton on Tuesday to spend a few days with Mrs. T. E. Seale.

On Thursday Mr. and Mrs. Jones of Clover Bar, parents of T. A., Joe and Leslie Jones, all of this district, celebrated their golden wedding anniversary. Congratulations and best wishes to the bride and groom of 50 years ago.

Mr. and Mrs. Theodore Waach and family of Claresholm came on Monday for a visit with Mrs. Henry Tiedeman.

The J. K. Johnston family picnicked at Elk Island Lake on Sunday.

Miss Ethel Graham was storm bound at the Jones home Sunday and spent the night there.

Mr. and Mrs. Graham made a business trip to Edmonton on Tuesday.

SOCIAL CREDIT MEETINGS

Bardo, (Anderson School) Saturday, August 10th. Speakers: Dr. McPherson and J. Landeryou.

Tofield, Thursday, August 15th at 8:00 p.m. Speakers: Dr. J. L. McPherson and Mr. J. Landeryou.

Ketchamoot, Thursday, August 15, at 8:00 p.m. Speakers: Dr. J. L. McPherson and C. D. Denney.

McKenzie, Friday, August 16th, at 8:00 p.m. Speakers: Dr. J. L. McPherson and J. Landeryou.

Lake Shore, Friday, August 16th, Dr. McPherson and C. D. Denney.

Kingman, Saturday August 17th at 8:00 p.m. Speakers: Dr. McPherson and J. Landeryou.

Crop Testing Plan

A FIELD DAY of interest to all farmers and others will be held at

CAMROSE, AUGUST 17th

—at 2:00 p.m.—

Many interesting and valuable demonstrations of the different varieties of grains, etc. will be made.

As well will be shown and explained the "Crop Testing Plan" under which crop improvement scheme, plots representing 300 farmers' fields of wheat now being produced in the surrounding district will be examined and analyzed by competent plant breeders.

The collections of the samples have been made by the British America, Searle, Northern, National and Midland & Pacific Elevator Companies, which samples in turn have been grown, and will be analyzed, by representatives of the Dominion and Provincial Departments of Agriculture and our Western Universities.

Farmers and others are cordially invited to attend—an interesting and instructive day is assured to all.

Look at it This Way

A retail store regards itself as being a public servant Therefore, it is wholly fitting that it should try to be the best and most eager servant possible. A retail store which hides itself from those whom it wants to employ it become under-employed, and so its sales decline.

The public inclines in largest numbers toward those stores which seek its attention and custom. It takes the advertising store at its own valuation. It likes to do business with those who manifest eagerness to serve it. It likes to buy at those stores which have to renew their stocks frequently

Advertising is just communicating news and information about one's store and service It is just a form of talking It is those who talk who are listened to. Silent stores lose out to stores which carry on conversation—in the form of newspaper advertisements—with those whose custom they want.

Any retailer who wants to get more customers—for the replacement of customers who become lost to him and for the expansion of his business—can surely get them by making his store important in their eyes, and by putting in his advertisements the kind of information which will help buyers come to decisions.

The Tofield Mercury advertising columns are the cheapest and most effective manner in which to get your message before the people you wish to cater to.

THE MERCURY

SMALL BOY TRIES TO EAT THERMOMETER

Washington, Aug. 6,—Though the heat and the humidity continued intense here Monday, the casualty here was a small boy who tried to eat a thermometer.

Carlton Jackson, three, saw all his elders inspecting a thermometer as the mercury hit 99. The long red line looked like candy to him. So he bit it off.

Doctors said he would be all better soon

DUCKS HERE SAVED BY WAR ON CROWS

If more Albertans would take the shotgun out in the spring and shoot crows, then in the fall they would get better bags of ducks, declared Stanley H. Clark, provincial game commissioner, Tuesday, commenting on a similar statement by E. C. Bonnel, prominent Winnipeg sportsman who was urging Manitoba sportsmen to greater crow-hunting activity.

By eating thousands of duck eggs each spring crows make alarming inroads in the number of ducks that flock south each year, Mr. Clark explained. Alberta hunters have conducted an active anti-crow campaign in this province for ten years with the result that conditions here are not so bad as in other prairie provinces.

By allotment of approximately 500 prizes each year school children and gun club members are encouraged to go after the crows before serious damage is done to the duck flocks by destruction of eggs, stated Mr. Clark.

No definite figures as to extent of depletion of duck flocks by the crows are available, but it is extensive," the game commissioner said "It is the subject of study by the bureau and it is expected that valuable information will result from their investigation."

Crow shooting is not just a chore on the part of the Alberta sportsmen, he pointed out They realize that it is beneficial to the duck shooting in the fall, but even potting crows is good sport

MONKEY IS RESUSCITATED

Hollywood, Aug. 6 —Dr. Ralph Willard exhibited Monday a male Rhesus monkey named Jekal which he said he had resuscitated after having frozen it "solid"

Another monkey, Motilda, did not respond to the technique of Dr. Willard, a native of the Russian state of Georgia who now directs a clinical laboratory here. A third, Gaston, still was in the zero-cold chamber from which Dr Willard said he will take it in a few days

Several months ago Dr Willard announced success in similar experiments with guinea pigs. Later his decision to work with dogs brought sharp protests from humane organizations

Dr Willard said he first put the monkeys under ether, then injected a solution of sodium citrate to prevent blood coagulation, and caused death by an overdose of ether The monkeys, he said, were then placed in the ice machine

Jekal was brought to life by slow stages, Dr Willard said The monkey, when shown to newspapermen, was scratching vigorously at his bandages and grasping a bunch of grapes

Dr. Willard believes his experiments with the freezing and resuscitation of animals may yield important knowledge of gland control that might be applicable to human beings.

SAY NO OUTSIDE HELP NEEDED FOR HARVESTING IN ALBERTA

All available harvesting work can be handled by men already within the province without the necessity of using "imports," it was reported in official sources Tuesday after a census of men now in camps under the jurisdiction of the dominion national defence department and Alberta relief commission revealed approximately 2,000 available for work.

Of this total 1,000 are in the dominion camps and the rest in the relief commission camps. Taking into account other men available in the province for work at the moment's notice, no outside help will be required, it was stated.

General demand for harvest help is not expected until the last week in August due to the present condition of grain as a result of recent heavy rains. Cutting should be general by that time and is expected to commence in the Edmonton district by August 15.

Officials have not estimated the number of men required for harvest but are confident that the available man-power will be sufficient Reports from some districts indicate that men are already drifting in, seeking positions with farmers for whom they have worked before These men are seeking jobs without registering with the employment offices.

SEASON'S FIRST SPRING WHEAT REACHES TABER

Lethbridge, Aug. 5.—First spring wheat of the season delivered at Taber elevator Monday graded No 1 hard It was Reward variety grown on the edge of the town of Taber Spring wheat cutting will be fairly general this week in lighter crop districts of southern Alberta.

13 YATCHS "QUIT" IN LAKE CONTEST

Thirteen of the 14 yachts which went across the starting line at South Cooking Lake Monday in hunt for the Golden cup capsized or were forced to run for shore as a result of storm conditions. William Field, sailing the dinghy "Cree" was the only one to finish and won the cup.

Crews of the overturned craft were rescued by Pat Morris and Douglas Lockerbie, who put out from Koney Island in a small motorboat, while Dr. T. P. McDonald, fell out of good position in the race to rescue some of the earlier casualities. Later on his main sail split and he was forced to shore down lake. Remainder of the crews were rescued by persons on other launches which put out from shore, and by Frank Barnhouse, who put out from shore in his big sloop.

Half a dozen yachts capsized in quick succession at the first buoy. S. C. Gosling and his son William, were forced to run cover at Koney Island when their weight was not enough to hold their boat down on the windward leg.

The winner recently won a cup at Chestermere lake, near Calgary, when he sailed under similar conditions. The Cooking Lake course was 10 miles long

Included in the contestants were Allan Terwillegar in the "Achroyd"; F B Mathews in the "Meowasin"; William Gosling in W. J. Dick's boat the "Audrey", Fred Robertson and the owner Robert McLellan, in the "Redwing", Lloyd Halburton in the "Grade", Dr T Forrester McDonald in the "Clare", Lorne McBurney in the "Blue Bird", Commodore Aitcheson in the "Elsie", H S Hegler in the "Hellene"; Kenneth Barnhouse in the "Marjorie"; and George Barnhouse in the "Dorothy"

Rovers Go A'Roving

Here are five Canadian Rover Scouts on board the Canadian Pacific liner Duchess of York, in which they sailed from Montreal to attend the World Rover Moot being held this year in Sweden. Eastern and Western Canada are represented by the five, who, left to right, are: L. P. Dominik, of Peterboro, Ont., Allan Hiron, of St. Paul, Alta., A. B. Patterson, sea scout, of Oshawa, Ont., Kingston Webber, of Edmonton, and A. C. Kessler, of Saint John, N. B.

The Canadian Rovers will form part of a British contingent of 1,500 attending the Rover Moot, or nearly half the entire number expected to attend. They will be in camp for six days at the Moot headquarters on Ingaroe Island, not far from Stockholm. Elaborate preparations have been made by the Swedish Rovers, hosts of the gathering, who are headed by Prince Gustaf Adolf, eldest son of the Crown Prince of Sweden. The camp will have a fire brigade, telephone system, post-office, hospital and will publish a daily newspaper in the four official languages of the Moot, English, French, German and Swedish.

The Swedish Moot will be the second World Rover Moot. The first was held in Switzerland in 1931. Two of the five Rovers in the above picture, A. C. Kessler and Allan Hiron, attended the 1931 Moot.

LO! THE POOR BANKER—

SOMEBODY AT an Edmonton city council meeting once said "everybody takes a crack at the gas company" or words to that effect. Whether that statement is true or not, it does appear that in these days of turmoil that everyone is taking a crack at the banks. Just how far they are justified in doing so or whether they are even justified at all few people reallly know. Of course there are many different people with different ideas as to what their own conutry's financial set up and that of the world should be like and the well informed among these know what they are talking about. But there are also a great many more, who, buffetted by stress of circumstances are railing against the banks chiefly because the banks are the most conspicuous thing within their line of vision.

Here let it be said that this paper holds no brief for the banks. Country printers and bankers have little in common. The banker is fairly opulent and as regards economic security well anchored in sheltered waters, while the country newspaperman is out in the open and has to bear the brunt of every economic gale that blows. But the average country newspaperman has the welfare of first his district, then his province, then his country at heart. And it is in this spirit that this article is written. Moreover readers should be careful to distinguish between the real banking profession and the financial manipulator and financial racketeer. No person has a greater hatred of the arrogant individual riding on the clouds of high finance than the writer—but that is not banking in its true sense. Furthermore there is no person more sympathetic towards the debt harrassed farmer, the unemployed or anyone adversely effected by the depression. The depression effected us too.

First let us give a very brief and sketchy history of banks and banking. Tablets of clay have been found showing some of the functions of the modern banker. Deposits bearing interest and other banking customs were also known in ancient Greece and Rome. It is also said that the Chinese had a very early paper currency about A.D. 800, but while it is possible to trace the evolution of a form of modern banking right through the middle ages, it was at Venice that the first public bank established by acts of the senate was founded in 1584 and 1587. In 1619 the Banco del Giro was founded and was long famous as the Bank of Venice. The invention of the bank note with the exception of that said to be used by the Chinese is due to Palmstruck, who founded the Bank of Sweden in 1656. The rise of banking in England dates from the siezure by Charles I. in 1640 of the bullion deposited in the Tower of London by the city merchants. It was returned to them but for safety they deposited it with the goldsmiths, who did a large business in money changing. Subsequent events brought ruin to the goldsmiths and also to their depositors. The successful example of the Dutch banks, and a general demand for improvement all round, brought about the establishment of a definite banking system and the end of the goldsmiths. The Bank of England was founded in 1694 and while not the first was among the early banks. From the passing of the Bank Act in 1844 there has been in England four banking panics and one financial crisis, bringing in their train needed improvement in the banking structure. While banking practices follow along broad general lines in all countries, each separate country has minor differences in its banking system so as to make the system more applicable to the country in which it is functioning. All the above is somewhat sketchy, dry and uninteresting and is only written that one may realize that banking is an age old profession, in tradition akin to that of medicine, the law and the ministry. And further, despite many assertions to the contrary, to partly show that different generations of bankers have improved their technique generation by generation to meet the growing and changing needs of its customers, the people.

The prime function of a banking system is to facilitate trade and commerce, and not only does this apply to within the borders of any one state or country, but as between different countries. An importer of silks from Hong Kong, located in New York or London would find it difficult to get along without the aid of the banks; likewise a merchant in Tofield doing business with a wholesale house in Toronto find the bank exceedingly useful. The services rendered, which are of many different kinds are of course duly charged for, just the same as a doctor, lawyer or mechanic charges for the service he renders. In other words banking is simply a business or profession and as such must be conducted on business like lines if it is going to survive. Unlike many other businesses though, the failure of a banker to exercise proper discretion, not only imperils his own welfare but also the welfare of his customers who may have money on deposit with him.

Connected with the banking business and forming a large part of its daily activities is the giving of credit. Perhaps exchange of commodities would be a better term for when a man takes a loan from the bank he hands the banker security and when he pays it back the security is returned to him. Now, in the trading of credit chartered banks have certain privileges, they may trade credit to an amount considerably larger than the actual cash on hand, but not to an unlimited amount. But it should be remembered that this privilege, is hedged with governmental restrictions and was designed, in Canada at least, as much for the benefit of the general public as for the banks. Moreover it is a privilege requiring great care, absolute impartiality and embodying grave risks. Perhaps this one feature is the greatest "kick" a section of the public has against the banks to-day. It is very important not only to the banks but to the general public as well. We have said that banking is a business, and like any other business conducted at a profit. We have also said that the banks' chief function is to facilitate business and we have also said that a banker charges for the loans he makes. Now, the banker wants to make loans to the full capacity of his resources and legal privileges just the same as any other business man wants to work at their full capacity. Why is he not doing it now?

Before this question is answered, it should be borne in mind that up to the present most men were of the opinion that a loan automatically carried with it the responsibility of repayment. If you do not subscribe to this belief the following argument does not hold good. Well, then why are the banks not as liberal as they used to be? Simply because economic conditions over which they have absolutely no control prevent them. If we assume a loan automatically carries responsibility of repayment, we must assume credit is a serious thing. Perhaps a good illustration of credit would be, that, like fire and water it is an excellent servant but a bad master. During the so called good years as most everybody knows, and nobody knows it better than the banks, credit got out of hand, and we have all, more or less, been sweating blood for it since. The banker will lend and does lend to Catholic or Protestant, Liberal or Conservative, Jew or Gentile, he has no political or racial preferences, his only demand is that it be a safe loan. Of this he prefers to be the sole judge know'ng full well the most he can make out of the transaction is the interest, while the borrower may double or trebble his money or lose it altogether.

Modern civilization can be likened as resting upon three main props.

1. Religion, as represented by the churches of all denominations and creeds.
2. Political, as represented by parliamentary government of all kinds.
3. Economic, as represented by the banks, financial institutions, industry, trade and commerce.

During the known history of the world, religion, the word being used in its broadest sense, has been the means of much blessing and much strife. Volumes could be written regarding this, but for the purpose of this editorial it is sufficient to say that religion is what people believe.

The realm of politics is something different. Political action is based upon what people think. And it is not surprising to note that from time to time a large number of people change their line of thought. Else how would you explain the continual change in party governments. Conservative one time, Liberal another, Labor another and so on. So political governments are cast along the lines of current thought.

Coming to economics I was talking to a man the other day and I said, "by whom are you governed?" and he replied, "by parliament of course." I said, "politically yes, but your real government are the banks," using the word in its broadest sense. "Yes, yes," he said, and raising his voice, "Is it right, is it right?" Well now, let us see. We have said religion is what people believe; we have said that political action is cast along the lines of current thought and now we will say that the economic prop is what people DO.

Now, in the world of material things, which is the most important, what people think or what people do? Let us give an illustration. Supposing a person goes into a store in Tofield and buys five dollars worth of groceries, lays five dollars down but the money becomes accidentally covered. In conversation with the storekeeper he finds that the storekeeper is at variance with him as regards a belief as to the composition of the moon. The storekeeper says the moon is a silver ball, and the customer is equally certain the moon is made of green cheese. They argue, fume and fret, until the customer says: "I know the moon is made of green cheese, I saw it through a telescope." "H'mm" says the storekeeper, "you saw it through a telescope, well then you must be right, but it looked like a silver ball from my garden." They come to a complete agreement and further discussion reveal that in all things over which men differ they are in perfect harmony. The customer picks up his groceries and commence to walk out. "Hey" says the storekeeper, "wait a minute, you have not paid for those groceries yet." "Oh yes I did" says the customer, and they begin to argue all over again. "Well," says the storekeeper "you cannot have the groceries unless I receive the money," to which the customer replies: "If I cannot have the groceries, my family will have nothing to eat." To which the storekeeper answers: "If I do not receive the five dollars, my children will have no shoes as I need the money to buy them with." Just then with a sweep of the hand the storekeeper discovers the money on the counter and everything is satisfactorily settled. So you see even though they were in complete harmony as to what people think, it was what they did that gave nourishment to one family and shoes to the other

And so we find in the material world the economic prop is the most important one.

We said the people were governed by the banks using the word in its broadest meaning, and in a sense the people are. But who then govern the banks. Wholly and literally the banks are governed by what the people do. Under our present financial set up, the everyday economic transactions of the populace literally force the banks to take any given line of action. Lo! the poor banker

RED AND BLACK RUST

Dr. J. H. Craigie, of the Dominion Rust Research Laboratory at Winnipeg gives the following explanation relative to "red" and "black" rust of grain There is considerable confusion in the public mind regarding the relation of "red rust" to "black rust of grain. Many people regard them as two distinct rusts As a matter of fact, they are merely two different expressions of one and the same disease The disease first appears on the plants as "red rust" (that is in the red stage) and this stage continues while the crop remains green When the crop begins to ripen the red stage gives place to the black stage (the so-called "black rust".) A far better name for the disease is "stem rust" as it is the stems of the plants that are mainly affected, although infection also occurs on the leaves

It is while the disease is in the red stage that it spreads The red colour is due to the reddish spores produced by the organism They are distributed by winds, and cause new infections

In the black stage the spores are dark in color These spores remain attached to the plants and are not carried about by winds, at least to any extent. In fact the black spores are incapable of infecting cereal plants

One more point should be noted It is generally stated that the "red rust" doesn't do much harm to the crop but that the damage is done by the "black rust". This is altogether a misconception As pointed out above, the "red rust" and the "black rust" are different stages in the life of one organism—the fungus that causes stem rust. From the time the red stage appears on the plants and right along until after the black stage appears the plants are being drained of food and water by the organism It is therefore wholly incorrect to say that "black rust" alone does the damage Both the red stage and the black stage are responsible for the sum total of damage done to the crop but most of the damage is probably done before the black stage appears

Stem rust of wheat and barley does not attack oats, nor does the stem rust of oats attack wheat or barley. Crown rust of oats, a different disease from stem rust of oats, in the "red" stage is orange in color, while stem rust is brick red

ANOTHER TRIP TO CHURCHILL

Winnipeg, Man., Aug., 5 —Much travel interest has followed the announcement of the third annual all inclusive trip from Winnipeg to Churchill with a side trip to the Flin Flon This trip will be made by a special all sleeper train leaving Winnipeg on the morning of August 16 and will arrive back in the city at noon of August 22

During the last two years this trip has been very successful and has been of highly educational value to the business and professional life of Western Canada This year indications are for a larger train as a large number of reservations have already been made

The train which provides the home for the travellers from start to finish will arrive at the Pas early on the morning of August 17 and, a few hours later, will move off to Flin Flon so the visitors may inspect the great silver and copper mine Here the afternoon and evening are spent

The arrival at Churchill will be early on the morning of August 19, where a full day will be spent Ample opportunity will be offered for visitors to inspect Manitoba's seaport and also to see the remains of Fort Prince of Wales, one of the most historic of Hudson's Bay forts A visit will also be made to the large grain elevator, which will be in operation The party will return to Winnipeg by noon August 22

TALL STRANGER FROM NORTH SEES FIRST VIEW OF TRAIN

Prince Rupert, B.C., August 5 — Down from the north where he has spent practically all of his life, a tall stranger stepped off the boat a few days ago to get his first view of a railway train He was quickly taken in tow by Canadian National trainmen and shown everything from the engine to the observation car. His greatest interest was in the dining car and preparation of meals and the sleeping car He looked upon the Porter as a mysterious gentleman who, by a wave of his hand, produced well-made and comfortable beds from the air He suddenly became so comfortable that he hoped Edmonton, his destination, might be located in the next quarter-section to London, England

GRIZZLY BEAR "AS BIG AS A HORSE."

Valemount, B.C., August 3rd Firmly convinced that the territory north of this town on the Canadian National main line offers the finest grizzly hunting on the continent, G. L. Pop, internationally known furrier of Vancouver, returned here a few days ago with another magnificent specimen It measured more than nine feet and was "as big as a horse

The party which included the well known guides George and Dick Hargreaves, of Mount Robson, met their first grizzly on an open slide, a favorite spot for the species This was a relatively small specimen and the big fellow came along the next day Mr Pop has hunted grizzlies for years and has never lost his respect for their courage and endurance

TWO CHILDREN LOSE LIVES AS EXPLODING LAMP STARTS FIRE

Trapped in a tiny bedroom in their flame-enveloped home while their frantic father vainly attempted to reach them through the flames two children were burned to death and the parents are in the Royal Alexandra hospital here, the mother is in a serious condition, as a result of a fire which destroyed their farm home four miles north of Carvel corner on the Alberta Beach highway, Wednesday night

George Adams 4 and Margaret Adams 3 were the two fatal victims and the two parents Mrs. Olga Adams, 22 and Lewis Adams 32 are in hospital. Mrs. Adams is in a serious condition [illegible] father suffered [illegible]

Suffering [illegible] to him was [illegible] father [illegible] Journal [illegible]

"Oh, God! I tried to reach them but it was [illegible]

Striking [illegible] his wife [illegible] with [illegible] Mr. Adams [illegible]

"I was [illegible] lighted wick away from the lamp while my wife poured in the coal oil and it exploded with a blaze that spread over everything," continued the stricken father "My wife's clothing was a mass of flame in an instant and she staggered about the room trying to beat out the fire "Everything she touched became ignited."

THE GNAT
(Contributed by BUZZ)

Once upon a time there was a man who had a very poor house, and the man was very wroth with the house. The roof was full of holes and leaked very badly, part of the glass was broken out of the windows, the door was broken and hung [illegible] hinge, the walls had holes [illegible] chinking through which the wind blew fiercely, the floor was [illegible] dirt and when it rained outside [illegible] as muddy inside as [illegible]. So the man decided that he would destroy the house but put it off from day to day.

He came in from a hunt one day hungry, and wet and cold, the house was also wet and cold. He started to make a fire, the kindling was also wet, [illegible] when he struck a match the wind blew down the chimney and blew out the match. He became so angry [illegible] he did not know what to do [illegible] that something would happen [illegible] anything, until he [illegible] plan how he could [illegible]. At last he hit upon a [illegible] he would burn the darn [illegible]. And after quite an effort [illegible] a fire started in some [illegible] corner, at first the [illegible] and then the [illegible] bother but he was so angry that he did not notice it until [illegible] had that he had to go [illegible].

The rain [illegible] down in torrents, the wind [illegible] and he began to get colder and colder, and then he [illegible] himself, he had plenty of [illegible] the hill, why did he not get some of them out and build another house before he destroyed the one he had? However poor it was he could have [illegible] up some of the [illegible] and at least have been far better off than he was now, sitting [illegible] wish man.

Why [illegible] I plan, why didn't I [illegible]

There are those in our society who say that the present system has broken down and that they are going to support anything that promises a change, arguing that it cannot get any worse and that to destroy the present system will force a change and of necessity, for the better.

COW CLIMBS 22 STEPS TO MAKE VISIT

Stratford, Ont., August 7th.—Be[illegible] the scales today on [illegible] the slaughter house [illegible] of the truck and gave [illegible] a merry chase. She climbed a flight of 22 stairs and gave quite a shock to Mrs. M. Tyne of the relief department, about [illegible] apartment. Mrs. Ty[illegible] the animal away and [illegible] all the way down the stairs again.

PORTER [illegible] $100,000 GEMS LOST 4 YEARS

New York, Aug. 06.— Two detectives saw something peculiar about the way James Hinton, 42, a negro porter, was walking down Broadway Monday.

They stopped him, searched him and found in a crumpled envelope a [illegible] of pearls valued at $100,000, which was reported stolen or lost by Mrs. Grafton Minot of New York in May, 1931.

Hinton said his wife found the necklace while working in a gown [illegible]. They were afraid to notify the police, he said, for fear of being arrested.

TOFIELDERS ATTEND LIBERAL MEETING AT RYLEY

Mr. Howson, Liberal Leader, spoke at a large gathering in the Community Hall, Ryley, on Tuesday. Quite a number from Tofield attended. The main address was given by Mr. Howson, while other addresses were given including one from Mr. Chas. Gordon, Liberal candidate and Mr. Joseph Rogers of Tofield.

MYSTERY RAY CLAIMED ABLE TO PENETRATE FOG

Fort Monmouth, Highlands, N.J., July 30.—Double details of military police paced outside the U.S. army reservation Tuesday while officers amid utmost secrecy, studied a new "mystery ray" said to be capable of detecting the presence of a ship 50 miles at sea through fog and darkness.

Signal Corps technicians declined to confirm reports that they already had begun a series of nightly tests designed to demonstrate the ray's effectiveness in spotting not only ships but aeroplanes at high altitudes.

UNEASY LIES POOR FARMER; $17,000 BED

Algood, Tenn., Aug. 6.—Oral Bilbrey's wife made his bed. Out of nice clean straw—and it cost Bilbrey just $17,000.

The farmer was away from home when his wife decided to fill the mattresses with new straw. She had to empty the old straw, so she built a bonfire and piled it high.

Then Bilbrey came home and his wife remembered. Her husband had accumulated his wealth in currency, stocks and notes and hidden them away in a mattress.

They all went up in smoke.

Alberta Savings Certificates

A SOUND FORM OF INVESTMENT

By Issuance of Savings Certificates, the Province of Alberta has for many years afforded opportunity to the public for investment of their savings at attractive interest rates, at the same time assisting the Province in maintaining public services vital to the welfare of the people.

In addition to the usual "Demand" Certificates, available in denominations of $5 and upwards, the Government in 1932 inaugurated Term Certificates, bearing a fixed rate of interest for stated periods of one, two or three years. Purchasers of these certificates are afforded the same security as on Provincial Bonds. The term certificates are available in various denominations from $25 up and are not subject to the varying market prices for debentures.

4½% Per Annum Paid on Two and Three Year Term Certificates.

3½% Paid on One-Year Term Certificates.

3% Paid on Certificates Redeemable on Demand.

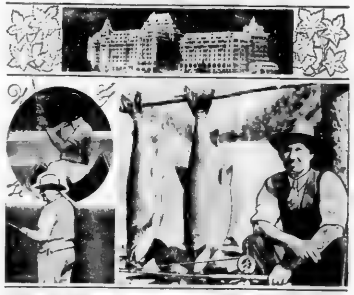
Where Dreams Come True



Not much has been [illegible] the fishing near Banff Springs Hotel in the Rockies, probably because writers had [illegible] writing [illegible] about the scenery, [illegible] golf, tennis and swimming [illegible] mountains to be climbed on [illegible] horse, the health-giving qualities of the air, and the fun to be found there the year round. There were no suitable descriptive words left for the fish.

But many types of fighting fish abound in the nearby lakes and streams. Minnewanka, the lake of Indian legends, frozen over for a week after the opening of the fishing season, made a glorious start on the new season by producing more than 365 pounds of trout in two days. [illegible] Hall of Banff, led the parade with two trout, the larger [illegible] dream tipping the scales at 4[illegible] pounds, and the other registering a more usual [illegible] pounds. He was out for only an hour and a quarter in the early afternoon from the time of the first cast until the second fish was landed, despite the fact that the pair put up 30 and 40-minute fights.

Visitors have also made good catches this year. On the same day sportsmen got eight fish averaging about 18 pounds each, [illegible] in two days another party of [illegible] caught 340 pounds of [illegible] trout, running from five to [illegible] pounds, with the average about [illegible].

[illegible] catches like these are not [illegible] in the West, it [illegible] been discovered fairly recently that trolling is not at all [illegible] to get the big ones. [illegible] at the Canadian Pacific Railway hotels at Banff Springs and at Lake Louise, as well as at the many bungalow camps throughout the Rockies, learn soon after their arrival that there are fine fishing grounds in the near vicinity.

GOOD TURN OUT AT FIELD DAY CONSIDERING WEATHER

The Tofield Junior Wheat and Oat Club Field day, held at the Swanton farm just north of town, was quite well attended. The weather was uncertain, otherwise more would have been present.

Mr. Englesham, district agriculturalist gave an address on field crops and production thereof and preparing seed grain for exhibits. Mr. Ben Anderson spoke a few words regarding Junior Grain Clubs and assuring his hearers that the Wheat Pool derived real pleasure from assisting Junior Clubs of this kind.

A. M. MATHESON ASKS TOFIELD AUDIENCE FOR CONTINUENCE OF SUPPORT

Before a fair crowd on Wednesday night, A. M. Matheson M.L.A. gave a rousing address in support of the U.F.A. government and their record after fifteen years.

He urged the farmers to stick together and emphasized the fact that the farmer is the original producer of most of the wealth of Alberta. He solicited their vote on election day relying on their appreciation of the government's record.

The Crisis Agricultural Law, 1933, of Holland is no half measure. It grants direct subsidies, controls the entire process of agricultural production and distribution, and monopolizes the importation and exportation of different products.

Eulogy to Grass

By John James Ingalls

Next in importance to the divine profusion of water, light, and air, those three physical facts which render existence possible, may be reckoned the universal beneficence of grass. Lying in the sunshine among the buttercups and dandelions of May, scarcely higher in intelligence than the minute tenants of that mimic wilderness, our earliest recollections are of grass; and when the fitful fever is ended, and the foolish wrangle of the market and the forum is closed, grass heals over the scar which our descent into the bosom of the earth has made, and the carpet of the infant becomes the blanket of the dead.

Grass is the forgiveness of Nature—her constant benediction. Fields trampled with battle, saturated with blood, torn with the ruts of cannon, grow green again with grass, and carnage is forgotten. Streets abandoned by traffic become grass-grown, like rural lanes, and are obliterated. Forests decay, harvests perish, flowers vanish, but grass is immortal. Beleaguered by the sullen hosts of winter it withdraws into the impregnable fortress of its subterranean vitality and emerges upon the solicitation of spring. Sown by the winds, by wandering birds, propagated by the subtle horticulture of the elements which are its ministers and servants, it softens the rude outlines of the world. It invades the solitude of deserts, climbs the inaccessible slopes and pinnacles of mountains, and modifies the history, character and destiny of nations.

Unobtrusive and patient, it has immortal vigor and aggression. Banished from the thoroughfares and fields, it bides its time to return, and when vigilance is relaxed or the dynasty has perished, it silently resumes the throne from which it has been expelled but which it never abdicates. It bears no blazonry of bloom to charm the senses with fragrances or splendor, but its homely hue is more enchanting than the lily or the rose. It yields no fruit in earth or air yet should its harvest fail for a single year famine would depopulate the world.

LINDBROOK

A dance was held at the home of Mr. and Mrs. Robinson of Lindbrook last week. The place was packed so evidently it was a popular event. The orchestra consisted of Messrs. Leon Lepine, Clark Lindgren, and "Sandy" Robinson and (their instruments). The usual lunch was served at m.n. and afterwards the dance continued till the "wee sma hours."

Congratulations to Mr. and Mrs. Lawrence Gill of Lindbrook on the birth of a baby boy. Both mother and baby are doing well we are glad to state.

Mr. and Mrs. F. Kortzman and son Ralph, and Mr. E. W. Hooper of Lindbrook motored to the city on Sunday to see Mrs. Elmer Anderson. They report her as gradually improving.

Miss Chrissie Robinson of Lindbrook stayed a week or so of her holidays as the guest of Mrs. John McGinitie and thoroughly enjoyed her visit.

Mr. and Mrs. Turner and daughter of Edmonton are the guests of Mr. and Mrs. Hadley Burton of Lindbrook North.

Mr. and Mrs. J. Bracegirdle and family and Mr. and Mrs. F. Evans motored to Poe on Saturday night to a dance at an old friends there. They returned about 4 ack emma on Sunday morning and found no one had stolen the store or gas pumps, etc., and so to bed. On arising later in the morning they looked out and saw one of the pumps had been run into by a car or truck and broken, but the ones that did the damage had beat it and to date remain unknown, still the police are checking up so the juggernaut may be found yet.

Mr. A. Gill is building a fine new barn on his farm here. Say! is this a sign that the depression is lifting. Gee, we hope so.

Miss Lily Morden is away at present on a holiday at Jasper, Alta.

LOCAL AND PERSONAL

Miss Nina Bell of Edmonton is visiting her sister, Mrs. Norman Scott of Tofield.

Mrs. M. McHeffey and daughter returned home last week. Mrs. [illegible] is spending a few days with her.

Mr. and Mrs. Doc Morrison and son of Edmonton spent a few days in Tofield last week.

A goodly number of Tofielders attended the dances at Ryley and Deville last week.

Mrs. Broughton and small daughter returned home last week. On Tuesday she left for Viking where she will visit with relatives.

Mr. Hudson of the Searle Elevator Company is on his holidays.

The Tofield Ball team won third money in the ball tournament at Ryley last week.

John Steil who has been at Dunmel for the past school year is visiting his mother here.

Miss Anne Lindsay left for her home in Innisfree where she will visit her parents for 10 days.

Mr. and Mrs. McLaughlin and family returned from a trip to the States. They report an excellent trip.

Miss Amy Green of Dutchess, is visiting her sister Dorothy here.

Miss Lois Thompson spent a few days at her home here.

Mr. and Mrs. Bert Lovell and family returned home last week after spending two weeks at Vancouver.

Miss V. Ball of Edmonton spent a few days with relatives and friends in the Tofield district this week.

Miss Eva Burroughs of Stettler is visiting at the McCarthy home.

Mr. and Mrs. Bissett of Dawson Creek are visiting friends in town.

FOR SALE.—6 ft. Binder in good running order. Also a fresh cow, 5 years old.—E. McClymont, Phone 1010, Tofield.

The [illegible] very well known [illegible] were advanced with the usual [illegible] argument as to statements of other parties.

DR. J. L. McPHERSON
Ryley
Social Credit candidate. Dr. McPherson is well and favorably known throughout the district.

CHARLES GORDON
Vegreville
Liberal Candidate. Businessman and prominent citizen. Past Mayor, Councillor and [illegible] of Vegreville.

Other Candidates

A. M. MATHESON
Edmonton
Real Estate agent. Sitting member and well known to everybody.

MR. PONICH
Vegreville
Conservative Candidate. Newcomer to political field.

Look at it This Way

❧

A retail store regards itself as being a public servant. Therefore, it is wholly fitting that it should try to be the best and most eager servant possible. A retail store which hides itself from those whom it wants to employ it become under-employed, and so its sales decline.

The public inclines in largest numbers toward those stores which seek its attention and custom. It takes the advertising store at its own valuation. It likes to do business with those who manifest eagerness to serve it. It likes to buy at those stores which have to renew their stocks frequently.

Advertising is just communicating news and information about one's store and service. It is just a form of talking. It is those who talk who are listened to. Silent stores lose out to stores which carry on conversation—in the form of newspaper advertisements—with those whose custom they want.

Any retailer who wants to get more customers—for the replacement of customers who become lost to him and for the expansion of his business—can surely get them by making his store important in their eyes, and by putting in his advertisements the kind of information which will help buyers come to decisions.

The Tofield Mercury advertising columns are the cheapest and most effective manner in which to get your message before the people you wish to cater to.

❧

THE MERCURY

ALBERTA NEWS BULLETIN

Issued from the Office of the Publicity Commissioner, Government Buildings, Edmonton, Alberta, August 5

Tourists from U.S.

Over 4,500 cars containing U.S. tourists entered Alberta at the ports of Coutts and Carway during the months of May, June and July, according to customs figures. It is estimated that nearly 20,000 passengers travelled in these cars. These figures do not include cars entering Alberta through the Crow's Nest Pass or Banff park.

Game Expedition

Harry Snyder, Montreal and Chicago oil magnate, left recently on the most extensive big game hunt ever to go into the far north from Edmonton. Flying in a monoplane, Mr. Snyder and his party will soar over the Barren Lands to take a census of the rare musk ox herds and study caribou migration. The party will search for the Barren Lands grizzly bear, then proceed to the Nahanni country and northern British Columbia after rare species of mountain sheep and elk. Over 4,000 air miles will be covered by the expedition.

Pure-bred Alberta Cattle for U.S.

Marking the third consignment of pure bred cattle shipped to the United States within the last three months, 155 head of cattle of different beef breeds, consigned to A. V. Lampmert, Redmond, Wash., have been shipped within the last two weeks. The stock is foundation material for improvement of herds in the U.S.

Board for Special Areas

Charged with the duty of administering all special municipal areas, a board has been set up by the provincial government, consisting of E. J. Gray, deputy minister of municipal affairs, chairman; O. S. Longman, field crops commissioner and William Hewlett, who has had wide spread experience in the work of administering special areas. There are several areas in the province that will come under the jurisdiction of the board and in this work it was deemed advisable to have representatives from both the municipal affairs and agricultural departments.

New Assessment Officials

Appointment of John W. Judge as director of assessments in the provincial department of municipal affairs, and James W. Chapman as supervisor of improvement districts, was announced as part of the reorganization planned in the Assessment Commission Act at the last session of the legislature. The new assessments director will take a large share of this type of work off the shoulders of the members of the commission.

Health Insurance Board Named

The new provincial health insurance board, named under the Act passed at last session of legislature, has been appointed with Hon. Geo. Hoadley, Minister of Health as chairman, and with Dr. A. R. Archer of Lamont as vice-chairman, and Dr. M. R. Bow, deputy minister of health as third member. All members serve on the board without remuneration. The new health insurance act has now been proclaimed.

Coal Production

Alberta coal production for the present year to the end of June was 2,341,524 tons, compared with 2,019,115 tons for the same period of 1934, showing an increase of 322,409 tons.

Coal Shipments to Ontario

Shipments of Alberta coal to Ontario markets totalled 24,000 tons from January 1 to May 31, according to figures supplied by the Dominion Fuel Board. This is an increase of 8,842 tons from 1934.

IMPERIAL OIL DISTRIBUTE SHARES

Distribution of 206,528 shares of Imperial Oil Ltd. with a market value exceeding $4,000,000 has been made within the past few days to 2,557 of the company's employees in Canada. Some of these shares went into practically every community in the country and a list of the occupations of the employees who received them would be almost endless.

In Manitoba 3,428 shares were distributed, in Saskatchewan 13,170, and in Alberta 21,849.

The employees acquired this stock over a period of three years through the company's Fourth Co-Operative Investment Trust. Due to the company's contribution and appreciation in the value of the stock the employees actually paid only about $1,600,000. G. Harrison Smith, President of Imperial Oil, commenting on this distribution said that years ago the shareholders had speculated on Canada's future by investing millions of dollars in equipment to serve consumers everywhere in Canada. As business developed the importance of maintaining a personal touch with the consumer and of promoting industry and enterprise became increasingly evident and so the plan of making employees part owners of the business was devised. "It is part of a general plan relating to proper and just treatment of labour" Mr. Smith said, "and is based not onyl on the belief that labour is entitled to good treatment but on the knowledge that efficient and economical operation of an industry depends upon a loyal and enthusiastic personnel. In most cases" he said, "when you deal with an employee of Imperial Oil you are dealing with a part owner of the company. Of 55,000 Canadian shareholders in the company, more than 5,000 are employees."

CANADA IMPORTS A "DEVIL"

Montreal, Que., August 12—It would seem that Canada has not troubles enough of her own these days without importing a "devil", but this creature is not out particularly to make trouble and furthermore he is securely crated, being quite contented providing he is supplied with proper food and water. It may be explained that this particular creature is not of the horned and hoofed variety but just another animal native to Tasmania who comes to Canada from the Zoo at Melbourne, Australia, as a good-will emissary to the Zoological gardens at Toronto, bringing greetings from his mammalian brethren in the Antipodes to his future associates of Riverside Park.

In addition to this Tasmanian devil, there are also four other crates in the shipment containing two wombats, akin to the opossum family, two Cape Barren geese and two Brush turkeys, all of whom are destined to accommodate themselves to Canadian Zoological ethics and take up housekeeping in Toronto, their permanent future home.

This shipment arrived here aboard the S.S. Cornwallis, freighter of the Canadian National Steamships in service between Canada and the Antipodes, this consignment of animals and birds being one of many exchanges which have taken place in the past between these two zoological gardens.

CARRYING COAL to NEWCASTLE

Halifax, N.S., Aug. 12.—Scientific progress seems to be upsetting a lot of commonly accepted phrases, at least that is the way it appears to work out in the case of the apple industry in the Maritime Provinces. "Carrying coals to Newcastle" is a familiar saying when one wants to convey a meaning of absurdity, but down in Berwick, Nova Scotia, a new process in dehydrating apples has been applied on a commercial scale and Nova Scotia is now sending dehydrated apples to British Columbia, according to the Industrial Department of the Canadian National Railways. British Columbia is itself a great apple growing province.

HARVESTING CEREALS AT DIFFERENT STAGES OF MATURITY

(Experimental Farms Note)

Experiments conducted at the Dominion Experimental Station, Lacombe, Alberta, have shown that a cereal crop does not have to be dead ripe when harvested in order to germinate well or produce a high grading sample of commercial grain.

Samples of wheat, barley and oats were harvested at two day intervals, following the period when the kernel was in the milk stage of maturity. It was found that kernels of wheat, oats and barley cut as early as the milk stage of maturity, would germinate one hundred per cent, provided they were uninjured by frost or some other agency. It was also found that the different cereals would attain the top commercial grades if harvested as early as the firm dough stage of maturity. It was shown that the yield, as well as the quality, was not reduced when the cereals were cut in the firm dough stage of maturity.

Surprising as it may seem, the colour of wheat, oats and barley, harvested in the firm dough stage of maturity, is frequently better than that of grain which was allowed to become dead ripe before it was harvested.

These studies showed that there may be a wide variation in the time of maturity of the grain in a field. In some cases this variation may amount to as much as ten days. For that reason, a number of heads should be examined before deciding to cut a field. If the field is cut when the earliest maturing heads are in the firm dough stage the later maturing heads will be immature so that cutting at that time will tend to reduce the comercial grade and yield of the grain. A field can be harvested when the latest maturing heads are in the firm dough stage without loss of either yield or quality.

Grain in the stook is not damaged by frost. In view of the fact that this year, a considerable acreage of grain has been seeded later than usual, with the possibility of an increased amount of frost damage to late seeded and late maturing crops, the possibility of harvesting all grain crops before they are fully mature is worthy of being given serious consideration.

A pleasing feature of the Canadian egg market in 1935 has been the active retail demand. Reports from a large number of centres indicate that retail sales of eggs have been more active during the summer and spring of 1935 than for some years past.

SOMETHING NEW IN RAILWAY TRAVEL

Vancouver, B.C., August 12.—Unique in the line of railway tours is one which arrived in Vancouver recently on S.S. Prince George. The party is made up of twenty-one residents of Minnesota who banded together to tour the United States and Canadian West, cheaply but comfortably. They used a colonist car on the Canadian National Railways throughout Western Canada, making their own beds and their own meals, providing their own entertainment and carrying their own transportation representative. After stopping off at Winnipeg and Jasper, they continued by train to Prince Rupert, where they boarded the Prince George.

Waiting for the King

Canadian undergraduates who go to the Old Country in their summer vacations enjoy many unusual sights and meetings but the group shown above, encountered its biggest thrill when the royal automobile was stopped and the King and Queen chatted with them about Canada.

This party is one of many from Canadian universities that visited Great Britain this year under the auspices of the Overseas Education League by the Canadian Pacific liner Empress of Britain.

They visited England, Scotland, Ireland and Wales and saw many famous schools and colleges in the British Isles, in addition to the sight-seeing features that are a part of every Old Country tour.

The group was viewing Buckingham Palace from the Mall when Their Majesties set out for a drive. They stopped the car and chatted with the Canadian students for 10 or 15 minutes.

THE TOFIELD MERCURY

USE YOUR HEAD—

BEFORE ANOTHER issue of this paper is published the electors of this province will have gone to the polls and by marking their ballot signified their wish as regards provincial government for another five years. At no previous Alberta election has their been so many parties in the field from which the voter may choose. The usual conception of democracy is that two parties occupy parliament, one actually governing and the other acting as a check, by opposing in a greater or lesser degree, legislation advanced by the governing party. By this means most everything is pretty well hammered out. Even so, democratic legislative errors are not unknown, and no such thing as perfection was ever attained. Perhaps this is one reason why the present multiciplicity of political parties developed, but we cannot help believing that too many parties tend to weaken legislative power rather than strengthen it. With no one party having a clear working majority, a situation develops which compels the party having the largest number to bargain and jockey for votes from the three or four other parties, thereby creating discord and confusion.

However the parties are here, all told about 250 candidates aspiring to office. There are 63 seats, which is plenty, so by far the greater number are bound to be disappointed. And 250 candidates being on hand, they have to be reckoned with.

Voters have been told so often that the coming election is the most important one Alberta has faced, that the force of the phrase must have lost a little of its original punch, even if it still remains true. But if it is an important one to the province as a whole, it is also a most difficult one to the individual elector. Confused as he or she must be by the conflicting arguments of the contesting parties, the individual voter is being thrown back more and more on his or her own reasoning powers, which, after all, is the pure escence of democracy.

And as an independent paper, on the eve of an election, this is the best suggestion we have to offer. Use your own reasoning powers to their full capacity. Attend the meetings held near you—all of them. Read carefully election literature coming to your hand, being sure to obtain some of every kind. Do not be swayed by anger or compassion, and don't allow yourself to be carried away by enthusiasm, but form your own opinion by constructive thought and cold logic. When you read or hear a speaker make a definite statement, turn it over in your mind several times before accepting it. If it is the kind of statement you should accept, it should be able to withstand the same blast of cold logic. Remember that you have something all parties want—your vote—and this should not be given merely for the asking, but because by the process of reasoning you have come to a definite conclusion that the man of your first choice represents the party most likely to administer the affairs of this province in what appears to you the most sane and sensible manner. While friendly discussions to obtain increased knowledge are helpful, out and out arguments are harmful to both sides, generally resulting in a more stubborn belief in the pet theories of those who are arguing. Mr., Mrs. and Miss Elector, the issue is up to you—**Use Your Head.**

A DEEP, DEEP MYSTERY—

WHAT MAY be listed as the one great mystery of the Canadian West was drawn to my attention the other morning. Upon stepping outside I noticed some two dozen new "binder" whips lying in front of Brace's store. I have been in Western Canada since the spring of 1907 and regularly as the seasons roll round, as soon as the fox tail appear on roadside and prairie, sure enough new binder whips are placed in a conspicuous position for all people to see—and if they feel so disposed, to buy.

Many changes have come over the west since 1907. The horse and buggy era has changed to an era of Fords and Chevrolets to say nothing of Plymouths and Dodges. Even off the roads on the farm itself, the puff, puff and chug, chug of the gasolene motor, in many cases displaced the hee and haw of the equestrian driver and the occasional whinny of a horse. But binder whips persisted in their appearance. It is true that of late years old dobbin has once again, partly at least, come back into his own, but surely in the decade of the twenties, with a dwindling number of horses and a steady supply of binder whips the saturation point must surely have been reached. But no, they keep on coming. A binder whip is rather a useless appendage in a modern Ford or Chevrolet [illegible] it has no place, and while we have printed [illegible] many auction sale bills, we never [illegible] listed to be sold. There was at one time a popular song entitled "Where do the flies go in the wintertime." Perhaps they follow the binder whips or the binder whips follow the flies—anyway, it's a deep, deep mystery.

IN HYDE PARK

(By P.P.S. in Christian Science Monitor)

"MAWBLE AWCH!" cries our Cockney conductor, and we alight from our bus. Park Lane looks substantial as ever, and the cultured voices of Mayfair are discussing above the tinkle of rare china the recent performance of "Prince Igor," or the Ballet Russe, or cricket at Lord's. Bloomsbury boarding houses and residential hotels in Kensington still find abundant conversational material in the pageantry of kings and queens and princes, dukes and belted earls.

But what of the rest of London—the keepers of little shops, the office clerks, the drivers of lorries, the potboys, the greengrocers, the porters, the sweepers of streets? They have plenty to say and they're saying it, saying it out loud. All of Hyde Park Corner is occupied, this Sunday afternoon. About twenty little groups of people, each with an orator, highly communicative whether informed or not, extend for a hundred yards or so in front of the trim palings and the emerald English grass. Two broad shouldered "bobbies" stand at the bavement edge, where bicycles are parked.

"That's what's the matter with England," we hear above the din, for while all the speakers are making as much noise as they can, the loudest voice of all belongs to a hatchet-faced individual in a greasy collarless suit, who keeps pushing the long, black hair out of his eyes and shaking his fists at his audience as if nothing would be sweeter than the chance to beat them up. "That's what prevents you, my friends, from 'aving a free and an 'appy life," he continues. "Nah, mind you, I down't sigh anything aginste Japan. She cawn't 'elp it. ."

" 'ark too the lamb and salvition," chants the choral religious group, but he is equal to such competition, and again his voice crackles through the air. "Yew can go into a shop there, in the Strand, cawn't yer, and buy a pair of trowsers and an 'at, a shirt and a pull-over, but can yer buy British? No! Because yer down't get enough wige to buy even a British 'at."

"Aw, go on," shouts a heckler. "Yer down't know wot yer talkin' abaht."

"Yew stop doing that, will yer? 'ere I am, trying to give a scientific lecture, and yew keep briking in. Nah, I've shown yer sufficient tolerashun, and if I'm interrupted again I shall certainly do the sime as they did to me last week. Nah, don't be an old washerwoman!"

It begins to pour, but the orators go vigorously on, and their audiences remain. The placid citizens on the little green chairs nearby merely put their umbrellas up and continue to watch people pass. Suddenly a wretched-looking woman, who has been standing at one side, joining in the evangelist choruses, mounts a little stool, and clutching her shabby handbag to her breast, screeches, "Too-day, my friends, you have been bought with a price," and starts a hymn going, while a motherly soul, passing by, plaintively rebels against further park strolling and asks her companion, "Oh, Mary-Jine, ain't we going teawards?"

Here is an earnest if unpolished young Jew, under a Zionist flag, proclaiming that Fascism isn't what it's cracked up to be. But he is drowned out by a poetic-faced lad, who may be over twenty but looks about eighteen. He is the speaker for the "Empire Crusade", and in excellent language he sets forth his argument for isolation. "You should get out of Europe and develop our empire," he urges, "we must keep out of European entanglements." Fiery disagreement comes from a rosy-faced, round little man twice his age, who demands to know, "And 'ow can you carry on as the leading power in the world if you shut yourself up in a water-tight compawtment?"

Beneath a banner which reads, "Call our Religion Islam, not Mohammedanism," a frizzy-haired man invites London to be saved.

There is an impressive repetition of the Lord's Prayer, while the preacher and his audience bare their heads. Then bowler hats, and felts, and cloth caps, once again replaced, the group becomes more interested in the lively, unwashed Irishman under a banner of green, orange, and white, who is wittily controverting the report he had received that De Valera was a Jew, and imploring every Irishman, whether he may "coom from New York, Hawaii or Honolulu" to remember that England had a prime minister from Lossiemouth.

The largest group of all centers about a brush haired, pugilistic individual who flourishes a red board with white letters spelling, "INTERNATIONAL SOCIALISM." He is also, and consistently an atheist, though he admits, apologetically having been brought up Church of England. His challengers cannot follow his metaphorical meandering into metaphorical dissertations wherein the higher qualities are symbolized by a cup of tea. He finds them even less sympathetic on the subject of economics, and when one of them who looks like a jockey, cries fiercely, " 'ere, 'old yer 'orses, we read books as well as you," he decides it is time for refreshment. And we think so, too.

HOW TO VOTE

Explanation of the Single Transferable Ballot Used in Provincial Elections in Rural Divisions

The Observer has been asked several times during the past few weeks to explain off hand the method of voting in provincial elections; also how the ballots are counted in order to make second or third preferences by voters effective.

The ballot used is called the Single Transferable Ballot, meaning that voters express their choices, if they so desire, by use of the figures, "1", "2", "3", and so on according to the order in which they prefer the various candidates. **Voters must not use the "X" in these provincial elections.** To do so makes the ballot invalid and it is thrown out by the returning officer. Voters must indicate their first choice by the use of the figure "1". If they like they can stop there and their vote is called a "plumper." But it is just as well to exercise the right of choice and make the figure "2" opposite the name of their second preference, and if there are enough candidates in the field to justify it, the exercise of a third choice by use of the figure "3" opposite the name of their third preference. Voters will understand, we hope, that the exercise of preferences is largely dictated by the number of candidates nominated. If only two candidates, the figure "1" is enough; if three candidates, the figures "1" and "2" are advisable; if four candidates, choices extend to "3" and so on.

The purpose of the Single Transferable Ballot is to make certain that the candidate finally declared elected really represents the choice of the voters as expressed in their first, second and third preferences. For that reason, the Observer urges voters to exercise at the very least, their second choice in the coming election. These second choice votes are almost sure to decide the election in this division.

Method of Counting

There is nothing intricate in the preliminary count of ballots in this system of voting. The first choice votes are given first consideration. If any one candidate has a clear majority of first choice votes over all others combined, he is elected forthwith. But in case no such majority is obtained on the first count, the candidate having the least number of first choices is dropped out and his second choice votes are considered and allocated to the others still remaining in the field according to the way they are marked. If this does not result in the election of one candidate by a clear majority, then the next lowest man is dropped and his second choice votes considered and allocated. This process is continued until the final count is between two candidates only, of whom one is almost sure to be declared elected; but in the event of a tie vote resulting on this last-mentioned count, it is our opinion that the returning officer had better throw up his hands and let some one else complete the count.

However, it is very unlikely that it will be necessary to take third choices into account when only four candidates are in the field. Of course, it is among the things that might happen.

An Illustration

To illustrate the method of counting, we will say that there are four candidates in Vegreville, Brown, Jenks, Jones and Smith. On the first choice votes, Brown gets 1100; Jenks gets 1000; Jones gets 900; Smith gets 800.

Smith being low man, is eliminated. His ballots are looked over for second choices and result like this: Brown gets 200; Jenks gets 300; Jones get 300. The standing then is: Brown 1300; Jenks 1300, Jones 1200.

Jones is eliminated. His first choice ballots are examined for second choices and found to give Brown 350; Jenks 550. The standing then is Brown 1650; Jenks 1850. Jenks is thereupon declared elected, as he has a clear majority of first and second choices combined over Brown.—Vegreville Observer.

CREED TO GOVERN COMMUNITY LIFE

Down in Fort Worth, Texas, the city has a creed to govern its community life. The creed is now being adopted as a policy of personal conduct by the progressive citizens of many progressive towns and cities. Citizens who refuse to take part in progressive movements but content themselves with destructive criticism, hamper civic progress.

Consider, particularly, the potentialities for good in the citizen who refrains from disparaging remarks about his city, its institutions and his fellow citizens; casts his vote on all public questions, civic, provincial and dominion; seeks not to evade jury duty, patronizes home merchants; lets no day pass without doing to the best of his ability some little bit looking to the betterment of his community.

We have never been in Fort Worth nor do we know much about the place, but if its citizens are to any large degree actuated by the spirit of this creed, it must be a fine city in which to live and do business.—Canadian Statesman, Bowmanville, Ont.

KETCHAMOOT

Miss Mabel Lawson is enjoying a ten days holiday visiting her sister, Mrs Harold Smith and family at Vancouver

Mr and Mrs Wm Lee and daughter, Viola, motored to Mundare and Lamont on Friday of last week, on a business trip

Miss Kate Carde[illegible] of Vermilion is housekeeping at the Schultz home

Mr and Mrs Chester Coombes and family motored to near Ashmont to visit Mrs Coombes' [illegible] ther and other relatives returning home Saturday

Miss Viola Lee entertained the Social [illegible] Club at her home Thursday of last week. A goodly number of members and visitors were in attendance

A shower was planned on Mrs Stanley Brown [illegible] at her home Thursday afternoon of this week August [illegible]. A dainty lunch was served by the hostess and a [illegible] afternoon was spent. The September meeting will be held at the home of Mrs Harry McGinitie

A [illegible] afternoon was spent on Wednesday afternoon of last week, when Mrs Oscar Barnes entertained the Ladies Aid and several visitors [illegible]. Mrs McCowen as president conducted the meeting. Flowers were ordered sent to Mrs [illegible], whose husband, the [illegible], former minister here, passed away recently. The September meeting will be held at the home of Mrs A J Williams

Mr Jack Appleby took advantage of the excursion and is enjoying a short holiday at Vancouver

Mr [illegible] Sheppard and Mr Kitchener of Edmonton were guests of Mrs C Williams

The Junior U F.A. held a weiner roast and fire side meeting at the picnic ground on the Sears farm. A large crowd of young people, besides having a jolly sing-song, listened with much interest to a splendid paper, given by William Davison, on the Bad Lands of Alberta. Sandwiches, cake and coffee was served with the weiners and a jolly time was had

Clifford Appleby took in the Camrose fair as a guest of the Junior U F A camp

On Sunday Mr L Carlisle took a truck load of friends and neighbors to Lakeview, Cooking Lake. Dinner and supper was eaten together and a pleasant day was spent. Among those present were Mr and Mrs L Carlisle and family; Mr and Mrs Earl Carlisle and family; Mr and Mrs Berreclough and daughter; Mr and Mrs J H Ingram; Mr and Mrs Moan of Tofield; Mr and Mrs Shupe, daughter Irma; Mrs. Davison and family, Mrs Sears, Albert and Stanley, Messrs C A Ingram, Geo Simpson, Robert Cameron; Lyle Coombes and Clifford Appleby. Others seen at the Lake were, Mr and Mrs A J Williams; Mr and Mrs Fred Williams Mr and Mrs John Lee and family, Martin Lawson, Roy Whillans and Jack Fasa

LAKESHORE

Mrs T E Seale entertained a number of ladies at her home on Thursday in honor of Mrs Ethel Barnes who was her house guest for several days last week

Mr and Mrs Neil MacKinnon of Mannville were visitors at the Phillips home on Sunday

The Misses Beulah Johnston and Ethel Graham are camping at Elk Island Lake this week.

Mesdames Johnston, Wood, Phillips and Graham played bridge at the Graham home on Tuesday afternoon. As usual when this foursome plays the battle was hard fought. When the smoke cleared away Mrs G and Mrs P were a little in the lead. Better luck next time Mrs J and Mrs W

Mrs Russell Ferguson, Mr Phillips and Miss Grace MacKinnon were guests of Mrs T E Seale on Friday afternoon of last week

Owing to bad weather and worse roads the barn dance at T. A Jones in honor of Mrs Art Ho[illegible] birthday was poorly attended

---

Like wheat grown in India, nearly the whole production of rice in India (apart from Burma), although amounting to more than one-third of the total world production, is absorbed by the 350,000,000 inhabitants of India

---

"There's one thing I don't like about this horse," remarked the man who had just conducted a deal, "she won't hold her head up."

"That's only her pride," said the dealer "She will when she's paid for."

C GALLENGER SELLS CLASSY CALVES

Claude Gallinger has just completed the sale of a very good dark red bull calf Cupbearer Danny to Geo Calder of Innisfail

To use Mr Gallinger's own words he considers this the best prospect for a breeder's bull that he has sold yet. His sire is Danny B and his dam a Roan Lady purchased by Mr Gallinger from the Idaho State college, Moscow

Danny Boy is sired by Abbie Prince Regent by Royal Barber and his dam is by Newmoor Jasper. Danny Boy was the sire of the highest priced Shorthorn bull $525 sold at the Calgary spring bull sale

Another calf from the Gallinger herd, was the [illegible] calf Leader Bar [illegible] Bar Bros of Vermilion

This calf was [illegible] has [illegible] Quarterbar's Leader and he is by Quarterbar [illegible] the best breeding sons of Quarterstar [illegible] herd sire for Will Dryden, the Ontario stockman. The dam of this bull is August 21st, and her great grand dam was imp. Augusta 112[illegible]

These young bulls are exceptionally well bred, are good individuals and should prove valuable assets in their new homes

QUALITY IN BINDER TWINE

The binder twine now being used to harvest Canada's grain crop comes from a number of sources. Canadian made twine supplies a large part of the domestic demand and considerable quantities made in the Dominion are exported to other countries, but, binder twine from several other countries has come to share the Canadian market. The greater part of the importations into Canada are from Great Britain, Ireland and Holland and in recent years small quantities have also been received from Belgium and Germany

The law requires that each ball of binder twine sold in Canada shall bear a label stating the number of feet of twine per pound in the ball, whether 500, 550, 600 or 650 feet. This is a case where quantity is the estimate of quality. Inspectors of the Dominion Department of Agriculture Seed Branch inspect Canadian made twine at the places of manufacture and imported twine at storage warehouses, and by a system of measurement and calculation determine the actual number of feet per pound as compared with the length guaranteed

Results of binder twine inspection in recent years have shown a steady improvement in both Canadian and imported twine used in Canada. More than three hundred samples were taken of the twine distributed in Canada in 1934, the tests of which showed that 47 per cent had actually more twine to the pound than was guaranteed and 14 per cent had exactly the length guaranteed. The remainder of the samples had some shortage which was inconsiderable in most cases and only 2 5 per cent had a shortage of over five per cent, which is the limit of shortage allowed by law

Tensile strength in binder twine is not subject to legal control. Inspectors, however, give some attention to this factor but it is now seldom that a sample is found in which the tensile strength is too weak for ordinary grain binding.

FRUITS AND VEGETABLES FOR HEALTH

The human body needs minerals and vitamins the great natural elements for health and growth which are supplied by fruit and vegetables

Minerals such as iron, calcium, phosphorus, iodine and sulphur have been called the balance wheels of the human machine as they neutralize the acid condition of the blood. They are found in proper combinations and in varying amounts as nature provides them in vegetables and fruit. Spinach, celery and cauliflower are richer in calcium. Strawberries, tomatoes, potatoes, spinach, cabbage and carrots are good sources of iron. Lettuce and onions provide appreciable amounts of phosphorus

Vitamins, essential to health, are necessary for growth and protection from disease. Different vitamins are found in various foods. Beans, carrots, apples, tomatoes, spinach, are valuable sources of vitamin A. Cabbage, lettuce, green peas, spinach and tomatoes give vitamins B and G. Apples, cabbage, peas, strawberries and tomatoes provide vitamin C

Starch and sugar are found in potatoes, parsnips, beets, carrots, corn, peas and beans, and supply fuel for body heat and energy. Legumes (ripe peas, beans and lentils) contain nitrogen and are used for tissue building

The efficient home-maker knows the proper food to serve her family. She also cooks and serves that food so that it will be eaten, enjoyed and probably more wanted

M.D. OF BEAVER LAKE COUNCIL MEETING

A regular meeting of Beaver Lake Municipal Council was held at Ryley on August 10th, 1935. All councillors were present.

On a motion by Mr. Lucas the minutes of the previous meeting were read and adopted.

Mr Sam Hamilton called on the Council and an order for an 8-ft. maintainer for Div. 4 and a 10 ft. maintainer for Div. 6 was given and approved

Moved by Mr. Lucas that we pay J. H. Kennedy car damage to the extent of $56 33 —Carried

It was decided to deduct one half of the above amount to be paid to Mr Kennedy from the road foreman's pay sheet, owing to the fact that it was an irregularity on his part that caused the damage.

Moved by Mr Lucas that we give the Consolidation Bylaw for 1935, three readings, and pass same. And that secretary should accept Consolidation applications only when all specifications have been carried out.

Moved by Mr Hillerud that we approve of the action of the reeve and secretary in settling the Vegreville Hospital action in the case of Mrs Kudrovich for $350 00.

The secretary was instructed to advise Mr. Henry White to report to Mr. Moen regarding weed inspection. The secretary was also instructed to forward a bill to the Village of Holden for $45 00 covering road work done by Municipal road men

Moved by Mr. Kobin that the next meeting be held on September 14th at 8:00 p m

Moved by Mr Kuhn that no cash be paid for road work to anyone other than foremen or workers.—Carried

RICE AND JAPAN'S ECONOMIC LIFE

In view of the prolonged negotiations between Canada and Japan, the following extract on the Japanese economic conditions of agriculture from the 1933—34 report of the International Institute of Agriculture may be of interest. It is needless to repeat here, says the report, that the whole of Japanese agriculture rests in quite a particular way on two products only: rice and silk. Although there has been evidence in Japan in recent years of a certain tendency to emerge from the "rice-growing economy" characteristic of its economic structure hitherto, it is unquestionable that rice remains, nevertheless, the most important product of the whole economic life of Japan.

It must be added, in order to see the problem more clearly, that when we speak of rice, we mean Japanese rice, that is to say, rice produced in Japan properly so-called. The Japanese people find that foreign rice has not the taste of the homegrown article, and this explains why the production at lower cost of Indo-Chinese or Siamese rice can in no way supplant home-grown rice nor compete with it. Only in famine years, when the price of rice is too high, are the poorer classes of the population constrained to replace home-grown rice by imported rice which, because of its lower price, is within their power to purchase. In recent years the Japanese colonists have succeeded in improving the quality of the rice produced in Korea and Formosa and the pressure of colonial rice production has already begun to be felt on the domestic market.

On account of the preference of the Japanese people for home-grown rice, the importation of rice from abroad is practised only in so far as it is necessary to make up for the deficiency of the home production and it has no influence on the rice market. In the family budget, the purchases of rice represent the largest item, being often as much as 23 per cent of the total expenditure among the poorer classes of the population. Thus, there is no room for wheat

THE HERALDS OF RAIN

(By N Baptist, Tofield, in the Family Herald and Weekly Star, Montreal

O, its going to rain tomorrow,
And this is how I know,—
The clouds hang dark and lowering,
And the gulls are flying low!

The gulls are flying low tonight,
And that means "Rain" you know;
Calling, circling 'gainst the blackness
Like the winter's swirling snow,

O the clouds, they mock, they pass us,
Nightly come and fruitless go,
But the gulls will never fail us,
Swooping, swinging to and fro

O, it's going to rain tomorrow,
The flowers need it so!
The listless wheat stands bleaching,
O, thank God the gulls fly low!

It will soothe old Earth's bare bosom,
Her life-blood once more will flow
Rain will fall like benediction,
All because God's gulls fly low

Here and There

Fine percheron stallions, smartly groomed cavalry chargers of the mounted police, racing and pacing horses and mounts trained in jumping and for the hunting field mingle at the village of Montebello, P.Q., on the north shore of the Ottawa, for the annual Seigniory Club Horse Show this summer during August 15-18, Thursday to Sunday. A musical ride will be put on by the Royal Canadian Mounted Police. The event is under the patronage of His Excellency the Governor-General and Canadian and American society folks are expected in large numbers.

Enjoying a short stay at the Banff Springs Hotel on his way to taking up his post in London, His Excellency T Matsudaira, Japanese Ambassador to Great Britain, stated to an interviewer, "I prefer just to enjoy myself and to forget for a few hours that there are more arduous duties than the contemplation of this lovely place."

Addressing a gathering of the Rotary Club of Victoria at the Empress Hotel, recently, Premier Joseph A. Lyons, of Australia, pointed to the British Empire as a great force for peace and urged Canada to cultivate a more favorable trade with his own country. Last year, he said, Australia bought from Canada $18,000,000 worth of goods, while Canada bought from Australia only $4,000,000 worth.

The Algonquin Hotel, St. Andrews-by-the-Sea, New Brunswick, opened for the summer season at the end of June, and is now the centre of much holiday activity. Their Excellencies the Governor-General and Lady Bessborough were among the guests and the famous Katy's Cove bathing beach is again as in former years very popular with the children and the younger set.

With the increasing popularity of vacation trips on the Great Lakes, the Canadian Pacific has expanded its Great Lakes steamship service to include calls at Port Arthur on westbound voyages as well as eastbound. These ships have been outfitted with deck sports, including quoits, shuffleboard and deck golf. Dancing and music bring pleasure to the evening hours. The schedule makes it possible to take an enjoyable week's trip going either way with overnight stops at both ends, Port McNicoll and Fort William.

The Maritimes are again this year attracting a large number of tourists from Canada and the United States. Across the Bay of Fundy there is a very pleasant steamer trip from Saint John to Digby where the Pines Hotel is located and from Boston to Yarmouth with its well known Lakeside Inn, there are regular sailings. Also the Cornwallis Inn at Kentville is a first-class centre for trips to the famous Evangeline Country around Grand Pre.

August is the peak month at the Banff Springs Hotel when between August 26-31 golf amateurs of the world will compete in the historic Prince of Wales Trophy and the Willingdon Cup. The course, a mile above sea-level and set in the midst of some of the most glorious scenery on the continent, is the locale of the play.

CHICAGO PORK PRICE UP BY 350 PER CENT

Chicago, Aug. 14—Wholesale prices for fresh pork in the Chicago area Wednesday reached a high of $29.50 a hundredweight or more than 350 per cent increase in two years.

Gain Tuesday amounted to an even dollar and brought prices $23 higher than the extreme low of $6.50 a hundred pounds in 1933.

Admitted causes of the record prices were last year's drouth with the consequent shortage of corn, principal food for hogs, and the loss of export market for pork. Shipments of live hogs to Chicago now average about one-third of last year's receipts at this season.

FIRST SNOWS FALL IN NORTH

First snow of the season fell in the north Wednesday morning at Hudson Hope. The snow fell during a continuous 30 hour rain and remained unmelted on hills near Hudson Hope. No other norther points reported snow although rain throughout the north was general Tuesday night.

Popular Priced Sweaters

School Opening and the Approach of Cooler Weather Necessitate Immediate Consideration of These Serviceable Wool Garments

IMPORTED WOOL PULLOVERS 89c to $1.00—

FAREWELL DINNER

On Tuesday evening at the Royal Alexandra Hotel a farewell dinner attended by members of the bank staff and Rev. Wallis, was held in honor of Miss Thelma Noland who is leaving the service of the bank to become a bride. A presentation of a beautiful radio lamp from the bank staff was made [illegible] the Bank of Montreal presented Miss Noland with a cheque of generous proportions.

Miss Noland, who has been with the bank for the past eleven years, was much moved by the presentations but expressed thanks for their kind generosity.

CANADIAN PUPILS WEAKEN KIPLING

Eastbourne, Aug. 14—Rudyard Kipling, shyest of Britain's celebrities, broke a vow against speechmaking to tell a group of Canadian boys and girls Tuesday that "England is as much a possession of Canada as Canada is a possession of England."

Kipling had consented to face the audience of 84 graduates of Canadian secondary schools at St. Winifred's school, Eastbourne, on condition he need not make a speech. The Canadian boys and girls, visiting England for six weeks under the auspices of the Overseas Educational League, won his heart, however, and he made a brief speech.

He wanted in particular to know about the economic conditions on the prairie provinces and the effect of the drouth there.

Kipling met them in the school yard, talking first to the boys, who were in one group and then to the girls. He was at once on the friendliest terms with them, told them stories, joked with them and asked them questions about the places they had visited.

"I've Proved Firestone Safe at Any Speed" says Kelly Petillo

IN every community are records of individual sets of tires, but Firestone have been proved for sixteen years in the 500-mile Indianapolis Speedway Race. Fearless drivers who stake life and victory on tires choose Firestone as the safest and most enduring.

Accept with confidence the recommendations of these men—Firestone are safe for them and safe for you. See the nearest Firestone Dealer today.

Town Council

A regular meeting of the town council was held on Monday evening August 19th at 7:30. Members present were Councillor T. W. Taylor, deputy mayor, and Councillors Chapman, Bellamy and Hammond. The business transacted was of a routine nature.

ANGLICAN PICNIC

The usual annual Anglican Sunday School Congregational Picnic was held at Lakeview on Wednesday, August 21st. A goodly number of cars left the church at 2:30 p.m. It was a delightful day and all enjoyed the drive out as well as the happy time spent at the lake. Swimming, games, and picnic lunch and social time added to the day's enjoyment. Our thanks are due to those who kindly loaned their cars and to the W.A. and friends who supplied refreshments.

A Confirmation service was held at St. Peter's, Ardrossan on Sunday, August 18th. There were nine confirmed candidates—seven ladies and two boys. The service was conducted by the Lord Bishop of Edmonton, assisted by Rev. Wallis. The church was filled to overflowing.

GORGEOUS DAHLIAS

A bouquet of gorgeous dahlias was brought to the Mercury Office this week by Mr. Ab. Sinclair. These were from his residence garden. Mr. Sinclair is an amateur gardener of note and has some very nice flower beds. The dahlias were of different colors, very brilliant and of large size.

On Thursday afternoon of last week members of the Lee and Brown families paid a surprise visit to the home of Mr. and Mrs. Stanley Brown. After a pleasant visit, a delicious lunch was served. Those present were Mr. and Mrs. William Lee, Mrs. Lawson, Mr. and Mrs. Roy Lee, Mrs. John Brown, Mrs. Leslie McGinitie and Misses Janet and Ethel Brown.

PARALYSIS STRIKES THREE MORE IN EDMONTON

Three new cases of polio myelitis, commonly known as infantile paralysis, have developed this week, bringing the Edmonton total to seven with two deaths. It was announced by the city health department Wednesday. The latest death, that of a seven-year-old boy, occurred Tuesday night

A number of suspect cases are under observation but health authorities emphasized there was no cause for undue alarm

One of the new cases reported was a young girl, who has been ill for some time and is now practically recovered, whose disease was diagnosed as polio only Tuesday

The other new case is a nine-year-old girl whose condition is said to be "not serious."

CUB WOLVES DEVOUR YOUNG FAWN ALIVE

North Bay, Ont., Aug. 21.—Nature in the raw can be relentlessly cruel, a party of United States tourists were convinced as they recalled today the grim woodland tragedy unfolded before their eyes in the cold grey dawn of a northern Ontario morning

Returning from a fishing trip on the Martin river, a few miles off the Ferguson high-way near here, they saw a she-wolf and two cubs eat alive a young fawn

Startled by frantic threshings and the snarl of fighting beasts in the bush, they edged closer and closer and witnessed the two cubs pouncing on the helpless fawn as the she-wolf slinked nearby

Once the fawn got to her feet but was tumbled by the she wolf and the cubs returned to their vicious attack. Making one last, desperate effort the fawn lashed out with a hoof and caught a cub between the eyes. They sneaked away and the she-wolf in two slashes of her claws ended the life of the fawn.

The Ayrshire cow, Onslow Lass, bred and owned by Miss Mary Hooper, Picton, N. S., has recently completed a second record of over 20,000 pounds of milk, 20,411 pounds to be exact. The previous year at seven years of age she gave 20,685 pounds of milk

Social Credit Swept Into Power

LIKELY TO HAVE OVER FIFTY SEATS OUT OF SIXTY-THREE

William Aberhart Willing to Be Premier

In one of the most exciting elections ever held in this province, the Social Credit party of comparitively recent origin, was swept into power on Thursday of this week. Practically all the U.F.A. stalwarts were left behind in the running as well as several Liberal and Conservative former members. At time of writing the Social Credit party are credited with 43 wins and are conceded between 50 and 55 seats. W. R. Howson the Liberal leader is elected as is also Mr. Dunning the Conservative leader. Calgary has four Social Credit wins and one Conservative and one Liberal.

Immediately the first returns began to come in it was obvious that the Social Credit party was making great gains but few people were of the opinion the Social Credit-ers win would be so decisive. Thus for the first time in history a government has been elected on a definite promise to pay a monthly dividend to all citizens. While not a candidate on Thursday,, William Aberhart has been invited and has expressed his willingness to accept the responsibility of the premiership. During the last few weeks of the campaign the Social Credit party was subjected to heavy adverse criticism, their opponents emphatically claiming the Social Credit promises could not be fulfilled and the Social Credit-ers just as emphatically claiming that they could. Time alone will tell. Having been given such a decisive mandate by the people of this province, it is now the duty of Albertans to co-operate with the new government.

The new member for the Vegreville constituency of which the Tofield district is a part, is Dr. J. L. McPherson of Ryley, who secured a clear cut victory over the Liberal candidate who was second. A. M. Matheson, former U.F.A. candidate came third and Mr. Ponich, Conservative,

LOCAL AND PERSONAL

Rev and Mrs Allen returned to their home here after a two weeks vacation at the coast.

Mrs. Imler and family returned from Pigeon Lake where they have spent most of the holidays.

Mr and Mrs Clutterham returned home on Wednesday after motoring to Portland, Oregon

Mr. and Mrs. Abbott returned home after spending some time visiting their daughter, Mrs. Brady of Edberg

Mrs M. McIleffey and small daughter left for Edmonton on Wednesday where they will make their home. Murray will join them later.

Mr. and Mrs. Eldred and family left this week for a two weeks vacation

Mrs Swift and Annie returned on Wednesday after spending a month at the Coast.

Mrs Henzell returned to her home in Edmonton after visiting at the Lovell home.

Specials on Avon and Perfection Products until September 7th. Avon Toothpaste—Giant Size Tube 15c., to every customer who gives an order for other Avon or Perfection products. Two boxes of Avon Face Powder for $1.38, regular price 91 cents per box.—Mrs. J. W Robinson, Agent, Phone 43.

Mrs. Noland and Thelma spent a few days in the city this week

Mrs. L. W. Smith, Audrey and Freddie returned from California on Wednesday

Mrs. McCauley, Helen, Margaret and William returned after spending their holidays at Calgary and Banff

Mrs Doxsee and Messrs. Schunk and Hume arrived at Tofield from Vancouver recently and have taken up residence at the Doxsee farm west of town

Mr Angus Campbell, who resided in this district for many years, and who now resides at Saskatoon, is visiting relatives in the Kingman district.

AMISK CREEK

The field day held at the E. A. Moen place, August 8th, was very well attended by people from the surrounding district. Mr Eagleham from Vegreville gave a very interesting talk about the different grades of wheat and oats and other things about agriculture. The young people sold ice cream and lemonade and the Ladies' Aid took the opportunity to raffle off a quilt. Mrs P O Flaaten was the lucky winner with number 25. The Shonts girls played a friendly game of Soft Ball with the Ryley girls. The score was 20—37 in favor of Shonts

The Young People had their monthly program in the church on Sunday the 11th of August. Quite a number were present. Arnold Berg gave a very interesting report from the Young People's Convention held in Viking

Mr A Haugen, Lilly and Arthur, motored up to Flat Lake to meet Thora Haugen who had been visiting up there for a couple of weeks.

The Ladies' Aid held their monthly meeting at Mrs. R. O. Berg's home on Thursday of last week. Nine members and many visitors were present. Mrs C Erickson and Mrs P O Flaaten gave interesting reports from conventions held in Camrose. Stitching a quilt was the work for that day

Jack Frost visited around here last week. Some of the tender stuff in the garden such as beans, tomatoes, cucumbers and several other things froze. Potato tops and corn also, but we hope the grain isn't hurt too much.

Mr A Erickson returned from the States some time ago. He reports a very nice trip

Ruby, Lilly, Alice and Arnold Berg and Agnes Annebo attended the Young People's Convention held in Viking first week of August

Mr and Mrs H Hillerud and daughter motored to the city last Sunday and visited with their youngest daughter, Beulah, who is at the General hospital and who have recently under gone an operation. We are glad we can report she is getting along fine and is expected to be coming home soon.

The Young People and Sunday School combined held a picnic at S. [illegible] Cooking Lake last Sunday

Mr and Mrs A Steer were callers at the E A Moen home last Sunday

Mr and Mrs J Blackburn and children were visiting with Mrs Blackburn's mother, Mrs K Olsen for a few days. They have now returned to Lavoy

Mrs I. Watt, son Gordon and daughter Doris from Edmonton have been visiting with Mrs K Olsen, mother of Mrs Watt, for some time. Gordon returned to the city again last Thursday

Miss Olive Olson returned from Saskatoon recently where she has been visiting with her cousin

Lilly Berg has been sick in bed for a few days. The flu is still with us. We hope for a speedy recovery Lilly

Pearl Patterson visited with friends in Ryley last week

Mrs H Jenson, Mrs A Haukedal and children, Miss H Jenson, the Misses Ida and Mabel Ausmo and Mr O Lund and O Stokkern were callers at the Flaaten home last Monday

Mr. and Mrs I Annebo, Magda, Hennie and Palmer were visitors to Mrs Breckan's home in Bardo last Sunday

Mr and Mrs C Ward and children returned from Banff last Saturday

Misses Beret and Alfrida Berg spent last week holidaying at South Cooking Lake

Mr and Mrs Sorenson from Poe visited at the Erickson home last Wednesday evening.

Ruby Berg and Mr and Mrs Sand, of Edmonton were visitors at the Berg home Saturday evening

---

The Ontario approved Turkey Breeders Association inspection work has been greatly increased with 2,000 turkeys eligible for approval inspection in 1935 against 662 in 1934

2,000 BATTLE FOREST FIRES IN MARITIME HEAT WAVE

Halifax, Aug. 20 — Sweltering in tropical heat with no sign of relief more than 2,000 volunteers were fighting fires in the forests of the maritime provinces Tuesday

At least 1000 men were recruited in New Brunswick's great timberlands where 60 fires were reported, while others were spread out over Nova Scotia and Prince Edward Island, combating [illegible] they had battled for nearly a week.

Farmers [illegible] were reporting heavy losses as crops [illegible] and orchards began to show the effects of drouth

A week-[illegible] death toll [illegible] in the three provinces was swelled to 42 as three more [illegible] were reported Monday [illegible] New Brunswick and [illegible] Nova Scotia and a Cape Breton farmer died from the effects of sunstroke

The highest temperature reported since the heat wave began last week was at Milford Station N S Monday, 107. Antigonish N S reported 105, New Glasgow 102 and North Sydney 102

Freshly [illegible] Tuesday included destruction of an entire new settlement of [illegible] at Chiverary in Gloucester county New Brunswick

Residents [illegible] saved only what they were wearing. They took refuge at Big River, and preparations were under way for their relief

FINAL ELECTION MEETING HELD LAST MONDAY

A crowded hall greeted the Liberal speakers at the Variety Theatre on Monday. Joseph Rogers occupied the chair and speakers included Hon Duncan Marshall, Chas Gordon and A L Horton. All speakers were given a respectful hearing and accorded applause

During the question period difference of opinion was expressed

Look at it This Way

A retail store regards itself as being a public servant. Therefore, it is wholly fitting that it should try to be the best and most eager servant possible. A retail store which hides itself from those whom it wants to employ it become under-employed, and so its sales decline.

The public inclines in largest numbers toward those stores which seek its attention and custom. It takes the advertising store at its own valuation. It likes to do business with those who manifest eagerness to serve it. It likes to buy at those stores which have to renew their stocks frequently.

Advertising is just communicating news and information about one's store and service. It is just a form of talking. It is those who talk who are listened to. Silent stores lose out to stores which carry on conversation—in the form of newspaper advertisements—with those whose custom they want.

Any retailer who wants to get more customers—for the replacement of customers who become lost to him and for the expansion of his business—can surely get them by making his store important in their eyes, and by putting in his advertisements the kind of information which will help buyers come to decisions.

The Tofield Mercury advertising columns are the cheapest and most effective manner in which to get your message before the people you wish to cater to.

THE MERCURY

WHEN MILK SOURS

Despite the attention the particular homemaker pays to keeping the milk supply down to actual requirements during the hot weather, a certain amount of sour milk is apt to accumulate. Fortunately, little of this good food is wasted, for most people understand that, in the natural process of souring, caused by the action of harmless bacteria on the milk sugar, none of the high food value of the milk is lost, and although the soured milk is not palatable to drink, it can be advantageously used to make cottage cheese and delicious cakes or cookies.

Cottage Cheese

Heat one quart (or more) of untainted sour milk over hot water to a temperature of about 100 degrees F., or until it separates into curds and whey. Strain, without squeezing, through a double cheese cloth. Put curd into a bowl, mix well and season with salt and pepper. Moisten with melted butter or cream. Chill. One quart of milk yields one cup of cheese. Serve with crackers or use for salads or sandwiches.

Spice Cake

1-2 cup butter.
2 cups brown sugar
2 eggs or 1 egg and 2 egg yolks
3-4 cup sour milk
2 1-4 cups flour
1 teaspoon soda
1 teaspoon baking powder
1 teaspoon cinnamon
1-2 teaspoon cloves
1-2 teaspoon nutmeg
1-4 teaspoon salt.

Cream shortening. Add sugar gradually and cream well together. Add well beaten eggs. Sift the dry ingredients together and add alternately with the sour milk. Bake in a buttered pan in a moderate oven (350 degrees F.) for about 40 minutes.

Icing: Beat 2 egg whites until stiff. Gradually add 1 cup of brown sugar. Spread over cake batter. Sprinkle with broken walnuts and bake as above directed.

Sugar Cookies

1 cup butter
2 cups brown or white sugar.
2 eggs
1-2 cup sour milk
4 cups pastry flour
2 teaspoons baking powder.
1-4 teaspoon soda
1-2 teaspoon salt
1 teaspoon vanilla or lemon extract

Cream and butter sugar. Add well beaten eggs and flavoring. Beat thoroughly. Add milk and sifted dry ingredients alternately. Form into roll. Chill and slice, or chill dough, roll and cut with cookie cutter. Bake on baking sheet in moderate oven (375 degrees F.) until delicately browned—about 10 minutes.

Chocolate Cookies

To "Sugar Cookies" add 2 squares unsweetened chocolate, melted or 2-3 cup cocoa. Bake at 350 degrees F.

Fruit Cookies

To "Sugar Cookies" add 1 cup chopped raisins or currants. Dredge with part of flour.

ACTS TO KEEP NATION ALOOF IF WAR COMES

Legislation Is First of Kind Since Dark Days of 1917

CONFLICT IS FEARED

WASHINGTON, Aug. 21.—Seven-point resolution designed to safeguard U. S. neutrality in event of a foreign war was adopted Wednesday by the Senate without either debate or vote. Attempts already were under way to assure house action.

President Roosevelt was reported to favor the move.

Stirred into action by signs of an Italo-Ethiopian war, the senate speedily endorsed a resolution that provides:

Authority for the president to prohibit U. S. citizens traveling on ships of belligerent nations, except at their own risk, with 90 days allowed for citizens to return home from war areas.

Authority for the president to prevent ships, foreign or American, from carrying men or suplies to belligerent vessels at sea.

Embargo on Arms

A mandatory embargo on exports of arms, munitions and implements of war to all belligerents in a foreign conflict.

A system of licensing munitions manufacture and export as a permanent policy of the government, along the lines of the Geneva arms treaty of 1925, ratified earlier in the session by the senate.

A ban against American ships carrying arms or munitions under embargo to any belligerent port or to any neutral port for reshipment to belligerents.

Restrict Submarines

Authority for the president to restrict or prohibit the entry of belligerent submarines into American waters or ports.

A national munitions control board to administer the program, consisting of the secretaries of state, as chairman; treasury, war, and commerce, and the chairman of the senate and house foreign navy relations committee.

It was the first legislation of the kind approved by either branch of congress since the dark days of 1917.

MEN OF THE NORTH FACE HARDSHIPS WITH COURAGE

Winnipeg, Man., August 19.—Arctic citizens, white and native, of Canada are decent, law-abiding people, well worth working for, Right Rev. A. L. Fleming, Bishop of the Arctic, said a few days ago on his arrival from the east over Canadian National Railways.

"I have a great admiration for the white man of the North," Dr. Fleming said. "Not because he is a religious man. Some of them are. Many are not. But because he is a real man, facing hardships with courage."

The health of the Eskimo, due to a combination of causes, is better than it was, Dr. Fleming said. In the first place, missionaries, the Hudson's Bay Company, or the R.C.M.P. were all able to give out destitute rations in time of epidemic or shortage of food, and the Dominion government would refund the expenditure. In the old days the natives simply died without care. Increase of hospitalization and better medical superintendance gave the natives a better chance at healthy survival. Trading and police staffs had some knowledge of medicine which was available to the sufferer, where there was no hospital.

In Dr. Fleming's diocese, which includes all of Canada within the Arctic circle and dips down to the 54th parallel at Fort George, two hospitals are operated under his supervision, one at Pangnirtung, Baffin Land, and the other at Aklavik, at the mouth of the Mackenzie river.

Eskimo youth graduating from mission schools were being absorbed into the growing life of the north. But they "must be trained in the North," said Dr. Fleming. He told of boys from the Anglican Residential school at Shingle Point, Mackenzie River, being taken on as apprentices in herding the reindeer recently brought to that part of the country. He saw a future for Eskimos in this work.

"FOUR-CORNERED" TRANSACTIONS

The ways of modern international trade are devious and the disposal of Canadian agricultural and other products entails the knowledge of many methods. For example, if Canada desires to trade with Germany, the "barter" or "compensation" trade, or the "four-cornered transaction" has to be brought into play. This method of trade, encouraged by the German government, is best explained by a concrete example given by the Canadian Government Trade Commissioner in Germany, as follows:

A German import firm, for example, wishes to purchase Canadian apples. It is able to establish a connection with a manufacturer of chemicals doing regular business in Canada. With this chemical firm's agreement and co-operation, an application is filled with the German Government Supervising Office concerned with fresh fruit and similar commodities, showing evidence of contracts for the sale of chemicals in the Canadian market and requesting authority for the purchase of stipulated quantities of Canadian apples at specified prices. It is also desirable to indicate that the transaction will assist the export of larger amounts of chemicals than could otherwise be arranged.

Permission for the export deal having been obtained, the Canadian purchaser of chemicals is then advised to pay, through a bank as trustee or in some similar manner, the purchase price of the apples to the Canadian exporter of other goods and to remit the balance in excess of this amount directly to his supplier in Germany, while the German apple importer, in a similar manner, makes payment to the manufacturer of chemicals. There is thus a "four-cornered" transaction involving an exchange of goods between Canada and Germany but entailing no further transfer of funds than from one Canadian and one German firm to another and the remittance from Canada to Germany of the excess value of Canadian imports over exports. Such transaction, it must be noted, says the Canadian Trade Commissioner, may be completed by one Canadian and one German firm, who both buy and sell from and to each other, or by one firm in one country and two in the other, but it has to date been more common for the transactions to be of the "four-cornered" type.

SURVEY MADE OF CHEMICAL WEED KILLERS

The sixth of a series of studies dealing with weed research and control has been issued by the Northwest Grain Dealers' Association. This pamphlet deals with chemical weed killers, and is the result of research conducted by Dr. G. P. McRostie, Professor of Agronomy, University of Manitoba, and Mr. W. Tildesly, M.Sc., Assistant on Weed Research, and financed by line elevator companies.

The pamphlet deals with proper chemicals to use in weed destruction. It outlines methods of mixing to avoid burning body and clothing. Manner of spraying, when to apply, and effect on grain yields are set forth.

Summarizing the results of the survey, the pamphlet states:

1. The use of chemical weed killers is only justified where cultivation cannot be properly done, or where it has proven ineffective.

2. Some annual weeds can be successfully and profitably controlled in growing crops.

3. The profitable use of chemical for the control of perennial weeds is confined almost entirely to the treatment of rather small patches.

4. Fertilizers, properly applied, are a material aid in lessening the weed menace in the common cereal crops.

Copies of this booklet can be obtained, free of charge, from any line elevator agent, or by writing to the Northwest Grain Dealers' Association, Winnipeg.

OUTLOOK BRIGHTER IS BORDEN'S VIEW

Ottawa, Aug. 20.—Sir Robert Borden, Canada's war-time prime minister, told directors of the Central Canada exhibition Monday the economic horizon is not as dark as it may appear to be.

"Pray do not misunderstand me," he hastened to add. "Without international co-operation, intercourse, confidence and goodwill which are lamentably lacking at present, without firm assurance of peace, there can be no such sudden victory over depression as that which crowned war-effort in 1918.

"But, even as it is, I am enough of an optimist to believe the clouds are not so dark as they were and some glints of sunshine are beginning to stream through."

Sir Robert called upon Canadian youth to strive to maintain an indomitable spirit. The future might be theirs in higher degree than apparent to them today. "I do not doubt," he added "that in relief camps there are today young men who in years to come will serve Canada with distinction. Let them hope, not despair."

PARTIAL RECOVERY SEEN IN BRITAIN

Washington, Aug. 20.—A balanced budget, a protective tariff, a depreciated currency and cheap money have helped to bring a "substantial measure of recovery," but not prosperity, to great Britain in the past two years, according to a study released Monday by the Foreign Policy association.

The conclusion was based on two reports on studies of policies of Great Britain and the results so far attained, prepared by William Koren of the association's research staff.

"The index of industrial production based on 1924 rose from 93.3 per cent in 1932 to 110.5 per cent in 1934, a figure only 1.3 points below the index for 1929." Mr. Koren reported. "Foreign trade figures have also tended upward since the low point of the industrial depression in the summer of 1932."

"Industrial workers have shared in Britain's recovery during the National government's tenure of office. Registered unemployment in the United Kingdom has fallen from the peak figure of 2,979,425 in January 1933, to 2,068,152 in June, 1935, and the number of employed insured workers in Great Britain has increased from 9.33 million in September, 1931, to 10.36 million."

Canada continues to be the chief source of supply of tomato ketchup and sauces to the United Kingdom, increasing her shipments in the 1935 period to 96,857 cases from 80,709 in 1934. The tomato soup trade also is almost entirely in Canadian hands.

The figures of imports of wheat into the Scottish ports of Glasgow and Leith for the first six months of 1935 show that Scotland has taken more Canadian wheat than in the corresponding period of the two previous years. The shipments of Canadian flour also were greater than for several years previous.

The estimated short apple crop in the United Kingdom for 1935 should stimulate a larger demand for Canadian apples which have the further advantage under Canadian export regulations of carrying with them a certificate of freedom from disease.

THE SUN—

NEWS DISPATCHHES of the past few days tell of an unusual heat wave in the Maritime provinces. Very high temperatures have been recorded and quite a few deaths, attributed to the heat have occurred. It is quite possible that six months from now, the same wires will be carrying and possibly the same operators will be sending a story of a cold wave, in which frost, snow, and heavy gales will figure prominently. And as is usual in such stories, a certain number of deaths will be attributed to the unusual temperatures.

In the geographical location in which most Canadians find themselves, the problem of a suitable temperature is more a matter of keeping sufficiently warm than one of keeping cool. With the exception of a few short weeks, artificial heat is welcome in most Canadian homes. Therefore new methods of obtaining heat greater than that furnished by the surrounding atmosphere is of more than passing interest.

It has long since been recognised that the original source of heat is the sun and many have been the attempts to harness the rays of the sun in such a way as to make a practical source of heat for domestic and commercial uses. As far back as 214 B.C. Archimedes is said to have burned the Roman fleet by concentrating the rays of the sun on the ships by means of mirrors. The possibility of such a feat was tested in 1747 and by the use of 360 plane mirrors wood was burned at a distance of 61 metres. Down through the years numerous "solar engines" have been invented most of which had some improvement on those constructed previously. Perhaps those of greatest interest to present day readers are the two that have been invented within recent times. One last year in California in the United States and one reported quite recently from Madrid, Spain. In the California apparatus the engineer by means of glass, heated oil, the heated oil in turn heating water into steam which was used for heating and cooking. In Madrid, Jose Vile-Conte, Spanish engineer has recently constructed a solar furnace capable of concentrating enough heat to melt metals and glass. Wood placed in the "smelter box" flashes into flame instantly, and it is asserted that with elaboration and enlargement a temperature of 5000 degrees Fahrenheit or just 1000 degrees short of the sun itself can be produced.

The day is probably still far away when sun ray machines will take the place of present day domestic heating and cooking units but the work already accomplished would seem to give credence to the dreams of many researchers who visualize sun ray apparatus supplanting coal fed blast furnaces and power houses. There is, too, a wide field open for investigation in the development of sun units for supplying the individual electric power needs of individual householders. Particularly does this apply to rural districts away from power lines.

Many years ago one of the slogans of this province was "Sunny-Alberta." Perhaps the day will come when the beneficient rays of Old Sol will provide heat, light and power for Alberta farm housewives.

WILL ROGERS AND WILEY POST—

THE WHOLE American continent and a large part of the entire world was shocked and grieved last week to hear of the tragic death of Will Rogers and Wiley Post. It was not so much that two lives had been snuffed out, lives are coming into and going out of the world every minute of time, but because the character and achievements of these two men were such as to make their names household words and their lives in a sense, public property. Vast numbers of people loved Will Rogers for his homely wit and wholesome philosophy and an equally vast number admired the courage and enterprise of Wiley Post. And with the tragic passing of these two men, each individual who had read of their achievements experienced a personal loss. The special radio memorial service for these two famous men, perhaps the first of its kind, was a standing tribute to their lives and abundant evidence of the esteem in which they were held. Listening to the service in the privacy of one's home, it was impossible not to be moved by the expressions of sorrow of those participating.

WE ARE ALL HISTORY MAKERS—

WHILE IT is true at all times that, things being what they are, their consequences will be what they will be, this does not mean that the individual is helpless. He is not powerless to shape his own life, nor is he without power in the general process of affairs. History is being made every day now, just as much as it ever was. In its mighty workings it is always changing, never finished. It is like a snowball as large as the moon, rolled along by millions of tiny beings, who are ourselves. We struggle along and somehow, slowly, with pauses and with backward movements, the big ball of human destiny keeps moving. And on the whole it keeps moving forward.—The Canadian Magazine

HARVESTING---Old Style

By Mary Zirkle in the Christian Science Monitor

WE CLIMBED onto the rounded roof of our sod house so that we might have a better view of the header, with its reel flashing in the sun, as the harvest crew worked in the east field.

Since a tornado peeled the roof off the soddy during our first summer in it, our father had anchored the new one with stout cables at each corner, and it was by grasping these cables and digging our bare toes into the earth walls that we reached our vantage point. Frequent complaints came from below, because when the tar paper placed between the boards that ceiled the rooms and the finishing sods, became old and cracked, our movements sent particles of dirt showering down; but we were fairly stoical about these complaints so long as we were not actually ordered to descend. The scene we looked upon was too exciting to be marred by minor arguments.

There stood the wheat, triumphant over the perils of drought, of grasshoppers, of black rust and of hail; fluent in the wind and of a color and sheen to which fine gold very nearly attains. Very nearly, but not quite, because the wheat was part of the intimate life, rich with laughter and bright with expectation, that we knew.

Our wheat in the dry lands did not grow tall enough to be reaped with binders, and this was long before the day of the combine. We used a header, the whirring reel pushing the wheat against a sickle and carrying the severed heads and straw onto moving canvas by which they were carried up the elevator into the header barges. When a barge was filled it was driven to the stack yard and unloaded. There a "stacker", who because of his skill was a step higher in the economic scale than the mere "pitchers", or barge men, arranged it in stacks to await the coming of the threshing crew.

All this activity, this shouting of directions, soothing of alarmed horses, adjusting of machinery, these flourishes intended to show mastery of the art of handling a header barge, these prodigies of pitching and stacking; all, our mother told us, would cease in a few short hours if our skill in the kitchen should falter. She told us this to make us more content with our lot as mere females, and she made the point fairly convincing; but we always clung to a secret suspicion that the greater glory would be to drive a barge, or the header itself.

However simply we fared during the rest of the year, harvest time was a perpetual feast. What chickens bubbled in the pot, awaiting the addition of homemade noodles or dumplings! What mounds of mashed potatoes and plates of hot biscuits melted before the onslaught of hungry men! What pies, flaky of crust and oozing with rich juice came from the oven of our old cook stove! The house fairly hummed with activity and two small girls hummed with it, doing, I am afraid, very little that was constructive but feeling themselves vastly important.

We dug potatoes, picked peas and, by our own request beat the meringue for pies. As mealtime approached, the clock moved relentlessly toward the hour, we alternately hoped and despaired. Dinner must be ready on time!

We could not imagine what would happen if the hour should arrive, the men come trooping in, and dinner not ready. But somehow or other, the table would always be ready, the food dished up, and water and towels placed on the bench outside the door so that the men might wash before they sat down to eat.

We tried, as mother advised, to think of ourselves as ministering angels, but while the role was a heady one it was also exacting and we frequently fell by the wayside. I recall one evening in particular when the hands, ready to retire to their quarters in the loft of the new barn, discovered to their annoyance that their bedding had disappeared. They were weary men, and the humor of the situation escaped them.

Our father looked the scene over in silence for a moment, after which he strolled quietly to the house, where he cornered us and asked us a few pertinent questions. Then he turned to the exasperated men and suggested mildly: "If I were you, boys, I'd dig around the straw a bit." As if by accident he led the search to a particular corner where, sure enough, the missing quilts were found.

The next morning we lingered in the kitchen, watching the men devour ham, eggs and biscuits. We sniggered a little, forgetting the dignity required our six and eight years, until Red Billings glanced keenly at us and remarked solemnly to the table at large that he'd heard of folks so pizen mean that they would cheat an honest, hard-workin' man of his rightful rest. Tex expressed incredulity at this, protesting that he found it hard to believe that any human critters could be so low down and onprincipled.

There may have been more but we did not hear it. We retired, abashed, from the scene and avoided meeting each other's eyes, for we felt uncomfortably sure that the burst of laughter that followed our departure somehow concerned us. Thus early was our faith in the wisdom of the practical joke shaken.

FAST STEAM TRAVEL

By E. S. P. Rawstron in the National Home Monthly

Out to beat the Flying Hamburger! That was the thought in the mind of Driver William Sparshatt, most famous of the L. N. E. R. enginemen, as his huge green engine the Flying Scotsman gracefully drew its train out of King's Cross at the outset of the recent test runs. The powers that be on the L. N. E. R. were determined to ascertain whether a steam engine could travel at very high speeds over long distances. They wanted to make sure that steam was not a back number and ready to give way to the more recently invented Diesel-oil type train.

The L. N. E. R. experts knew that the fastest train in the world was the German two-car Diesel express, the Flying Hamburger, which daily keeps up an average of 77½ m.p.h. between Berlin and Hamburg. They decided, therefore, before making speed tests with a steam train, to hold preliminary consultations with the owners of the Flying Hamburger.

As the outcome of these talks, German railway authorities agreed that if a steam train could be made to cover the distance of 185½ miles between London and Leeds at an average speed of 67½ miles per hour, this feat would be acknowledged as equal in merit to that daily set up by the Diesel-oil Flying Hamburger. Since there are many hills and speed restrictions between King's Cross and Leeds, whereas there are practically none between Berlin and Hamburg, it was only fair that the British train should be given an easier schedule.

On the all-important run, Driver Sparshatt climed the hill out of King's Cross rapidly, to reach 70 m.p.h. when five miles out. The German schedule allowed for nineteen minutes to Hatfield. Driver Sparshatt was through in seventeen.

His Flying Scotsman was doing 94½ miles an hour at the end of the long bank down past Hitchin. The six great driving wheels, the balance weights and intricate parts which go to make up a locomotive, were flying round at the rate of 400 revolutions a minute. Forty-four thousand miles had been covered by the Flying Scotsman since its last repair. But there was scarcely a chance of a hitch. Another 35,000 miles to go before serious fear of that!

A compulsory speed restriction at Peterborough brought the rate down to 23 m.p.h. through the town. But Driver Sparshatt made such light work of the twenty-mile climb up Stoke bank that the crest of the hill was topped at the remarkable rate of 82 miles an hour. One hundred and ten years ago men said that no railway engine would ever succeed in climbing up a hill at all.

Mile after mile flew past the Flying Scotsman in breathless succession—89 m.p.h. beyond Grantham, 76½ at Markham summit, 87½ at Scrooby, 81 beyond Doncaster. Driver Sparshatt and his Flying Scotsman were in great form!

Only 152 minutes after leaving London the test train drew in triumphantly at Leeds Central. A distance of 185½ miles had been covered at an average rate of 73½ m.p.h. start to stop. That was something of a whacking for the 67½ m.p.h. schedule set by the owners of the Diesel-oil Flying Hamburger!

The run was one of triumph for steam. German authorities had to acknowledge that the Flying Scotsman had handsomely beaten on points, the fastest train in the world.

It is scarcely believable that 155½ miles of the total distance between London and Leeds were reeled off at an average speed of 80 miles an hour—a world's record for steam travel.

One world's record on one day, however, was not enough for Driver William Sparshatt. On the return trip to London, this wizard of the footplate exploited his experience and skill to their maximum capacity. Skill it is, too, that makes the Flying Scotsman race over the track at 90 miles an hour.

Motor-car owners, used to treading on a simple accelerator, sometimes get hold of the notion that to make a steam engine go all out, all one has to do is to shove the regulator wide open and wait for results. Let them try and see!

The test train reached King's Cross with a run of 70⅝ m.p.h. from Leeds to its credit. This was not such a high average as that maintained on the outward trip, but it was well above the test schedule set by the German Diesel enthusiasts.

Despite all American and British rumors to the contrary, no men in the world save Driver Sparshatt and Fireman Webster have ever achieved a properly-recorded speed of 100 m.p.h. on the footplate of a steam locomotive. A famous old record that of 102½ m.p.h. set up by the Great Western Railway in 1904, has just been discredited through expert investigation.

Driver Sparshatt, though, need have no fear of anyone disproving his record. For his speed of 100 m.p.h. was automatically registered upon instruments of undoubted accuracy in a special dynamometer recording car attached to the test train.

A fine point about the record runs is that no part of the Flying Scotsman engine showed signs of being dangerously hot through friction. In fact, in Driver Sparshatt's own words: "There was not a bearing anywhere on the engine that was even warm." That speaks wonders for the efficiency of the continuous oiling system, and, too, for the excellence generally of the engine design.

WILL ROGERS AND POST, NOTED AMERICANS, DIE IN ALASKA PLANE CRASH

Will Rogers, cowboy philosopher, stage and screen actor and air travel enthusiast and Wiley Post, who circled the earth [illegible] airplane, [illegible] Thursday evening at Point Barrow, northernmost Alaska when [illegible] crashed. [illegible] to secure directions and [illegible] taken off from [illegible] only 50 feet [illegible] into shallow water. Rogers and Post were [illegible] instant. [illegible] caused [illegible] plane in [illegible] to their [illegible] having [illegible] Calif. [illegible] Siberian [illegible] plane used [illegible] on their [illegible] their 1933 [illegible] and South [illegible]

[illegible] was well [illegible] fans for [illegible] he landed at [illegible] circling [illegible] Will Rogers-Man" Thousands [illegible] (Aug [illegible] when they [illegible] in a wild [illegible] again in Edmonton [illegible] a short time [illegible]

BENNETT WON'T AID TREKKER'S RETURN

Ottawa, Aug. 21. Premier Bennett Wednesday [illegible] he would have nothing to do with the 400 Ontario trekkers who have been stranded [illegible] and want [illegible] He [illegible] Mayor [illegible] of Ottawa the government would [illegible] transportation.

Premier Hepburn of Ontario previously announced he would not pay their fares.

"They were told [illegible] come here," Mr. Bennett said, "but they came [illegible] nothing that has been said over and over."

TERRIFIC HAIL DOES DAMAGE NEAR SASKATOON

Saskatoon, August 21.—A terrific hail storm which could be seen approaching Saskatoon early last evening and swung off to the east, did heavy damage in Warman rural municipality immediately north of the [illegible]. The hail damaged standing crops in a strip a mile and a half wide and from 15 to 16 miles long. Damage to wheat will approximate 60 per cent and damage to oats will run from 60 to 100 per cent.

LEGACY ENDS RELIEF NEED FOR EDMONTON FAMILY

Four minors and two adults, orphan children of a widowed woman who [illegible] months ago, go off the relief [illegible] Edmonton because they have [illegible] a little fortune [illegible] the death of an [illegible] in Spokane recently. They have been willed about $2,000 each.

Mr. Justice Ives in supreme court chambers Tuesday issued an order giving the guardian of the five minors, who was appointed [illegible] a short time ago, the right to [illegible] from the funds [illegible] in a monthly basis to provide the maintenance and education of the children. Annual [illegible] and farm [illegible] will be kept together and [illegible] from the proceeds of the [illegible] Previous [illegible] relief.

NEW DETAIL HOUSING ACT MADE PUBLIC

Ottawa.—Under the Dominion housing act [illegible] fund a $[illegible] capital of $[illegible] balance at a rate [illegible] 20 years [illegible] by finance minister [illegible]

Interest charges [illegible] maximum rate of five per cent [illegible] that may occur will be [illegible] between the government and the lending institution. If [illegible] loss occurs the amount owing on the mortgage [illegible] above the value [illegible] the lending institution will bear two-thirds and the government one-third.

For the construction of a single dwelling or a larger building to be used for residences the government and approved lending institution will advance 60 per cent of the loan and the government 20 per cent.

Contracts under which the government and the lending companies will operate have been distributed and when finally signed the act will be in operation and ready for applications. Prospective builders will apply direct to lending companies. The government will receive only three per cent on its money and the contract will provide that not more than five per cent is charged the borrower.

WIFE'S SLAYER IN HANNA CASE HANGS AT FORT

For the murder of his wife near Hanna last winter, William Hawryiuk, 43, was hanged at Fort Saskatchewan jail early Wednesday.

Hangman Arthur Ellis sprang the trap at 1:40 a.m. and the body was cut down 10 minutes later.

Hawryliuk walked to the gallows quietly and unassisted. He had refused a meal and stimulants late in the evening.

"It's all right," he answered when official told him on Tuesday that a cabinet council at Ottawa had refused to interfere with the death sentence.

As he stood on the gallows trap and the rope was adjusted about his neck, he said nothing.

At his trial at Hanna in June, Hawryliuk was alleged to have poured kerosene over his wife and then set fire to her. She escaped him momentarily and dashed out into the snow, rolling in it to put out the flames.

Then, according to the crown's charges at the trial, he beat her into unconsciousness with an iron bar, and left her. She froze to death.

KILLS LANDLORD, HOUSEKEEPER, WOUNDS MAN, ENDS LIFE

Amisk, Alta., Aug. 22.—An enraged farmer who had quarreled Tuesday with the owner of the farm which he rented, returned Wednesday night, killed the owner and the owner's housekeeper, wounded a hired man and then took his own life as a posse of men surrounded the house.

The dead:

Samuel Seright, [illegible], former Argentine rancher, owner of the farm.

Miss Hilda Olsen, 20, his housekeeper.

David Larsen, 35, alleged to be the slayer.

Wounded:

Cornelius McKenzie, 27.

Amisk is [illegible] miles southeast of Edmonton.

Cornelius McKenzie and his brother Dan, [illegible], escaped by jumping from an upstairs window. A moment before Larsen had fired through a closed door, striking Cornelius in the hand.

The McKenzie brothers ran to different neighbors who summoned help, and as two R.C.M.P. officers and a posse of [illegible] men approached the house they heard the shot which Larsen fired into his own head.

The tragedy occurred at the Seright home. Larsen had worked for Mr. Seright for seven years and for the past three years had rented the farm from him, continuing to live in the same house. They quarreled Tuesday, apparently over the rental agreement.

Police said they learned that Larsen returned to the home at 11.30 p.m. Wednesday, walked into Mr. Seright's bedroom, and fired three shots at the victim, one entering a shoulder and two others in a leg. Then, they said, Larsen used a razor to cut Mr. Seright's throat, and followed with two more shots into the victim's back.

The McKenzie brothers, sleeping upstairs and aroused by the shots and shouts, started downstairs with a lighted lantern. They met Larsen coming up, rifle in hand. They dashed into the housekeeper's room and slammed the door. Larsen fired through the door and the shot struck Cornelius in the hand. The brothers went out the window, and Larsen went into the room, apparently struggled with Miss Olsen, cut her throat and shot her in the head.

He killed himself while in the kitchen of the home as the posse approached.

Miss Olsen's body was found behind a bureau in her room with the face badly bruised, apparently where she had been struck.

Dan McKenzie arrived at the home Tuesday to act as a second hired man, and Cornelius told police that on that day Larsen came to him in the barn and talked "in a rambling sort of way," saying among other things, "you have been planning this a long time." McKenzie declared that he had answered that if there was any complaint he would get out, but Larsen replied that he had nothing against him but didn't like something Mr. Seright had said.

Larsen, his story continued, then said he was going to see Mr. Seright and settle some business and McKenzie told him that he had better arrange at the same time to get his (McKenzie's) pay, as he was leaving.

What occurred between Mr. Seright is not known but McKenzie received his cheque and left the farm, going to Hughenden. Later in the day Mr. Seright went there and told him that Larsen had left and that since he could not get along shorthanded he would like him, McKenzie, to return. Mr. Seright and McKenzie got back to the farm Tuesday night.

Larsen, who stayed at a nearby [illegible] Tuesday and Wednesday, packed his personal belongings into his [illegible] late Wednesday and drove it to within 15 feet of the front door of the Seright home. Carrying a 20-[illegible] rifle, he walked into Mr. Seright's bedroom. Apparently Mr. Seright had put up a desperate struggle for his life as the room was disarranged and his body was found partway out of the room.

After the slayings, Dan McKenzie ran to the home of David Gibson, and Cornelius reached the home of Magnus Johnson. When the alarm was raised the posse included Dr. C. D. McBride of Hardisty and Dr. F. W. [illegible] of Hughenden. The posse approached the house carefully as the [illegible] shot was fired by Larsen. He had also cut his throat with a pocket knife.

A jury was selected from the posse and an inquest set for Friday. Members of the jury are A. J. Lawley, Allen Coutts, Harold Coutts, Hughenden; [illegible] T. Harney, Lougheed; B. Chapman and Jack Lees, Amisk.

Dr. McBride acted as coroner at the house and performed post mortem immediately.

Miss Olsen arrived at the house to act as housekeeper only three weeks ago.

Mr. Seright was born in Scotland and settled here 22 years ago after ranching on an extensive scale in Argentina. Larsen was born in Sweden and entered the district seven or eight years ago. The McKenzie brothers came from Nova Scotia.

Hilda Olsen came to Canada six years ago from Denmark where she was born.

Previous to going to Amisk, she worked for W. McDonald in Ryley for a time.

Butter, cream, eggs, flour, fruits, milk, cooking oils of corn, peanut, and soya bean are a few of the agricultural products used by the biscuit and confectionery, cocoa and chocolate industries of Canada which employed 10,304 persons in 1934. Since 1924, the statistics relating to the Canadian chewing gum industry were incorporated with the biscuit and confectionery industry.

H. E. ROGERS

ABERHART IS PREPARED TO TAKE PREMIERSHIP; SAYS NO DRASTIC ACTION

No drastic action will be taken with regard to capital or investments in this province and nothing detrimental to their interests will be introduced so long as business firms are not exploiting the people, William Aberhart, leader of Social Credit movement stated, when reached by the Journal on the long distance telephone to Calgary.

The leader stated that if a conference of the Social Credit members decided to offer him the premiership, he will accept it, and assume the office gladly.

"By their votes today, the people of Alberta have vindicated their right to economic freedom," said Mr. Aberhart.

"They have manifested to the world that the people of Alberta are determined to put an end to the great problems of the depression.

The youth of our land must be given an opportunity to live rather than exist."

"If you are invited by the Social Credit members to take the premiership, will you accept."

"As it looks now, there will be no other course open and I would enter upon it with a great deal of pleasure to organize the government of the province of Alberta as it should be organized, in co-operation with all members of the government."

"When do you think the members should meet?"

"It would seem to me that an early conference of the members would be called for it is essential that immediate steps should be taken to relieve the people of the tremendous strain they have been under in this province."

"When would the basic dividends be paid?"

"No person can say just how soon we will be ready to pay the basic dividends because we do not know what difficulties may arise in the pathway of building the foundations of a new social order."

IMPERSONATOR DODGES CHASER IN SOUTH CITY

CALGARY, Aug., 22.—An impersonator was chased for seven blocks by a scrutineer Thursday as Calgary voters were polling a record vote. Polling booths were jammed for most of the morning with line-ups at each, housewives forming a major portion of the early voters.

The impersonator appeared at a polling booth and gave a name. [illegible] that man has been dead for two years."

"That's funny," said the scrutineer, "I know the name well and I know [illegible]

Challenged, the prospective voter fled, with the scrutineer in close pursuit.

Ten minutes later the scrutineer returned.

"He got away," he panted, "but he won't vote here today."

"What name did you say?" asked the poll clerk.

The name of the dead man was repeated.

"That's funny," said the poll clerk, "that man recorded his vote here just two minutes ago."

MUNICIPAL DISTRICT OF CORNHILL COUNCIL MEET

The fifth regular meeting of the Council of the Municipal District of Cornhill was held at the District's Office on Friday, August 16th, 1935.

The meeting was called to order at 10.15 a.m., all councillors being present.

The secretary placed the monthly financial statement and agenda before the meeting, and the minutes and accounts of the previous meeting were read.

Moved by Councillor H[illegible]mberg, that minutes and accounts payable, as read by secretary be adopted.—Carried.

Two separate delegations, one representing Cooking Lake School District and the other representing Hastings Lake School District, then interviewed the council. Representatives for Cooking Lake S.D. consisted of Messrs. Morrow, Bentley and Schultz, and those representing Hastings Lake S.D. were Messrs. Tough, Hand, and Rowland.

The delegations called on Council with a view to having a settlement made re collection of school taxes on South half 22-51-20-w4 since 1914 and credited to Hastings Lake School District as per original area of said School District, but in same year changed to Cooking Lake School District [illegible] the Department of Education [illegible] not changed on District payroll. At 12.15 both delegations were still discussing the payment or non payment of said collections, but not having arrived at a friendly settlement. At this time the secretary of the municipality suggested to the council and both delegations that a

SCHOOL FAIR TO BE HELD SATURDAY SEPT. 7th

The annual school fair of this district will be held on Saturday, September 7th. There will be the usual exhibits of school work, grains, grasses, vegetables, flowers, arts and crafts, livestock, poultry, etc.

The following schools will be represented, Anderson, Ingram, Ketchamoot, Lakeshore, Lindbrook, McKenzie and Tofield.

It is expected the exhibits will be numerous and varied and a visit will be well worth while.

EXPRESSES THANKS

August 24th, 1935

Tofield Mercury,
Tofield, Alberta

I take this opportunity to acknowledge my sincere thanks to all who supported me in my recent election campaign. However, I hold no animosity to those who did not see the present economic situation as I see it and will, to the best of my ability, endeavour to carry out the policy to the best interests of all, not only locally but provincially.

J. L. McPHERSON

It is with much regret that we report an eye injury to Mr. Wilbur Gallinger which necessitated the removal of one eye.

Dellwyn Wallen returned home this week after spending the holidays away.

LOST.—On election day, August 22, one pair of black rimmed spectacles. Finder please leave at Mercury Office.

International Unity

In these days of international discord, when rumours of war with all its tragic horrors are rife, it is distinctly refreshing to read of something that stands for unity and peace rather than enmity and strife.

In every month of every year thousands of people of all nationalities cross the Atlantic ocean upon the large floating palaces at their disposal. Of a number of lines, the Cunard Line is a prominent one and on the ships controlled by this line alone, as the weeks and months pass, thousands of British and American passengers for several days come in close contact one with the other. Among many forms of entertainment accorded the passengers the evening concert is not the least important, and as in similar gatherings on land, the "national anthem" is frequently sung by those attending. Due to the mixture of nationals among the audience, each of whom naturally prefer their own national anthem, the Cunard Company has had cards printed containing one verse of "God Save the King," one verse of "America," and a new third verse, rich in tone, brilliant of conception and bright with the hope of better understanding. "Big oaks from little acorns grow," and it is easy to understand that national harmony can be fostered and stimulated by the touch of genius such as the three verses below indicate.

God save our gracious King,
Long live our noble King,
God save the King.
Send him victorious,
Happy and glorious,
Long to reign over us,
God save the King.

My country 'tis of thee,
Sweet land of liberty,
Of Thee I sing.
Land where my fathers died,
Land of the pilgrims pride,
From every mountain side,
Let freedom reign.

Two empires by the sea,
Two peoples great and free,
One anthem raise.
One race of ancient fame,
One tongue, one faith, we claim,
One God, whose glorious name
We love and praise.

LOCAL AND PERSONAL

Mr. and Mrs. C. Simmons of Edgerton visited friends and relatives here on Sunday.

Mr. and Mrs. McCulla who have been visiting at the Jobb home left for their home in Sask on Saturday.

Miss Audrey Jobb returned from the Coast and is visiting her parents here.

Miss Eva Burroughs who has been visiting at the McCarthy home for a short time returned to her home in Stettler last week. Betty McCarthy returned with her to spend the week end in Stettler.

Mrs. Calvert, Mrs. Seale and Miriam, Mrs. Stan Yakabuski, Miss Loret Ross, Miss Jessie Munro and Kenneth Munro motored to Donalda last week end.

Miss Anne Lindsay returned after spending a short time at her parents home in Innisfree.

Mrs. Harvey Adams of Calgary is visiting with Mrs. Letourneau here.

Pat Moon visited Tofield on Sunday.

Miss Sarilda McCartney of Edmonton is visiting her aunt Mrs. H. Hicks here.

Frank Dunn, Les Glover, Barney Kendall and Reg McCarthy motored to Lake Minon last week end on a fishing trip. Due to bad weather very few fish were caught.

Bob Blair spent the week end in the city.

Mr. and Mrs. Jim Hannan of Camrose spent Saturday in town.

Mr. Robert A. McLaren, student missionary, Round Hill, will conduct the services at Lakeshore, Ketchamoot and Tofield on Sunday 1st. The Rev. D. K. Allan will dispense the Sacrament on the Round Hill "field" -Lake De May, Dodds and Round Hill. Mr. McLaren is an interesting speaker and has done very fine work in the mission field.

KETCHAMOOT

Miss Viola Lee has opened up a beauty parlor at Mundare. We wish her every success.

Miss Hazel Sears left last Friday morning for a three weeks holiday at the homes of her uncles P. F. and Wesley Ingram at Victoria, B.C.

The regular monthly meeting of the Ladies' Aid will be held next Wednesday Sept. 4th at the home of Mrs. A. J. Williams. A miscellaneous shower in honor of Mrs. Geo. Williams will be given. A cordial invitation is extended to all.

Born: To Mr. and Mrs. Robert Berrielough, a son on Saturday, Aug. 24. Congratulations Lillian and Bob.

A little daughter arrived to Mr. and Mrs. Norman Wideman on Aug. 13, but only lived a few days. Our sincere sympathy, Inez and Norman. Mrs. Wideman and family have been at the home of Mrs. Wideman's parents, Mr. and Mrs. Soma for some time.

Dr. Law and Dr. Richardson extracted a few teeth for Mrs. W. A. Mitchell one day last week. Mrs. Mitchell is still at the home of her mother Mrs. Henderson.

Miss Maud Wildman spent several days last week with her friend Miss Ethel Brown.

Mrs. Mabel Brown, son Archie and a young man friend of Bawlf and Mrs. Davison were Sunday guests of Mrs. McMullen.

Mr. and Mrs. Chester Coombes and two daughters, Ethel and Easter motored to Athabaska on Sunday on a blue berry picking trip.

Miss Fawcett and little Miss Olive Jack of Poe were guests of the Schultz family last week.

Mr. and Mrs. Wm Lee spent the week end recently visiting an old school mate of Mrs. Lee's near Mundare.

Mr. Sam Stauffer and assistant set up new binders for Mr. Whillans

Reduction in Grain Storage Rate in Alberta Pool Elevators

Announcement is made that a storage rate of 1 45 of a cent a bushel per day will apply on grain stored in all Alberta Pool elevators, effective from August 31, 1935 for the ensuing license year. The present rate, which has prevailed for many years, is 1 30 of a cent a bushel a day.

The Alberta Pool elevators is making this voluntary reduction as a temporary measure in reducing cost to grain growers during the present recognized emergency in the marketing of grain.

The proposed reduction will affect 435 Pool elevators in this province as well as four terminals operated by the Alberta Pool on the Pacific Coast.

THE ELECTION OVER—

ON THURSDAY last the electors of this province showed unmistakably that their confidence had been placed in the Social Credit party. The die having been cast, any argument and discussion now is futile and beside the point. The next move is up to the government itself, a move that without question should supplement promises with deeds. These promises which are both praiseworthy and revolutionary include:

(1) Banish poverty from Alberta

(2) Pay a basic dividend—tentatively set at $25 00 a month—to every citizen

(3) Establish a "just price" for both producer and consumer

(4) No new money would be used

(5) Non-negotiable securities would be used for the purchase of goods and services

(6) The basic dividend would be collected by a levy

In addition to thousands of people within the province, literally millions of people in the Dominion, the United States, Great Britain and elsewhere are watching to see what the outcome of this great experiment will turn out to be. There are, of course, plenty expressions of opinion from public men all over the dominion being published, and from day to day a certain amount of new material relative to the experiment is turned up, but to us there is only one test, the test of achievement.

Having been given such an outstanding mandate by the people of this province, the new government should be, for a reasonable time at least, spared undue criticism. Leaving it alone, at the same time wishing it the best of luck would seem to be a good plan for press and public to follow

---

Perhaps something of even more importance than elections is the likelihood of farmers getting this season's crop safely harvested, and later threshed and in the granary or elevator. To start off with, the planting season was late. This was followed by a relatively cool summer, which, while containing plenty of good growing weather, has been lacking in good ripening weather. Rain was welcome in June and July, but now the growing season being practically passed, warm dry weather is needed for harvesting. Unfortunately, the weather hardly gets nicely settled than a rain of great or lesser degree comes along. The rain Tuesday night and early Wednesday morning is a case in point. Haying has been a more or less intermittant job this year, quite a quantity of that cut being under water. There is plenty of hay, providing it is procurable In most years the end of August sees haying completed, but the season has been such that many farmers still have hay to put in the tack. Harvesting is generally underway by this time, but only a few have commenced cutting Much of the grain is still green awaiting a prolonged warm dry spell to ripen it. Let us hope that the present indications of "fair and warm," are lasting

---

The school holidays are nearly over. In a short time Tofield pupils and Tofield district pupils will commence another year of learning. And, generally speaking, the greatest number of them will not be sorry. The holidays, after the intensive preparation for and the writing of examinations, are very welcome of course and are greeted with glee, but as the weeks pass into the latter part of August, it is with no small degree of satisfaction the average student contemplates returning to school. It was not always so, and perhaps in every country in the world it is not so to-day. But great strides have been taken in education during the past forty or more years and the teacher is no longer the terror to boyhood he once was Greater skill in the teaching profession leading to better knowledge of youth, a kindlier attitude, combined with studies made more interesting, have all tended to create a spirit of comradeship between teaching staff and students, and has made school a natural outlet for youthful energy, rather than a painful ordeal through which youth is compelled to pass. So when school opens next week it will not be with lagging steps and unwilling mien that the youth of the land will enter the halls of learning but with sprightly stride and cheerfulness they will take up duties to fit them for greater things in after life

---

When Mr. Sinclair brought some brilliant dahlias to the Mercury Office last week, we are sure it was because of their magnificent coloring, but he might have been handing us a sly dig One of the latest pieces of information to be handed to the public by the American Chemical Society, is that a method of producing sugar from dahlias has been discovered. The sugar is twice as sweet as that now commonly used and commercial production has already become a possibility Perhaps Ab thought the perpetual sour expression of our features could profit by a sweetening element.

SLOGANS and SHIRTS

By Raymond Crawford in Canadian National Railways Magazine

To anyone who takes the trouble to think about it, our civilization—at least as represented in Europe today—is only skin deep. Ugly and primitive spectres raise their heads and hiss defiance at other ugly and primitive spectres. Nations make agreements evidently without any intention of observing them when self-interest dictates. Europe is in a state of frantic nationalism with all its accompaniments of suspicion, egotism and self assertion.

There are two kinds of nationalism. One good and necessary, the other pernicious and fraught with all manner of baneful consequences. Every decent citizen has an attachment for his country, otherwise he would be without soul. The man without a country or the man who puts race before the country in which he has his livlihood and his privileges is rare. But this very patriotism may make us tolerant or intolerant of other countries. Love of family, which is the most normal thing in the world, should help us to understand love of family on the next street; so because of our loyalties to our own land we should better appreciate the loyalties of other men to theirs. In this way a sane internationalistic spirit would be engendered which would make for fair play and consequent security. But alas! this ideal is far from realization because of the existence of an aboriginal type of nationalism which has at least three characteristics. First it regards itself as a self-centred unit without obligation to or consideration for any other sovereign unit. When therefore there is a conflict of interests, economic or otherwise, there may easily follow the conflict of war It is a reversion to primitive tribalism. The second characteristic is that within this totalitarian state the citizen must subordinate all his interests to the unit, especially in time of war. And in the third place, this nationalism regards itself as superior to every other, and so is ever trying to assert its superiority or to regain a vanished supposed superiority. Here are two or three utterances of distinguished statesmen from different lands: "The greatest people the world has ever seen." "We are morally and intellectually superior to all, without peers". "God has yet made nothing equal to our people and I don't think He ever will or can". And of course we have "the lesser breeds without the law" which was rhetoric but a bit complacent just the same. There is no inferiority complex in all this, but a spirit which is apt to see in every outside movement a menace to national pride or prestige, because delusions of greatness bring delusions of persecution, hence the cry of Germany in 1914, and its continual cry at the present time.

But the main feature of this insulate nationalism is that it is fatal to democracy in any true sense of that term, fatal at least to a thinking democracy; indeed the type of so-called democracy which is evident today doesn't think, it only feels and applauds. A recent writer has said very frequently that in 1914 we heard so much about a war for democracy, but democracy was one of its certain casualties. Democracy on the Continent of Europe is being displaced by despotic government. It is an old mediaeval figure dressed up in garish clothes; the difference being that the old despotism was hereditary, the new one is not.

What is the reason for all this? One answer is unreason. Democracy is born in times not only of intense feeling but of virile thinking, but when men cease to think and are controlled by their emotions or by a herd instinct, any irrational thing may happen; then government of the people, by the people and for the people—to use Lincoln's famous phrase at Gettysburg—does vanish from the earth. One explanation of present conditions in Europe is that nations emerged from a horrible war, weary, bewildered and ready for any quick change (it must be quick) or experiment that promised better days. Everywhere there was restlessness, and strange to say men who had fought and suffered for liberty began to clamor for someone who would think for them, act for them and lead them out of their difficulties by some magic way. So those who had opposed despotism to the death wanted a superman, a dictator, and symbols and slogans and various colored shirts proclaimed submission to the sovereign will. Under this colossus there is an aristocracy, only it is a political aristocracy supported by an army which is ready to purge the State of suspects and even to make races of pure blood. Minorities have no place in such a centralized state and any opinion contrary to announced policy is not tolerated. In other words free speech is denied to members of such a state, absolute submission is required. History seems to be repeating itself in this respect, because after the Napoleonic victories over Prussia, a German philosopher who roused the stricken and disheartened people from lethargy, demanded this submergency of the individual in the State. He said "the new education must completely destroy freedom of will". So the dictator speaks, and the people in a frenzy of admiration—almost of worship—acquiesce; but one wonders what will happen when these almost deified leaders die. Will it be in Italy, Germany and Russia as it was in ancient Rome—a number of warring military dictatorships which really brought about the fall of the

(Continued on page three)

I LIKE INDIANS

By Tony Lascelles in Forest and Outdoors

Yes, I like Indians. They have impressed me since I first became acquainted with their race, more than thirty years ago. And I particularly like the ancients who drum and danced in seclusion during the darkest hours of the night; rebellious souls that disdain our self-appointed desire to correct and advise, and so refuse to be enticed into the fold to be shorn of racial customs and beliefs.

I like Indians because of their simple creed; their simplicity of thought and action; for their language, beautifully expressed; their unsophistication, refreshing in an over-stimulated age, and for their love of wild things and the wilderness in which they live.

I regret our general lack of appreciation of their virtues and our elaboration of their faults, tolerant of thein iniquities we have inflicted upon them, and appalled at the diseases they have contracted through association with us.

Blood, Blackfoot, Piegan, Cree and Salteaux, I have fraternized with them all, listened to their legends, and dipped in the common pot from which they ate. I have slept in their cabins, tents and teepees, and travelled with them over the prairies of the old west and about the forests and waters of the near north. I have shared their pleasures and their sorrows, and brought them before the white man's court of judgment when they erred against their code and ours. And because of my acquaintance, I like Indians.

Character is a matter of temperament, kindliness, faith and good will. It matters little upon what racial forge the ingredients are welded, or how, and by what spiritual agency they attain perfection. It is sufficient that they exist together in every race of people, irrespective of color or creed.

Not many years ago, I received instructions to remove an old Indian from a camp ground he had occupied all his life, to a nearby reservation. His wife had recently died and he needed care, for he was blind. It was said that he had lived almost a century. He pleaded to be allowed to remain. His father and his grandfather, he stated, tears falling from his sightless eyes, had lived their lives, as he himself, on the same knoll beside the lake near which his teepee stood. "Shemogonish", he continued, "when you come again I will not be here. I am very old and tired and soon go to join my wife and dead relations in the land of the Good Spirit." A week later he was found dead in his smoke-stained teepee;—wavelets lapping a shingly beach and vagrant breezes stirring the canopy of the forest, sang his requiem.

Dear old pagan, when I, of other faith, come to die, may I meet my end as bravely and hopefully as you. A simple cross marks his grave beside the lake he loved so well.

I remember another old Indian gentleman. He, too, has passed to the Great Beyond, leaving a verdant memory in his wake. Our last meeting beside a lake, many miles from civilization. He and his sons were hunting moose and drying the flesh for winter food. He asked me to accompany him. Moose were plentiful in those days, for intensive forest fires were unknown thereabouts, and the white hunter and settler had yet to arrive. We had scarcely travelled a mile when he suddenly stopped in his tracks, lifted a finger, and pointed towards a nearby lagoon, blotched with lily pads. A bull-moose stood deep in the water, its head beneath the surface. My companion sighted his rifle, and, finger on the trigger uttered an apology I can never forget for its true solicitude and beauty. 'Brother moose' he said, "I am sorry to take your life, but I need your meat for food and your hide for clothing." At the sound of his voice, the moose raised its head; a rifle spoke, and an inert body slumped in the water of the lagoon with a gurgling splash.

For a moment we talked. His voice, it seemed, told of sorrow for what he had been compelled to do, rather than the satisfaction of attainment. Then, he hurried for the assistance of his sons, and I went my way, pondering meanwhile over a "pagan" ritual whose significance would have brought untold joy to the heart of the patron saint of creatures, large and small. I am glad he was my friend.

Recently, I had occasion to travel with another Red Man who had never attended a white man's school. In consequence of his neglect, the beliefs of a long line of ancestors had no opportunity to quarrel with what concepts he had acquired through a casual contact with civilization. It was a chilly night in the fall. The waterfowl had left for the south, and the deciduous trees were drab and bare. At dusk we beached our canoe—we had been paddling steadily all day—and built a campfire beside the shelter of a dense spruce bluff almost at the waters edge. As we sat smoking in silence about the cheery blaze, a clattering noise in the forest told of a bull moose polishing a pair of mighty antlers in preparation for the mating season to come. Prompted, no doubt, by the incident, and remembering an old Salteaux legend, I questioned my companion. "Tell me", I asked, "why does the moose shed its horns every year." He looked at me thoughtful a moment, and then gazed towards the shadows. It was several minutes before he replied: "No, Okemauw, white man always laugh". He was proud, and reluctant to speak, fearing ridicule. Silent, be-

(Continued on page three)

The Poor Man's University

ALL OF US would be poorer if there were no advertisements in our newspapers—poorer in pocket, mind, comfort, culture.

Advertisements have been called the "Poor Man's University," for they are wonderful teachers—wonderful mirrors of the world's scientific and cultural development.

The advertisements keep us informed about what is being accomplished by the world's best engineers, chemists, research workers and technicians, in every field of human endeavor—in the realms of radio, motor-car and tire manufacturing, food preparation, domestic and personal hygiene, building materials and construction, and agricultural economy, home easements and beautification

If there were no advertisements in our newspapers and magazines, we'd all slip back—back to the levels of life of 50 and 100 years ago. We'd read less, move about less, lower our standards of living, be content with poorer machines, eat coarser food and wear coarser clothing, live in unattractive homes, do a vast amount of distasteful labor, wear ill-fitting shoes, see ugliness everywhere, have more illness, meet with more accidents, have more toothaches; and our stores would be dull places indeed.

Read what the advertisers in this paper have to offer, to be informed is to be profited.

THE MERCURY

THANKSGIVING DAY TO STAY THURSDAY

Ottawa, August 22 —Opposition to any further change in the date of Thanksgiving day for this year was expressed by Hon. C. H Cahan, secretary of State, Wednesday. Churches favored Thursday instead of Monday for the holiday

The secretary of state has responsibility for deciding the date Originally it was set for Monday, October 14th, but when that was selected as election day Thanksgiving was moved to October 24th, a Thursday

"For over 40 years," Mr. Cahan said in a statement, "Thanksgiving day was always fixed for a Thursday in October. The day, as His Majesty the King's proclamation always states, is fixed as 'a day of general thanksgiving to Almighty God' for the blessings with which Canada has been favored during the year.

"In later years the churches of Canada have complained that as a week-end holiday the religious character of Thanksgiving day has been almost completely lost sight of, and that the day has become one for holiday excursions and frivolous entertainments, which are not consistent with the objects for which the day was originally set aside "

LOWER GRAIN STORAGE RATES

Something new in the history of the grain business in Western Canada developed this week when the Alberta Pool Elevators announced its intention of cutting the storage rates for grain carried in its elevators by approximately one-third effective from August 31, 1935 to August 31, 1936

Pool Elevators will charge 1 45c. a bushel a day for grain in store instead of 1 30c. a bushel a day—the rate which has prevailed for many years The new rate will apply for grain stored in its over 435 country houses as well as in 4 terminals at the Pacific Coast

Alberta Pool Elevators is a co-operative organization owned and operated by Alberta farmers. In that position it considers it a privilege to be instrumental in reducing costs in some measure to the grain growers in a year when crops have suffered severely from drouth, hail and frost.

IF AN ETHIOPIAN WAR COMES

It appears inevitable that Italy will invade Ethiopia very shortly. The question of how such a war will affect wheat prices is being discussed Some Winnipeg traders believe that an Italian Ethiopian war will being back dollar wheat Of course this is merely conjecture. No one knows just what influence a war would have on wheat prices. If the conflict was prolonged and if other European countries increased their standing armies through fear of what might happen, European wheat cultivation would be curtailed and a livelier demand for overseas wheat would result.

This year, however, Italy has a very good crop, the latest estimate being 290 million bushels This is some 47 million bushels more than the 1934 crop. The supply seems ample for Italy. At the same time it is noted that wheat prices have been steadily rising in that country. Mussolini will likely be anxious to reduce the cost of living and it would seem the most logical way to do this would be to permit freer import of overseas wheat. In fact a report from Winnipeg suggests that Italy has already been buying quantities of wheat on the exchanges —Wheat Pool Bulletin.

THE MAN WHO COUNTS

"It is not the critic who counts; not the man who points out how the strong man stumbled or where the door of deeds could have done them better. The credit belongs to the man who is especially in the arena, whose face is marred by dust and sweat and blood, who strives valiantly, who errs and comes short again and again—because there is no effort without error and short-coming—who does actually try to do the deed, who knows the great enthusiasm, the great devotion, spends himself in a worthy cause, who at best knows in the end the triumph of great achievement and who at the worst, if he fails, at least fails while daring greatly, so that his place shall never be with those cold and timid souls who know neither defeat nor victory President Roosevelt

Labor for Nothing

Teacher: "And so we find that X is equal to zero "

Student: "All that work for nothing"—American Boy

MUSSOLINI BUYS YUGOSLAV GRAIN

Needing grain to feed the Italian troops preparing for a campaign in Ethiopia, Mussolini has turned to Yugoslavia, one of Italy's traditional foes, and has placed large orders for grain in that country. At the frontier port and city of Susak where for years Italian and Yugoslav guards glare at each other over fixed bayonets suddenly a few days ago grain began to pour in a golden tide into Italian ships —Wheat Pool Bulletin.

TOURISTS FROM CHICAGO GET THRILL AT JASPER GOLF COURSE

Jasper Park Lodge, Alberta, Aug. 20 —When Mr and Mrs R. P. Kelley, of Chicago, started out for a game of golf over this picturesque mountain course, they hardly figured on getting all the thrills at once After playing around to the 15th tee, commonly known as "the Bad Baby", which is a decidedly tricky 130 yard one-shotter, the Chicago visitors had the thrill of their lives

The tee is situated close to a small grove of young poplars, and attracted by a movement they saw one of the busy beaver colony tugging at a tree it had just gnawed down The four-footed worker was entirely unconcerned by the gallery as it slowly dragged the tree across the grassy [illegible] tee Finally young Andy Mack, one of the caddies, who lives in Pembroke, Ont., dropped Mrs Kelley's [illegible] and actually helped the beaver with the tree to the side of Lac Beauvert close by Mr Beaver calmly rolled the tree into the water and started on his trip across the lake to the beaver colony

It was decidedly one of the greatest thrills the American visitors had ever experienced

CHANGES IN GAME REGULATIONS

Important changes in the game regulations of the province, which include reduction of game fees in many instances, have been announced One of the most important will permit residents of Manitoba, Saskatchewan or British Columbia to hunt bird game in Alberta for a fee of $2, provided they are holders of game bird licenses in their own provinces. This is a reduction from $10.

Resident outfitters' licenses within forest reserves, are reduced from $25 to $15 The resident big game license is cut from $2 to $1, and the resident bird game fee from $2 50 to $2 00 The resident special elk license is cut from $10 to $5, and there is no longer any special license necessary for bear in the forest reserves, this being absorbed in the general big game license

There will be an entire closed season on swans, cranes, pheasants, ptarmigan and blue grouse, ruffled grouse and spruce partridge

There will be a ten-day open season for prairie chicken from October 1 to 10, in the territory lying south of the North Saskatchewan river, and west of the Calgary-Edmonton line and the Calgary-Macleod line of the C P R and west of the line between [illegible] and 26 to the international [illegible]

Open season for Hungarian partridge south of the main line of the C P R across the province will be from September 16 to November 30 and in the territory north of the main line of the C P R from October [illegible] to November 30. There is [illegible] with respect to the [illegible] season

[illegible]

DOMINION ASSISTANCE CONTINUED FOR SHEEP INDUSTRY

Alberta's sheep breeders and sheep raisers are again to have the benefits of ram grading and [illegible] premium policies The Dominion government realizing the importance of a continuous policy in the production and use of good rams are providing [illegible] assistance so that farmers may buy good rams with confidence at a reasonable cost to the purchaser Hon Robert Weir, Dominion Minister of Agriculture, is anxious that purebred breeders of sheep should continue to improve the purebred flocks so that better quality rams and ewes may be produced. Furthermore, it is hoped that as a result of the use of graded rams on grade flocks throughout the province, the quality of market lambs will show a marked improvement

All purebred breeders will be given an opportunity to make application for the ram grading service and the premium which will be paid on graded rams will be from $4.00 to $10 00

Roman Empire

One thing seems to have emerged from all this centralization and subordination of the rights of the individual. It is the mitigation of class jealousies, but this is a spirit which does not at all depend on political organization

We turn from all this display and frenzy and saluting of emblems to the solid humdrum British Empire with its hereditary monachy and its parliamentary democracy, and to those who toy with the idea of a change or a totalitarian state we say with fervor, no thank you!

I Like Indians

cause of our arrogance and inability to understand, even without belief. Not until his feelings were soothed with an apology and explanation, did he relate why the horns of Muus, the great one, fall to the ground when winter comes Afterwards, he told me the story of Sik-uk, the skunk, he of evil smell; Sin-gosh, the weasel, and Ah-meek, the beaver, who fell from the skies when Manitou gave the forest life

It is with regret that we witness the passing of a generation of Red Men who take with them to the valley beyond the setting sun, the arts and crafts of other days and the beliefs and rituals of a creed that is not unstrange

Failings they have, to be sure, the present generation and the past. But when appraising their sins I weigh their virtues, remembering meanwhile the faults of our own race, large in number and oftimes vicious in comparison. Yes, I like Indians.

ADDITIONAL LOCALS

Mr. and Mrs. Johnstone Ferguson left this week for a trip to the East. Mrs. Ferguson will stop at Toronto and Mr. Ferguson will go as far as Boston.

Mrs. [illegible] Henley of Gresham, Ore., is visiting at the Vergil Moss home. She drove up with Mr. and Mrs. Clutterham.

On Tuesday afternoon at the home of Mrs. [illegible] a shower was held in honor of Miss Thelma Noland, bride elect of [illegible] week. Many of Thelma's [illegible] were there [illegible] and [illegible] the bride elect.

Fortunate

[illegible] a [illegible] the moment.

"Not in mine," said the former king. "And might I ask what is your line?"

"[illegible] I keep the crown and sceptre," was the reply.

"You're lucky," sighed the other, "I couldn't keep mine." —Ottawa Evening Citizen.

Rapid

A Scotsman and an American were sailing up the Firth of Forth. Coming to that wonderful structure, the Forth bridge, the American said to his friend: "Say, Sandy, what's that funny little bit of fretwork up there for?"

Sandy replied: "Ah dinna ken, it wasna there las' nicht."

CORNHILL COUNCIL MEET

(Continued from page one)

settlement be accepted by all concerned on the following basis. School levy made during the years 1928-29-30-31-32-33, be refunded to the Cooking Lake School District and that said refund payment be spread over a period of three, four or five years. Trustees of both school districts agreed to a settlement on above basis.

Moved by Councillor Holmberg, secretary be authorized to transfer from the Hastings Lake School District to Cooking Lake School District school levy made on South half of section 22-51-20-w4 during the years 1929 to 1933 both inclusive, as final settlement of dispute or difference between the said two school districts. Carried.

The meeting then adjourned for lunch.

The meeting resumed at 1.00 p.m. and [illegible] was moved by Councillor McSporran that 1935 Hay Lease be issued to Fredrick Arthur Rowland covering the N. E. qr. 7-51-20-w4, upon payment of two dollars.—Carried.

Mr. Hamilton representing the Adams Machinery Company, Limited, addressed the Council re road building with an Adams Elevating grader. Mr. Hamilton arranged with Council that they to be [illegible] August 29, and proceed to [illegible] Three Hills, Alta., for the purpose of seeing an Adams Elevating grader building roads in that locality.

Mr. A. J. Williams interviewed Council [illegible] of the interview [illegible] Mr. Williams will purchase, the S. W. 24-50-20-w4, subject to the approval of Department of Municipal Affairs.

Moved by Councillor Holmberg each councillor submit to secretary instructions as to procedure to be taken re collection of arrears of taxes on which the district has already filed a caveat as per list already handed to each councillor by secretary. Carried.

Moved by Councillor McSporran that 1935 Hay Lease be issued to J. Gladue covering the N. W. qr. sec. 6, and S. E. qr. 7-51-20-w4, upon Mr. Gladue paying to the secretary the sum of five dollars.—Carried.

Councillor Erickson moved that the district sell to the Baptist Union of Western Canada, Lots 15, 16, and 17, block 2 Kingman, subject to approval of Department of Municipal Affairs. Carried.

Moved by Reeve Glenn that district [illegible] to Adolph Weder, [illegible] Mr. W. [illegible] the S. E. qr. [illegible] of section [illegible] for balance of this calendar [illegible] that subject to certain [illegible] being complied with [illegible] the approval of Dept. of Municipal Affairs the above mentioned [illegible] to Mr. Weder.

A number of accounts were presented, passed and ordered paid.

Well Done

"Do you think cooking classes accomplish anything?"

"Sure I do. I haven't seen a tramp around the place since they started in."—Neumode.

LINDBROOK

Now the election is over, and the voice of the people has spoken and that's that, now if it will only stop raining so that we can get the hay up, most of it here won't be cut this year being under water, and then keep from freezing every fine night, the crops are frosted as it is, maybe we'll have time to listen to some more political diatribes from the parties aspiring to Dominion honors.

Congratulations to Mr. and Mrs. B. Trainor (nee Miss Evelyn Glenn) on the birth of a daughter at the home of the mother's aunt and uncle, Mr. and Mrs. Glenn of this district. Both baby and mother are doing fine.

Mr. Joe Ellis and son Norman, motored here from Vancouver. Mr. Ellis is staying at his brother Norman's place at Hastings Lake. We guess Joe is saying like the famous Mae West, "I'll be seeing you," or "Come up and see me some time."

Mr. and Mrs. W. Fontaine motored up to Brousseau and St. Paul with their son Alphonse, to see some famous doctor up there, with a view to seeing if he can benefit Alphonse. They found him and he talked quite hopefully.

Mr. and Mrs. Turner and daughter who have been staying at Mr. and Mrs. Hedley Burton's on a holiday returned home to Edmonton.

Mr. and Mrs. J. Bracegirdle and Mrs. F. Evans motored to Wainwright last week to visit the clan down there, and returning brought with them their two nieces, Miss Irene Lissimore and Miss Gladys Lissimore who are at present staying with them.

Mrs. E. W. Hooper went up with Mr. F. Anderson and children to visit Mrs. Anderson in Edmonton last Sunday and now Miss Doris and Master Stanley Anderson are her guests this week.

The parishioners and friends in Lindbrook wish to offer to the Rev. A. Wallis and Miss Thelma Noland of Tofield, their best wishes for long life, health, wealth and happiness on their forthcoming marriage. Both being well known to many people here.

Things we would like to know:

If peanut butter would be a good emergency ration?

Is summer a thing of the past? or did it ever exist, at least this year?

We hear that Mr. Vincent Glenn is home again. He has been away at Bonnyville, Alta for quite a long time.

What Price Education?

Joe worked as a checker in a munitions plant. He learned one day, by interviewing the laborers whose truckloads of shells he tallied, that they got $10 and time and a half overtime, while his wages were only $6 a day. He then interviewed the foreman of his floor, asking to be reduced from checker to laborer.

"Can't do it," replied the foreman testily. "Why, you're the only man among 'em who can read and write!"
